Well-informed opinion connects the departure for Switzerland of Reshid Pasha, some time Turkish Ambassador at Vienna and now Minister of Mines and Forests, with the peace negotiations. These are believed to have come to a deadlock. The Turks insist that their representative in Tripoli and Cyrenaica shall possess temporal powers. The Italians decline to concede him more than spiritual prerogatives. Baron Marschall von Bieberstein, whose sudden death has cast a gloom over the diplomatic world at Pera, might have given Turkey good counsel, even from London, at the present juncture. Save for the *Tanin*, the Turkish Press is silent concerning his fifteen years' tenure of office as German Ambassador at Constantinople, but Constantinople has not forgotten the service he rendered the capital and the Empire by procuring the dismissal of the infamous Fehim Pasha. Had it not been for the war between the Turkish friends and the Italian allies of Germany, the great Ambassador would have left Constantinople with an aureole of full success. The historian will recognise that the set-back of 1911 counted for little by comparison with the diplomatic successes of fourteen years.

Samos.

As your correspondent at Athens foretold, the Samians have risen, aided by Greek volunteers from Crete. The Turkish garrison got out of hand in the fighting that followed, and French and British naval brigades have landed at Vathy. Diplomacy has again been caught napping, and one wonders whether we are to be confronted with a "pocket edition" of the Cretan imbroglio.

THE EARTHQUAKE IN TURKEY.

Sir Edward Grey has forwarded to the Lord Mayor, who is raising a Mansion House Fund for the relief of the sufferers, some particulars supplied by the British Embassy in Constantinople of the damage done by the earthquake at the beginning of August. The district affected contained 109 villages, with a population of 106,618, inhabiting 24,612 houses. Of these houses 10,591 were wholly and 4,920 partially destroyed, and 1,115 persons were killed and 2,122 wounded. Families, comprising 29,082 individuals, are in sore distress. In addition to the inhabited dwellings, 31 Government buildings, 326 shops, 37 mosques, 11 churches, and 32 schools were destroyed. Renewed shocks of earthquake were felt quite recently at Therapia and on the European shores of the Marmora, causing considerable damage and a panic in many villages. The chief requirement of the Relief Committees is building material to give shelter to the afflicted people. We regret to learn that the Mansion House Fund amounts to less than £1,500 at the present time, and that it is proposed to close it at the end of this week.

We are informed by the treasurer of the Greek Church, Manchester, that the sum of £165 in cash and a large quantity of ready-made clothing for adults and children have been sent to the Greek Patriarch in Constantinople by the wardens of the Greek Church in Manchester for the relief of the sufferers through the recent earthquakes in the neighbourhood of the Sea of Marmora. This collection was the result of spontaneous donations from members of the Greek community and many of their business friends.

SALONIKA LETTER.

(From Our Own Correspondent.)

Salonika, September 28.

Albanian Affairs.

As all the Turkish world knows, Nasr Edin Hoja, of happy memory, had a donkey which, by reason of its ownership, has become almost as famous as its worthy master. One morning a neighbour who had to go to a distant village came to the hoja and begged for the loan of the donkey, but was told by the latter that having already lent it to someone else he greatly regretted his inability to do so. At that moment the donkey brayed in the stables, whereupon the neighbour reproachfully asked the hoja why he had told him a story that was manifestly untrue. Deliberately stroking his beard, and looking gravely at his questioner, the hoja exclaimed in a hurt tone of voice, "Allah! Allah! Are you going to believe me—or my donkey?" This anecdote is brought to mind by the account of an interview between the brother, who has just passed through here, of a prominent Albanian chief and the editor of a local paper. According to this traveller the situation in Albania could hardly be better, and that province has now finished for a very long time to come with the nightmare of internal troubles, calm having been almost entirely re-established throughout. The few acts of banditism, exaggerated by the Press, which are being committed here and there are only isolated cases without any importance, and they will soon be stopped. The new officials, all scrupulously chosen, will, from the highest to the lowest, work sincerely with the people for the rapid raising of this unfortunate province which, stagnating in ignorance, has such great need of light and science. The chief causes of the late rising and advance on Uskub were the irregularities of the last elections, the partiality of the official classes under all circumstances, etc.; and had the central Government continued to play fast and loose with them, the clans would have come on to Salonika, and in case of need would have marched even to Constantinople. However, all that is past, and the recent rising may be looked upon as a final upheaval; while Albania, completely satisfied, will now work in calm and peace to develop itself, to progress, and to enter into the way of civilisation. This is the legend on the reverse of the medal, and is eminently satisfactory; but what of the obverse?

From other sources we learn that at Ipek the military authorities are hastily constructing defence works outside the town against an eventual attack by Albanians from the side of Prizrend or Jakova; that communication with the Scutari vilayet and North Albania being still interrupted the authorities are in ignorance as to the situation in those districts, and that troops are being continually sent there from Monastir and Uskub. As for the Mallisori, it is well known that they are in full revolt, besieging Scutari; that there is continual fighting round that town and Touzi, with the movement spreading to Gusinje; that in Prizrend an attack by Albanians is feared with the object of raiding the stores of arms and munitions; and that a state of siege is being extended throughout those regions. Looking at the one side of the medal and then at the other, is it surprising that our first feeling of satisfaction is damped—that we find ourselves in the position of the neighbour when he was asked to say whether he believed the hoja or the donkey?

War Material for Servia.

A great deal of war material comes through this port for Servia, and hitherto our Government has given every facility for its prompt landing and dispatch, and cynically so when the Servians, some four years ago, were loudly declaring their determination to die to the last man rather than allow Austria to absorb Bosnia and Herzegovina. Now, however, our authorities are holding up three different lots: here, at Uskub, and at Verisovitch, giving rise to much diplomatic wrath in Servia and to strong protests by its Minister in Constantinople. Naturally, this sudden reversal of policy is regarded as a grave sign of the times, and the talk of war has become louder in consequence. And this is not lessened by the present strengthening of the strategical position round Adrianople, and by the military manœuvres, which it is now arranged are to begin there in about ten days, when some 50,000 men are to be brought together, which move is, of course, looked upon as a warning to Bulgaria.

To add fuel to the smouldering flames all around, the King of Montenegro is said to have sent a telegram to the Macedonian Revolutionary Committee in Sofia, in reply to one from it with congratulations and sympathy for his attitude towards Turkey, in which he expressed his hopes for the future and his wishes for the success of the revolutionary movement. One can hardly believe this last story, as it seems altogether improbable that he could have so far forgotten what is due to an officially friendly State as to publicly send any such message; but such rumours, wherever concocted, do much harm, and create a very natural soreness on the part of those against whom they are directed. The situation all round is strained quite enough, very little being now needed to "let loose the dogs of war." Even our late Vali, Hussein Kiazim Bey, is evidently worked up to war-fever heat; in a preface to a treatise recently written in Turkish on the advantages of personal initiative, while blaming the policy of the present Cabinet, which he considers is leading to our ruin, he says it is necessary to bring aggression to book, and he can discover no other means than by crushing that Balkan State which most of all incites to disorder and dissension in this country; and he adds that, having entered Europe by force of arms, the Osmanlis must there maintain themselves by the same. He also tells how, at one time, together with his friend M. Chopoff, the Bulgarian Consul-General in this town, he had zealously nursed his hope and striven for an understanding with Bulgaria, and even with the other Balkan States, but his views are altogether changed, and he now thinks that by war alone can Turkish rule exist in Macedonia.

THE BALKAN SITUATION.

Very little news which had not already appeared in the daily Press was forthcoming at the various Legations concerned in the Balkan crisis yesterday. From inquiries at the Servian Legation we gather that the points which the Servians themselves most emphasise are that neither in the Mürzteg Programme nor in the one which followed it were those territories known as Old Servia included. The reforms which the Reval Programme seemed to promise were interrupted by the Turkish revolution of 1908. On the granting of the Constitution the questions of important reforms were for the time being shelved, both the Great Powers and those countries intimately concerned agreeing to "give Turkey a chance." Since that time it would appear that absolutely nothing has been done, and the Servians consider that the existing state is bordering on anarchy, and that the situation has resolved itself into two questions: Are the Turks of themselves incapable of reform, and have or have not the Great Powers the means of enforcing them? It is felt that something definite in the way of securing autonomy for Old Servia must be done. The means utilised are immaterial provided that the end is attained. Such appears to be the general attitude of Servia, but nothing definite regarding the possibilities of war was obtainable.

At the Turkish Embassy we elicited the information that there had been absolutely no change of material importance in the situation since Wednesday. According to Reuter's Agency no information regarding the possible attitude of Roumania in the event of war is yet to be obtained. This country is, however, not as directly involved in the present crisis as the immediate neighbours of Turkey and cannot rightly be regarded as a Balkan State.

NOTES FROM SYRIA.

(From Our Own Correspondent.)

Beyrout, September 14.

Hazem Bey Removed.

After a prolonged resistance, Hazem Bey has gone the way of other Valis supposed to be the creatures of the Committee. Syria, which is a stronghold of "Ententisme," was intolerant of any high functionaries connected with the Unionists; and although Hazem Bey has not given any proof of belonging to the extremist section of the Committee, yet, fearing the possibility of interference with the forthcoming elections, or at least the indirect influence of his official prestige, the Ententiste leaders have been constantly sending telegrams to the capital asking for his dismissal. The Government, however, who could not be oblivious of his past services, nor overlook his personal qualities of integrity and enlightened Liberalism, felt, no doubt, that such an extreme measure would not be justified, and therefore wisely adopted the safe course of a compromise. They have offered Hazem Bey the Vilayet of Aleppo. It seems, however, that he suspected in the transfer the prelude of an eventual dismissal; and it is said that, while refusing the offer, he pleaded that the services which he had rendered in this vilayet should entitle him to the retention of his post. The Ministerial order, however, could not be revoked, and Hazem Bey had to leave on Saturday for Constantinople.

The new Vali, Edhem Bey, arrived on Monday, the 9th inst., having come overland, evidently to avoid the Italian warships. In crossing the Mereijat quarantine station, midway between Damascus and Beyrout, he was asked by the Lebanese sanitary authorities to comply with the regulations, but he refused on the strength of a Ministerial order urging him to proceed to Beyrout with the utmost possible haste and of the fact that he came direct from Aleppo by special car without communicating with any place supposed to be contaminated. Edhem Bey is not a stranger to Beyrout. He came here as Vali at the beginning of the constitutional régime, but left soon after, having, it is said, found it intolerable to be a mere puppet in the hands of a secret Committee. Edhem Bey is a man of liberal education, and his extensive travels in the West have further widened the horizon of his views and thoughts.

NOTES FROM SMYRNA.

(From Our Own Correspondent.)

Smyrna, September 25.

Italian Fleet off Smyrna.

On Sunday morning the inhabitants of Smyrna woke up to hear of the sudden appearance of the Italian fleet at the entrance of the Gulf. The news was first brought by a British cargo steamer, which had been stopped and searched by the Italians and then allowed to go on its way. The small local steamer that goes regularly to Vourla left as usual on Sunday morning, but returned at midday owing to the naval pilot boat having ceased to work on the appearance of the enemy's ships. The Austrian Lloyd steamer due to arrive at 10 a.m. did not appear at its usual time, and it was thought that she must have been stopped by the Italian ships. She arrived a few hours late, having been first stopped on Saturday night off Samos by a gunboat, and boarded by a single officer, who examined the manifest. The ship was then again stopped at the entrance to the Gulf, where some three large ships and six torpedo boats were seen. Since Sunday most of the ships coming into Smyrna have been searched thoroughly, but afterwards released without any trouble.

There is no blockade in force, and it is thought that the Italians were simply making a demonstration, and at the same time preventing the Turkish authorities from sending troops to Samos to put down the rising in that island. To-day, the 25th, there are no signs of any Italian ships, but it is thought that they are still cruising round.

Cretans Land at Samos.

On Friday about 300 Cretans landed at a small place called Marathocambo, with a view to stirring up the Samiotes against the Turkish soldiers stationed on the island. It is said that they were assisted by the searchlights of an Italian warship being thrown on the landing place. This news is not very likely, as the Powers have quite recently shown their anxiety to prevent this landing by despatching a British and a French warship to Samos. Joined by a number of Samiotes, they marched against the Turkish garrison at Carlovassi, but the Turks, to the number of 120, succeeded in reaching the mountains. The principal demand of the insurgents is the withdrawal of the Turkish troops from the island, a long-standing grievance of the people of Samos.

NOTES FROM JERUSALEM.

(From an Occasional Correspondent.)

Jerusalem, September 22.

Insecurity of Property.

The insecurity of property of all sorts in Palestine and Syria is becoming increasingly evident. Thefts, burglaries, and highway robberies are so common that there seem to be few residents in the land of any standing who have not had some personal experience. One visitor to Jerusalem recently had his trunk cut open on the Russian steamer between Beyrout and Jaffa and had a quantity of jewellery extracted. Another, a lady long resident here, had her trunk opened when it was among the registered luggage in the luggage van on the French line between Baalbek and Damascus, and had a number of dresses removed, and many can tell of burglaries when the thieves seemed to be quite reckless. When interfered with a thief thinks nothing of using his revolver or his knife with intent to kill. To him life is cheap and any punishment very unlikely. For all this there seems to be no kind of redress. Even European companies, metaphorically speaking, shrug their shoulders and say, "What can *we* do?" Whereas the local officials, unless the injured person captures the thief or assassin, and himself produces irrefragible evidence against him, do absolutely nothing at all. It is not in distant and outlying parts that these things occur, but in the midst of large cities like Jerusalem and on high roads like the Jerusalem-Jaffa and Jerusalem-Jericho roads.

The Malaria Problem.

The malarial and other fevers which play such terrible havoc among the poorer inhabitants of the city, and especially among the Jews, have attracted attention in influential quarters in Germany, and Professor Mühlens, of Hamburg, has been sent out with three assistants, and is now engaged in making an exhaustive inquiry into the subject. Quite independently, too, an old pupil of Professor Mühlens, Dr. Brunn, has been sent by Mr. Nathan Strauss, of New York, to conduct a similar inquiry with regard to the Jewish institutions and colonies in Palestine. Of the seriousness of the malarial poisoning abundant evidence has been found in the many hundreds of specimens of blood which have been examined, but whether it will be possible for any widespread remedial measures to be adopted is very doubtful. Such measures require an organised public health department furnished with very considerable powers of enforcing the regulations they consider necessary. In Jerusalem, full as it is of the representatives of many nations—all under the privileges of the Capitulations—it is difficult to see how any regulations, disagreeable as they would necessarily be to the individual, could be enforced. But without these the hope of improvement is vain. With regard to Dr. Brunn's special mission, as it concerns the agricultural colonies which are under directors, there ought to be more hope, for undoubtedly in some, if not in all, of these the strict observance of a few simple rules—avoidance of exposure to infection from mosquitoes, isolation of the sick as causes of infection, and the taking of quinine as a prophylactic—would eliminate this scourge. Such regulations it should be possible for the managers of the colonies to enforce.

LETTRE D'ATHENES.

(De Notre Correspondant Particulier.)

Athenes, le 30 septembre.

La question des reformes.

La tournure que vient de prendre ces derniers jours la situation diplomatique de la question des réformes a produit ici un effet rassurant et inspire un peu plus d'optimisme aux cercles politiques d'Athènes.

Les réformes que la Turquie, se voyant mise au pied du mur, s'est offert au dernier moment, d'introduire dans toutes les provinces européennes, réformes qui n'étaient en substance que celles octroyées à l'Albanie, n'ont inspiré ici aucune confiance. Il est évident que, se voyant sous la triple pression exercée par la proposition Berchtold, par l'intervention de la Russie et de l'Angleterre et par l'attitude menaçante des états des Balcans, la Turquie a cherché à se tirer d'embarras en reconnaissant ou plutôt en faisant semblant de reconnaître la nécessité des réformes. Mais, instruit par les tristes expériences du passé, on sait bien ici quel cas on doit faire de ses promesses destinées à jeter de la poudre aux yeux afin de temporiser.

Par contre, l'intervention des puissances en vue d'imposer à la Turquie l'application de l'article 23 du traité de Berlin a été accueillie à Athènes avec une vive satisfaction. Le fait de leur intervention effective offrirait, au surplus, les garanties demandées par les états des Balcans, sans lesquelles toute réforme d'initiative turque ne saurait inspirer la moindre confiance et serait condamnée d'avance à la stérilité. Car il faut croire qu'après être intervenues, les puissances sauront exiger non seulement du gouvernement ottoman actuel, mais aussi de ceux qui lui succéderont, l'application et le fonctionnement régulier et permanent des réformes qu'elles auront imposées; et cela, soit d'après les suggestions des chefs religieux des nationalités respectives, soit de toute autre façon, mais toujours sous la constante surveillance de leurs ambassades.

Seules de telles réformes seraient capables de rassurer d'une façon définitive les états balcaniques sur le sort de leurs frères irrédimés. Or, si elle devaient échouer, personne n'oserait affirmer que la paix ne court aucun danger. Je crois même pouvoir ajouter qu'il ne faudrait pas s'étonner si un beau jour on se trouvait devant une mobilisation simultanée de tous les états des Balcans, y compris le Monténégro. Les manœuvres annoncées par la Turquie hâteront peut-être cet événement. En attendant les préparatifs se poursuivent ici avec la même activité croissante. Entre autres choses on a décidé la prompte réfection de trois anciens croiseurs dont les chaudières et les appareils accessoires de l'artillerie ont besoin d'être remplacés. Une classe de la réserve qui venait d'être licenciée a été rappelée sous les drapeaux, ainsi que les exemptés des trois autres classes, y compris les officiers. En même temps on a pris toutes les mesures nécessaires pour que toutes les réserves puissent, le cas échéant, être mobilisées dans les huit jours.

La question cretoise.

A l'occasion de la prochaine ouverture du parlement hellénique la question crétoise revient encore à l'ordre du jour. Devant la répugnance manifestée par les puissances à accorder l'union, les Crétois déclarent qu'ils se seraient contentés d'un commissaire royal qui, nommé par le roi de Grèce, gouvernerait l'île en son nom. Cette demande avait été soumise l'année dernière aux puissances protectrices par le gouvernement crétois, mais elle était restée sans réponse. Maintenant cette question, ayant été agitée de nouveau, fait l'objet d'un échange de vues entre toutes les chancelleries européennes avec les autres questions qui se trouvent sur le tapis. Il paraît qu'elle rencontre une vive opposition de la part de la Triple Alliance. Pourtant, si cette proposition était acceptée, elle détournerait les Crétois de leurs tendances unionistes et assurerait aussi la tranquillité à ces deux pays. Mais si elle est écartée, tous les indices portent à croire qu'on devra tôt ou tard revenir temporairement au régime du haut commissaire. Quelques politiciens crétois croient que, dans ce cas, la personne qui serait vraisemblablement appelée à remplir cette charge serait le prince André qui, grâce à son affabilité et sa modestie, serait mieux agréé des Crétois.

En attendant, les Crétois enverront encore leurs députés à la chambre hellénique qui s'ouvre le 1 octobre et quarante de ces députés sont déjà à Athènes. M. Mavromichalis, chef d'un parti de l'opposition, a déclaré que, s'il réussit à venir au pouvoir le 1 octobre, il n'hésitera pas à admettre au parlement les députés crétois. Ces encouragements les enhardissent et rendent la situation du gouvernement assez difficile devant l'opinion publique.

Les evenements de Samos.

Malgré les mesures prises par les puissances pour empêcher ce mouvement, l'insurrection organisée depuis un mois en Crète, en vue d'expulser de Samos les troupes turques, n'a pas moins éclaté la semaine dernière. Une bande d'hommes armés de fusils Gras et Mauser dont on porte le nombre de soixante à quatre-vingts, arrivée d'Icaria par on ne sait trop quel bateau et ayant à sa tête M. Sofoulis, ancien chef du gouvernement samien, a débarqué jeudi dernier à l'aube à Karlovassi. La bande composée de Grecs de toutes les îles égéennes était commandée par cinq ou six chefs crétois des plus expérimentés. Deux cents Samiens armés sont venus se joindre à eux dès leur arrivée. Les troupes turques s'étant retirées à Vathy, les insurgés s'en approchèrent jusqu'à une heure de distance. On affirme qu'un engagement a eu lieu, au cours duquel il y a eu quelques blessés.

Lundi dernier le commandant des troupes turques ayant envoyé à la côte soixante soldats pour protéger le débarquement des renforts qu'il attendait, les insurgés ont attaqué le détachement et l'ont mis en fuite. Les Turcs, exaspérés de cet échec, ont ouvert un feu nourri sur la ville et contre un bateau postal sous pavillon grec qui se trouvait en ce moment mouillé dans le port. Parmi les passagers du bateau se trouvait aussi le consul-général de Grèce à Alexandrie, qui revenait de Kos ramenant la famille de sa sœur. Le consul-général de Grèce à Samos, qui était monté à bord pour rendre visite à son collègue, s'empressa de descendre à terre, mais lorsqu'il fut entré dans la barque, il devint le point de mire des balles turques et fut sauvé par miracle. Le gouvernement grec a chargé son ministre à Constantinople de demander des explications et d'exiger de la Turquie qu'elle exprime ses regrets et qu'elle paye des dommages-intérêts.

Les dernières nouvelles de Samos portent que les insurgés s'élèvent à 1.200 et qu'on envoie dans les îles voisines les femmes et les enfants. Il est évident que les Samiens s'efforceront de faire réussir leur coup-de-main avant la conclusion de la paix et pendant que la flotte turque est encore immobilisée.

Nouvelles diverses.

Un incident militaire s'est produit la semaine dernière, qui a mis un instant dans une situation difficile la mission française commandée par le général Eydoux. Le colonel Genin, en prenant la direction de l'école militaire des "Evelpides" et de celle des sous-officiers, aurait dit dans une allocution adressée aux professeurs des dites écoles que les résultats de la seconde ont été moins satisfaisants. Les officiers sortis de cette école, se croyant offensés par ces propos, ont demandé la révocation du colonel Genin, menaçant en cas de refus de donner leur démission. L'agitation a duré quatre ou cinq jours, mais des explications données par le colonel Genin au général Eydoux ont mis fin à ce regrettable incident.

Un congrès d'agriculture a été tenu à Volo. Par leurs conclusions les congressistes expriment le vœu d'améliorer en général les conditions des agriculteurs, de constituer par l'expropriation forcée des grandes métairies, leurs cultivateurs actuels en petits propriétaires et de prendre en attendant des mesures législatives pour améliorer leurs rapports avec les propriétaires.

"The Comrade."

The leading weekly journal of India, conducted generally on the lines of the London **Spectator, Nation,** and **Saturday Review,** dealing with politics, education, literature and social questions of India, and the affairs of Eastern countries and Moslem governments, with great ability and independence. An excellent medium of advertisement on account of its large circulation among a select circle of readers in all provinces of India.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, September 25.

Initial Ceremony of the Holy Carpet.

The first of the ceremonies in connection with the despatch of the Holy Carpet to Mecca took place this morning on the Mohammed Ali Square. As usual, all Government offices were closed in honour of the occasion. In the absence of H.H. the Khedive, who is at present in Switzerland, the proceedings were presided over by H.E. Mohamed Pasha Said. The troops at present in garrison paraded and rendered the customary honours to the Carpet on its way to its temporary resting place in the Saidna Husseini Mosque.

Ministerial Changes.

H.E. Mohammed Pasha Said, the Prime Minister, returned on Monday from Europe, where he has been spending a well-earned holiday. The s.s. "Helouan," by which he arrived, was met by the Ministers and senior officials. Said Pasha, who appeared to be in the best of health, had met the Khedive at Trieste, and had had two long interviews with him before his departure. He will now take up the Regency, which has been carried on temporarily by Hussein Rushdi Pasha.

The native Press is full of rumours of forthcoming Ministerial changes. These *on dits* always crop up at this time in the year and, usually, little attention is paid to them. But, as a section of the European Press is giving credence to this rumour of a reconstruction, it would appear that there is more substance in it than usual. From what can be gathered, however, in semi-official circles, the utmost extent of this reconstruction, if it comes to anything, may be the creation of a Ministry of Agriculture and Mines, to which would be attached the Government Lands Department.

At present there exist separate Departments of Agriculture and Mines, the former, with a Director-General, being attached to the Ministry of Public Works, and the latter, with a Chief Inspector, to the Ministry of Finance, which also controls the Government Lands Department. At the close of the present year it is expected that the State Domains Loan, which was contracted in 1878, will have been completely paid off, and that a balance of £60,000 profit on the year's working will revert to the Egyptian Treasury. In addition, the State will automatically acquire possession of a very considerable area of land which remains over from the original estates mortgaged to the service of the Loan. It is thought that advantage may be taken of this important addition to the Government Lands, and of the fact that agricultural affairs are developing so enormously, to create the Ministry of Agriculture of which there has been so much talk of late.

With regard to the changes in the Ministry of Finance, the general opinion is that if, as appears most probable, Lord Edward Cecil obtains promotion to the Adviserships, Hunter Pasha, the Director-General of Coastguards, will succeed him as Under-Secretary of State. Another move in the higher Government personnel is foreshadowed by the unofficial announcement of the resignation of Mr. Dupuis, the Adviser to the Public Works Department. It is considered that his successor will be Mr. Murdoch Macdonald, whose appointment to the Under-Secretaryship a little while back created such a sensation, and who has been a signal success as an administrator. None of these innovations or moves will receive confirmation until after the return of Lord Kitchener, who is expected back early next month. Whilst the foregoing reflects the opinion held in semi-official circles, it is, of course, quite possible that the British Agent may, in the "general post," which it is understood he contemplates making in the Ministries of Finance and the Interior, come to other but no less excellent decisions.

The Seditious Posters.

The inquiry still continues *in camera*, and only the most meagre details are leaking out. Blattner Bey, who represented the Egyptian Government at Constantinople when the Turkish authorities recently searched the domiciles of the Egyptians resident there and made the arrests, has returned to Alexandria, and a further large batch of documents has been received from the Porte and is now being examined by the Parquet. It has been practically decided to transfer the inquiry to Cairo, as the Procureur-General cannot afford the time to keep on running down to Alexandria. It is hoped that sufficient progress will have been made for the case to go before the October Assizes.

The Cotton Halakas.

Work on the organisation of the cotton halakas is proceeding apace. In many districts these institutions, which it is hoped will prove to be of the greatest benefit to the fellaheen cultivators, are being utilised already, and the wisdom of having everything in readiness this month is now evident, for the advanced state of the cotton crop has enabled picking to be started at an unusually early date, and the halakas have profited therefrom. There is, of course, a great deal of opposition from the side of the merchants—not the larger firms, who have never been accused of defrauding the small cultivator, but the lesser fry and the middlemen, whose profits were mainly derived from the extra weight they obtained and the deceptions in the matter of ruling prices which they practised. The success of the halakas will largely depend on the influence which these gentry are able to exert on their erstwhile customers and the means which the authorities adopt to counteract that influence. Considering that at the back of these institutions there stand the Provincial Councils and the entire local administration, with the Mudir at the head, their success should not be long in question. But at the same time, one must not overlook the fact that the Egyptian fellah is the essence of conservatism.

The Cantonal Tribunals.

On the other hand, the authorities appear to be very satisfied with the working of that other great popular reform, the Cantonal Tribunals. At the outset these village courts were only instituted in certain districts, but little by little the area has been extended, and now the Ministry of Justice is credited with the intention of creating similar courts in the provinces of Giza, Assiut, Minia, and Girga.

Administrative Causes Celebres.

In a recent letter I mentioned that there was a prospect of our having one or two administrative *causes célèbres* in the law courts this autumn. The coinage scandal in the Prisons Department is one of the affairs about which I hinted. A complete, though small, apparatus for making counterfeit coins was discovered in the possession of a convict in Tourah Prison, and an inquiry was opened. It is now said that this illicit proceeding was not confined to one prison, but was systematically carried on in many others. The affair is still under investigation, and from what I have been able to gather it is very much more serious than was at first anticipated. One of the other scandals is in connection with the Antiquities Department. That is also the subject of an extensive inquiry, and no details have so far been allowed to leak out.

ALLIANCE

ASSURANCE COMPANY, LIMITED.

Head Office: BARTHOLOMEW LANE, LONDON, E.C.

Assets Exceed £23,000,000

Chairman: The Right Hon. LORD ROTHSCHILD, G.C.V.O.

Among the classes of Insurance Business transacted by the Company are the following:—

(1) LIFE INSURANCE, with and without Profits, with special provisions for the payment of Estate Duties.
(2) FIRE INSURANCE of every description.
(3) INSURANCES TO COVER LOSS OF RENT, INTEREST AND PROFIT consequent upon Fire damage to property.
(4) MARINE INSURANCE.
(5) BURGLARY, THEFT, and PLATE GLASS INSURANCE.
(6) ACCIDENT, including Personal Accident, Motor Car and Employers' Liability Insurance.

Fidelity Guarantee and Sinking Fund Policies are also granted.
Applications for Agencies are entertained, and Prospectuses with other papers may be had on written or personal application.

NOTES FROM THE SUDAN.

(From Our Own Correspondent.)

Khartoum, September 21.

Recent Arrivals.

Now that the rains have left us till next year the heat is increasing, and we have had over 107 deg. once again. But in spite of this some of the ladies are beginning to return. Mr. and Mrs. Smith, Dr. and Mrs. McGill, all of the American Presbyterian Mission, and Miss Tristram and Miss Jackson, of the Church Missionary Society, have come up this week, and we are all beginning to realise that we must mend our bachelor manners for the winter.

Major Palmer, Financial Secretary to the Egyptian Army, has arrived from Cairo, and is staying with the Adjutant-General, Colonel Asser, who is also acting as Governor-General. Colonel Asser has just returned from a visit of inspection to Wad Medani, in the course of which he examined the progress of the experimental farm at Taiba, which, as most of your readers know, is furnishing important data with regard to the growing of cotton in the Sudan.

Major Moir, R.E., who has been appointed Director of Posts and Telegraphs in succession to Major Turner, is expected in Khartoum within the next few days. Major Pearson, the head of the Survey Department, has recently returned from a surveying expedition in the region of the Pibor river, in the course of which he has gained a great deal of new information about that hitherto unexplored river system.

Crops and the Weather.

The flood reports from the cotton districts of Tokar, near Suakin, are very favourable, and if only the strong winds prevalent lately will abate the crop should do well. There will also be a large sowing of dhura in that region this year.

It may interest your readers to know that during a recent hailstorm to the west of Sinkar, in the Red Sea Hills, the hailstones were so large that a large number of cattle and sheep exposed to them were killed.

Hashish Smuggling.

A very ingenious attempt to smuggle hashish into the country has been discovered by the Customs authorities at Port Sudan. The ingenuity of the perpetrators was worthy of a better cause than the importation of this pernicious drug. Four iron cylinders stated to contain carbonic acid gas were consigned by an Alexandria firm from Trieste to Assuan, viâ Port Sudan. These cylinders lay unclaimed for some time, and the Customs authorities, becoming suspicious, opened one, and instead of gas found hashish. The cylinders had been very cunningly lined, and a large haul of 41 kilos was made.

DEVELOPMENT OF THE SUDAN.

Prior to his departure for the Sudan, Sir Reginald Wingate was interviewed by Mr. Percy F. Martin, F.R.G.S., and the results of the interview were published in Tuesday's *Pall Mall Gazette*. They make most interesting reading, and bear eloquent testimony to the wonderful progress made by the Sudan under the Anglo-Egyptian condominium.

Railways and Roads.

"Year by year," said Sir Reginald, "the country is being opened up by means of railways, and the commercial and strategical importance of the Sudan are increasing proportionately. We may claim, I think, that the construction of our railways has been financially justified in every way, more especially by the fact that the revenues earned show a not inconsiderable profit.

"How much have we expended upon railways? In the Budget you will see that in 1912 were expended £1,116,864 under the heading of 'Departments and Services,' as against the sum of £982,000 in 1911. The increased expenditure which occurs is distributed over different departments, the principal amount going to the provision of further railway lines or to improvements in the existing ones, and for new steamers. The advantages derived by the agricultural interests by providing these quick and cheap means of transport are incalculable. This became apparent when the Government was first approached by a British syndicate some two or three years ago with a view to the construction of a barrage across the Blue Nile in the neighbourhood of Sennar, and the undertaking of a canalisation scheme for providing water for the irrigation of some 500,000 acres suitable for cotton-growing and cereals.

"The receipts from the railways show an appreciable surplus. Trade has increased during the past year no less than 41 per cent. River transport, except perhaps at Khartoum, where the railway is now a competitor, has also increased. So soon as our funds permit we shall undertake a good deal of further road-making, but lack of money has prevented any very comprehensive scheme of roadmaking as yet this year. Nevertheless, some 1,050 miles of new roads were cut in 1911.

"As to our posts and telegraphs, these have shown an advance in revenue of over 10 per cent. upon 1910. Public works have progressed, and several schemes, notably for water supply at Port Sudan, are at present being considered."

Blue Nile Irrigation.

With regard to a new irrigation project, Sir Reginald said:—

"The idea is to build a reservoir, at a cost of between £500,000 and £750,000 sterling, which would comprise a barrage across the White Nile—somewhere near its junction with the Blue Nile.

"By this means the immense tracts of land on the Kordofan side of the White Nile would be brought under flood cultivation, while it would serve to bring under control the Nile's flood supplies during September, October, and November. With regard to the Gezira development and two other schemes, the cost of the works to irrigate some 500,000 feddans would involve an outlay of about £3,000,000; these, when in order and in full operation, should serve to irrigate, from the Blue Nile, a further 200,000 feddans at a cost of about £2 per feddan. Then the cultivated area on the Khor Banaka could be increased about 50 per cent. to 60,000 feddans; this would cost another £80,000. A further 200,000 feddans should be brought into the area at Kassala by means of artificial irrigation works established upon the River Gash; in Dongola some 150,000 feddans could be cultivated, in spite of the rapid rise and fall of the flood, which makes irrigation rather difficult."

NOTES FROM ROUMANIA.

(From Our Own Correspondent.)

Bucharest, September 28.

The Serious Floods.

For six days now torrential rains have been falling steadily all over the country. Rivers have overflowed their banks and many villages are flooded and entirely cut off from all food supplies. The inhabitants are thus in a pitiable state and in some cases not only without sustenance, but also without shelter. The damage to the vines is incalculable, whilst the state of the ground does not allow of the continuance of ploughing for sowing the spring crops of wheat, barley, etc. Thus the whole of next year's wheat crop is seriously threatened, and so dark is the outlook that the banks are commencing to refuse to grant credits against next year's crops, which has heretofore been the regular custom. Much maize has yet to be collected, and as it stands in the torrents of rain it also is deteriorating. Besides, the roads being rivers of liquid mud, in which cart wheels sink to the depth of a foot, transport is rendered almost impossible.

Army Manœuvres.

The preliminary cavalry manœuvres, which were proceeding on a large scale in the neighbourhood of Braila, have had to be brought to a sudden close, the authorities fearing sickness among both troopers and chargers. But happily in the Dobrugea the rainfall has been comparatively small, and the royal manœuvres will in no way be affected as long as the "deluge" does not reach that quarter also.

Aviation will be represented at the manœuvres by ten flying machines. The League for National Flying has put at the disposition of the army five flying machines, of which two are Maurice Farmans and two Blériots, lately purchased in France. Prince Bibesco, the generous founder of this league, will have the direction of the above aerial squadron, which has been temporarily attached to the army, and which will be piloted by military airmen.

The military authorities leave on September 29 for Medgidie, the headquarters in the Dobrugea, and the actual manœuvres commence on October 1 and continue till October 8.

NOTES FROM SERVIA.

(From Our Own Correspondent.)

Belgrade, September 28.

Servia and Bulgaria.

Now that M. Pashitch is at the head of this Government there is more likelihood than before of Servia's forming an entente or alliance with Bulgaria, and the visit, a few days ago, of M. Danef, President of the Sobranje and former Bulgarian Prime Minister, is indicative of weighty matters being discussed by the two Governments. According to a Servian newspaper, M. Pashitch last Saturday evening left Belgrade by train, proceeding to Sofia, and ordered a special carriage for the accommodation of Ministers. It turned out that he went to meet important official Bulgarians on the way hither from Sofia, and then accompanied them to Belgrade, arriving here early the next morning. One of these distinguished visitors was M. Danef, who remained in this city one day only, spending his time in conferences with the Servian Cabinet Ministers; but so secret was the visit kept that it was only through the indiscretion of the Bulgarian Press that the Servian Press became aware of the fact.

Many Servians still believe firmly in the probability of an early outbreak of hostilities. The imposing movements of Austro-Hungarian forces near the Servian frontier and in Bosnia, the manœuvres and concentration of Turkish troops on the Bulgarian frontier, the undiminished war fever in Bulgaria, the visit of M. Danef, all tend to keep alive in the public mind the expectation of an approaching war. This belief was nursed, too, by the incident at Samos and the firing by Turks on a Greek ship, and when at first news reached here of the alarming rumour in Vienna that Bulgaria had already declared war against Turkey the anticipations of Servia becoming involved also became a certainty.

It is known here that immediately after the visit of M. Danef to Belgrade there was common talk at Sofia of the intention of Bulgaria to present an ultimatum to Turkey, and the same is precisely what had been previously spoken of at Belgrade concerning the intention of the Servian Government. But it can be positively asserted that in Servia there is now no question of any such ultimatum being presented, and the peaceful assurances of M. Gueschoff, Bulgarian Prime Minister, point to the fact that Bulgaria's policy does not differ on this point. Yet the persistency of this ultimatum rumour in both these Balkan States causes one to be rather suspicious, and as generally there is no smoke without fire, we cannot say what once may have been the intention of both Bulgaria and Servia in this respect.

The Prime Minister's Statements.

What are the assurances given us in Servia? M. Pashitch has this week been twice interviewed, and the following are his words. To the proprietor and editor of a Servian paper he said:—"It is singular that the majority of the people of this country think that there is now a greater probability of our declaring war than there was at the time of the annexation of Bosnia and Herzegovina, but I may inform you that, as matters stand at present, there is no such danger." At the other interview the Prime Minister said:—"We take every possible care to avoid causing uneasiness in the public mind, but of course in face of the actual serious situation we are bound to take all eventualities into consideration, and assure ourselves both by diplomatic and military steps that Servia should not be surprised by unexpected events."

Large purchases of meal, flour, hay, etc., have been lately made and are being stored, but this fact and the calling out of all men of the reserves, the throwing up of earthworks near Posherevatz along the Danube facing Hungary, and the fortifying of Semendria, also on the Danube, may be calmly looked upon as simply precautionary measures.

The circumstances attending the recent arrest of supposed Austro-Hungarian spies at Semendria are remarkable. A Custom House sentinel perceived the approach of a small rowing boat containing an Austrian lieutenant, a corporal, and four privates, all in uniform and fully armed. They landed, and the Austrian officer, it is asserted, coolly took out his notebook and commenced to make a sketch of the fortifications and works, when the Servian sentinel, taking cover behind a tree, levelled his gun and called out to the Austrian soldiers to throw down their arms and surrender. Just then another Servian sentinel came on the scene, whereupon the Austrians obeyed and were taken into custody, and from Semendria were conveyed to Belgrade, where, after being examined by the Prefect, they were handed over to the military authorities. The pompous Austrian functionaries in Belgrade did not remain idle. Both the Austrian Consul and the Austrian Military Attaché intervened, and these official interventions seem to have been effective, as the arrested soldiers have been delivered to the Austrian authorities, who have forwarded them to Hungary.

The artillery and ammunition ordered two years ago in France, and lately sent to Salonika, is still detained in Turkey, despite the protestations of the Servian Government.

Belgrade, September 30.

The military preparations are assuming a serious aspect, large sums of money are being spent, and the excitement in the army is intense, despite the supposition that the Government does not desire hostilities. Servia wishes to secure supremacy in Old Servia, and to have much-desired reforms carried out by the Turkish Government, and it may be that all these military preparations and enormous expenditure are parts of a game of bluff to secure the objects in view. But if so, it is a dangerous game to play; the situation is very sinister; startling rumours are afloat; and Servian army officers may get out of hand, and by exceeding the intended bounds cause serious trouble.

If, on the other hand, the Servian Government are not sincere in their professions of peace, then we stand on the brink of war.

Later.

King Peter has signed the decree authorising the mobilisation of all the Servian forces. Troops are being despatched to the Turkish frontier. Elaborate preparations are being carried out, and heavy expenditures are being incurred. The Skuptschina has been convoked for Thursday next, October 3.

Later.

Two divisions forming a *corps d'observation* will remain at Belgrade to watch the Austro-Hungarian movements, but this with the earthworks thrown up along the Danube and the fortifications at Semendria would hardly suffice to effect a successful resistance against Austria-Hungary. Yet Servians on this point feel quite at ease, it being said that Russia has succeeded in obtaining from Austria a promise of neutrality, in case of a conflict breaking out between Servia and Turkey.

An order has already been given to-day to all Government schools, colleges, and the University to hold no classes after Thursday next, and for the buildings to be fitted up at once with beds and conveniences for the sick and wounded, as the Government wishes to be prepared for the worst. Crowds have collected in the streets cheering for the army.

NOTES FROM ODESSA.

(From Our Own Correspondent.)

Odessa, September 30.

The Persian Situation.

In my last two despatches I referred to the reiterated statement of the *Retch* and one or two other metropolitan organs to the effect that the ex-Shah contemplated a second attempt to regain the Peacock Throne of the Kajars, and I said that nothing was known here of any such intention on the part of Mohammed Ali, that the statement was denied by the Russian adjutant attached to the royal exile's suite, and that if the deposed monarch did return to Persia it could only be with the collusion of Russia. During the past week the report of the ex-Shah's eventual restoration has been persistently growing in other than Press circles. In politics, as in other mundane affairs, there is no smoke without fire. The *Odesskia Novosti* and the *Yuzhnaia Myssl* the other day discussed, very discreetly and circumspectly, the possibility, or probability, of Mohammed Ali Shah's rehabilitation. Both journals took as the text of their commentaries and speculative assumptions the significant incident of the presentation to the Russian Consul-General at Tabriz of a petition signed by a very considerable number of "patriotic" Persians praying his Excellency to exert his influence to bring about the speedy return of Mohammed Ali Shah, in whom the petitioners and their countrymen reposed their last hope for the salvation of Iran and its deliverance from the frightfully chaotic condition into which it had helplessly and hopelessly drifted. It would be interesting to learn who were the actual prompters and promoters of that petition. Curiously enough, too, and coincidently with M. Sazonoff's departure from London to Balmoral, the *Novoye Vremya*, undoubtedly inspired thereto, announced, for behoof of those whom it might concern, that the modern capital of Teheran lies within the sphere of Russia's "influence" in Persia—that is to say, *sans phrase*, that the Persian capital will be included in the area of Russia's future protectorate over Northern Persia. In the gradual realisation of this country's ulterior designs in Persia the restoration of the ex-Shah—on conditions—might become a helpfully expedient step, and would, no doubt, prove an acceptable sop to the "loyalist" Persian Cerberus. It goes without saying, of course, that in that event the restored Mohammed Ali would be the mere puppet vassal of the White Tsar until the propitious time arrived for the final deposition of the Kajar dynasty.

The Balkan Crisis.

During the last forty-eight hours the reports from Russian Press correspondents in Sofia and Belgrade are of an extremely disquieting nature. From Sofia it is stated that the latest sanguinary collision between Turks and Bulgars on the Macedonian frontier has raised such a frenzied war clamour in all the Bulgarian centres that King Ferdinand may be compelled to abandon the passive attitude he has with so much difficulty maintained during the last few weeks and respond to the imperious popular outcry for war. One of the Russian correspondents goes so far as to aver that for his own personal safety and the retention of his throne Ferdinand must address a categorical ultimatum to the Porte, and, failing an instant and satisfactory assurance, declare war. The Bulgarian Consul-General and Agent in this city, with whom I had a very brief conversation yesterday, takes the gravest view of the situation, but says he has not altogether lost hope that Tsar Ferdinand will be able a little longer to weather the storm that is surging around him. Should, however, no improvement in the position very shortly supervene, his Majesty, much as he desires to conform to the pacific counsels of Russia, will have no alternative but to lead his well-organised army of 300,000, all imbued to the core with a savage hatred of the Turks, across the Ottoman frontier, and the Bulgarian legions would have the instant and combined support of the Serbs, Montenegrins, and Greeks.

Several hundred Bulgarian reservists resident in South Russia have left here during the last few days by steamer for Varna and Burgas.

LETTERS TO THE EDITOR.

FOREIGN POLICY AND THE NATION.

To the Editor of The Near East.

Sir,—I am much too glad of the able support of your correspondent "F. H. S." to desire to break a lance with him on so erudite and complex a subject as the effects of breeding on character.

This is beside the issue on the question of Foreign Office reorganisation we both advocate, as full advantage would be taken of brains and character, whether these were found in conjunction with *magni nominis umbra* or amongst the *fruges consumere nati.*

The point is to secure the best possible service for the State in an age when any surviving prejudice based upon feudal or class distinction can only operate to the disadvantage of the commonwealth.

By all means give the expert "secured by rational eclecticism a free hand," as "F. H. S." proposes, but—within reasonable limits.

I cannot for the life of me see why general lines of foreign policy directly affecting the "problems of subsistence" in "this over-peopled country" should not be decided upon by those whom the people elect to represent them, instead of by a secret *comitia* of bureaucrats whose qualifications for undertaking these "tremendous responsibilities" are unknown and unknowable.

"F. H. S." will, I believe, agree with me that the heads of the permanent staff of the Foreign Office are the incubators of those fertile policies which, emerging fully hatched into the fledgling stage, are protected until full growth beneath the wings of the Secretary of State. The two latest bantlings are prime specimens. The destruction of Persian independence and the priceless exhibition of incompetence displayed in the Chinese Loan negotiations.—Yours obediently,

Folkestone, September 30. Sydney Schiff.

SUFFERINGS IN TURKEY.

To the Editor of The Near East.

Sir,—Those of your readers who have followed the fortunes of the suffering Christians of Turkey will be sorry to learn of the great need still existing amongst them. We, who are in constant communication with the American missionaries in that country, can tell a sad tale of the misery in the midst of which they labour with such unremitting zeal and devotion.

From Urfa we learn that "the want is more desperate even than after the 1895 and 1896 massacres. Snow, locusts and bad crops, and the effects of the war, are keeping business at a standstill." Marash is enduring a visitation of cholera, and, with utterly inadequate medical help and bodies weakened with privation, we know what that must mean to the sufferers.

A recent letter from Constantinople tells of the number killed and injured by the earthquake of a few weeks ago. I will quote a passage:—"We get dreadful news from the Dardanelles quarters. Some of the villages on the Marmora are wiped out, and the survivors are so dazed by the loss of their relatives by death, and the loss of home and things, that they seem incapable of doing anything for themselves."

A nurse at Van Hospital writes:—"We find the sick people lying on the damp floors of their hovels, far inferior to those in which we would house our cattle, with only a few dirty rags to cover them, and the children huddled up to a sick mother. The number of cases which die from pneumonia is terrible."

What can one say to make England realise the awful suffering of these our fellow creatures—our brothers and sisters, whose lives are one long misery from the cradle to the grave?

In the Mission Orphanages, for from £6 to £8 annually, a child may have the advantage of maintenance, education and training, and, above all, of tender love and solicitude. Will not my readers help in this good work? Out of all the hosts of children, we have but 200 in the Homes; and how gladly we would take another 200 if only we had the means! They are the leaven which we hope may in the future help Turkey to rise to a higher plane among the nations, for healthy and well-trained children are a country's best asset.—I am, faithfully yours,

Mary Hickson (Mrs.). Hon. Sec.

P.S.—We have just heard from Mr. Peet, the treasurer of the Boston Mission Board at Constantinople, that a sum of money for relief is an absolute necessity if widows and orphans at Hadjin, Bitlis, Sivas, and other stations are to be saved from starvation. Gifts may be safely and speedily forwarded through E. Wright Brooks, Esq., hon. treasurer, "Friends of Armenia," 47, Victoria Street, London, S.W.

47, Victoria Street, Westminster, S.W.,

JOURNALISM IN PERSIA.

(By a Persian Correspondent.)

His Excellency the Governor-General Shuja-ed-Dowleh has been publisher and editor-in-chief for the last four months of a four-page weekly paper called *Fékre* (or "Thought"). At first the editorship was entrusted to an Armenian, who was also editor of the Armenian weekly, *Mitk* ("Mind"), but things went wrong with him from the very first. Shuja-ed-Dowleh sent in an item of news to be inserted in the new paper, and the editor, who knows very little Persian, turned the Governor's letter over to his Persian secretary for publication without first reading it carefully. It turned out to be a denunciation of the Sipahdar, the *Mashroota* and the *fedayis*. It said:—"The news that the Sipahdar is coming here as Governor-General has given rise to rejoicing among the democrats and the *fedayis*, forty of whom have taken *bast* in the Turkish Consulate. They are holding nocturnal meetings to form plans for the reception of the Sipahdar and for disturbing the city again."

Shuja-ed-Dowleh had not signed the letter, of course, and the Armenian editor was held responsible for the news. The *fedayis* had taken *bast* in the Osmanli Consulate secretly. At least, it was supposed to be secretly on their part, and therefore it was a great mistake on the part of the editor to permit the secret to be revealed in his Persian paper. It was, however, only a mistake! It was not intentional! The editor acknowledged his mistake, and it then remained how best to remedy it. In the second issue of his paper an editorial regretted the publishing of the news, and begged the pardon of all those who would be likely injured by it. It said that the act was not intentional, but that it had been due to carelessness and imperfect knowledge of Persian on the part of the editor, and also to his overconfidence in the good judgment of his Persian secretary, who had proved unworthy. (The secretary has since resigned!) This editorial smoothed matters over, and soothed the irritated feelings of those who were friends both to the *fedayis* and to the editor himself—in fact, the friends of the editor felt the sting of the act more than the friends of the *fedayis!*

The matter was now considered settled as far as the people were concerned; but the Osmanli Consul would not allow it to drop. In the news in the place of the word *fedayi* the word *ashrar* (disturber of peace) had been used. The Sultan's Consul brought a lawsuit demanding that the editor should either prove that there were *ashrar* in the Consulate or that he should be punished for publishing false news. The demand was made through the Karguzar-Khana, and the punishment demanded was:—(1) Six months' imprisonment of the editor, and (2) the suspension of the *Fékre* for six months. The editor pleaded that the news had been printed by the command of the Shuja-ed-Dowleh, and the Karguzar replied to the Consul that he could not punish the editor, who was under the protection of Shuja-ed-Dowleh. So the demands of the Consul went to the wind for the time being. Besides this, Shuja-ed-Dowleh had furnished the editor with a long list of signatures of the most prominent men—merchants, mullahs, noblemen—who were testifying in writing that there actually were *ashrar* in the Turkish Consulate. The editor was given this document in order to use it for self-defence and prove to the Osmanli Consul that he (the editor) is not the only one, but that the most prominent citizens say that "*ashrar* are given *bast* in the Turkish Consulate." But after getting the Karguzar's note the Consul did not show up in court the next day, so the editor did not have a chance to use the document, and I understand that Shuja-ed-Dowleh sent and got it back from him.

In the meantime battles were being fought near Hamadan between the late Yeprem Khan and Salar-ed-Dowleh, brother of Mohammed-Ali-Shah, and Yeprem was killed in one of the engagements. Mujallal-es-Saltana, the commander-in-chief of the armies of Salar-ed-Dowleh, sent on this occasion a telegram to Shuja-ed-Dowleh from Kermanshah saying that he had defeated the Government army, killed Yeprem, and expected, by the help of God, to march into Teheran within five days. The telegram was a long one, giving a description of the engagements and the "bravery" of their men in detail. Shuja-ed-Dowleh sent it to the Armenian editor to have it published in the *Fékre*, but the editor returned it with a note saying that he could print certain extracts from it as simple news, but that he could not permit the entire telegram to be published, which meant giving good news to a certain class of the people and displeasure to others. The editor also added: "Since your Excellency has seen fit to appoint me to the editorship of your paper I must have full freedom in the selections of subject matter, otherwise I am ready to resign. I cannot permit mention of the name of Mujallal-es-Sultan, who is more despotic than the despot himself."

The wrath of Shuja-ed-Dowleh can be better imagined than described. To dare to return a letter to him! To dare to throw the Governor-General's copy into the waste-paper basket! Was it possible? It takes a man with courage to do it. The Armenian editor did it, and his being an Armenian saved him from the Governor's wrath. Had he been a Moslem he would in all probability have had to pay for his daring by losing his head! On getting his note Shuja-ed-Dowleh had exclaimed: "What! This editor tells me what is good and what is not good for publishing. He must imagine himself a Cabinet Minister. Tell him to resign at once!" And, to his credit, the editor did resign from a paying post, rather than become a tool in the hands of the old régime. And now his chair is filled by Shuja-ed-Dowleh himself. True, a certain Mirza Husein signs himself as "Editor" or "Superintendent." But the Governor-General himself is the editor-in-chief. Several secretaries do all the writing, copying, translating, composing, etc., but every word and sentence must be read to Shuja-ed-Dowleh and approved or "blue-pencilled" by him before it goes into print.

The expense of publishing the paper—150 tomans a month—is paid by Shuja-ed-Dowleh. It is an "educational, moral, and political weekly," a journal of "good manners, good morals, and the public welfare." How far it justifies its professions is a matter of opinion, but it fulfils splendidly the original aims of the publishers—to win public opinion in favour of Shuja-ed-Dowleh, denounce *Mashroota*, spread anti-*Mashroota* ideas, advocate the better side of the old régime, and attack this or that person not admired by the proprietors!

Fékre serves also as a medium for making public notices and for announcing official firmans. Its last issue (No. 18) announces the following command of Shuja-ed-Dowleh, printed on the first page, and addressed to Shahzadé Mukhtadir-ed-Dowla, the Mayor of Tabriz:—

> Your Royal Highness is hereby notified to make it known that all those persons (*fedayis* and *mashrootachis*) who have been in hiding since the well-known events (referring to the *fedayi* attack upon the Russians last December), either in the city itself or in its vicinity, or in foreign lands, must come out of their hiding places. It is your duty to notify all the Kat Khoodas (head men of each division of the city) that they see to it that the persons in hiding in their wards come out. It is the duty of every man and individual to make it known to all their friends and acquaintances who are in hiding, and let them come out of their hiding places. Anyone who fails to make this command known to a hiding man will be severely punished; and if any householder who has given shelter to any man demands any compensation from him, he will be severely punished. Let every citizen make this command known; let every refugee come out and fear no one!

This pardon (if only it is not an official trap) and invitation to those who have been in hiding since the "well-known events" is thought to be connected with the coming, as Governor-General, of his Excellency Sipahdar-Azam, who is in Miana, and is expected here on the 10th of Ramazan. Being a fasting month, and having an army with him, he will travel rather slowly. The Sipahdar is supposed to have the powers of a Viceroy, for he comes as Governor-General for two provinces—Azerbaijan and Gilan (south-west and west of the Caspian Sea). The palace of the late Kaimakam is being renovated and furnished for his residence. Shuja-ed-Dowleh is not inclined to consent to *work under him;* and we expect to have "something up" when he comes!

Mirza-Firooz-Khan.

Tauris, August 20.

THE PRESS ON THE NEAR EAST.

England and Islam.

The *Asiatic Quarterly Review* (October) contains an article by Lieutenant-Colonel A. C. Yate on "The Reform of Persia," from which we quote the following extract:—

No Christian, probably, can interpret the inmost impulses of a Mussulman heart, but in the time of distress friendship is thrice welcome. Islam is now sorely harried and perplexed. She knows not whither to turn. I venture to think that the British Crown will lose nothing if it arrays itself as the ally of Islam. What other ally can Islam have? Is it France or Italy, who have annexed Northern Africa? Is it Italy or Austria, who are rivals for the possession of Turkey's Adriatic provinces? Is it Austria or Russia, who have already stolen all they can in the Balkans, the Crimea, and the Caucasus? To Persia, Russia has been more Shylock than Mentor. Is it Russia or Germany, who at this moment hold in their hands the keys of Turkish railway enterprise? Is it Greece, waiting with open mouth for Crete and one or two other titbits to fall into it? China is, in a measure, a Muhammadan Power, but self-reform taxes every nerve of the Chinese Republic. Clearly, the British Empire stands out as the rallying-point of Islam, if Islam will rally to it. The front which that Empire requires to take up in asserting its rights as the leading Muhammadan Power of the world is a line drawn from Suez to Baghdad, and thence through Isfahan to Zulfikar on the Afghan border—a good line of resistance, with the right flank protected by Afghanistan and the left by Egypt, and with British troops and a British naval squadron ready to operate in South-East Persia and in the Persian Gulf.

We are in hearty agreement with the views put forward, coinciding as they do with those frequently expressed in THE NEAR EAST.

Peace and Good Sense.

La Grande Revue (September 25) has a sensible article on the prospects of peace between Turkey and Italy, from which we take the following:—

Rien ne montre mieux que les lenteurs des pourparlers d'Ouchy et les obstacles de tout genre auxquels se heurtent les négociateurs, à quel point il est nécessaire que l'Europe fasse entendre sa voix et signifie nettement ses intentions et ses désirs, puisqu'aucun des deux adversaires ne se sent de taille, ou d'humeur, à imposer à l'autre ses volontés. Tout le monde est d'accord pour penser que l'Italie et la Turquie ne devront pas régler toutes seules certaines questions que leur guerre a soulevées et à la solution desquelles les tiers sont directement intéressés: telle, par exemple, la question des Iles. Puisque les puissances ont là-dessus leur mot à dire, qu'elles le disent sans plus attendre. Et point n'est besoin pour cela de réunir une conférence.

Austria and the Balkans.

Mr. George Lloyd, M.P., has an interesting article in the *Daily Mail* (October 2), entitled "What is Happening in the Balkans," from which we extract the following:—

In this situation the attitude of Austria is the governing factor. Austria is well aware that England and France, and probably Russia, are all against an upheaval in the Balkans. It is difficult to believe that Austria would be willing to see Bulgaria and Servia, or Bulgaria alone, consolidated as a powerful Slav State lying across the road to Salonica. A successful Bulgaria would bar the eastern sea road to Austria for all time. It is no less difficult to believe that Austria would calmly view the gathering power and progress of a completely independent Albania, or welcome the effect which the examples of Slav independence and power would have upon the minds of Montenegro, Croatia, Bosnia, and Herzegovina. If, then, Austria is determined, in conjunction with France and England, to prevent war, she can make it impossible for Servia to move a man or a gun eastward.

King Edwards Diplomacy.

To the current *Fortnightly Review* Mr. Edward Legge contributes a most interesting article on King Edward VII., in which he tells the following story:—

In the summer of 1905 the King of Servia and his Ministers were straining every nerve to re-establish diplomatic relations with this country, which had been broken off owing to the assassination of King Alexander and Queen Draga on June 2, 1903. As King Peter was on good terms with Russia, and as Queen Helena of Italy is his sister-in-law, the Russian and Italian Ambassadors in London were instructed to exert their influence with our Government on the subject of the diplomatic relations between Servia and England. Apparently the two Ambassadors (Count Benckendorff and Signor Pansa) got a hint from, presumably, our Foreign Office that the problem could be solved only by King Edward. They were accorded an audience and made their representations to His Majesty, who replied *à peu près* as follows: "I regret very much indeed that I cannot comply with your suggestions. The assassination of King Alexander and Queen Draga on June 2, 1903, was so terrible that it made a deep impression on public opinion in England. Public opinion has not yet recovered from the shock, and would certainly not approve of the re-establishment of diplomatic relations with Servia, and you know well that I and my Government must take into account the public opinion of our country. And besides this reason I have another, so to say, a personal reason. *Mon métier à moi est d'être Roi.* King Alexander was also, by his *métier*, '*un Roi.*' As you see, we belonged to the same guild as labourers or professional men. I cannot be indifferent to the assassination of a member of my profession, or, if you like, a member of my guild. We should be obliged to shut up our businesses if we, the Kings, considered the assassination of Kings as of no consequence at all. I regret, but you see that I cannot do what you wish me to do."

The incident was reported by the Italian Ambassador to M. Mijatovitch (former Servian Minister in London), who now permits Mr. Legge to publish it.

The Bulgarian Standpoint.

The *Manchester Guardian* (October 2) contains a lengthy statement of Bulgaria's case in the Macedonian dispute, derived from an authority in close touch with Bulgarian official quarters. We regret being unable to quote at greater length from this article, but our readers will doubtless find the following short extract of interest:—

So far as Bulgaria is concerned, if war breaks out it will not be due to a fever of enthusiasm in our country. It will be a war coldly and calmly undertaken as the sole issue out of an impossible situation. The present state of affairs in European Turkey is a gaping wound in the body politic of Bulgaria, through which she has been the prey of various diseases. We have 300,000 Bulgarians in Macedonia, and we are forced to give constant attention to their grievances at the expense of our own internal problems. We are forced to keep up an army far beyond our resources. It is a question of life and death for Bulgaria, and if there is war it will be a war dictated by necessity if ever war was.

Articles to Note.

"The Arabic Language Question in Egypt," by "Arif," in the *Asiatic Quarterly Review* (October).

"Progress in the Sudan," by Colonel Sir C. M. Watson, and "A Journey in South-Western Abyssinia," by George Montandon, in the *Geographical Journal* (October).

"*The* Persian Problem," in the *Throne* (October 2).

"The Abu Zait Conspiracy," in *Blackwood* (October).

"Islam in the West and Central Sudan," by Professor D. Westermann, in the *International Review of Missions* (October).

"Attraverso il Sahara," by Pippo Vigoni, in *L'Esplorazione Commerciale* (September 15).

"Ueskueb, die Hauptstadt des Nordlichen Mazedonien," in the *Königsberger Allgemeine Zeitung* (September 8).

"Les Arméniens dans les Révolutions Orientales," in *La Revue* (September 15).

NEAR EAST BOOKSHE LF.

LESS OBVIOUS CAUSES OF THE TURCO-ITALIAN WAR.*

Professor Charles Lapworth, of the Birmingham University, in collaboration with Miss Helen Zimmern who resides at Florence, has produced an elaborate piece of special pleading which labours to prove that the invasion of Tripoli was just, necessary—indeed, inevitable. When we find that three dozen Italians, from the Prime Minister down to a professional photographer, are effusively thanked in the preface, we learn the sources of our authors' inspiration. They deserve credit for indicating the occult chain of causation which led up to an unprovoked attack on a neighbouring and friendly Power, and for enlightening the British public as to the amazing strides in material progress which Italy has made in less than a decade. She has waxed rich and powerful, thanks to a revival of agriculture and technical industries, to the spread of co-operation, and the influx of wealth in the shape of home remittances made by her citizens in the Americas. A load of debt has been cast off, and the Exchequer is equal to the growing cost of armaments. For the first time in her brief annals, United Italy is "race-conscious," and has embarked on the struggle for self-aggrandisement which that sentiment is apt to inspire. Nationalism is a fact with which Imperialists and cosmopolitans have to reckon. It is rampant in every country, and especially strong in one which has great traditions behind it. Young Italy has realised the potentialities of a commanding position in the Mediterranean Sea. It declares that the heirs of ancient Rome shall no longer be the poor relations of the Triplice. *Italia farà de sel* is the national motto. Italy must prove her manhood, and regild the laurels tarnished at Adowa by waging a war of conquest.

These dreams of resuscitating the Roman Empire have been thwarted by the selfishness of Italy's Teutonic allies. Despite the Berlin Treaty, under which Austria-Hungary guaranteed the integrity of the Turkish dominions, she annexed Bosnia and Herzegovina; is plotting the conquest of Albania, and aims at extending her frontier to Salonika. Now, if the whole eastern coast of the Adriatic be appropriated by the hated *Tedeschi*, they will have Italy at their mercy. She does not possess a single good harbour between Venice and Otranto, while the opposite shore is studded with ports capable of sheltering battleships. Once Austria-Hungary is established at Valona and Durazzo, she will stifle the *Irredenta* movement, which aims at regaining the Trentina and adjacent districts containing a large Italian element.

It may well be asked why, with so many irreconcilable interests separating them, did Italy form an alliance with the German Powers in 1882, and why has she thrice renewed a treaty which must have been most galling to her self-esteem? Professor Lapworth explains that the "Unholy Alliance" was forced upon Italy by profound distrust of France, coupled with her own weakness and isolation. All this is a thing of the past; the two Latin nations are on excellent terms, and Italy is strong enough to stand alone. It would thus appear that, in declaring war against Turkey, she flung down the gauntlet in the face of her Teutonic allies.

Expansion is a vital necessity for the individual and the race. It is of the first importance to Italy, which loses more than half a million citizens yearly by emigration to America. Her statesmen sought a dumping-ground for this surplus population, which should remain an integral portion of the nascent empire. The northern littoral of the Mediterranean is admirably suited to Italian agriculturists, but it was passing from the sway of Islam to that of strong and competing Powers. Egypt had fallen under British influence: France had annexed Algeria and Tunis, which owes its prosperity to the Italian element; she had brought Morocco within her orbit. Tripoli alone remained nominally loyal to the Sultan. It is nearly four times as large as Italy and contains more cultivable land than Germany, but its vast natural resources are wholly undeveloped. The founders of United Italy had cast longing eyes on a land of promise which lies within a short day's steaming from the Sicilian coast. The late Lord Salisbury was inclined to favour Italy's claim to this portion of the Sick Man's possessions, but England's sympathy never extended beyond fair words. For selfish ends she encouraged Italy to establish herself in Abyssinia, and was indirectly responsible for the massacre of Adowa, which inflicted a terrible blow on Italian prestige.

A crisis came when the "Panther" landed a force on the Moroccan coast, proving that the Kaiser wished to obtain a footing in the Mediterranean. After private "conversations," France secured recognition of her paramount interest in the Sherifian empire, and there was good reason for the belief that Germany had obtained from France a free hand to establish herself elsewhere. Rightly or wrongly, Italian statesmen thought that the mailed fist was about to come down on Tobruk, which is incomparably the best harbour on the Northern Mediterranean littoral. This train of events explains the sudden invasion of Tripoli, which staggered civilisation a year ago.

The citizens of old Jedburgh were notorious for their custom of hanging a man and then trying him. After launching her ultimatum, followed within twenty-four hours by a declaration of war, Italy sent a *communiqué* to foreign Powers setting forth the wrongs which her subjects in Tripoli had endured at the hands of Turkish officials. This indictment reminds one of the fable, "The Fox and the Lamb," in which Reynard enumerates his victim's misdeeds in justification of his resolve to gobble her up! But, granted that the clerical Banco di Roma and other Italian adventurers had good reason to complain of Turkish misrule, the question arises whether Italy exhausted every method of obtaining redress before letting loose the dogs of war. The instinct of self-preservation has led civilised communities to protect their citizens against robbery and murder by instituting courts of law. A burglar who uses the revolver gets short shrift. Nations have adopted a similar safeguard against the predatory propensities common to our race. Italy was a party to the Peace Conference of 1899, which established a special tribunal for deciding international disputes by arbitration. The weak side of the pacificist movement is that there is no Power strong and disinterested enough to act as policeman. Italy has taken advantage of the general anarchy which still prevails. Instead of appealing to The Hague for redress against Turkey, she broke away from the comity of nations and sought to extend her empire by means of brute force. In so doing she has put back the clock of civilisation for fifty years. No one can foresee the consequences for Christendom and the world at large which may flow from her unprovoked aggression. There is, indeed, a clause in the Convention of 1899 which permits war without previous arbitration in the case of differences of vital importance in which the national honour is involved. On the large assumption that the relations between Italy and Turkey came within this proviso, it is difficult to speak with calmness of the action taken on Monte Citorio in formally annexing Tripoli and Barca while the Italian occupation was confined to a narrow strip of coastline. But for this astounding blunder, it might be possible to arrive at a *modus vivendi* with Turkey on the precedents afforded by Egypt and Cyprus—recognition of the Sultan's suzerainty and the payment of a moderate tribute. By burning her ships Italy has rendered an early peace impossible, for a Commander of the Faithful who should tamely submit to spoliation would see his empire fall to pieces in six months. Professor Lapworth is indignant with British "friends of Italy" for expressing disapproval of her escapade in Tripoli. He should realise that an empire which numbers more Mohammedan subjects than that of Turkey cannot endorse action which has outraged the conscience of Islam from Nigeria to Borneo. Lovers of Italy are grieved to the heart by her cynical disregard of the ideals generated by civilisation and her lapse from the righteousness by which alone a nation is exalted.

CURRENT COMMENTS

The remark in our Beyrout correspondent's recent account of the visit of the Italian Fleet, to the effect that the Ramadan gun was not fired during its stay at that port, reminds a Cairo correspondent of another and even more famous occasion when that signal was dispensed with for fear of its meeting with a wrong interpretation. That occasion occurred in November, 1904, when the division of the Russian Baltic Fleet under Vice-Admiral Volkersahm passed through the Suez Canal on its way to the Far East.

***

The unfortunate Dogger Bank incident caused the Egyptian authorities to decide to suppress the usual gun, which was fired to denote the conclusion of the day's fast, for it was feared that the crews in their reputed demoralised condition might mistake the report for some unfriendly demonstration or even for a hostile salute from the Japanese cruisers, which they firmly believed were either dogging their footsteps or were awaiting them outside Suez. From the time the Russian squadron arrived at Port Said to the time it quitted Suez the sunset signal did not sound.

***

In addition, such a shadow had this "forlorn venture" cast before it, and so fearful were the St. Petersburg authorities that the scratch crews might run amok and create another incident, that the Greek Fleet, which had been calling at Port Said, left hurriedly on the approach of the Russian squadron, in response to friendly representations, and the Egyptian authorities established a strong cordon of police-boats round the vessels and a patrol of coastguards on the land side. Indeed, those sightseers who put off in boats in order to examine the famous squadron at closer quarters were ordered to keep outside the cordon, and were earnestly enjoined not to point at them with sticks or umbrellas!

***

The Cairo correspondent of the *Pall Mall Gazette* has been congratulating the Cairo Zoo on the fact that ten baby boa-constrictors—the first born in captivity—made their entry into the world there on September 19. We cannot endorse his congratulations. The Cairo Zoo authorities may be justly "proud of this event, which constitutes a notable addition to their already large record of zoological achievements," but it is a pity that the "baby reptiles are thriving." To us it seems incomprehensible that any dangerous reptile should be suffered to live.

***

The announcement that the Czar has appointed King Carol of Roumania a Field-Marshal of the Russian Army gives one to think furiously. Not that Russia has not good cause to be grateful to, as well as proud of, her new Field-Marshal, whose services to her at Plevna it would be hard to overestimate. But it seems rather late in the day for recognition of those services, does it not? If the honour be really intended as recognition, the Russians must be endeavouring to rival our own War Office in the matter of bestowing medals and decorations long after the events that earned them. At the present juncture of affairs, with Roumania the "dark horse" in the Balkan stable, many people will inevitably be tempted to quote the witty definition of "gratitude" as "a lively sense of favours to come."

***

Apropos of the above, it may be of interest to note that the principal events of the war of 1877-78 as far as concerned the Roumanian forces engaged have lately been "reconstituted" by a Roumanian manufacturer of cinematograph films, and that the pictures have been exhibited in Bucharest, to the great delight of local audiences. Much money and trouble, we are informed, have been expended on their production, and the actors and actresses of the National Theatre gave their services. But, judging from a description of the representation sent us by a correspondent, we gather that Roumania has not yet learned the art of "building up" realistic effects with such marked skill as certain French firms exhibit.

***

Our correspondent writes: "The first scenes, representing 'Peace' are delightful. One sees the Roumanian peasants celebrating some festival, with wine-drinking and general merry-making, amidst charming scenery. Then the mayor arrives with news of the declaration of war, the reserves are called up, and the men march off while wives and sweethearts are left to weep. But the subsequent pictures are indifferent. . . . The crossing of the Danube (to be re-enacted in the manœuvres in a few days) is horribly botched. The King is alone, with no staff, and the enthusiastic crowd that witnessed the crossing—practically the entire population of Braila—is represented by a priest, Bratiano, and four others. How much better is the picture by Schomburg, in the Royal Palace here, which is so historically correct as to introduce Archibald Forbes with Melton Prior, who is sketching as the never-ending line of troops march by. In the cinematograph picture the whole army is one battalion of infantry, a squadron of cavalry, and two guns!"

***

"Osman Pasha," our informant adds, a little later, "surrenders with one leg bound up in cotton-wool, after directing the defence of Plevna quite alone, without so much as an orderly! But then King Carol rallies the retreating rifles at the first attack entirely 'on his own,' and might be a corporal were it not for the explanation thrown on the screen before the showing of the picture!" We should rather like to see those pictures ourselves: it is difficult just now to find anything amusing in the region of the Balkans. But, after all, they are probably no more incongruous than a good many of the cinematograph displays that are given farther West; and at least they would not be open to the objections levelled against some others on which we have commented in these columns.

***

The International Peace Congress at Geneva can hardly be regarded as a completely successful gathering. A resolution which was passed on the third day, condemning the Turco-Italian war, caused, we are told, "an exciting scene," one Italian delegate defying the chair. And two days later there was another meeting of "a stormy character," when questions affecting Tripoli, Morocco, and Egypt were under consideration. With regard to the first case, it is certainly sad to find the doves quarrelling in their nest over the very question they have met to discuss. But with regard to the second, it is hardly cause for wonder that they should fall out when they begin to discuss topics so far foreign from the proper cause of their meeting. The protest of Mr. Maddison, one of the British delegates, was amply justified. The evacuation of Egypt is not a subject for the "Peace" champions to broach, and the fact that Farid Bey should support the resolution was distinctly provocative.

PERSONAL & SOCIAL.

Wednesday being the anniversary of the Sultan of Turkey's birthday, the Hon. Sir Arthur Walsh, Master of Ceremonies, called, by command of the King, upon the Turkish Ambassador to offer his Majesty's congratulations.

Lord Kitchener arrived at Venice on Friday as the guest of Lady Layard. He was met at the station by Vice-Admiral Garelli, Naval Commandant at Venice, who greeted him in the name of the Government. On Saturday he visited Mr. Asquith in the afternoon and attended a dinner given by Admiral Garelli in the evening. On Sunday he left for Egypt on board the "Schleswig."

Sir Reginald Wingate, the Governor-General of the Sudan, and Lady Wingate left London on Wednesday night *en route* for Egypt. The Sirdar was accompanied by Captain Clayton, private secretary; Captain Mayne, military secretary; Captain Kennedy, assistant private secretary; Captain Hadow, A.D.C.; and Major Stack, Sudan Agent. At Trieste the Sirdar will be joined by Sir Rudolf Slatin, and after a stay of two or three weeks in Cairo will proceed to Khartoum.

Sir Gerard Lowther, British Ambassador at Constantinople, was present at the service held last Friday at the German Church, Brompton Road, in memory of the late Baron Marschall von Bieberstein. Amongst others present were the Turkish Ambassador, the Greek, Roumanian, and Bulgarian Ministers, and Lady Block. Sir Gerard later left London for Constantinople.

M. Sazonoff, the Russian Foreign Minister, left London on Wednesday for Paris, travelling by the 11 o'clock Continental express from Victoria.

M. Sazonoff had two conversations with Sir Arthur Nicholson at the Foreign Office on Tuesday, the subject being, it is understood, the Balkan situation. Other visitors on the same day were M. Grouitch, the Servian Chargé d'Affaires, and the Persian Minister.

Sir George Barclay, British Ambassador at Bucharest, left London last Friday accompanied by Lady Barclay, for Roumania.

Captain the Hon. C. W. J. Orr, Chief Secretary, Cyprus, left England yesterday to return to the island.

Sir Richard and Lady Crawford have returned to Constantinople from England.

Mr. R. W. Graves, C.M.S., has also returned to Constantinople.

Mr. C. E. Heathcote-Smith, H.B.M.'s Vice-Consul at Smyrna, who is at present absent on sick leave, left London to-day for Lausanne, and expects to return to Smyrna in two months' time.

The Hon. Hugo Baring has left Constantinople for London, where he will arrive about October 13.

M. Michel B. Boeresco, First Secretary to the Roumanian Legation, has returned to London from the Continent.

Mr. Bonham Carter, Judicial Secretary to the Sudan Government, has arrived in Khartoum from England.

Digitized by Google

Prince George of Servia arrived in Belgrade unexpectedly on Tuesday night.

Our Roumanian correspondent writes:—King Carol will leave Sinaia on or about October 3 to be present at the autumn manœuvres. After the final review, His Majesty and Queen Elizabeth will spend some days at Constanza, and will then return to Sinaia before moving to the capital for the winter. Mr. Bourchier, the well-known Balkan correspondent of the *Times*, has arrived at Sinaia and has been invited to follow the manœuvres. Perhaps there is no one who knows so much of Balkan politics as Mr. Bourchier, who has resided in this exciting part of the world for many years.

The King has been pleased to confer the honour of knighthood on Mr. S. A. T. Rowlatt on his appointment to be a justice of the High Court, King's Bench Division. It will be remembered that the new knight, who is a brother of Mr. F. T. Rowlatt, Governor of the National Bank of Egypt, was born on the banks of the Nile.

Mr. A. L. Webb, C.M.G., agent for the Egyptian Railways in London, expects to leave for Egypt in January next, and will be absent from England for two months or so.

Mr. H. P. Kingham, manager of the National Bank of Turkey, has returned to Constantinople.

Mr. E. A. Harrison, the well-known general manager of Messrs. Thos. Cook and Son, has returned to London from Harrogate, where he has been taking a cure.

Colonel A. G. Thomson, C.B., who has just vacated command of the Royal Military Academy, joined the Royal Engineers more than thirty-five years ago, and served at Tel-el-Kebir in 1882, with the Sudan Expedition of 1885, and all through the South African War.

Colonel R. Porter, Deputy Director of Medical Services, Malta, has been granted leave of absence until October 31. During that period his duties will be performed by Lieutenant-Colonel T. G. Lavie, R.A.M.C.

Halil Halid Bey, who was one of the delegates of the Ottoman Parliament at the Inter-Parliamentary Union which has been meeting at Geneva, has arrived in London on a short visit.

Mr. Williams, Inspector of Irrigation for Lower Egypt, and who is now on leave, has been granted one and a-half months' extension of leave. According to the *Egyptian Gazette*, it is probable that Mr. Williams will request the Egyptian Government to relieve him of his post at the expiration of his holiday.

Mr. Home, Sub-Governor of the National Bank of Egypt, who has been spending part of his summer holidays in Fifeshire, left London on his return to Cairo last Monday.

Reuter's Calcutta correspondent states that special prayers will be offered to-day in every mosque in India for the Sultan of Turkey.

A marriage has been arranged, and will take place quietly at All Saints' Church, Cairo, on the 19th inst., between Victor Charles Nixon, agent, National Bank of Egypt, Benha, and Hilda Mary, daughter of Mr. and Mrs. Henry Scott, of Andover, Hants.

Mr. R. H. Greg, second secretary to the British Agency in Cairo, is making a tour of Palestine and Syria.

Apropos of the departure from Malta on leave of absence of General Sir Leslie Rundle (already reported in these columns), the Malta corespondent of the *Morning Post* writes:—"Notwithstanding the political excitement, the General Election being imminent, the newspapers publish complimentary articles on Sir Leslie Rundle's administration. The Governor's readjustment of the Estimates, which enabled the Royal Commission to recommend that there should be no increase of taxation, has caused considerable satisfaction here."

Mr. and Mrs. George Royle, who have been visiting friends lately in Scotland, are now staying for a short while at Bexhill, and will be returning to their residence at Ghezireh Palace Gardens, near Cairo, in the course of next month. The many friends in Egypt of Mr. George Royle will be pleased to hear that he has improved in health since his arrival in England last June.

Mrs. Brunyate, wife of Mr. Brunyate, Acting Adviser to the Egyptian Ministry of Justice, and Mrs. Blakeney, wife of Major Blakeney, Assistant General Manager of the State Railways, have arrived in Cairo from England.

Major-General Sir B. T. Mahon, C.B., D.S.O., who has been promoted to succeed General Sir H. S. Grant, K.C.B., as Lieutenant of the Tower of London, served in the Dongola Expedition of 1896 and at Atbara and Khartoum in 1898.

Miss Mariette Pallis, of Cambridge, a well-known botanist, has been in Roumania for some weeks, studying the flora of the country, especially that of the marsh districts and the Danube borders. Miss Pallis, who is accompanied by Miss Bouch, has made numerous excursions in the Campulung and Rucar districts, and has been assisted in her studies by M. Euculesen, of the Roumanian Geographical Institute.

Hussein Pasha Wassif, who has been spending some days in London, left Victoria on Tuesday for Paris, and will return to Egypt on the 9th instant by the Norddeutscher Lloyd steamer from Marseilles.

The German Emperor has conferred the second class of the Order of the Red Eagle upon M. Stancioff, councillor of the Bulgarian Legation at Berlin.

Mr. Max Fischer is leaving Paris for Cairo viâ Constantinople on the 15th inst.

Chevalier Aquilina and family have arrived in London from Cairo.

The gold medal of the International Geological Association (for 1912) for original research has been awarded to Mr. Alexander J. Sefi, elder son of Mr. A. Sefi, of Stanley Gardens, Cricklewood.

King Carol of Roumania has conferred the Grand Cross of the Star of Roumania upon Mirza Ali Khan, the late Persian Minister to Roumania. His Majesty has been appointed a Field Marshal of the Russian Army.

The death has occurred at Uxbridge of Colonel H. Garde Rice, late Army Service Corps, who saw service with the Sudan Expedition of 1885, when he was awarded the medal with clasp and the bronze star.

The death has occurred of Colonel W. S. Churchward, late R.A., who took part in the Egyptian Expedition of 1882 and was present at the battle of Tel-el-Kebir.

The wife of Mr. George A. Lloyd, M.P., give birth to a son on Monday at 99, Eaton Place.

The will of the late Miss Stella Louisa Mackie, daughter of the well-known physician, the late Sir James Mackie, of Alexandria, has been proved at £19,360, with net personalty £19,266.

Mr. Michael Spartali, aged ninety-three, who with his wife has just celebrated the seventieth anniversary of his wedding day at Sandford House, Godshill, Isle of Wight, was formerly Consul-General for Greece, and attended the funeral of George IV. and the coronation of William IV. On the declaration of war by England against Russia in 1854 Mr. Spartali's special courier announced the war at Constantinople to Sir Stratford Canning (British Ambassador) and to the Sultan two days before the British Government's special courier. Mr. Spartali was connected with one of the largest grain and general merchants' and foreign banking concerns in London from 1829 to 1884.

OBITUARY.

JUDGE ROYLE.

It is with deep regret we have to announce the death of Judge Charles Royle on Friday last at Bexhill-on-Sea, where his brother, Mr. George Royle, of Ghezireh, is at present residing. The late judge was one of the best known and respected members of the British community in Egypt, and his death will be greatly felt by the host of friends he had in that country, and more especially in Cairo, where he resided since his elevation to the Bench as a Judge of the Court of Appeal some ten years ago. He, like his brother, belonged to a legal family, and was the son of the late Mr. William Royle, solicitor, of Lymington, Hants. Like his younger brother he also began life in the Royal Navy, from which he retired after nine years' service to commence studying law. He secured two exhibitions as law student, and was called at Lincoln's Inn in 1865. He subsequently practised in England at the Chancery Bar previous to proceeding to Egypt, ten years later, and commenced practising in Alexandria, where he became very popular, and was one of the founders of *The Egyptian Gazette*, the first English newspaper published in Egypt, which was started in 1879. Judge Royle was a regular contributor to the *Standard*, *Pall Mall Gazette*, *Temple Bar*, and other publications, and was the author of several important works, including his last, "Egyptian Campaigns." The subject of our short memoir was never married, and was born at Lymington in 1838.

DOMESTIC ANNOUNCEMENTS.

The charge for Announcements under this Heading is 2s. for three lines and 1s. per line afterwards. Minimum charge, 2s. All announcements must be authenticated with the name and address of sender.

BIRTHS.

BRISTOW.—On September 22, at Hill House, Pulborough, Sussex, to Mr. and Mrs. E. Lyell Bristow, of Port Said, Egypt—a daughter.

FRASER.—On September 21, at Glenmoriston, Ness Bank, Inverness, the wife of H. Fraser, Suez, Egypt—a son.

GRANT.—On September 28, at Burgate Manor, Fordingbridge, Hants, the wife of Major P. G. Grant, R.E. (attached Egyptian Army), of a daughter.

MARRIAGE.

HASLUCK—HARDIE.—On September 26, at Pluscarden, N.B., by Rev. R. Gordon, of Pluscarden, and Rev. R. Cowan, of Elgin, F. W. Hasluck, of the British Archæological School in Athens, younger son of P. P. Hasluck, of The Wilderness, Southgate, N., to Margaret Masson, eldest daughter of John Hardie, Easterton, Elgin, N.B.

DEATH.

PETROCOCHINO.—On the 29th inst., at 80 Westbourne Terrace, W., Despina, widow of the late Demetrius Petrocochino, aged 74.

FRIDAY, OCTOBER 4, 1912.

THE INFLUENCE OF BALMORAL.

On one side Turkey, on the other four Balkan States whose territory marches with the Ottoman Empire. Five armies hurriedly mobilised, and bayonets gleaming on a long frontier line, where even in the dull days of peace rifles have a habit of going off by themselves. It is no question affecting the interpretation of abstruse phraseology, no nice point of national dignity, no sentimental championing of an abstract principle that stirs the opposing forces; a fierce inherent hatred of one another urges them to try conclusions in what would be, if they were left to themselves, a life-and-death struggle. Little wonder, therefore, that those to whom anticipation is the soul of life declare that war is inevitable or that a miracle alone can prevent it. The answer to the first proposition will be known in due course, and if the march of events brings confirmation, no conspicuous prescience will have been shown. In the meantime the hours pass and war is not yet declared. Shots may be fired here and there, but the contending armies are at present under restraint. The theory of miracles is not universally accepted, and one may pause to consider whether there are not more simple causes at work to explain the strange phenomenon now presented in the Balkans. In the first place, the motive for war is one of long standing; various incidents have recently brought the deep waters of national hatred on both sides to boiling-point, and it would be idle to deny the effect of the Kotchana and Berane massacres on public feeling in Bulgaria and Servia. But a hatred that is ingrained does not prevent the accession of reason as does the sudden flame of a new passion. Bulgarians and Turks have been at one another's throats before and hope to indulge in the agreeable sensation again. But experience teaches them that the contest is unsatisfactory when the snows have begun to fall, and the more seriously the two sides mean business, the keener the anxiety to see that the conditions are favourable for the greatest possible effort. In the second place, between the war-lust of the people and the actual declaration of war lies the calculating wisdom of the respective Governments. While the frontiers are bristling with bayonets, the whole weight of European diplomacy has been thrown into the scale of peace. The first throw, for which the Austro-Hungarian Foreign Minister was responsible a few weeks ago, appeared to miss the delicately poised balance altogether. As a corrective for that mistake Europe has to welcome the recent conversations between Sir Edward Grey and M. Sazonoff. There is reason to suppose that their exchange of views covered the situation in the Near East, and any restraining influence brought to bear on Turkey and the Balkan States will have derived its practical effect from the agreement reached at Balmoral. If, therefore, peace is maintained while the massed armies of the Balkans continue to face one another for a short time, it will be found that the approaching snows of winter and the joint representations of the British and Russian Governments, holding out the sure promise of greater advantages from the maintenance of peace than from the arbitrament of war, will have supplied the very homely ingredients of this Balkan miracle.

Whatever the solution of the Near Eastern crisis—whether peaceful, as we hope and still believe, or by an appeal to arms—the influence of Balmoral stands and will in due course make itself felt in the Balkans. In the meantime, British and Russian interests march together in other parts of the world, and their importance gains with the degree to which in any given quarter they hold the field to the exclusion of other outside interests. Pressing as was the situation in the Balkans, the original purpose of the meeting between M. Sazonoff and Sir Edward Grey was connected more closely with Persian affairs. For this reason and also because in referring to that country the two statesmen are free to announce their intentions without regard to other European Governments, the statement issued from Balmoral on the subject of the conversations dealt mainly with Persia. No new political agreement affecting that country, it was announced, had been discussed, and neither Great Britain nor Russia has any intention or desire to partition Persia. In order to expedite the withdrawal of foreign troops from Persian territory, both Powers are carefully considering how they could best assist in strengthening the Persian Government for the purpose of enabling the latter to re-establish order and to secure the safety of the trade routes.

In the carefully chosen words of this *communiqué* we shall probably be right in seeing the first beginnings of a serious attempt to apply the influence of Balmoral to a constructive policy in Persia. There is to be no violation of the integrity of Persia, and such measure of independence as she still possesses will be retained by her. But instead of allowing things to drift and remaining indifferent spectators of a Persia falling to pieces from political dry rot, the two Powers have now agreed to adopt a definite line of action with a definite goal in view. The details of the new policy may have yet to be filled in. Of the main features we know only that they include an adequate grant of money to the Persian Government to enable it to maintain an effective gendarmerie and to carry on the administration of the country. Law and order are to be preserved by the gendarmerie, but whether this force is to remain under Swedish officers or is to be under Russian officers in the north and British officers in the south is not yet made known. From the action of the two Governments it is to be inferred that they will make it clear to all pretenders that they can countenance no challenge of the authority of the Teheran Government. Any comprehensive survey of the financial situation in Persia that must have preceded the decision to make arrangements for a large loan will have taken into consideration the question of railways, without which the development of the country must remain arrested. We shall be surprised if in that survey any room was found for the Trans-Persian railway scheme. The influence of Balmoral, we may hope, has at least eliminated that disturbing element, to which we have always been opposed, and has cleared the ground for more useful lines in the south, while the Russian system is being extended to Teheran. Too much has happened in Persia to allow that unhappy country to attain any permanent amelioration of its lot apart from the active assistance of the two Powers. The urgency of a constructive policy has repeatedly been emphasised in these columns. When one has been agreed upon, it becomes necessary to watch that no mistakes are made in the method of its application. Between the intentions of the Russian Government and their interpretation in Persia, past experience has shown that there is often a wide gulf fixed. By that way have most of Persia's troubles reached her. In future we have a right to expect more harmonious relations between Russian consular and military officials in Persia and the Persian people at large. Great Britain's responsibility in this instance is not restricted to improving the state of affairs in the south. There is no need to doubt the goodwill of her partner in the north, but it is her duty to Persia to see that the spirit of the new policy prevails throughout the whole country. Only by practical co-operation on these lines can full justice be done to the influence of Balmoral.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

As far as I have been able to ascertain, the general feeling in City financial circles having interests in the Near East is that a lasting settlement of the Macedonian question is urgently desirable, even although such solution should involve war between Turkey and the allied Balkan States. It is felt that such a war would not be of long duration, in view of the approaching winter, but more especially owing to the financial position of the States engaged. Many pending questions, productive of irritation and uncertainty, would, it is believed, be more or less permanently settled, to the subsequent advantage of all interested in the commercial and financial development of the Balkan countries and Turkey. At the same time, it would be infinitely regrettable that the gradually accumulating surpluses of the allied States should be dissipated, and these States involved in ruinous expenditure, just at the moment when their finances seem on the point of entering an era of quite unparalleled prosperity. Still, if war *must* come, the Great Powers can, at any any rate, "hold the ring" and enforce a more or less equitable settlement when the war spirit shall have exhausted itself.

***

It is reported that the Turkish Ministry of Finance has approached the Ottoman Bank with regard to another Treasury bond operation, in connection with an eventual loan of several millions, to be secured on tithes and the sheep tax. I understand that the rate of interest proposed by the Turkish Government for the suggested new loan is 4 per cent., but I venture to prophesy that under present conditions no financial institution would for a moment consider any proposal involving a loan to Turkey at less than 5 per cent. However, I imagine that Turkish Ministers will not be inclined to haggle on this point.

***

The Sudan Government has recently been giving attention to the possibility of improving the condition of the ostrich feather trade. At present the trade appears to be in the hands of natives of the poorer classes in Kordofan, and owing to ill-feeding and lack of intelligent attention, the breed of birds tends continually to degenerate. This evil is intensified by a tendency towards too frequent plucking of the feathers. In order to secure the revival and development of this trade, it will be necessary to improve the breed of the ostriches—a matter requiring a long time and careful expert guidance. Of course, the question would be comparatively simple, if South African birds were procurable for breeding purposes; but, unfortunately for the Sudan, the export of eggs and birds from South Africa is forbidden. However, in spite of these difficulties, I am certain that the scientific advisers of the Sudan Government will prove equal to producing a strain of birds whose feathers will be able to successfully rival the best obtainable elsewhere. This industry seems an essentially suitable one for Egypt and the Sudan. There is an ostrich farm near Cairo, operated by Germans, I believe; but I am afraid that the quality of the feathers is not of the highest.

***

Commenting on the establishment of the cotton markets (halakas) by the Egyptian Government, a London contemporary states that they will "be a source of considerable profit to the banks and merchants interested in the purchase of cotton." I do not quite see how this will be. On the contrary, I am afraid that many merchants interested in the purchase of cotton will resent the innovation as exceedingly likely to curtail their profits; for there is unfortunately no doubt that the fellah has often been robbed of a part of his just due, by fraudulent weighing and the imposition of prices below those officially current in the great cotton market at Alexandria.

***

This and similar protective measures instituted in the interest of the fellah are excellent and praiseworthy in every way, but it is certain that they will to some extent fall short of their object, as long as the cultivator preserves his inbred suspicion of all innovation. This will doubtless disappear with the progress of education, but the process will be a slow one, and the fellaheen will continue to furnish many a victim still to the astuteness of the native "business man."

***

I read in a contemporary that the National Bank of Egypt is sending one of their chief officials from Cairo to Adis Abeba in connection with the business of the Bank of Abyssinia. This tends to confirm rumours which have reached me regarding forthcoming developments in the affairs of the latter institution. The Bank of Abyssinia made a rather unfortunate début, but the last few years have been devoted to quiet and conservative work, which is now commencing to bear fruit.

***

A correspondent writes to me inquiring about a company which, it is stated, is in course of formation in Roumania for the purpose of "erecting buildings of all sorts on English plans." This company is further said "to have in view the building of an hotel at Bucharest, and the representative of the concern has been endeavouring to place some shilling shares in Roumania, giving a most glowing description of the prospects, and has succeeded in placing some of these shilling shares at five shillings and sixpence each." Certain of the English names mentioned by my correspondent are calculated to inspire anything but confidence, and I would most earnestly advise the utmost caution in any dealings with the concern in question. Any company which has to resort to "peddling" shilling shares is scarcely likely to earn even modest dividends for shareholders.

***

The *Lübecker General-Anzeiger* is perturbed over the Balmoral interviews and the partition of Persia, which it naïvely assumes has been decided on. The patriotic journal, constituting itself the watch-dog of German interests, calls upon its Government to secure trade advantages for the Fatherland in Persia, as "compensation" for—what, indeed?—for *possible* injury to interests which she *might* have had—but has not—in Persia. The mere fact that one day Germany will build a railway down the Tigris to Baghdad is regarded by a certain growing section of the German nation as giving their country a special right to influence, not only in Mesopotamia, but in Persia as well.

***

On another page my readers will find an interesting extract from the report of our distinguished Consul-General at Meshed, in which are described the disadvantages under which British trade labours in competition with that of Russia in Northern Persia. This description will illustrate the urgent need for railways throughout the country—not one great trunk line, but a well-planned progressive system reaching those parts of Persia which are susceptible of trade development. As far as the requirements of British trade are concerned, I am convinced that a prime necessity is the much-talked-of railway from Mohamera to join the future Russian northern system at Kermanshah. Only by this means can we assure our commercial supremacy in the south and compete under reasonable conditions in the north.

***

In the Consular report on the trade of Khorasan for the year 1911-12, I read that "a merchant who has had a consignment lying near Kermanshah for nearly a year, awaiting security of the road, now suggests sending them back to Manchester to be sent here, viâ Russia, by parcel post." This gives a more vivid idea of the state of the country than much description could. That even after waiting a year it should seem more profitable to return goods from Kermanshah to Manchester for retransport to Persia by parcels post than to await the establishment of security on the trade routes is a fact which eloquently expresses native views on the probability of early restoration of orderly government.

***

I hear that Wild Bey, the managing director of the Nungovich Hotels Co., who has been staying at the Piccadilly Hotel, has left London for Germany, where he will visit the principal cities in connection with the movement on the part of the leading hotels in Egypt and other caterers for attracting tourists to that country during the winter season. Last year the first step towards the realisation of the scheme for attracting more visitors to the banks of the Nile was taken by the formation of a committee representing the Egyptian hotel companies, Messrs. Thos. Cook and Son, and the Hamburg and Anglo-American Nile Co., the Egyptian State Railways, the International Sleeping Car Co., and others, who, between them, raised a fund of nearly £2,000. Of this sum £1,200 will be spent in Germany this year in advertising the advantages of Egypt as an ideal winter resort both for health and pleasure, and next summer a larger amount will be devoted to booming its attractions in England and the United States of America, for which purpose an expert advertising agent is to be engaged to conduct the campaign in the two countries. Mr. Wild will return to Cairo on completion of his mission, about the end of October, and will then submit a detailed report to the members of the committee.

Constantinople Business Letter

(From Our Special Trade Correspondent.)

Constantinople, September 23.

Delays in Discharging Goods.

Complaints have been made on various occasions by steamship agents at the delays in handling cargo in this harbour. At one time the cause for complaint was the insufficiency of lighters, steamers having been unable to obtain the lighters required for the discharging and loading of cargo. Since the commencement of the year, the Wilson Line has on more than one occasion discharged the cargo from its steamers on to the Quay Company's pontoons alongside the Stamboul Custom House, which is the berth for the Liverpool liners. No satisfaction has been obtained, and the conditions remain the same. Quite recently the War Office has requisitioned lighters which were already alongside of steamers to take cargo. All the agents of the several Liverpool liners, as well as the agents of the Wilson Line, have now petitioned the British Chamber of Commerce complaining of goods being kept on pontoons and lighters for periods varying from fourteen to twenty-one days before being discharged into the Custom House. At the same time a petition has been signed by some of the largest importers of British goods complaining of the delays in obtaining their goods. The Customs Administration, on the other hand, complains of merchants leaving their goods for indefinite periods in the Custom House warehouses, thus encumbering the warehouses, and in order to force them to clear their goods promptly has decided to double the storage charges. The Maritime Chamber at a meeting held on Thursday of this week, has had the same question of delays under consideration. There is no getting round the fact that at a time when the imports have been slightly below the average, there has been very considerable congestion, and while there have been and are still certain exceptional conditions obtaining, unless some means of meeting the situation are devised, with shorter days approaching and a likely considerable increase in the arrivals of goods at this season, matters will become worse instead of better.

The exceptional conditions I have referred to date from several months back. In the first place, after the closing of the Dardanelles for a month, there was an unavoidable congestion, but this would seem to have been handled in an admirable manner by the Customs authorities. There has also been a shortness of "wherewithal," which has prevented many dealers from taking up their documents and withdrawing their goods. I also had occasion in my last letter to refer to the accumulation of goods for the War and Admiralty Departments, which have not been cleared for similar reasons, in some cases for several months. There has also been the recent month of fasting, when less work can be obtained from the Customs official, and more especially from the Kurdish porters. However, when this much has been said, I have exhausted all the extenuating circumstances in favour of the Customs Administration, and while I am certain that all the interested parties, with some of whom I have had conversations, are unanimous in appreciating the benefits Sir Richard Crawford, the Customs Adviser, has conferred upon trade, both in the granting of facilities and in the reorganisation of the entire service, there are at the present moment conditions which require serious attention and the good-will of all concerned in order that the causes be removed.

Sir Richard Crawford has consented to meet a delegation of shipping agents, merchants, and representatives of the Chamber of Commerce, and I have no doubt but that good will result of this meeting. It is irrefutable that delays have occurred in the landing of goods at the Stamboul Custom House, whatever the cause, and one agent informs me that the cost of landing goods has, owing to these delays, in some cases exceeded 10s. per ton, and this is doubtless being added to the freight on British goods, which is a serious matter. I have also learned from one importer that he has been able to clear his shipments coming from France by Messageries steamers on the third day after the arrival of the steamer in this port, while goods which had reached this port by one of the British lines more than a week earlier, were only obtained fifteen days after the date of arrival. This importer rarely has his goods carried by British steamers, but prefers to have them shipped from London viâ Marseilles. The explanation of this difference in the time of delivery is that the French vessels moor alongside the Galata quays, and discharge directly on to the quay, whereas, for want of berthing space on the Stamboul side, the British liners moor stern-on and discharge into lighters and pontoons. The sooner we are able to fall into line and obtain our goods with a minimum of delay the better for British trade and shipping; hence the importance of the question.

A Lesson.

Italy exported to Turkey a cheap grade of wax matches which reached an annual figure of £60,000. Since the declaration of war and the imposition of a prohibitive duty, these goods have had to be drawn from other sources. I expressed my views in a recent letter on the subject of the lack of enterprise and initiative of British manufacturers in regard to this market, and was pleased to learn a few days ago of a local agent who had been a large importer of Italian matches having succeeded in getting one of the oldest established and largest British manufacturers of wax vestas to make an article exactly similar in appearance and packing to the Italian matches which had the largest sale on this market. Since the introduction of this British substitute he has done a business of £10,000 in this line. The box is retailed at the same price as was the Italian, and it required the stoppage of the supply from that country for a British manufacturer to be taught that he could supply, I presume at a profit and not for the love of the thing, an article which he would otherwise never have bothered himself to try to introduce. Such an instance makes one wonder how many other articles are only waiting the initiative of British manufacturers to meet the requirements of this particular market, which reflection I offer to the *Mercantile Guardian* to make light of in its usual playful manner—"British industry is, fortunately, not in such straits, etc.," and "the manufacturer has to recognise what he is best equipped to produce, etc."

The Prefecture of the City.

The Technical Council of the Prefecture will shortly send a commission abroad to purchase an up-to-date model of refuse carts for the scavenger service of the city, which is to be entrusted to specialists engaged in Europe. The Prefect is stated to have communicated to the Ministry of Public Instruction the necessity of placing seismographs and pluviometers at certain points of observation in the city.

The Ottoman Steam Navigation Co.

The three passenger steamers ordered by this company of the French St. Nazaire firm have had their trials, and it is hoped to obtain a safe-conduct for their delivery to Constantinople. I am tempted to ask "What about the three similar ships ordered of the Thames Ironworks Company, now in liquidation?" An echo, no doubt inspired in some way by the company which had paid the first instalment, and the Imperial Ottoman Bank, which advanced the balance, answers what certainly sounds like—"damnation"!

SUDDEN DEATH OF AN ARMENIAN MERCHANT.

Mr. G. K. Gulbenkian, a well-known City merchant engaged in the Black Sea trade, died suddenly about noon on Monday at the Baltic Exchange. The deceased gentleman, who was about 53 years of age, and a member of the firm of Messrs. Gulbenkian Brothers and Company, 17, Gracechurch Street, was conversing with a friend upon business affairs when he suddenly collapsed and fell to the floor. Upon medical assistance being summoned life was pronounced to be extinct.

TURKISH TOBACCO.

The Ayassolouk 1912 Crop.

(From a Correspondent.)

Smyrna, September 22.

Tobacco merchants, exporters, and growers are all deeply interested at present in the new crop, and this forms amongst them the sole topic of conversation. As usual, they all look to the American Tobacco Company to see what its agents are doing, or going to do, and this year a new feature has been introduced in the form of the British American Tobacco Company. Although, according to the recent judgment of the American courts, there is now no actual American Tobacco Company—or, in other words, Trust—but a number of smaller companies, the interests still remain more or less the same, while the methods, if anything, are more sweeping than before. Until now the one big foreign company buying tobacco leaf in Smyrna and district was the American Tobacco Company. This, of course, has been split up, and there are the Export Leaf Company, the W. H. Alston Tobacco Company, and now the British American Tobacco Company has also sent out representatives. The head of the latter combine is the famous J. B. Duke, who was so long the ruling spirit of the trust. An ambitious and energetic man, he is extending his field of operations into Turkey, much to the dismay of the small private tobacco merchants. His influence was soon heavily felt, the agents of these big companies buying up almost the whole of the new crop at very high prices and leaving very little tobacco for most of the native buyers. One well-known merchant was fortunate enough to commence buying before the agents of the combine, but afterwards no one was able to pay the high prices the Americans gave, the increase over last year's figures being 40 per cent. to 60 per cent.

The crop this year is estimated at about 3½ million okes, of which 3 million okes are Ayassolouk and ½ million okes Sari. It is a moderate one, both in quality and quantity, and is somewhat affected with the Bassara disease. The quality is not so good as last year's, and the tobacco is also strong in taste owing to the long drought which prevailed this year.

The stock in hand in Smyrna is the usual one, and there is only a moderate one in Europe, where prices for cleaned tobacco have been exceedingly low, but when it becomes generally known that the new crop has been cornered prices will probably go up, especially as the more important factories and Régies in Europe will find it very difficult to obtain the raw leaf. The merchants here who have stocks in hand hope by holding on to secure high prices, and thus compensate themselves for their failure to secure any of the present crop, but the general effect of the advent in this market of the British American Tobacco Company has been depressing.

The permits, or teskérés, given for this crop by the Régie Monopoly to the peasant cultivators were for slightly over 100,000 deunums, as against 136,000 deunums the previous year, but only about 80,000 deunums were planted owing to the difficulty experienced in obtaining advances and to the long drought.

MESOPOTAMIAN IRRIGATION WORKS.

Reuter's Agency has received some interesting particulars of the progress made in the first portion of the works to be executed under Sir William Willcocks's scheme for the irrigation of Lower Mesopotamia. As our readers will remember, the works are being carried out by Sir John Jackson (Limited) for the Turkish Government on a percentage basis. The problem to be solved by the engineers is that which was tackled by the ancient Babylonians, the taming of the Tigris and the Euphrates, so that their flood waters, instead of spreading ruin, should bear prosperity to the land. The first step in the harnessing of the Euphrates has been taken just above Hindieh, some 75 kilometres from Baghdad to the south. Here the river is to be diverted by a dam, held up by a barrage and distributed through a regulator down the old Hilla branch, past Babylon to Hilla. The barrage is being built to the east of the present river bed. It is 250 metres long, and consists of 35 arches fitted with sluice gates 5 metres wide. The 6-metre high piers supporting the arches are now all finished up to the springing point of the arches. They are 1.50 metres thick, with key piers measuring 3.50 metres. This structure rests upon a foundation of 1 metre of concrete and 2 metres of brickwork. Adjoining the Upper Hindieh Barrage a lock is being constructed with an 8-metre opening for the use of the river traffic.

The vast nature of the undertaking is well shown by the approximate figures of the work. At the Upper Barrage alone there are 600,000 metres of excavation work, 7,000 metres of concrete, 23,000 metres of masonry, 17,000 metres of pitching, and 4,000 metres of puddling. This barrage will raise the level of the water by 7 metres, and there is a further drop of 2.50 metres to be negotiated immediately below. At first it was intended to effect this by means of a Lower Barrage at Hindieh. This having been found quite impossible, a subsidiary barrage has been begun immediately below the Upper Hindieh Barrage. It is a perfectly straightforward piece of work, and consists of a lock and a huge shelf of masonry. The masonry work has not yet been begun, but the excavations are well in hand. The work on Hilla regulator, some 300 metres above the Upper Barrage, which will consist of five arches, has been started. The 40,000 metres of excavation work have been done and the masonry is going up. When the regulator and the two barrages are finished a 40-metre thick earth dam will be flung across the stream, which is about 160 metres wide at the point, and the river will be turned into its new bed between the barrage and the regulator, and despatched, according to requirements, down the Hilla branch, which has been cleared out, and which, according to present surveys, will be properly canalised. At Habbania an escape is being constructed which will carry off the flood water into the ancient Babylonian reservoir. When these works at Habbania and Hindieh are complete, with the smaller irrigation canals, it is estimated that some 600,000 acres of land will receive a plentiful and constant supply of water.

Operations have been somewhat delayed by the Turco-Italian war, and the consequent political uncertainty in Constantinople, and there was also at the outset considerable difficulty in getting labour. In spite of these delays, however, the first portion of a scheme which seemed almost too great to be practical is now nearing completion. Further progress depends only on the financial conditions prevailing in Turkey. There is now a large amount of labour available. With the aid of the local Sheikhs some 2,000 men and women were induced to come into the work. Nothing has yet induced them, however, to adopt any of the Western labour-saving devices. They scorn to use a spade in the excavation work, and scratch away with a glorified hoe. They still refuse to recognise the superior merits of a wheelbarrow, and prefer to carry the earth they excavate in bags suspended from their heads. The habits of industry which they have formed, however, will bear most excellent fruit when the scheme is completed and there is plenty of fertile land clamouring for labour.

TRADE OF PERSIA.

Kerman.

In his report upon the trade of the Kerman district for the year 1911-12, Lieut.-Col. T. W. Haig, I.A., H.M. Consul, states that in spite of the general insecurity of the roads, of numerous robberies, and of high freights, the value of imports from India and the United Kingdom has risen from £94,679 to £124,115 in Kerman, and from £11,472 to £22,795 in Bam, while the value of imports from Russia has risen from £23,445 to £29,165. This is satisfactory on the whole, but there appears to be no reason, except the deplorable condition of the roads between Kerman and Bunder Abbas, for the considerable increase in imports of Russian piece-goods.

American petroleum has been completely ousted by the Russian product, which is also diminishing the consumption of Belgian and Burmese candles.

The increase in imports of British and Indian piece goods is largely due to the recently aroused activity of native Zoroastrian merchants, who have begun to compete with the Hindus in the importation of these manufactures, for which there is a large demand.

The increase in the importation of cochineal and indigo is due to the carpet trade, in which these substances are largely used as dyes. There is an increase in both of the varieties of indigo imported. The cheapness of Multan indigo recommends it to the weavers of carpets of inferior quality; but the weavers of and dealers in carpets of the best class demand Calcutta indigo, which is richer in colour and more durable as a dye than that exported from Multan. The increase in the importation of copper is due, as was stated last year, to the partial or complete closure of Persian mines. In a country so disturbed as this, commercial enterprise is at a discount, and where 18 per cent. can be obtained for money placed out at interest, and without any exertion on the part of the depositor, it is improbable that any effort to develop the natural wealth of the country will be made.

The decrease in the value of carpets exported admits of no satisfactory explanation. Last year's figures, though all possible care was taken in their collection, were probably too high.

Pistachio nuts and almonds have been exported in greater numbers than formerly, owing to the activity of carpet firms, whose agents have taken up this trade as likely to be profitable; but the Consul learns that it has not satisfied the expectations which it raised, and is not likely to be attractive until communications are improved.

The statistics for internal trade show a very great decrease, attributable to the insecurity of the roads and the unsettled condition of the country.

Kermanshah.

In his report on the trade of the consular district of Kermanshah for the year ended March 20, 1912, Mr. Consul McDouall states that the year was a bad one for trade. During the spring there was as usual at that season, great delay owing to muleteers stopping to graze their animals on the road. After the occupation of Kermanshah by rebels the telegraph was interrupted, and the post irregular and unreliable. As the price of imported goods is largely dependent on the value of the pound sterling in local currency the interruption of the telegraph was a drawback to importers. The roads being unsafe goods accumulated in Kermanshah, and during the last three months there was almost a total stoppage of imports, goods, after leaving Baghdad, remaining at different caravanserais, especially at Khanikin on the Turkish frontier. In addition, the plunder of Kermanshah in February, 1912, and forced loans by the rebels impoverished the merchants and populace.

Cotton goods are the most important import. From Hamadan they reach Teheran, Resht and other places to the north. This trade is chiefly in the hands of agents selling on commission for Manchester firms with a Baghdad connection. In spite of the above troubles and a decrease in the amount imported due to non-arrival of consignments from Baghdad, Manchester goods have more than held their own.

Woollen goods are all declared as imported from the United Kingdom, but many are of Austro-Hungarian manufacture. The demand for those of British manufacture is increasing. Tissues of wool mixed with cotton were formerly included in tissues undenominated. These are now given separately in the customs returns. The heading wool and cotton tissues covers tissues of which either the warp or woof is wool and the other cotton.

Trade Conditions.

Commenting on the relative conditions under which English and Russian trade operate in Northern Persia, H.B.M. Consul-General at Meshed (Major P. M. Sykes, C.M.G.) reports as follows:—

Looking northwards Khorasan, through its capital, is connected by a road only 170 miles in length with Askabad, which is joined by a railway, a steamer service, and again a railway to Moscow. This is the main winter route. The main summer route is down the Volga to the Caspian, which is cheaper but takes longer. The Tashkent-Orenburg route is not used to any extent for trade with Persia.

A second route, available only for pack transport, runs to Doshakh, is 84 miles in length and is now much used. A third route, viâ Chaacha, reaches the railway at Merv after a journey of 170 miles. It is mainly used for exporting krans and for local trade. There is also the Khakha route, which is mainly used by pilgrims and is closed in winter.

To the south, on the other hand, whether Nushki or Bundar Abbas be the objective, interminable weary stretches of desert have to be crossed. Camels alone can be employed, and then only in the autumn, winter and spring; and, as the tables will show, the cost is not only very heavy, but the time occupied is also long. In other words, a merchant trading with the United Kingdom or India can turn over his money only once in the year as against five or six times in the case of the merchants dealing with Russia, and the fact that British goods are still imported is either due to their incomparable excellence or the fact that Russia cannot produce the article. Indigo, spices and tea belong to the latter category.

Owing to the fact that all goods from India are, with the exception of those despatched by the Nushki route, registered at the ports of entry, it is impossible to give more than a general impression as to the volume of British and British Indian trade.

"HOONDIS" AT MUSKAT.

The *Board of Trade Journal* announces that the Board have received, through the Foreign Office, a copy of a Notice containing the text of Regulations made (under Art. 1 of the Muskat Order in Council, 1867) by H.M. Consul at Muskat (Major S. G. Knox).

The regulations provide that all British subjects or British protected persons residing within the dominions of H.H. the Sultan of Muskat, on whom "Hoondis" (drafts), payable after a fixed period, are drawn for acceptance, shall, as soon as such a "Hoondi" is presented to them, sign it, and enter thereon the date of such presentation. Such signature and date shall be taken in H.M. Consular Court at Muskat as evidence only of presentation and not as evidence of acceptance. Any payee who has duly given notice of a "Hoondi" by the presentation thereof to the drawee, being a British subject or British protected person residing within the dominions of H.H. the Sultan of Muskat, shall, if such drawee refuses to comply with the foregoing provisions, forthwith give notice to H.M. Consul at Muskat of such refusal.

It is also notified for general information that the four days of grace usually allowed beyond the period specified in a "Hoondi" for payment after presentation will only be allowed if the drawee undertakes to pay the face value of the "Hoondi" at the place of business of the payee, and not if the payee has himself to proceed to the place of business of the drawee and collect the money due on the "Hoondi." Such undertaking by the drawee shall be given in writing to the payee one week before the payment falls due.

Openings for Business.

CEMENT IN EGYPT.

According to the *Bulletin Commercial de Bruxelles*, there is a good demand for cement in Egypt, 106,670 tons, valued at £162,751, being imported in 1911, although the importation in 1910 did not exceed 87,503 tons. The system of building in cement has largely contributed to the remarkable development in the importation of this material. On the other hand, the extensive harbour works at Port Said, recently commenced, and those about to be undertaken at Alexandria, will necessitate the use of large quantities of cement.

Imports from Belgium last year occupied first place with 50,257 tons, Great Britain coming next with 35,192 tons, and the remainder being divided between Austria, France and Germany.

Artificial cement is imported in barrels of 150, 180, and 200 kilog. gross, and in sacks of 45 to 50 kilog. Sacks are tending more and more to replace barrels, the reason for this being the rapidity with which cement is consumed. In some cases, however, barrels are preferred.

Natural cement is mainly used by the natives and for certain masonry work, Belgium being the principal supplier. It is imported in barrels of 140 to 150 kilog. gross and in sacks of 45 to 50 kilog., sacks invoiced.

The question of sacks is apt to give rise to some trouble for the importer. Empty sacks are invoiced to him by the suppliers; if he keeps them or returns them in a bad state, he is debited with their value. The consumers of cement make considerable difficulties over these conditions, and it is usually the importer who eventually suffers any loss.

British manufacturers are in the habit of shipping cement in very light sacks but sufficiently strong to stand the journey. This method has given excellent results.

LUMBER MARKET IN SMYRNA.

U.S. Consul Horton reports from Smyrna that the total amount of lumber imported into Smyrna yearly amounts to between 73,000 and 85,000 cubic metres (cubic metre = 35.314 cubic feet), valued at 4,504,000 to 5,905,000 frs. The principal sources of supply are as follows:—Whitewood, 50,000 to 55,000 cubic metres, of which Roumania furnishes 20 per cent. and Austria 80 per cent.; redwood, 4,000 to 5,000 cubic metres, from Sweden and Norway; pine, 5,000 to 10,000 cubic metres, from Turkey; other lumber, 4,000 to 5,000 cubic metres, from Gravosa, Austria; beams, rafters, etc., 10,000 cubic metres, from Asia Minor. Shipments from Austria and Roumania are mainly through the ports of Braila, Galatz, and Constantza; from Sweden and Norway, through the various Baltic Sea ports; and from Russia through Odessa.

Prices have been steadily rising of late in prevision of forest depletion; but there is a prospect of the vast forests of Caucasia being opened up in the not distant future, when it is expected that prices will decline. A railroad is actually reported in process of construction to the Russian ports of the Black Sea.

About 60 per cent. of the whitewood brought in from Roumania and Austria is consumed in the manufacture of dried fig and raisin boxes and 40 per cent. for building material and manufacture of furniture. Redwood from Sweden serves for flooring. A number of other varieties of wood are also imported, such as teak, pitch pine, linden, and mahogany, which are used for decorative work and art furniture.

Freight from Odessa to Smyrna is 125 to 150 frs. per carload of ten tons, and from Roumania through to Smyrna 105 to 140 frs. Customs duty and landing expenses amount to about 14 per cent.

The price paid by the wholesale buyer varies from 45 to 82 frs. per cubic metre, according to quality, kind, and the condition of the market. The price obtained by the same is plus Customs duty and from 5 to 10 per cent. profit, according to season. The lumber from Sweden comes, generally, sawed and planed ready for use; from Roumania and Austria it is received in the rough, and is worked by the planing mills, of which there are some ten to twelve in town.

SOLE LEATHER FOR TURKEY.

A recent issue of the *Chamber of Commerce Journal* contains the following:—The Ottoman Empire offers an important market for sole leather, the imports of which amount in value to about £320,000 annually. The principal places of importation are Constantinople, Salonika, Beyrout, Smyrna, Trebizond, Alexandretta, Baghdad, etc. Smyrna imported 453,986 kilos of sole leather in 1908, 553,630 kilos in 1909, and 408,506 kilos in 1910. The annual value of the imports at Smyrna is from £32,000 to £34,000. The chief countries supplying this article are France, Belgium, Austria-Hungary, Italy, England, Germany, Holland, etc. France supplies more than half of the total imports. The superior qualities of French leather retain their old reputation in the region of Smyrna and head the sales. Competition is keen to supplant them, but the French goods still enjoy the preference of buyers. Local industry, which has developed considerably in recent years, competes to some extent with the foreign import trade. The competition specially affects light cowhides of 2 to 4½ kilos, as well as buffalo hides from China and Rangoon of 9 to 19 kilos weight. In dealing with buyers of leather it is necessary to meet their requirements carefully, as much from the point of view of quality as of credit to be allowed and the precise execution of the order. Much importance is attached to rigidity in the leather.

SOFT GOODS AT VARNA.

According to the *Oestereichisch-ungarische Konsular-Korrespondenz* (Vienna), the demand for cotton goods at Varna is brisk. Cottons for men mainly come from France. They are delivered in widths of 140 centimètres, at the price of 6.30 frs. to 6.55 frs. per mètre, c.i.f. Varna, with six months' credit. Italy imports stuff for peasants' dress at the rate of 0.70 frs. per yard, in widths of 68 to 70 centimètres. Plush comes from Germany in the proportion of 15½ per cent. of silk and 84½ per cent. of cotton, at the price of 1 m. 85 per mètre, in boxes of 25 mètres. England and Italy deliver cotton satins respectively at the rate of 4s. 5d. per yard, and from 1.35 frs. to 2.70 frs. per mètre, c.i.f. Varna.

Sacks for flour are supplied by Austria-Hungary. More than 400,000 were imported in June last.

TRADE OF PORT SAID.

According to a recent Consular report, trade in the district of Port Said during 1911 shows a satisfactory expansion when compared with the previous year. The total commerce amounted to £E4,032,600, as against £E3,324,000 in 1910 and £E3,058,100 ten years ago. The total includes transit and re-export figures, which were £E1,652,900, thus leaving the net import and export trade £E2,379,700, divided up as to imports £E2,038,900 and exports £E340,800. It is satisfactory to note that imports from the United Kingdom have increased by about £E132,600, and those from India and British colonies by nearly £E40,000.

GLASS WARE FOR SERVIA.

The Foreign Office has forwarded to the Board of Trade a translation of a Circular of the Servian Minister of Finance, dated August 28, providing that imported glasses, bottles, etc., in which drinks are served at cafés and beer halls, and which have their capacity marked thereon, may not be cleared through the Customs until the "Control of Measures" has certified that the marked indications of capacity are correct. This rule does not apply to receptacles *de luxe* for domestic use (engraved, gilt and similar glasses, and so-called "sets," etc.), nor to glass utensils for chemists, laboratories, and industrial purposes.

TENDERS INVITED.

EGYPT.

Supply of Oak and Pine Sleepers.—Tenders are invited by the Egyptian State Railways and Telegraphs Administration for the supply of 20,000 oak and 524,000 pine sleepers. Tenders to be addressed to the General Manager, Egyptian State Railways and Telegraphs, Cairo. The tenderer must forward by the same date to the Chief Engineer (Ways and Works), Egyptian State Railways, Cairo, samples of the sleepers which he proposes to supply. A deposit of 5 per cent. of the value of the offer, but not to exceed £E500, is required with each tender. Copies of the specification, containing form of tender, may be purchased, price 2s. each, from Mr. A. L. Webb, C.M.G., Queen Anne's Chambers, Broadway, Westminster, London, S.W. Date, November 28.

Supply of Diaries.—Tenders will be received at the Economat Central of the Ministry of Finance for the supply of diaries, in Arabic, English, and French languages, for the year 1913. Persons wishing to tender should apply to the Economat Central in order to consult the condition and specification of the supply. Tenders will be received up to October 12 (noon).

Railway Material.—The Administration of State Railways and Telegraphs invites tenders for the following:—(a) 14,150 metric tons of Vignole rails (date, November 25); (b) 1,247 metric tons of fish plates, etc. (date, November 30); (c) 1,600 metric tons of chairs; (d) 760 metric tons of turrels (date, December 10); (e) 240 metric tons of bolts and screw bolts (date, December 10); (f) 90,000 metric tons of cast-iron chairs (date, December 14).

Supply of Zinc and Aluminium Sheets for Photo-mechanical Processes.—Tenders will be received by the Survey Department, Giza (Mudiria) for the supply of zinc and aluminium sheets for photo-mechanical processes for the year 1913. Copies of the condition of contract, specification, and samples can be obtained from the Director-General, Survey Department, Giza (Mudiria). Date, October 15 (noon).

Supply of Manual Fire Engines.—Tenders will be received by the Under-Secretary of State, Ministry of Interior, Cairo, for the supply of two manual fire engines required for the police stores. Conditions of tender and specification can be obtained, on application to the Personnel and Equipment Department (Nizam and Ghafir Office), Ministry of Interior, Cairo, or to the Stores Department, Ministry of Interior, Bulaq. Tenders must be submitted on the printed form provided for the purpose, with a covering letter on stamped paper of 30 milliemes, and should be addressed to the Under-Secretary of State, Ministry of Interior, Cairo, enclosed in sealed envelopes, marked: "Tender for the supply of fire engines." Date, October 15 (noon).

BULGARIA.

Supply of Paints and Brushes.—Tenders are invited at the District Finance Offices, Sofia, for the supply of: (a) Various paints, estimated value 28,853 frs.; and (b) of brushes, estimated value 7,680 frs., required for the Bulgarian State Railways. Dates: (a) October 15, (b) October 16.

ROUMANIA.

Construction of a Fish Market.—Tenders are invited by the Caracal municipality for the construction of a fish market. Date, October 11.

Supply of Steel Pipes.—Tenders are invited by the Direction of Roumanian State Railways for the supply of steel pipes (Bessemer, Siemens, Martin, or Thomas) for the construction of the Baicoi-Constantza pipe line. One lot of 660 k. 650 m. of 127 mm., and one lot of 90 k. 300 m. of 228 mm. diameter. For fuller particulars see THE NEAR EAST of September 27 (p. 617). Date, November 25.

Engineering Notes.

A Pistonless Hydraulic Press.

The old wooden olive oil press, of a very ancient type, is still in use throughout the olive-growing districts of the Near East. It is a bulky, roughly made, wooden-screw press, requiring two or three strong men to work it by means of a capstan and a heavy lever. The inefficiency of such a contrivance is obvious, since a considerable quantity of oil is extracted by the buyers of the oil cakes, who use modern mechanical means for the purpose. Iron screw and lever presses and hydraulic presses are, of course, much in use, but in hilly countries where there are, as a rule, no roads, and all loads must be carried on mule-back, the adoption of such heavy presses is difficult. Again, in flat districts, where these can be carried on wheels, there is a drawback in their use, especially of hydraulic presses, when they are fixed in places far from town, and the help of a skilled mechanic for repairs or readjustment of any part means days of idleness and comparatively heavy expenses. For this reason, more than any other, modern mechanical presses are chiefly used in towns near the sea coast or in midland districts where the assistance of a skilled mechanic is near at hand. We have been thinking of all these as the result of a visit to a recent exhibition, where we saw a new pistonless hydraulic press, which, we think, may well prove suitable for the olive grower in the Near East. No power is required for this press other than that obtained from the pressure existing in the ordinary water main, or from water in a tank at the top of a building. The energy is exerted in an armoured collapsible cylinder, the head of which forms the platen of the press. No complex or auxiliary machinery is required, and no special foundation or skilled attendance are necessary, as once the tap is turned on the full pressure is exerted and maintained for an indefinite period. The running costs are negligible, and the maintenance costs nil. With slight alterations in the shape and size of the platen, and the size generally of the press, we believe that this pistonless press will be a boon to the olive grower in the less accessible districts of the Near East, for we noticed that the heaviest part is such as can easily be carried on a mule's back through rough or hilly roads.

An Oil Tractor.

An oil tractor also attracted our attention, which demonstrated its uses in a very admirable way, and we believe it to be most suitable for the agricultural districts of Roumania and in Asia Minor, where oil as fuel is very cheap. This tractor is capable of doing the work of many good horses in an ordinary working day. It can drive threshing sets, flour mills, or any other stationary or portable machinery. It can be used for ploughing, hauling, sawing, etc., and all this most economically and with little attention. It has a two-cylinder paraffin engine, and the power is transmitted from the engine through a special cone clutch to a cross-shaft by bevel gear, which can be reversed. One end of this cross-shaft carries two pinions for giving speeds of 2¼ or 4 miles an hour to the road wheels, while the other is fitted with belt pulley for driving threshing and other machinery. The driving wheels are provided with means for extensions which may be needed on light or soft land. In the demonstrations ploughing and threshing have been very successfully carried out by this tractor, 10 to 12 acres (40 to 48 stremmata) having been calculated as done in a day, ploughed 9 ins. deep on a consumption of 2¼ gallons per acre. The range of swivel, both horizontally and vertically, gives a remarkable capacity for crossing ditches and other inequalities in the surface. The tractor we saw was capable of giving 30 to 35 b.h.p. at 800 r.p.m. This size will be very useful and suitable for large estates, but as in the Near East small landowners are very numerous, a smaller size tractor will be appreciated, and would secure a large sale if properly introduced.

A New Oil-burning Device.

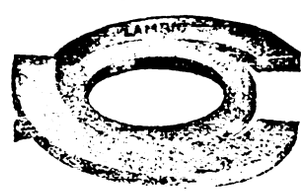
A member of the Busch-Sulzer Bros. Diesel Engine Co. has invented an oil-burning device which will be specially suitable for domestic heating purposes, japanning and annealing ovens, baking ovens, and cooking ranges. The inventor resigned his post in the Diesel Company in order to devote himself to the introduction and sale of his invention, which has already been adopted by many manufacturers.

The New Greek Destroyers.

The negotiations for the acquiring of the four torpedo destroyers recently built by Messrs. Cammell, Laird, of Birkenhead, by the Greek Government have been going on for some time. These have now been concluded, and the representatives of the Greek Government took the four vessels over on Wednesday, in the presence of Mr. Malandrinos, the Consul for Greece at Liverpool, and the representatives of the builders, Messrs. Cammell, Laird. Shortly after the Greek flag was run up on all the four vessels. The craft in question are the "Santiago," "San Luis, "Santa Fé," and "Tucuman," originally ordered for the Argentine Government, but not having left the builder's hands. The captains, officers, and crews, numbering about 200, have already been signed on for the delivery of these four vessels, whose destination is stated to be Piræus, and they were expected to sail yesterday evening at the latest. Since the negotiations have been going on the work of completing the vessels has been carried on at high pressure day and night. This hurried departure of four war vessels is significant in view of the acute war clouds now passing over Eastern Europe. These four ships, being of high speed (32 knots), and armed with heavy and up-to-date guns, will be quite an acquisition of some importance to the Greek Navy.

MACEDONIAN AND ALBANIAN COMMUNICATIONS.

(From Our Own Correspondent.)



Salonika, September 28.

Very recently Mr. Choublier, who a short time ago was the French Consul-General here, went to Constantinople to organise a mission or department for the construction of roads, bridges, etc., on which work had already begun, in Macedonia and Albania. We now hear that owing to the emptiness of the Turkish exchequer this scheme has to be dropped and the men dismissed. In consequence, several hundred will be thrown out of employment in the interior just as the winter is coming on; and, what is even more important, further delay will take place in the construction of those roads and means of communication said to be so necessary for the settlement and prosperity of the country.

NEWS FROM ALL SOURCES.

The Board of Trade are in receipt, through the Foreign Office, of translation of a Servian Royal Decree and Customs Circular, from which it appears that the prohibition of the exportation of cereals (wheat, flour, barley, oats, maize, bran, and hay) from that country is to remain in force until November 14 next.

As cattle plague has broken out in Abyssinia the Sudan Government has prohibited the importation of cattle from that country to Kassala and Sennar provinces.

The following firms are among the successful tenderers for the supply of clothing and equipment required by the Egyptian Police Stores Department:—Messrs. Hepburn, Gale and Ross; Thos. Hinshelwood and Co.; Thos. Petersen and Co.; the Limerick Clothing Factory; J. Compton and Sons; and Webb and Co.

We are informed that Messrs. Reynolds and Gibson, of Liverpool, have admitted to partnership, as from October 1, Mr. Francis Reynolds, Mr. William J. Walmsley, and Mr. Frederick S. Brown.

In virtue of a decision of the Turkish Ministry of War, the sons of natives of Egypt, Cyprus, Samos, Hedjaz, and Yemen residing in other parts of the Empire will have to serve in the Turkish Army.

The submarine "Delphin," which has been built at Toulon for the Greek Navy, left that port on Sunday afternoon for the Piræus.

The Lord Mayor proposes to close the Mansion House Fund for the relief of the sufferers by the recent earthquakes in Turkey at the end of the week. We much regret to learn that only about £1,500 has been received.

The threatened war has been responsible for the abrupt termination of a holiday which was being spent in London by two Servian officers, and both left for Belgrade on Tuesday evening.

Mr. Arthur Nichols, formerly manager of the Bank of Egypt in London, has returned to 76, Drayton Gardens, South Kensington, after an absence of several weeks in Paris, where he was engaged with some French financiers in the formation of a new bank in Morocco, which will have its head office in Paris and branches in London and the principal towns of Morocco.

Mr. Léon Boulad, of the firm of Boulad, Arcache and Company, commission merchants, of Alexandria, who had been residing at the Waldorf Hotel during the past few days, left London on Wednesday for Paris, on his return to Egypt.

Mr. A. G. Kenny, formerly of Cairo, informs us that he intends proceeding to Egypt towards the end of the year in connection with a business he will establish with that country in the beginning of next year for the firm of Thielmann and Co., of 39, Lombard Street, in which he has an interest. Mr. Kenny is at present residing at 44, Torrington Square, Bloomsbury, W.C.

The Cunard R.M.S. "Laconia" left the Mersey for Boston on Tuesday. This is the last voyage of the "Laconia" between Liverpool and Boston till the spring. On her next trip, departing from Liverpool on Saturday, October 26 (says a Liverpool contemporary), she will sail to New York, from whence she will undertake a couple of Mediterranean cruises. The second of these will be concluded on her arrival at New York, February 8, 1913. From February 15 to April 25 the "Laconia" will be chartered for Mr. Frank C. Clark's fifteenth annual cruise from New York to the Orient. She is due to arrive back in Liverpool about April 25.

Near East Markets.

SPECIAL REPORTS.

The following information is compiled from the weekly bulletins received at the London offices of the Imperial Ottoman Bank from its correspondents in the Near East:—

Jaffa. Sept. 25.

Wheat.—Prices rising. Superior qualities, P.J. 45; inferior quality, P.J. 39-40 per kg.

Barley.—Prices moderate, P.J. 20-21 per kg. No export movements.

Olive Oil.—Prices moderate, P. Naplouse 122-125 per jar of 16 okes. Imports unimportant.

Soap.—Prices unchanged, P.J. 1,450 per cantar. Exports: 300 cantars for Beyrout, Adalia, and Egypt.

Flour.—Prices falling. Imports, 1,200 sacks Adalia and 200 sacks Roumanian.

Oranges.—Export, 6,986 cases for Trieste, 1,525 for Hamburg, and 126 for Constantinople.

Busreh. Sept. 6.

Imports.—The market in general is satisfactory. Stocks of produce and cotton goods are normal.

Exports.—The great difference between the local prices and those prevailing in Europe has been making business between the holders of stocks and exporters somewhat difficult. The rise in prices lately experienced in Europe on the one side and the local fall in prices occasioned by surplus stocks has, however, given rise to some business. Since August 23 about 6,000 tons of cereals have been shipped, about half by the s.s. "Armanistan" for London, and the other half for Jeddah per s.s. "Mohammedi" and "Faris." A portion of this shipment came from Baghdad.

The date-picking has just begun, and the shipments this year will be slightly in advance of those of last year.

Angora. Sept. 21.

Mohair.—Business limited by reason of the smallness of local stocks. Buyers for export wish to do business and offer high prices, but they find only small lots of mixed quality.

Rarely have we experienced such a paucity in local stocks, which is general in neighbouring places also. Prices are therefore very high.

Cereals.—The crops are, as was foreseen, much below normal quantity. The deficit will amount to at least 30 per cent., and affects export business very unfavourably. Moreover, the quality of the new crop leaves much to be desired.

Arrivals have commenced and prices are maintained at a high level, especially for barley, which sells at prices hitherto unknown.

Adrianople. Sept. 25.

Peace seems more and more probable, and sources of complications appear to be avoided—at least, for the moment—and our market has shown more animation on the arrival of produce, which is finding an active export.

Mitylene. Sept. 21.

In consequence of the high prices of oil, exports have considerably diminished. We have to report only some small exports of, in all, about 250 barrels, valued at £2,500.

Imports.—A little more animation is shown. We have to note principally 500 sacks of coffee, 100 barrels of Boston rum, and some sugar from Trieste and Odessa.

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna, report as follows for the week ending September 20, 1912:—Our opium market has been active again this week, the sales amounting to forty-five cases, of which five are for account of local and interior speculators and the balance for England and America. We quote:—Old selected extra Carahissar, 22s.; new selected extra Carahissar, 21s.; current talequale as to quality, 17s. to 20s. Our large holders refused to sell at above figures, firmly maintaining the late higher bases. The arrivals amount to 1,465 cases, against 690 at same date last year.

CONSULAR REPORTS.

Sesame at Adana.

H.M. Vice-Consul at Adana (Mr. W. D. W. Matthews) reports that the yield of sesame in that district this year amounts to about 6,000 tons, as compared with 9,000 tons in 1911.

Cretan Olive Oil.

Mr. A. C. Wratislaw, C.B., C.M.G., His Majesty's Consul-General at Canea, reports, under date September 2, that the crop is a very scanty one, and it is thought that there will be very little oil left over for export when sufficient quantities have been kept back for local requirements. Consequently, the price is still high, the present quotation being £4 3s. per metric ton f.o.b. Canea.

Corfu Olive Crop.

The Acting British Consul at Corfu reports, under date September 14, that for the last two months the olive trees have commenced suffering from the disease *Mosca olearia*, which has assumed such proportions that at present the crop is considered as totally destroyed. The disease is attributed mostly to the lack of precautions on the part of the oil producers, who, instead of destroying the superfluous liquid refuse after pressing the fruit, left it exposed to the air, which practice gives rise to the breeding of the deadly fly. The stock of olive oil on hand amounts to from 40,000 to 45,000 barrels of 16 gallons. The prices at present are from £46 to £64 per tun (254 gallons) c.i.f. Liverpool, according to quality; acidity 11 per cent. It is considered that the prices will rise during the winter months, as there is a demand now from Italy and the French Riviera, which is likely to continue.

El Obeid.

The following extract is published in the *Sudan Times* of September 19:—

Although round El Obeid there has been no rain for some days the crop prospects generally are bright. Native optimism as regards the future is shown by the appearance of large quantities of stored-up dura in the suk here. The result is a considerable fall in price.

The removal of quarantine regulations, possibly as a result of lessening in cattle disease, has had the effect of reopening the cattle trade, and batches of bulls are now leaving for sale in Omdurman. Those sent so far have been chiefly purchased locally round El Obeid, and as yet practically no cattle from the West have made their appearance. Large numbers of sheep are sold daily in the suk. Just as this is written a batch of fifty head of cattle has arrived from Nahud.

A feature, as a result of arrival of the railway in Obeid, is the opening of an export from here of senna. Large quantities are now sent north, and the trade in this commodity is considerable and will probably increase.

PRODUCE REPORT.

London, October 3.

The markets have shown fair animation during this past week, and values are, in some instances, well maintained. Sugar is firm. Coffee steady. Currants firm for ordinary. Sultanas distinctly firmer. Seeds slow but unchanged. Oils steady. Corn quiet. Opium steady.

Sugar.

There is some evidence now of the depletion of Hamburg stocks. No less than 16,790 tons of beet have been actually shipped to North America during the past week, and this quantity will be repeated two or three times over very shortly. This means that we enter the new crop period with practically no sugar left over, the reduction in stocks being so complete that the United Kingdom is already waiting for new supplies. This remark applies equally to the Continental countries which grow the sugar and to the Eastern and American markets. The report this week on the Russian crop is an adverse one, owing to the weather being too wet; but whatever the crop may be, only 250,000 tons can be exported. Reports from Continental sugar-growing countries, on the whole, indicate that the output will be a large one.

Closing prices for beet sugar:—October, 9s. 5½d. to 9s. 7½d.; December, 9s. 7d. to 9s. 7¾d. f.o.b. Hamburg—Refined sugar, English, without change. Foreign—First marks granulated, October 11s. 7½d.; November-December, 11s. 6d. Russian crystals, ready, 11s. 6d. to 11s. 9d. f.o.b. Dantzic.

Coffee.

The market has taken quite a firm attitude, spot parcels realising a shilling advance, while speculative markets are about 2s. per cwt. dearer. Stocks in London are 13,432 tons, against 14,619 tons last year and 26,115 tons in 1910.

Washed Dumont small to bold was sold 78s. to 80s. 6d.; Mexican mid., 80s. 6d., and bold, 84s. Futures, December sold 64s. 3d.; March, 64s. to 64s. 0½d.

Currants.

Recent arrivals bring fruit of a satisfactory appearance and value. Prices remain moderate, although the market now shows a much firmer tone, and a rise for medium and better grades would occasion no surprise. Pyrgos bags, 24s. 3d. to 24s. 6d.; Pyrgos ¼-cases, 26s. to 27s.; Amalias, 26s. to 28s.; Gulf, 28s. to 31s.; Vostizza, 30s. to 36s.

Sultanas.

Another shipment of Greek fruit has arrived, and merchants evinced a desire to meet buyers in the matter of price. Of Smyrna fruit there is now a good selection, and the market is distinctly firmer.

Smyrna, good colour to very bold, 45s. to 52s.; fine, 55s. to 60s.; Greeks, 57s. to 63s.; Afghan, 44s. to 45s., old.

Figs.

There is a good demand for bags and boxes, as spot stocks are much below normal, and further shipments, so far as yet advised, are very light. Fine layers, 45s. to 50s.; good naturals, 28s.; choice naturals, 30s.

Dates.

Persian, Khedrawie, 60 lb. boxes, are quoted 14s. to 15s.

Seeds.

Business, generally, is slow, and there is little change to note in value. Linseed moved downwards.

London-Calcutta afloat sold 61s. 6d.; September-October, 60s. 9d.; October-November, 60s. 3d. Rapeseed, October, 50s. 9d. Cottonseed: London-Egyptian afloat was sold at £8 15s. 9d.; November-January, £8 10s. per ton. Canary seed, Turkish, 60s. to 64s.

Oils.

Linseed is rather quiet. Spot pipes landed, 33s. 3d.; barrels, 33s. 9d. Rape, ordinary brown, 30s. 9d.; refined, 33s. 3d. Cotton, crude spot, 26s.; refined, sweet, 30s. 3d.; ordinary, pale, 27s. 6d. Petroleum, American, 8½d. to 8¾d.; Russian, 7¾d.

Opium.

There is a better demand, and prices inclined to be higher; from 20s. 6d. to 21s. 6d. is offered for good Carahissar, but holders ask from 1s. to 1s. 6d. higher.

Corn.

Wheat.—The market is steady, with few sellers; buyers, however, appear indifferent. South Russian, on sample, prompt shipment, 36s. 6d. to 38s. 6d. Barley is firm, but the demand quiet; 25s. wanted Azoff-Black Sea loading; 24s. 9d., September-October or October-November. Parcels 3d. dearer; 24s. 4½d. paid for Azoff-Black Sea, August-September; and 23s. 9d. to 23s. 10½d. September-October. Oats are very quiet.

Various.

Almonds, Jordan finest, £10 to £11 per cwt.; good to fine, £9 to £10; small, £7 to £8. Cloves, Zanzibar, 7½d. to 7¾d. Pepper, 5½d. to 5¾d. Cream of Tartar (including Greek), only suitable for manufacturing purposes, 92 per cent., 84s. to 86s. in casks.

Cotton and Cotton Goods.

EGYPTIAN COTTON MARKET.

(From Our Own Correspondent.)

Alexandria, September 27.

Prices are firm. A rise took place on rumours of damage alleged to have been caused by boll-worm. Now this damage is shown to be of no importance, and this year's crop will be a record one.

The quality of the new cotton in Lower Egypt is good, but in Upper Egypt much of the cotton is of short staple.

The first picking is now general, and everything points to a crop of 8¼ to 8½ million cantars.

Our term market is animated. The bulls triumphed this week, profiting by covering purchases by bears and by purchases by exporters to meet actual sales. On the other hand, the bears persist in their belief that the weight of the crop will suffice to prevent a fresh rise. The future will depend, to our mind, on the demand for consumption.

The predictions that Georgia would produce a million bales less than last year is a factor militating in favour of a rise here, for, as is well known, the long stapled Georgia cotton is the most redoubtable competitor of the Egyptian varieties.

Cotton seed is rising. The demand is considerable, and the tendency is towards a still further rise.

The Crop.

In its sixth report on the condition of the cotton crop, the Alexandria General Produce Association says that, with the exception of some districts of the northern provinces, the temperature in Lower Egypt during September was generally favourable, although some fogs and abundant dews were reported. The boll-worm appeared in all provinces, but the damage resulting from this cause cannot be estimated exactly. The first picking was begun everywhere about fifteen days earlier than last year, and the results are superior to those of 1911. The result of the second picking depends greatly on this month's temperature; whilst as to the third opinions vary in the different provinces, but present prospects are for a yield considerably less than in 1911. The ginning yield is still somewhat irregular, and is rather inferior to that of last season. In Upper Egypt and the Fayoum the temperature was rather irregular, but, on the whole, favourable. The damage caused by boll-worm and fogs is of small importance. The first picking is expected to give better results than last season, but the second picking seems likely to be smaller and the ginning yield less than in 1911.

MANCHESTER REPORT.

Messrs. Reynolds and Gibson, Manchester, telegraph that the tone of the market last week was distinctly irregular and the volume of business passing decreased somewhat. Considering, however, such depressing factors as the Balkan crisis, the threatened lock-out, and the continued decline in the price of cotton, we have experienced a very strong undertone. Cloth was in moderate demand.

Miscellaneous business is booked for our lesser outlets. The Balkan trouble, however, is beginning to interrupt trade. Yarn: Inquiries for Egyptian yarn displayed an improving tendency at the commencement of the week, but the demand has dwindled during the last few days.

The immediate future of cotton prices is so uncertain (says the *Manchester Guardian*) that there is considerable reluctance on the part of buyers to do more than they need. Manufacturers, too, are disposed to be stiffer than they would be if they were sure about their costs for the next few days. There is a considerable inquiry from some of the smaller markets; and, though the Balkan trouble is, of course, a discouragement, there are many parts of what we vaguely call the Near East which are not affected by it. Some attempts to do business with Egypt are mentioned, and the Syrian markets are not quite dead.

EGYPTIAN COTTON FIGURES.

For 4th week, ending September 27.

Supplied by Reynolds and Gibson.

Out of Sight for Season.

	Season 1912/13. Bales.	Season 1911/12. Bales.	Season 1910/11. Bales.

(N/D „ Amer.)		6·22		5·46		7·23
Prem. of Egyptian over American		3·26		4·06		3·61

N.B.—The figures marked thus (?) are postulates.

COTTON GOODS IN THE LEVANT.

The *Manchester Guardian* (September 30) states that Manchester houses who buy for the Levant ports report a somewhat irregular demand for usual qualities of cotton goods for that market. The inquiries for suitable qualities for the coming season are fully up to the average, but considerable difficulty is now experienced, as the Constantinople and Smyrna buyers object to place contracts at existing prices for even well-known cloths. They prefer to take lower and cheaper grades, especially if the delivery question can be arranged. The difficulty is aggravated by the total absence of Italian-made goods, as in former seasons the distributing firms in Turkey were able to buy cheap lots of drills, flanneletes, and cabots often, with regard to price, to the disadvantage of the Manchester shipper. Heavy grey drills are decidedly dull, as the tendency is in favour of lighter-sized qualities, or makes that can be finished after leaving the looms. Stock-houses who supply the Beyrout and Syrian firms with their assortments of prints, dyed, and white goods are moderately busy. Indigo blue and "Para" red drills are in request, but stocks are scarce and dyers difficult to deal with. Clearing lots and seconds in greys are in demand, and holders can almost command regular prices for their stocks. The Persian trade through Constantinople shows no improvement.

ADANA CROP PROSPECTS.

Mr. W. D. W. Matthews, British Vice-Consul at Adana, reports that the cotton harvest in that district will begin towards the end of the present month. It is estimated that the yield will amount to about 100,000 bales, as compared with about 80,000 bales last year. About 4,000 or 5,000 bales of this year's production will be American cotton.

Mr. Matthews adds that the Deutsch Levantinische Baumwoll Gesellschaft has lost money in its attempt to introduce the cultivation of American cotton in the Adana district, and has decided to devote its efforts to improving the quality of the native (*yerli*) variety. The company has recently entered into partnership with a Turkish subject to work a farm of 6,000 deunums (about 2,100 acres) near Hamidieh. It is intended to select and sow the best of the native seed, and by careful selection it is hoped to evolve a superior quality of native cotton. Egyptian cotton is stated to be quite unsuitable, as it only ripens in the climate of Adana in very exceptional years. American cotton, on the other hand, could be successfully and profitably grown were it not for the lack of labourers.

LANCASHIRE AND THE SITUATION.

The course of events in the Balkans is being watched with keen interest and some apprehension in Lancashire. The effect on the cotton trade of a plunge into war would be very serious, for Turkey and the Balkan States are comparatively large purchasers both of cloth and yarn.

To give an indication of the extent of the exports of cotton goods to Turkey, it may be mentioned that in August last the shipments amounted to 47,168,000 yards, compared with 55,678,300 yards in August, 1911. This is not far below the average exports for a month to that country.

Greece also is a considerable buyer of cotton goods. Turkey alone took 1,351,100 lbs. of yarn in August, compared with 693,200 lbs. in the same month of last year. Bulgaria bought no less a quantity of yarn than 1,072,500 lbs. in August last, while 769,300 lbs. were sent to Roumania.

It will be seen that Lancashire has important interests at stake in the present crisis, and an outbreak of war would result in no small loss to cotton dealers.

SHIRTINGS FOR ABYSSINIA.

The *Board of Trade Journal* contains the following information from the report by H.M. Consul at Gambela (Mr. C. H. Walker) on the trade of that district in 1911, which will shortly be issued :—

Grey American shirting or sheeting is known as "abu geddi" or "abu gedid." As an article of clothing it is a necessity to the Galla population, and must always be considered as the most important article of importation into Abyssinia. Of goods included under the term "cotton fabrics" it is by far the most common. In 1911 the consumption via Gambela was about 1,500 bales of 25 pieces. Most of this was of Italian manufacture, and was deficient in strength and weight. The better qualities were American. Manchester shirting is not imported. (This statement would seem to be limited to Gambela; the imports of "abu gedid" into Abyssinia from the United Kingdom in 1910 amounted to about half the total quantity imported), as traders can obtain longer credit (in many cases one year) from Italian mills. The trade is increasing and should soon reach 3,000 bales. The through freight from Port Sudan to Gambela on cotton goods is about £12 18s. per ton—a 10-ton consignment costs £125 15s. 10d. If sent from Khartoum the steamer freight to Gambela is £6 15s. per ton.

The export of krans to Transcaspia did not attain its usual proportions last autumn on account of the restricted output of cotton there, due to early frosts. At the same period frosts badly damaged the cotton crops in Sabzavar and Nishapur, considerably reducing the amount of foreign exchange in the market.

Oil Topics.

Maikop News.

The latest news from the Maikop district is distinctly reassuring. The Black Sea Company received a cable that the well on Otvod No. 2, in the Neftianaya district, had spouted light oil at 1,320 ft. The well has been capped in order that everything might be made secure, and the pipeline connection was expected to be ready in three days. The oil has a specific gravity of .850, and should, therefore, be very valuable. This is really good news not only for the Black Sea shareholders, but also for other English companies. The plot is situated south of plot 408, and about three miles from the present producing area. Two new wells are being started. Adjoining this plot the British Maikop has a portion of a plot, and under the terms of its agreement it has been drilling a well which is down about 100 ft., and expects to strike the same oil as that struck in the Black Sea at about 1,400 ft. As the British Maikop has now plenty of money in hand (for it is selling its oil as high as 44 copecks a pood), it should be able to put down two or three wells near the Black Sea ground, and take the production away from the Black Sea just as it has taken the production away from the Victory. It is a curious thing that the engineers had condemned these plots and had said that there was no oil in them. However, it only shows how little some of the engineers know about oil occurrences in the Maikop district.

Black Sea Output.

The Black Sea output for last week was 937 tons, and showed a decrease of 28 tons. Maikop Spies output, however, slightly increased to 272 tons. This is satisfactory in view of the fact that one of its wells was stopped for twenty-one hours for repairs to the pump. British Maikop, which now has three wells going, has also had delays, and its output last week was 58 tons lower at 524 tons, but it ought to be giving us an output of at least 750 tons a week. The Maikop New Producers has an output of 158 tons. It will be a splendid thing for Maikop if by this new find of the Black Sea it turns out to have discovered a large producing area.

Maikop Amalgamation.

The Maikop amalgamation scheme does not appear to be meeting with the approval of all the shareholders. At the meeting of the Maikop Apsheron, which was called to approve the amalgamation, one of the shareholders opposed the scheme, and very properly pointed out that no accounts had been submitted and no information given regarding the Maikop Mutual Pipeline shares, and he also opposed on the ground that he saw no reason why the Maikop Apsheron should take upon themselves the liability of £60,000 owing to the Goldfields by the Maikop and General Petroleum Trust. When the scheme came out we pointed out some of the difficulties, and we confess that we are astonished that shareholders should agree to put up more money practically for the purpose of repaying the Goldfields of South Africa a loan they had made. It is hardly likely that the new company, burdened as it will be with a capital of £750,000, can ever pay a dividend. The Maikop Mutual Pipeline is now controlled by the Tweedy group. Most of the companies that are to amalgamate have a large holding in this pipe, and it is notorious that it has been unsuccessful, and that the shares are not intrinsically worth more than a few shillings apiece. A good many people are also very sore that whilst they have to pay up either 5s. or 2s. 6d. per share, as the case may be, the Maikop Hadijensky shareholders have to pay nothing. It is a very ill-considered reconstruction, and our advice to shareholders is that they cut their present loss and not throw good money after bad.

Central Carpathian.

A good many people have been asking when the Central Carpathian would amalgamate with the Premier Oil and Pipeline, and a meeting was held on September 30 presided over by Mr. E. T. Boxall, at which it was decided to wind up Central Carpathian voluntarily. The chairman stated that since May 1 the company's properties had been worked for the benefit of the Premier Company, and that the quarterly dividend declared by that company would accrue to the Central Carpathian on the 500 shares forming the purchase consideration. The net earnings from August to April of the present year would appear to be about £65,000, but £40,000 of this profit had been spent in purchasing the well of Isabella. Twenty-eight thousand pounds have been distributed in dividends, and there was therefore no more money to come to the shareholders. Indeed, the dividend that had been received from the Premier would be required to meet expenses. Some of the shareholders in Central Carpathian had been hoping that in addition to the share for share that they would get in Premier Pipes they might also receive some small cash consideration. That expectation will not be realised.

Galician Oil Trust.

The Galician Oil Trust is now producing between eight and nine thousand tons of oil a month, and as the price of oil is high it should soon be in a position to pay a dividend. Premier Oil and Pipeline, which began the year with a production of 11,620 tons, is now producing about 24,000 tons. Another good producer is the Cheleken, whose production has trebled, and has now about 12,000 tons a month. The Tcharken Cheleken has given us a very poor production, and is evidently not on such rich ground as the other companies working on this island. The Baku production is steadily falling away, the August production being 90,676 tons less than July. There is no doubt that unless the Baku people drill vigorously in the new grounds they will soon have a very serious crisis to face. Baku is a large city dependent entirely upon the prosperity of its oil wells, and these wells are steadily falling off. Fortunately the price of oil remains very high, and the leading companies must be making large profits.

A Roumanian Deal.

Another large deal in Roumanian oil property has taken place, the Trajan Company having sold a part of its territory at Poiana, Campina, Telega, Baicoi, and Scortzeni for 2,000,000 frs. The sale includes oil-bearing land, wells, material, workshops, factories, stores of all kinds, plant, reservoirs, pumping stations, and buildings. Of the purchase price 400,000 frs. is payable on signing the contract, 400,000 frs. on December 4, 1912, and the remaining 1,200,000 frs. in three equal quarterly instalments.

Tenders for the supply of pipes for the State pipelines will be opened on November 15. We recently gave particulars of the requirements and conditions. The survey for the construction of the 300 kilometres of line is well advanced, and work will be begun on excavation and grading immediately the contracts for pipes have been awarded. It is intended to run different qualities of crude through the same ten-inch line, but not, of course, to mix them. The two lines for refined oil will be used for two different grades, and the representatives of the refineries will be convened to decide among themselves upon standardising their products to two types for this purpose.

GREEK OIL IMPORTS.

A decree has been issued permitting the importation of oil for oil engines and motors under the following restrictions:—

(1) They must contain no vegetable or animal oils.

(2) They must be of a dark colour (about the colour of mahogany).

(3) Flashing point between 50 deg. and 170 deg. Centigrade.

(4) The acidity expressed in anhydrous sulphuric acid, must be higher than the highest permissible for lubricating oils.

(5) They must contain no oils which will distil at a higher temperature than 200 deg. Centigrade.

(6) They must not contain paraffin in sufficient quantity to make its recovery remunerative.

(7) They must not show a degree of saponification beyond 3-4.

BRITISH ENTERPRISE IN THE YENISSEI.

(From Our Own Correspondent.)

Odessa, September 22.

According to the *Sibirski Zhisn*, there has just arrived in the Bay of Yenissei a small steamer from Liverpool, chartered by a Mr. Derry, a London merchant, with a cargo of 10,000 poods of various instruments, machinery and colonial merchandise, consigned to several different firms in Yenisseisk and Krasnoyarsk. The steamer also brought two British specialists in timber from Norway, who will study the project of exporting from the Yenissei to the United Kingdom the more valuable kinds of timber, including cedar, found in the forests lying adjacent to the Kara Sea. These timber specialists will also extend their researches to the forests lying along the Angora, the Pit and the Ssym. Mr. Derry intends to establish a chief depot on the Yenissei Bay.

It is now many years ago since Captain Wiggins demonstrated the possibility of opening up a sea-route to the Kara Sea, easily navigable during part of the year, for the purpose of exploiting and developing the abundant natural riches of the Yenissei territory. It is to be hoped that Mr. Derry's new project will meet with the success it deserves.

MINING IN THE URALS.

(From Our Own Correspondent.)

Odessa, September 30.

During the last few years the contrast between the mining and metallurgical enterprises in Southern Russia and in the Urals has become more marked. Whilst these South-Russian industries are increasingly flourishing, those in the Urals are languishing. The chief causes of this state of affairs in the Urals are said to be the uncertainty of private possession, the lack of railway communication, and the paucity of properly organised limited companies—such as those operating in Southern Russia. St. Petersburg capitalists are now endeavouring, with the assistance of foreign banks, to give a new impetus to Ural industries.

English capitalists are also manifesting a lively interest in the more systematic development of the mineral riches of the Urals, but they have lost their appetite for gold-mining, which has proved fatal to many British undertakings. They are now turning their attention more especially to copper, platinum and iron ore. In copper, particularly, the Urals are abundantly rich, and the slowly, but steadily, rising price of that metal on the world's markets gives it a premier place in mineral productions. The output of Ural copper during the first half of the current year showed an increase of 40 per cent., as compared with the total product during the same period of last year. And notwithstanding this increase the supply of Russian copper is not yet sufficient to meet the demands of the home markets. Among the Ural enterprises which have during recent years proved most successful in copper is the Kyschtym works, which is financed by English capital; its working capital is 15 millions of roubles. The Saysertski works comes next in copper, and in that enterprise there is also English capital.

In the early years of Ural exploitation gold was the main attraction, and the indiscriminate rush for the precious metal involved many home and foreign companies in irretrievable ruin. Gold there is, of course, in the Urals, but, with few exceptions, the enterprises in the other metals mentioned above are the most lucratively promising. The most acute want of that region is railway communication, and any foreign company which could obtain, on favourable conditions, a concession from the Imperial Government for the construction of a network of light railways would in the result be well rewarded.

Shipping Intelligence.

BRITISH SHIPPING IN THE BLACK SEA.

(From Our Own Correspondent.)

Odessa, September 30.

Owing to a quieter tone on the foreign grain marts, business during the past week from Odessa, Nicolaieff, and Kherson has been less active than during the previous week, and freight rates show an easier tendency. Clearances from this port have been very limited in consequence of the paucity of grain arrivals from the interior. To-day's current rates are 15s. 6d. for Rotterdam and the same price for barley cargo for Hamburg. A small business has been done for Antwerp at 16s. 6d. At Nicolaieff the grain arrivals continue to be very heavy, and the shipments are on a large scale. Rates during the past week from the Bug port have been 16s. for Rotterdam and 16s. 6d. (barley) for Hamburg and the Weser. At Kherson business is slack and disappointing. There are fairly large stocks of grain in the local granaries, but shippers are holding back for firmer prices; consequently shipments are slow. Yesterday's rates from the Dnieper port were 16s. for London or Rotterdam and 17s. for Huil.

The Bessarabian maize crop threatens to be a total failure owing to the cold and rainy weather of the last week. It is too late in the season now to expect ripening weather.

STEAMERS FOR ROUMANIA.

Our Bucharest correspondent informs us that Commander Popovatz, director of the Service Maritime Roumain, accompanied by Lieutenant Commander Margineanu, commander of the s.s. "Dacia," has left for England with the object of visiting the various shipbuilding yards, and eventually ordering the new cargo boats which the Roumanian Government intend adding to their lines.

GERMAN COAL FOR EGYPT.

During the past few days (says a Liverpool contemporary) the shipments of German coal to Mediterranean destinations have been of an active character. So far this week 16,000 tons of German coal have been sent to Port Said and Alexandria, the coals being carried in English bottoms.

NILE TOURS.

The Hamburg and Anglo-American Nile Company has issued an attractive programme giving details of their steamer services from Cairo to Luxor, Assuan, and Halfa, with connection by the Sudan Government Railway to Khartoum and by special steamers to Gondokoro. The programme also gives details of steam yachts for private parties and other information for intending visitors to Egypt. These programmes may be obtained post free from the company's London office, 72, Regent Street, or from the principal tourist agencies throughout the world.

PASSENGER LIST.

First-class passengers for Alexandria from Marseilles per Messageries Maritimes s.s. "Dunbea," sailed September 26:—Mr. J. R. Reeves, M. and Mme. Lefreve, Mme. de Bellefaud, MM. N. Nauffal and Gibard, Mme. Pourrievre Bey, M. Vanzella, Mme. Vanzella and child, M. and Mme. Joudet, M. and Mme. Baimondi and two children, M. Brule, M. and Mme. Emmanuel and two children, M. Gullo, M. Pailli and family, Mme. Megrand, Mlle. Saule, Mr. Green, Mrs. Green, Mlle. Bourgeois, Mlle. A. Fonteneau, M. and Mme. Nancy, M. Sani Cassis, M. and Mme. Nahas and daughter, M. Caslar, M. and Mme. Zahar, M. Pagnaux, Mrs. Millet and child, Mr. and Mrs. Hobbs, M. Aroni, M. Tondeur, Mr. Millet, Mme. Thomas Amiat, Mme. Aarnaux, M. Maunier, M. Adli Bey and Mlle. Mario Zito, M. and Mme. Chevalley, son and child, MM. Paccand and Legrand, M. and Mme. Girieud. For Port Said:—M. le Marquis et Mme. la Marquise de Freige, Mr. W. Foster Smith, M. Boule, M. and Mme. Bailly and two children, Mme. Monde. For Jaffa:—Mr. R. P. Van der Buckle. For Beyrout:—M. and Mme. Ali Beyet and Mlle. Kovry, M. Arabie, M. and Mme. Cottard, M. Tewfik.

STEAMSHIP MOVEMENTS.

Cunard Line.

"Brescia."—At Smyrna for Liverpool September 24. "Caria."—Left Patras for Liverpool September 24. "Ivernia."—Fiume for New York. Left Gibraltar September 24. "Pannonia."—Left New York for Mediterranean September 26. "Saxonia."—New York for Mediterranean. Left Maderia September 29. "Thracia."—At Zante for Sicily September 26. "Veria."—At Bari for Ancona September 27.

The s.s. "Caria," for Gibraltar, Malta, Corfu, Patras, Syra, Smyrna, Constantinople, etc., will close for cargo at Liverpool on October 12.

Moss Line.

"Busiris."—Left Patras for Liverpool September 20. "Karnak."—Glasgow for Alexandria. Left Malta September 29. "Menepthah."—Liverpool for Alexandria. At Malta September 29. "Menes."—Liverpool for Alexandria. At Gibraltar September 9. "Moeris."—At Pera September 21. "Seti."—Alexandria for Liverpool. Left Valencia September 28. "Siptah."—Left Liverpool for Alexandria September 25.

The s.s. "Seti," for Gibraltar, Algiers, Malta, Alexandria, Port Said, Suez, Beyrout, Alexandretta, and Jaffa, will close for cargo at Liverpool on October 9.

Westcott and Laurance.

"Barcelona."—London for Ibrail. Left Malta September 26. "Belgravian."—At Malta September 13. "Eden Hall."—At Odessa September 24. "Joshua Nicholson."—At Smyrna September 25. "Orchis."—Left Malta September 27.

LONDON, October 3.

The crisis in the Balkans has completely shattered the bull accounts of Europe. Serious people do not believe that any war will occur. They think that the Balkan States are merely exerting pressure on Turkey in order to obtain various reforms which they do not believe can be obtained once the peace between Italy and the Ottoman Empire has been signed. In short, the best opinion in the City is that the whole thing is merely bluff. But bluff can go too far; consequently the people who were carrying stocks on borrowed money have been politely told to get rid of their commitments. This has caused selling, and many enterprising people have also sold short. In Berlin, where they should be well informed on all Near East matters, it is not expected that any war will result, and on Wednesday the Berlin banks sent very reassuring telegrams to their London offices. It looks as though the fall in prices had reached the bottom. On Wednesday night Bulgarian Fours left off at 85½, a four-point drop from the make-up. Even Egyptian Unified were weaker and could have been purchased at par. Greek Fours have been offered all the week, and closed on Wednesday at 51, a five-point fall. Hungarian Rentes remain comparatively steady at 89, at which price the yield is very attractive. Italians show no change, the general opinion being that, as far as Italy is concerned, the war is over, and it is definitely stated that all terms have been arranged. Turkish Unified, which carried over at 89, closed at 86½ to 87, and were heavily offered during the session. Russians were weak, and some astounding fluctuations occurred in Tintos. This is the great gambling stock of Paris, and the French speculator found it wiser to get rid of everything. At one time Rios were offered at 80, having tumbled as much as five points in a few days. They, however, recovered on the day. Russians were also weak. Indeed, the whole foreign market has been in a very unsettled condition. In some instances the fall has been overdone. There seems little doubt that the great Powers have definitely agreed amongst themselves upon a course of action, and there is no chance, even if war breaks out, of anyone becoming involved beyond the four countries interested.

Rails and Americans.

In the Home Railway market the principal trouble is in the speculative counters, in which a bull account exists. These stocks were distinctly weak. Dover A and Little Chats, the great gambles in this market, look very sick. Yankees were hardly affected at all, and New York bid for them. The bears bought back Milwaukee and the bulls Chesapeake. Amalgamated were as high as 93½. Canadian Pacifics were firm on the proposal to allot the shareholders the new capital in the ratio of three shares to ten at a price of 175 dollars. This is a magnificent bonus.

Rubber and Oil.

In rubber nothing has been done, and prices are weak. The raw article has fallen and the little spurt that we saw about a month ago has quite died away. It was evidently manipulated from the East. Oil shares, being naturally speculative, have suffered as much, if not more, than most of the markets. Mexican Eagles have fallen and Shells dropped at one time to 5. Royal Dutch were also done at 5,000 guelden, and Urals at 52s. 6d. Spies and the Maikop section attracted the attention of the bears, and on the whole very little can be said in favour of oil shares at the moment.

Mines.

Mining shares were offered from Paris, but not to any great extent. It is now said that the Kaffir magnates cannot agree amongst themselves as to the terms on which the boom is to be started, and that any attempt to put up the market will be postponed until the new year.

Egyptians Depressed.

The Egyptian market naturally suffered with all the other markets. A war in which the whole of the Near East would be involved would certainly be a bad thing for Egypt, and recent purchasers of Egyptian shares became nervous and a certain amount of unloading resulted. In our opinion the fall has been carried quite high enough, and we think that we shall see a reaction. Nothing can stop the prosperity of the country, which depends almost entirely upon the cotton crop. If this is good, everybody will make money, even if there is a war in Macedonia. Aboukirs fell to 32s. 6d., Agricultural Banks were dealt in under 6, Beheras were dull at 15½, Delta Lands tumbled to 17s., Delta Light Railway prefs. dropped ¼, to 8½, Abdys were weak at 10s. Markets showed little change, but Salt and Sodas were lower at 16s. 9d. There was nothing doing in Gharbieh Land, but Khedivial Mail ordinary were weak at 11s. National Banks dropped 10s. to 18, and New Egyptians were a poor market at 11s. 9d. Sidi Salems were offered at 24s., Union Foncière were lower at 2½, and United Egyptian Lands lost 6d. at 4s.—As soon as it is definitely known what will be done in the Balkans, we look for a recovery in this market, for the position in Egypt improves every day.

WAR INSURANCE AND THE BALKAN NEWS.

On the news from Constantinople that all vessels flying the Greek flag had been recalled by the Greek Government from Turkish waters, as much as five guineas per cent. was paid to insure Greek vessels now on the other side of the Dardanelles against the risks of war, says the *Times*. The insurance only covers vessels until their arrival in port in Europe. To cover British vessels on the homeward voyage from the Black Sea 20s. per cent. was accepted.

There were several inquiries for rates covering the risk of an outbreak of war involving this country, and any other leading European Power. Five guineas per cent. was quoted for six months, though no business appears to have been done.

At the Baltic there was a good deal of uneasiness caused by the prospect of another closing of the Dardanelles. Charters of Greek steamers intended to pass inwards through the Dardanelles to load in the Black Sea were broken, and it is understood that in some cases Greek vessels are being sent from the Mediterranean to be out of harm's way.

FINANCIAL NEWS IN BRIEF.

The Copper Mines of Maïdan-Pek show a profit of 260,146 frs. on last year's working.

The receipts of the Egyptian Delta Light Railways for the ten days ended September 10 amounted to £E5,742, being an increase of £E274 over the corresponding period of last year. The total receipts from the commencement of the year (April 1) amounted to £E107,924, being an increase of £E1,044.

Coupon No. 35 of the 5 per cent. debentures of the Smyrna Water Company will be payable, on and after October 13, at the head office in Smyrna and at the offices of the Crédit Général Liégeois.

Coupons for accumulated arrears of dividend on the 5½ per cent. cumulative preference shares of the Egyptian Delta Light Railways for the year ended March 31, 1912, are now ready for issue.

The balance-sheet of the Tramways, Transport et Electricité de Smyrne shows gross profits of 114,646 frs., and after deduction of general expenses a balance of 100,145 frs. is available for amortisements.

The Alexinatz Coal Mines, in Servia, show a profit of 378,903 frs. for the year 1911-12. 125,000 frs. of this amount will be devoted to writing down various accounts, 75,734 frs. will be transferred to reserve fund, and 120,000 frs. will be absorbed by the payment of a dividend of 60 frs. per share. The balance will be carried forward.

The dividend on the founders' shares of the Tramways du Caire has been fixed by the board at 27 frs., the same figure as for last year.

The net profits of the Oriental Tobacco Trading Company for the last year amount to £90,955, and it is proposed to distribute a dividend of 20 frs., against 25 frs. for the previous year.

The annual general meeting of the Société Anonyme des Tramways du Caire is to be held at the head office in Brussels on Wednesday, October 16, when the report and accounts for the past year will be submitted.

The annual general meeting of the Société Anonyme des Cinémas Orientaux is to be held at Brussels on October 7.

The Council of Foreign Bondholders has received from the Council of Administration of the Ottoman Public Debt at Constantinople a statement showing that the complete receipts in respect of the month of April were £T280,115, as compared with £T335,493 for April, 1911.

The half-yearly coupon of the Ottoman Four per Cent. loan of the Egyptian Tribute for interest due October 10 next, will be paid on and after that date at the banking-house of Messrs. Glyn, Mills, Currie and Company, 67, Lombard Street, E.C.

The coupons and drawn bonds of the Piræus, Athens, and Peloponnesus Railway 4½ per Cent. Bonds, due on October 15, will be paid on that date at the office of Messrs. R. Raphael and Sons, Austin Friars House, E.C.

The receipts of the Egyptian Markets, Ltd., for the week ending September 26, amounted to £716, being an increase of £371 on last year's figures. The total receipts this year to date amount to £37,180, showing a decrease of £3,529 as compared with the revenue of the corresponding period of last year.

POOK, BROS. & CO., Ltd., Merchant Bankers, Brokers and Contractors,

NOTES FROM ALEXANDRIA.

(From Our Own Correspondent.)

Alexandria, September 27.

The Share Market.

The general rise has not been greatly accentuated this week, but the tone is firm and a reaction is not anticipated. On the other hand, a further rise is not expected at present, for in a week's time we shall be in full activity of the cotton season, and all our attention, energies, and resources will be absorbed. The prospect of a monetary crisis does not encourage increased prices. However, a revival in foreign demand for Egyptian securities might cause an early rise, even before the end of the year, when the local demand will certainly favourably influence the market.

Meanwhile, within a month a solid appreciation is noticeable in land values, which suffered so severely by the crisis. This appreciation, which will receive a stimulus on the sale of the cotton crop, is a most encouraging factor, for it leads to the belief that judicial expropriations will decrease and that our land-owning companies will be able to realise part of their holdings.

The Five Feddans Law.

The Government has introduced useful amendments into the Five Feddans Law, but we fear that it will thereby become too complicated and encourage endless litigation. In any case, the application of this law will provoke a serious depreciation in land values and even perhaps a fresh crisis. The best solution would be to defer application of the law for a period of five years, in order that values might attain their normal level and to permit the Agricultural Bank to liquidate those expropriations which are now pending, unless it were decided to completely abandon the law, which is of small practical value and which might cause immense injury to the country.

The Government and the Banks.

The Egyptian Government is credited with the intention of creating an inspectorate of the Finance Ministry for the purpose of exercising a kind of control over the banks established in Egypt. This would be a strange, not to say ridiculous and arbitrary, proposal. A control of the internal affairs of financial establishments is nowhere practised. Even the Bank of England, which is a State bank, is not submitted to any official control. In France, Egypt, Italy, Germany and Austria, the State banks are controlled by the Ministries of Finance, by reason of the authority vested in them to issue notes. The other banks have no liens with the Government, and are only responsible to their shareholders. It is therefore certain that the new proposal will encounter strong opposition.

Comptoir Financier et Commercial.

Attention is just now concentrated on the shares of this institution. We were among the first to recommend the purchase of these shares, when they stood at 15-16. To-day, one of the directors furnished me with the following interesting information, which will be officially communicated to the shareholders at the meeting to be held on October 31.

The assets consist of £75,000 in mortgages and house property, £33,000 debt due by the Banque de Métélin, of which one half is certainly realisable, and £18,000 due by Karam. In all, therefore, £109,000 divisible between 75,000 shares—equal to £1 7/16 per share. To this must be added the amounts due by the bankrupt estates of Zervudachi and Rodocanachi, Reynolds and Company, and also the value represented by the lawsuits in course against the Banque d'Orient and the Bank of Athens, in which £250,000 is involved. Amitting these lawsuits to be completely lost—which is hardly probable—and that the bankruptcies, Zervudachi and Rodocanachi, Reynolds and Company pay only 10s. and 4s. in the pound respectively, one can count on £50,000, which, added to the £109,000 above-mentioned, gives £2½ per share as the intrinsic value. The present price is only £1⅛, and therefore shows a good margin.

The Zervudachi Bankruptcy.

As is known, the estate of C. Zervudachi and Son will realise only 4s. to 6s. in the pound, while that of Georges Zervudachi personally will realise about 20s. in the pound. The creditors of the first-named are now demanding that the assets of the two estates should be distributed without distinction among the creditors of the two bankruptcies. An interesting lawsuit will settle this matter during the coming winter. We learn that the Abyssinian Government has raised no objection to the renewal of the mining concessions granted to Georges Zervudachi, and that the Receivers will be in a position to dispose of them with advantage. The asphalt deposits at Lattakieh have been sold for £100,000. The large estates at Cherbine yield large revenues, and the splitting up of this property will yield unexpected profits. Finally, there is the picture gallery, which was originally valued here at £12,000, and which has now been estimated as worth £70,000, by an expert sent here by the Paris firm of Bernheim Frères. The Receivers have decided to send the pictures to Paris for sale, and it is said that they will easily fetch £100,000. The spectacle is thus afforded of a philanthropist dying in prison and in the blackest misery, although his creditors will have been paid in full, whilst wealthy rogues enjoy their liberty after having cynically robbed and ruined their victims. These are the marvels of human justice!

A BANK OF EGYPT ECHO.

At the public examination of Mr. W. A. S. Kettle (lately trading and described in the receiving order as Arthur Williams and Co., bankers, 104, Queen Victoria Street, E.C.), held at the London Bankruptcy Court on Tuesday, there was an "echo" of the Bank of Egypt failure. It was stated that in September, 1911, the debtor became acquainted with one Joseph Morris, who introduced to him a scheme for indemnifying the shareholders of the Bank of Egypt, Ltd., then in liquidation, against any loss that they might sustain by being called upon for payment of the unpaid calls on their shares. The debtor severed his connection with the Assurance Company in October, 1911, and a business for the purpose of working this scheme was commenced at 104, Queen Victoria Street, under the style of "Arthur Williams and Co., insurance brokers." It was arranged that Mr. Morris should act as the manager, and receive for his services two-thirds of the profits. A sum of £700 was received from shareholders in response to the circulars which were issued by "Arthur Williams and Co."; it was disbursed in general expenses of the business, and the scheme fizzled out about two months later.

PERSIAN RAILWAYS.

According to a Reuter telegram from Teheran, the British demand for a concession for a railway from the Persian Gulf to Khoramabad is under consideration by a Committee sitting at the Foreign Office.

The Russian project for a railway from Julfa to Tabriz does not appear to be making much progress, though M. Podgourski, a director of the Julfa-Tabriz and Enzeli-Teheran road companies, has been in Teheran for the past fortnight endeavouring to come to terms with the Persian Government.

THE EASTERN BANK, LIMITED.

Head Office: 4, CROSBY SQUARE, LONDON, E.C.

Subscribed Capital, £1,000,000. Paid up, £400,000. Reserved Liability of Shareholders, £600,000.

Finances of the Sudan.

Interview with Sir Reginald Wingate.

In an interview which he granted to Mr. Percy F. Martin, and which is published in the *Financial Times*, Sir Reginald Wingate, the Governor-General of the Sudan, made the following statement with regard to the financial position of the province :—"Although at the moment the account of the finances for the whole year of 1911 has not been closed, sufficient is known of the situation to say that there will be a surplus—not perhaps a very big one, but still a surplus. How much? Well, about £145,000. And note how the revenue has grown since the country was reoccupied. In 1898 we estimated a revenue of about £8,000. It actually amounted to £35,000. The next year it came up to £126,000, and the following to £156,000. Then it mounted rapidly, till, in 1910, it reached the total of £1,042,000, while in 1911 it amounted to £1,168,000. These figures are exclusive of the subsidy received from Egypt, which, in 1909, came to £335,000; latterly the amount received from Egypt has been consistently reduced. Thus, in 1910, we were enabled to diminish this contribution towards the civil expenditure of the Sudan by some £10,000; this year (1911) we have again reduced the contribution by £25,000, which has brought down this annual sum received from Egypt, and which in 1908 amounted to £253,000, to the figure of £163,000 for 1912. The totals are arrived at after the annual contribution paid by the Sudan to the Egyptian Government, for maintenance of an army in the Sudan, has been allowed for. This charge upon us is an annual one of £172,000. So we stand like this : Our estimated revenue will be, for 1912, £1,375,600, as against £1,195,000 for the year 1910. Our estimated expenditure will come to £1,538,000, as against £1,383,000 for the previous year."

The Sudan and Egypt.

Asked how the Sudan stood in regard to its financial relations to Egypt, Sir Reginald replied : "The capital expenditure from loans advanced from the Egyptian Minister of Finance has reached a little over £5,000,000. Upon a portion of this amount we pay interest; but not upon all. The loans are made subject to interest deferred until the Sudan revenue has increased so as to leave a surplus over expenditure on the ordinary Budget. Naturally, if the great irrigation project which is under consideration is to be carried out, further sums of money will be required. But I am not in a position to say anything about this or whether it will be a Government or a private enterprise. I can only tell you that the scheme, by whomsoever it be carried out, would probably entail the outlay of between £500,000 and £750,000. It calls for the construction of a barrage across the White Nile, where it joins up with the Blue Nile, and possibly connecting Khartoum with Omdurman. The scheme would have the double advantage of providing an abundant amount of irrigation for the immense Gezira Plain, where some of the finest cotton, as we know from our experiments, can be grown, and of materially increasing the summer water supply for Egypt. Additionally, it would bring under control much more than at present—the Nile's flood supplies of September, October, and November. The whole of the basin of Upper Egypt would benefit, as would also large tracts of land, at present useless, on the Kordofan side of the White Nile. If all of the schemes at present under contemplation are undertaken, the cost would not be less than £3,000,000. Do I think it is financially a sound scheme? The success of the already constructed Wad-Medani line leaves no doubt about it."

The Sudan Railways.

"Are the Sudan railways being worked at a profit?" asked Mr. Martin. And Sir Reginald Wingate answered :

"They have shown a profit since the year 1907, the year that we determined upon a further construction programme, and which has now been carried out. In that year of 1907 we earned a profit of £85,203. By 1910 the difference in our favour amounted to £123,432, the percentage of working expenses to gross revenue being 68.5; in 1911 the profit earned came to £128,378, the percentage of working expenditure being 70.9. You may certainly say that much of the success of our railways has been due to the ability displayed by Captain E. C. Midwinter, the Director, and his staff. Since you have been in the Sudan of late, and have travelled over our railways, you will know how much permanent good work has been done. We are still considering the Kassala-Gedaref-Sennar line already referred to, but this is the only new construction which we have in immediate view."

TRADE IN ABYSSINIA.

The report of H.M. Consul at Gambela, Abyssinia (Mr. C. H. Walker) for the year 1911 will shortly be issued. In the meanwhile, we give the following interesting information from the report, extracted from the *Board of Trade Journal* :—

Imports.—Beyond cotton cloth the Gallas have few needs at present, and the imports into Gambela are confined to the simplest articles. Out of a total import of £E27,962 (£E=£1 0s. 6½d.), cotton fabrics alone amounted to £E15,029 in 1911. Liquors were valued at £E835, crockery and china at £E232, and soap at £E146. Empty sacks to the value of £E758 were imported. Cotton thread was valued at £E292, but this trade is capable of expansion, as the Gallas are learning the superiority of this thread over the softer but weaker native cotton.

There is no reason to anticipate a large increase in the sale of hardware, scents or soap before the circulation of money is more efficient. Most of the earnings of Galla porters are buried, and only absolute necessities are purchased. The Abyssinian officials themselves are slow to spend except for occasional display on feast days.

Transport.—The difficulties of Gambela trade are those of transport. From Gore to Gambela is a distance of 65 miles, and the cost of transport varies from £6 16s. to £13 15s. per ton, according to the price of porters from Bure to Gambela. From Gore to Adis Ababa freight costs about £10 5s. per ton, but the time occupied is nearly a month.

Sayo is the nearest Abyssinian town to Gambela, and lies on the plateau 12 hours' journey north for porters. In the dry season, from January to May, 1 dol. (dollar=2s. about) per load of 84 lbs. (about £2 14s. per ton) is charged, and rates rarely rise beyond 2 dols. On this road a bridge is under construction at the River Sako, which is too swift and deep to cross from June to December.

Bure is 18½ hours east of Gambela for porters, and the route crosses several streams which are a danger in the rains. Over the small Baro or Baro Kella an iron bridge is being erected by the Abyssinian Government with the aid of the Sudan Government, and when the escarpment road is graded from Bure to the new bridge donkeys will be packed and will help to lower porterage rates by competition. From January to May 1½ dols. is the usual price for loads of 75 lbs., but in the rains from June to November prices rise, and in September as much as 4 dols. may have to be paid.

In the case of cotton goods American shirting can reach Gore viâ Port Sudan and Gambela at £4 per ton cheaper than it can be delivered at Adis Ababa viâ Jibouti. Gore therefore tends to become more independent of Adis Ababa, and it is not likely to be supplied by caravans from the east.

The Imperial Ottoman Bank announce the payment, on the 14th inst., at the offices of their Coupon Department, 27, Throgmorton Street, E.C., of a balance dividend of 6s. 4 4-5d. per share for 1911-1912, against Coupon No. 28 of the Regie Co-intéressée des Tabacs de l'Empire Ottoman (Turkish Tobacco Monopoly Company).

TURKISH FINANCES.

Official Statement.

The Ottoman Embassy has requested Reuter's Agency to publish the following semi-official communiqué of the Turkish Ministry of Finance :—

"The Imperial Government having recently issued negotiable Treasury bonds to the amount of 28,750,000 frs., of which 17,250,000 have been taken 'firm' by the Imperial Ottoman Bank, the financial Press has seen fit to make the most fantastic comments on the matter. In the first place, it is quite incorrect to say that the Ottoman Treasury is short of funds and unable to meet its engagements. The months of July and August are unproductive periods for the Treasury compared with the preceding months, by reason of the fact that the aghnam tax and the tithes which constitute the most important revenue of the Budget are not levied, the first being entirely collected at the end of June, while the collection of the second is only begun in September; these months, on the other hand, correspond this year to a period of exceptional expenditure in consequence of the extraordinary circumstances in which the Empire is placed and of the advent of the months of Ramazan and Bairam, which invariably necessitate supplementary disbursements. It is, therefore, not surprising that, in order to balance the special Budget for these months, the Imperial Ministry of Finance, following the example of Governments with the best-framed Budgets, should have thought it advisable to issue one year's Treasury bonds. The securities assigned to this small issue constitute, both by their soundness and by their amount, a subsidiary proof of the enormous margin of Budgetary assets which will be available at certain later periods. There remains the question of the interest of 7 per cent. When it is remembered that this advance is at par, and that a similar operation was entered into on February 1 (14), 1912, at the rate of 98½, with 5½ per cent. interest, which, in effect, amounts to 7 per cent., it will be found that the political difficulties, both internal and external, which have since arisen, have in no way reacted on the Imperial Government's financial credit, which has remained intact.

The Treasury Bonds.

"The assignment of a guarantee, in itself, is only due to the scarcely conceivable contingency of the abandonment of the option loan of May, 1912, out of which the proceeds of the advance are to be refunded. At the expiration of a year the Government will thus have already at its disposal more than half the amount required for the repayment of the Treasury bonds. In case of the non-realisation of the loan, the Government would be in a position to redeem this sum in two years through its ordinary resources. Other arguments which testify again to the great confidence which the Empire enjoys are furnished by the two clauses of the advance contract providing that the total amount of the Treasury bonds could be increased to 34,500,000 frs. on the same conditions, and that if the option on the loan of 1912 is exercised before the date of the bonds falling due the amount necessary for the repayment of their value will be reserved in a special account providing interest up to the date of their falling due.

"The Ottoman Bank, which is a commercial establishment as much as, and even more than, a State institution, would not have considered it expedient to enter into this business if it had not its interests assured, particularly at a period when it needs funds in hand for the commercial operations of the autumn. It was difficult for a bank to meet with an investment offering such security, combined with such advantageous yield. The Government on its part was desirous of not appealing to foreign markets to meet a momentary need, such transactions with the Ottoman Bank being, after all, nothing more than a simple transfer of funds by reason of the character of the guarantees."

NATIONAL BANK OF TURKEY

ESTABLISHED 1909 BY IMPERIAL FIRMAN.

CAPITAL - - £1,000,000 Sterling.

BOARD OF DIRECTORS.

CONSTANTINOPLE.

SIR HENRY BABINGTON SMITH, K.C.B., C.S.I., Chairman.
SIR ADAM BLOCK, K.C.M.G.
F. EDWIN WHITTALL.
H.E. AHMED DJEMAL BEY.
HUSSEIN DJAHID BEY.
RECHID SADI BEY.

LONDON.

HON. SIDNEY PEEL, Chairman of London Committee.
HON. HUGO BARING.
HENRY BIRCHENOUGH, C.M.G.
C. S. GULBENKIAN.
R. H. MACAULAY.
E. N. MEYER.

Head Office: CONSTANTINOPLE (KENADJIAN HAN, STAMBOUL).
MANAGER - - H. P. KINGHAM.

London Agency: 50, CORNHILL, E.C.
MANAGER - - - R. HECHT.

The National Bank of Turkey undertakes every description of Banking business. It opens current accounts according to the custom of Bankers. Customers have the facility of discounting approved bills and of obtaining advances upon negotiable securities. The Bank will undertake the purchase and sale of bonds, shares, etc., on the London Stock Exchange, on the local and on all Continental Bourses, the safe custody of customers' securities and valuables, and the collection of drawn bonds and coupons when due. The Bank issues drafts and telegraphic transfers payable in all principal towns in the world. Letters of credit for the use of travellers are also issued. Advances made on merchandise. The purchase and sale of coupons, foreign bank notes, coin and bullion are undertaken. Bills negotiated or sent for collection. Mercantile credits opened.

Deposits received for fixed periods at rates of interest which can be ascertained on application.

BANK OF ROUMANIA, Ltd.

Head Office: 7, GREAT WINCHESTER STREET, LONDON, E.C.
Branch: 94, STRADA LIPSCANI, BUCHAREST.

CAPITAL (fully paid), £300,000. RESERVE FUNDS, £169,688.

DIRECTORS:

THE EARL OF BESSBOROUGH, C.V.O., C.B.
SIR R. HAMILTON LANG, K.C.M.G.
THE VISCOUNT GOSCHEN
E. W. H. BARRY, ESQ.
P. NAVILLE, ESQ.

The Bank was originally incorporated in 1869 under Roumanian law, but in 1903 was transformed into an English Company under the Companies Acts. It is the oldest bank in Roumania, and the only one with a London office.

A general banking business is carried on. Correspondence is invited from those doing business with Roumania, and should be addressed to THE MANAGER in LONDON or BUCHAREST.

ANGLO-EGYPTIAN BANK, LIMITED,

LONDON, PARIS, ALEXANDRIA, CAIRO, MALTA, GIBRALTAR, TANTAH, MANSURA, BENI-SUEF, ZAGAZIG, and PORT-SAID.

Subscribed Capital - - £1,500,000.
Paid up Capital - - 500,000.
Reserve - - - - - 640,000.

The Bank undertakes every description of Banking Business on most favourable conditions.

NATIONAL BANK OF EGYPT

(Established by Khedivial Decree, June, 1898, with the exclusive right to Issue Notes payable at sight to Bearer.)

CAPITAL - - - - £3,000,000.
(In 300,000 Shares of £10 each, fully paid.)
RESERVE FUND - - £1,500,000.

Governor: F. T. ROWLATT.

HEAD OFFICE: CAIRO.

London Committee:

HON. HUGO BARING,
HON. ALGERNON MILLS,
SIR CARL MEYER, Bart.,
HON. SIDNEY PEEL.

London Agency: 4 and 5, KING WILLIAM STREET, E.C.

MANAGER: J. T. BEATY-POWNALL. ASST.-MANAGER: A. F. GILLBEE.

Accounts opened with traders and private persons. Every kind of Banking Business transacted.

Offices in Egypt at Cairo (Head Office), Alexandria, Assiout, Assuan, Benha, Beni-Suef, Chibin-el-Kom, Damanhur, Fayoum, Keneh, Luxor, Mansourah, Minieh, Mousky (Cairo), Port Said, Sohag, Tantah, Zagazig; and in the Soudan at Khartoum, Port Sudan, Suakim.

Company Notes and Reports.

Baghdad Tramways and Electric Lighting Syndicate, Limited.

The syndicate with the above title, to which we referred briefly in our issue of September 20, was registered on September 12. The objects for which it has been formed are: To promote a company or companies for the purpose of constructing, establishing and working in the Ottoman Empire or elsewhere tramways, railways and undertakings for the generation, distribution, supply and employment of electrical energy, and to adopt an agreement with W. B. Cownie. The company is private. The first directors (to number not less than two nor more than five) are W. Brodie and T. H. Evans. The qualification is 50 "A" shares (£1 each). Remuneration, £100 each per annum (chairman £150). Registered office, 3, Laurence Pountney Hill, E.C.

Constantza Trust Syndicate, Ltd.

A company with the above title was registered September 25 by W. B. Ransom, 60, Watling Street, E.C., with a capital of £244,000 in £20 shares. The object of the company is stated to be to adopt an agreement with L. Bressoux, whereby he agrees to transfer to this company all the profits to arise from carrying on the business of the Casino and an intended hotel situate at Constantza, Roumania, belonging to the Société Grands Etablissements de Constantza, to receive the said profits, to pay thereout in the first instance the working and other expenses of the company, and distribute the residue among the members of the company by way of dividends or otherwise. Any investments of surplus funds must be made in Roumania upon Roumanian securities. The minimum cash subscription is seven shares. The first directors (to number not less than three nor more than five) are: Baron E. de Marcey, P. Rosetti, J. Mano, and Count de la Flewriaye. Qualification, £200. The remuneration is fixed at £2 each per board meeting attended.

Arbanash (Roumania) Oil Co., Ltd.

The above company was registered September 26 by Elvy, Robb, and Welch, Temple Chambers, E.C., with a capital of £100,000, in £1 shares. It is stated that the objects of the company are to acquire from C. P. Dickinson certain oil, petroleum, and mineral-bearing lands, and claims and concessions of oil and petroleum, producing and mineral properties in Roumania and elsewhere; to adopt an agreement between the said vendor of the one part and S. L. Faddy (as trustee for the company) of the other part, and to carry on the business of producers, importers, exporters, manufacturers, and refiners of oils and petroleum spirit, manufactureres of and dealers in all products of oil, etc. The minimum cash subscription is £1,000. The first directors (to number not less than three nor more than five) are to be appointed by the signatories. Qualification, £100. The remuneration is fixed at £50 each per annum. The registered office of the company is at 15, Leadenhall Street, E.C.

CITY AND THE BALKANS.

Although we may still hope that a Balkan war will be avoided, says the City editor of the *Morning Post*, the probability of an outbreak is so great that it is time to seek to estimate its effect upon the City. The direct effect can be but small. Our immediate commercial relations with Bulgaria, Servia, and Montenegro are unimportant, and our financial relations with them are almost nil. With Greece and Turkey we have a little more to do in both respects. It is not to London, however, but to Paris that these countries will look in the first place for money to fight with. Their need for cash will make itself felt in London indirectly through Paris, if at all. We have been expecting Paris to help us to meet the demand for gold in New York and Alexandria. With a fresh call of this sort upon her resources she will be less able to do so.

If war break out the countries actually belligerent will require all the gold they can get, but it is not likely that they will get much. But besides that, the uncertainties of the situation will make bankers in general, and especially on the Continent of Europe, anxious to increase their reserves, and will lead to a general restriction of credit and a general increase in the demand for bullion. The natural accompaniment of such a state of affairs would be a rise in the official rate of discount of the Banks of England and France, and of the Reichsbank. A Balkan war, in fact, must mean an earlier 5 per cent. Bank Rate than we should have had otherwise. With a general slight restriction of credit for longer periods, the market rate of discount would tend to rise above the 4 per cent. Bank Rate (it is almost equal to it now); and the Bank would be forced to raise its rate to avoid getting bills it did not want. Supplies in the Short Loan Market, on the other hand, are usually increased by such a crisis. The investor hangs back, and trade may be adversely affected.

TRADE IN THE PIRÆUS.

According to Mr. C. J. Cooke, H.M. Consul at Piræus, British trade in that district showed perhaps a slight improvement in 1911, although the Austro-Hungarian and German manufacturers are as pushing as ever, and naturally take advantage of their nearness to a growing market to dump down their wares, thus spoiling the market for their distant competitors. The Italian trade with Greece, however, has almost come to a standstill through the Turko-Italian war now prevailing.

Agriculture in Greece is in a very backward condition, and little has been done by the State to promote this the chief industry of the country. The alluvial soil of the valleys is remarkably fertile, but agricultural improvements have been deplorably neglected. Water-courses have been left undrained and allowed to become silted up, and little attention has been given to the drainage of low-lying districts, with the result that much of the best land is converted into marsh after rains, and is either left uncultivated or produces only a small part of what it would produce under favourable conditions. Roads are few, transport is in consequence costly, and the use of labour-saving implements restricted. A real effort has now been commenced to promote agriculture and better the conditions of the peasant population. An Act has been passed to abolish the old and faulty form of municipal administration, and, under the new arrangement, each village will form a district community possessing a form of local government, which it is anticipated will induce the villagers to combine and devote part of the local revenue to necessary improvements. Foreign agricultural experts are being employed to organise different branches of agriculture. An effort is being made by the Minister of Agriculture and Commerce to increase the cultivation of cotton, and to improve the quality of the introduction of new varieties. The Government has taken in hand the drainage of the bigger marshes, which cannot be left to local effort, with the view of adding to the productive land of the country. A factory for the manufacture of artificial manures has been established in Piræus, and a good and increasing demand is being met with for the products.

LONDON COUNTY & WESTMINSTER BANK, LIMITED.

ESTABLISHED IN 1836.

CAPITAL - £14,000,000, in 700,000 Shares of £20 each.
PAID-UP CAPITAL - £3,500,000. RESERVE - £4,000,000.

Joint Managers:
ALFRED MAYO HAWTHORN (*Head Office*). THOMAS JAMES RUSSELL (*Colonies and Agencies*).
FRANK WILLIAM HOWETT (*Country*).

Joint Secretaries: AUSTIN ARROW KEMPE; GEOFFREY PAGET.

HEAD OFFICE: 41, LOTHBURY, E.C. - - - - A. M. Hawthorn, *Manager.*
LOMBARD STREET OFFICE: 21, LOMBARD STREET, E.C. - F. J. Barthorpe, *Manager.*
WEST END OFFICE: 1, ST. JAMES'S SQUARE, S.W. - - - A. Harding, *Manager.*
FOREIGN BRANCH: 82, CORNHILL, E.C. - - - - - S. S. Kahn, *Manager.*
also 104 Metropolitan and Suburban Branches and 233 Country Branches and Agencies.

Current Accounts are opened on the usual terms. Customers are given facilities for the transfer of money to or from any office of the Bank.
Deposit Accounts.—Sums of £10 and upwards are received on deposit at interest, subject to notice of withdrawal, or by special agreement, in accordance with the usual custom.
Executor and Trustee business undertaken.
Purchase and Sale of Stocks and Shares effected. **Dividends, Annuities,** &c., received.
The Agency of Foreign and Country Banks is undertaken, and every description of Banking business transacted.
Currency Drafts, Circular Notes and Letters of Credit are issued, and **Telegraphic Transfers** made to all parts of the World.
Approved Foreign Drafts are purchased, and Collections undertaken.
Documentary Credits are established, and every facility given for dealing with Documents at home and abroad.

THE OFFICERS OF THE BANK ARE BOUND TO SECRECY.

NOTES OF THE WEEK.

Events have marched rapidly in the Balkans during the past week. The mobilisation of the five armies gave to the situation a critical aspect that could not be ignored, and the Powers redoubled their efforts to make the intervention of the Concert of Europe effective. Concrete proposals for dealing with the crisis were put forward by the French Government, which recommended joint action on the part of Austria-Hungary and Russia, as the mandatories of the Powers, in the Balkan capitals, and collective action on the part of all the Powers in Constantinople. Thanks to the presence in Paris of M. Sazonoff, who had gone to France after his visit to Great Britain, the negotiations between the Powers, once begun, were concluded with commendable rapidity. The only modification of the French proposals came from Austria-Hungary, which desired that it should be definitely laid down that the reforms to be introduced in Macedonia should in no case affect either the integrity of Turkey or the sovereignty of the Sultan; that the reforms should have the general character contemplated in Count Berchtold's circular of August; and finally, that the representatives of the Powers in Constantinople should make their representations verbally instead of transmitting them to the Turkish Government in the form of a Note. These amendments were at once accepted, and on Sunday the Concert of the Powers was thus established.

The Turkish reply to these measures on the part of the Powers was to announce its decision to introduce in the Rumelian provinces the Vilayets Law of 1880. Article XXIII. of the Treaty of Berlin reads as follows:—

"The Sublime Porte undertakes scrupulously to apply to the island of Crete the Organic Law of 1868, with such modifications as may be considered equitable.

"Similar laws adapted to local requirements, excepting as regards the exemption from taxation granted to Crete, shall also be introduced into the other parts of Turkey in Europe for which no special organisation has been provided by the present treaty.

"The Sublime Porte shall depute special Commissions, in which the native element shall be largely represented, to settle the details of the new laws in each province.

"The schemes of organisation resulting from these labours shall be submitted for examination to the Sublime Porte, which, before promulgating the Acts for putting them into force, shall consult the European Commission instituted for Eastern Rumelia."

Instead of appointing the Commission indicated, the Porte drew up in 1879 a draft organic law, following in the main the statute for Eastern Rumelia, and submitted it to various provincial centres for emendation in accordance with local requirements. In April, 1880, it invited the Powers to convene again the International Commission for Eastern Rumelia to examine the amended laws, and the Act was formally approved on August 23, 1880, under the title of the "Law of the Vilayets of Turkey in Europe (Rumelia)." This Act, which placed each province under a Governor appointed for five years, whose authority was to be controlled directly by an executive council and indirectly by the provincial assembly, has remained from that date a dead letter. By undertaking to carry it into effect at this juncture the Porte indicates a crude desire to meet the Balkan States half way. Unfortunately the mere promulgation of the Act leaves the question of its enforcement open, even if its provisions were held to satisfy the situation as it stands to-day. On this point it is only fair to Turkey to say that for the moment she can do no more than propose a system of reform, and undertake to carry it into effect. Popular feeling in the Balkan States, however, has passed beyond the stage when it can be induced to listen to Turkish promises. The Vilayets Law is not considered adequate for the altered circumstances in Macedonia, and something more definite is required than the assurances of the Porte that all will be well. An autonomous Macedonia had already become the watchword of the four countries, and the only possible alternative was held to be a system of reforms drafted and administered under the ægis of the Powers, with or without the assistance of the Balkan States.

The Concert of Europe appreciated this attitude of the Balkan States and adopted a course calculated to meet their demands. On Tuesday, October 8, the representatives of the Russian and Austro-Hungarian Governments, as mandatories of the Powers, made the following declaration to the Governments of the four Balkan States:—

1. The Powers strongly reprobate any measure likely to bring about a rupture of the peace.

2. On the basis of Article XXIII. of the Treaty of Berlin they will take in hand, in the interests of the different populations, the realisation of reforms in the administration of Turkey in Europe; it being understood that such reforms shall in no way prejudice the sovereignty of the Sultan and the territorial integrity of the Ottoman Empire. The declaration, moreover, reserves to

Digitized by Google

the Powers liberty for further collective consideration of reforms.

3. If war, nevertheless, should break out between the Balkan States and the Ottoman Empire, they will not allow at the end of the conflict any modification of the territorial *status quo* in Turkey in Europe.

4. The Powers will collectively make representations to the Porte in accordance with the foregoing declaration.

This statement is clear and categoric, and justifies the belief, which we expressed last week, that the Balkan States had already gained by their mobilisation as much as they are likely to win by a declaration of war. From the position that the Powers take up in their communication there can be no withdrawing. They hold themselves responsible, not merely for the introduction of reforms in the administration of Macedonia, but for their realisation. Whatever stage mobilisation may have reached in Bulgaria and Servia, there can be little justification for a breach of the peace in the face of the Powers' explicit undertaking.

The statement of the Powers was presented to the Balkan Governments at eleven o'clock on Tuesday morning; but already the Montenegrin Chargé d'Affaires in Constantinople had handed to the Porte his Government's declaration of war, and the Turkish Chargé d'Affaires at Cettinje had received his passport. On any other occasion such action on the part of Montenegro might be regarded with comparative equanimity. But King Nicholas claims that he is acting in co-operation with the other Balkan States, and it is difficult to believe that one would deliberately precipitate a conflict unless such a course had secured the approval of all. The other States still withhold their formal declaration of hostilities; it is understood that despite the rapidity with which they are mobilising they are not yet ready for a forward movement on a large scale. Meanwhile the danger confronting Montenegro from independent action is not great. Turkey is unlikely to detach any large force to deal with Montenegrin marauders, who can retire at any time into safety within their own mountains, and are not likely to venture very far into Turkish territory until they are assured of the co-operation of their allies. Fighting is already reported in the neighbourhood of Berane; but for the moment we may suspend judgment on the relative importance of these preliminary encounters, even if we are sure of the actual issue of any specific engagement.

Time will reveal whether King Nicholas' action was taken at the behest of the three States with whom he is co-operating or whether he desired to secure for Montenegro the doubtful honour of being the first to begin the conflict. For the moment, however, it is difficult to withstand the reflection that in this one act King Nicholas runs the risk of sacrificing the respect and prestige that a long reign of particular merit has won for him. The provocation that the Turks have given in the massacres at Berane and elsewhere, and in their refusal to agree to a rectification of the boundary line, is admitted. These frontier incidents, however, have not the same significance for the Montenegrins that they would have for a less warlike people, and time was when they were held to be useful training for the nation. Of itself, the appeal to the sword accomplishes nothing. The determination of the Powers that "at the end of the conflict they will not allow any modification of the territorial *status quo*" implies that even if the Montenegrin arms are successful they will not be allowed to keep the ground they have won. The position of the Serbs in the Sandjak will, therefore, depend as before on terms of agreement with Turkey, and these will only have weight if they are sanctioned and enforced by the Powers. In every respect save that of territorial ambitions the Montenegrin aspirations are in a fair way towards realisation at the hands of the Powers. The breach of the peace, accordingly, is the more unjustifiable, for there can be little doubt that King Nicholas is well able to turn the current of his people's will, however intent on war they may profess themselves.

To those who are interested in the psychology of the Balkan peoples the details of the convocation in extraordinary session of the respective Diets of Bulgaria and Servia will afford an instructive object lesson. In Sofia an atmosphere of self-control and quiet determination prevailed. The usual pomp and ceremony attending the opening of the Sobranje were dispensed with; no troops lined the streets, and there was no procession of State carriages. In the King's Speech, which was brief and to the point, there was no reference that could offend the susceptibilities of any country, and the Turkish Chargé d'Affaires was present at the ceremony. King Ferdinand merely announced that the general mobilisation of the army, to which he had been compelled to resort, had rendered necessary the proclamation of a state of siege throughout the whole kingdom. The Sobranje had accordingly been summoned to sanction this proclamation, and to vote as well certain legislative measures imposed upon the country by the serious crisis in which it was involved. "Convinced," concluded King Ferdinand, in the third and final sentence of the Speech, "that, appreciating the supreme interests of the Bulgarian State, you will perform your duty, I invoke the blessing of God upon your labours and declare open the first extraordinary session of the fifteenth Sobranje. Long live Bulgaria!" A country that can face its moments of acute crisis in the spirit displayed by this Speech from the Throne has far to go.

In Belgrade the Turkish Minister had no other course left open to him than to absent himself from the opening of the Skupshtina. King Peter's Speech plunged at once into the "extraordinary" and "intolerable" situation in the Ottoman Empire. It spoke of the correct attitude maintained in the past by Servia, which "rightly and reasonably dared to hope that the Ottoman Empire would introduce reforms so as to assure a peaceful life and development to our co-nationalists, so that all obstacles to the progress and development of Servia would also be removed. Furthermore," King Peter continued, "careful attention has been shown by the Great Powers—I acknowledge this with pleasure and gratitude—in tendering friendly advice at Constantinople respecting the suffering which Servians, together with other Christian races, are enduring in Turkey. Unfortunately, however, all this has been of no avail. Instead of the expected reforms we were surprised a few days ago by the mobilisation of the Turkish Army in the neighbourhood of our frontier. To this action, which has threatened our security, Servia had only one reply —my decree, whereby the army has been mobilised. Our attitude is clear and concise. It is our duty to take measures for our own security. It is our duty, together with the other Christian Balkan States, to do all in our power to assure the necessary conditions of firm and continued peace in this peninsula." It is interesting to place in juxtaposition these two speeches to the national assemblies, for they offer a faithful reflection of the temperaments of the two peoples.

Everything points to an immediate ratification of terms of peace between Italy and Turkey. The treaty is understood to have attained its final form at Ouchy, and to have been considered by the respective Cabinets in Rome and Constantinople. Forecasts of its contents indicate that the question of sovereignty in Tripoli has been solved by the formula that Italy's complete sovereignty over Libya is to be neither contested nor recognised by Turkey. Turkish troops are to evacuate Libya, and Italy is to withdraw her fleet from the Ægean and the Red Seas, and undertakes to restore to Turkey the Ægean islands, subject to guarantees in favour of the Christian populations. The Sultan, in his capacity of Khalif, will continue to exercise his religious authority over the Libyan Mussulmans. It is to be hoped that the signature of this agreement will not be deferred any longer, as it is obvious that the conclusion of peace between Turkey and Italy must materially affect the general situation in the Balkans. The liberation of the Turkish fleet now shut up in the Dardanelles might considerably modify Greek enthusiasm for war, and any weakening of the allied forces

Digitized by Google

must render the Balkan Governments more amenable to the uncompromising logic of the Powers. International interests in the Near East would certainly prefer that war, if war there is to be, should be confined to land operations, thereby causing the minimum interference with trade.

Until the prospects of peace in the Balkans are more assured than they are at present it is almost superfluous to refer to Turkish intentions in regard to Macedonia. We find it hard to believe, however, that after the war-fever has died down there will not exist throughout Turkey a very general recognition of the fact that reforms must now be introduced in Macedonia, and that they must be genuine and permanent reforms. It is idle to hark back now to the crimes and omissions of the last thirty years. In the heat of exasperation over the action of the Balkan States reactionary views may find expression to-day in Turkey, but the public mind will nevertheless be prepared for a large measure of decentralisation. We would lose no time, therefore, in urging that every opportunity should be taken to engender in the mind of the Turkish Government confidence in the honesty of the Powers' intentions, while offering such measure of advice as may enable the Porte to keep abreast of changing conditions. Standing pledged to the "realisation" of reforms, the Powers will need to exercise close supervision of the actual working of the new methods of administration. The innovation is one to which the Turkish Government must become accustomed. It has already announced its intention of engaging English administrators, a course that we had previously urged in these columns; recent events should not be allowed to interfere with this resolve, and the system is capable of indefinite expansion. On the spirit in which a virtue is made of necessity will depend the future integrity of the Ottoman Empire.

When it was officially announced that as a result of the conversations at Balmoral the British and Russian Governments were in agreement in regard to the need for a constructive policy in Persia, the Persian Government registered a *pro forma* expression of regret that it had not been invited to take part in these negotiations. As if to anticipate the application of a new policy on the part of the protecting Powers, the Cabinet has suddenly displayed great reforming activity. Its programme includes the reopening of Parliament, the linking up of the Caspian or some point in Azerbaijan with the Persian Gulf by means of a railway to be built with international capital, and the organisation of an army, the strength of which is fixed at twenty-eight thousand men. The Government, moreover, it is stated, intends to apply to the British and Russian Governments for an advance of £200,000. This zeal is commendable, and may yield satisfactory results, if it is displayed in co-operation with and not in antagonism to the advice and assistance of the two interested Governments. It may be supposed that the Persian Cabinet's programme, as outlined, covers some of the ground that would be mapped out in any joint policy agreed upon by Great Britain and Russia; but without the financial support of the Powers it must lack vitality. The suggestion of a further advance of a relatively small amount indicates no very clear conception of the real needs of the country, and it is to be hoped that the two Powers will not be a party to tabloid reforms. A constructive policy, to deserve the name, must look farther ahead than a few months. It should mark out a comprehensive curriculum of rehabilitation extending if possible to the time when Persia will have a reasonable chance of standing once more on her own feet financially. The difficulties in the way are great, and they are enhanced by the complete lack of a suitable personnel in Persia through whom effect might best be given to the policy of the foreign Governments. The Balmoral agreement undertook to adopt a middle way between intervention and unrestricted misgovernment. To achieve this, the carrying out of a definite line of action becomes the first necessity. The discovery and utilisation of the best that is in Persia may proceed *pari passu*, but should not be allowed to retard the programme.

Possibly of more immediate effect upon Persian affairs than the statement of the Cabinet's policy is the announcement of the defeat and death of Yar Mohammed Khan outside Kermanshah. The career of this notable is a striking commentary upon contemporary conditions in Persia. Yar Mohammed Khan was prominent in the Tabriz revolution, and defended the city against Prince Ein-ed-Dowleh. He was subsequently given the command of a body of Mujahids, and took the field against Salar-ed-Dowleh. He experienced a crushing defeat, and was almost taken prisoner. When Prince Firman Firmah a few months ago led an expedition against Salar-ed-Dowleh he had under him Yar Mohammed Khan. The latter, however, deserted, returned to Kermanshah, of which he took possession in the name of Salar-ed-Dowleh and declared in favour of the pretender. His death and the rout of his followers have come at an opportune moment. Salar-ed-Dowleh, unfortunately, was not present at the engagement, but he is stated to be once more in full flight, pursued by Government troops.

This success should raise the prestige of the Teheran Government and prepare the way for the final withdrawal from the country of Salar-ed-Dowleh. The rivalries of the different tribes remain, and constitute one of the chief obstacles to the restoration of law and order. But if the Persian Cabinet cannot be so constituted under a capable Regent as to induce the discordant elements in Persia to compose their differences, it may be necessary to introduce some system of administrative decentralisation which will admit of effective control on the part of the two foreign Powers in those territories where their respective interests are paramount.

After a trial extending over nearly two months judgment has been meted out to those who took part in the riots in Cyprus last May. Eighteen Turks and Christians have been sentenced to terms of imprisonment varying from fifteen years to nine months, and have been ordered to pay fines and compensations. The outbreak was connected with the agitation among the Greek inhabitants for union with Greece, or for such modifications of the Constitution as will render the prospects of union more favourable. Since the riots the Greek leaders have presented their case in person to the British Government. The order in which the two incidents took place was unfortunate. But the Cypriots are assured of wide sympathy with that portion of their agitation which deals with the excessive burden of the tribute, and if they can separate that justifiable demand from their own personal interests and certain aspirations which cannot be realised, the tribute ought in due course to be remitted.

Reference has already been made in these columns to the possibility of a rearrangement of some of the more prominent posts in the Egyptian Civil Service, making for economy and increased efficiency in the Administration. It is known, however, that for a long time a far more striking reform, affecting the Capitulations has been under contemplation, and there is reason to believe that the negotiations to this end are taking a sufficiently favourable course to warrant considerable optimism. Hitherto the major desire for breaking the international fetters that still retard the administration of justice in Egypt has existed in the country itself, and despite the representations of the British Agents in Cairo the British Government has held back from making the subject one of diplomatic urgency. If this attitude has now been abandoned, the cause is half won. The demand in Egypt for thoroughly efficient courts and adequate civil and commercial codes is becoming more and more insistent, and there can be no question that the commercial and financial communities are seriously handicapped by the present constitution of the Mixed Tribunals, which offer neither an effective nor a speedy administration of justice. The removal of these hindrances to the development of Egypt would prove by no means the least of the services that Lord Kitchener's tenure of office is conferring upon the country.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)

Constantinople, October 4.

War Preparations.

The situation has grown worse with such rapidity during the last week that even the most optimistic observers are forced to admit that war can only be averted by great efforts on the part of the Great Powers. On Monday evening the news reached Constantinople that the Bulgarian and Servian Armies had received the order to mobilise. On the following day the Ottoman Government, learning that fifteen classes of Hellenic reservists had been called out, ordered mobilisation of the armies of European Turkey, Anadol, and Syria. Since that date, though the Great Powers have been using "every effort" to maintain tranquillity in the Balkan peninsula, the gravity of the situation has not diminished. Indeed it has increased *pari passu* with the increase of warlike excitement at Constantinople and in the Turkish provinces, where each party is trying to show itself more patriotic than its rival, and where public meetings are now clamouring for war.

Naturally, little or nothing is known here concerning the plans of the Balkan Allies, or, for that matter, of the Turkish Army. The Serbs appear to be linking up with the Bulgars on the Kustendil-Kumanovo side, and to intend to leave the area between Mitrovitza and Novi Bazar untouched, doubtless with the object of leaving Austria-Hungary unruffled. The Bulgars apparently intend to throw all their weight on the Adrianople side, where half their army will, it is expected, be engaged. They have about ten days' start of the Turks as far as rapidity of mobilisation is concerned, and, if war is declared in the course of the next few days, will probably take the offensive, mask Adrianople, and push down the Maritza Valley towards Harmanli. Such at least is the Turkish forecast.

The Turkish Commanders.

The appointment of Nazim Pasha as Generalissimo makes it probable that the Turks, too, will elect to fight on this side of the theatre of war. Two armies are being formed, one, which will fight in Thrace under the command of Abdullah Pasha, the other under Ali Riza Pasha, a capable but unlucky soldier, for Macedonia. Uskub is expected to be its headquarters. As for the strength which the Turks can deploy during the all-important first month of operations, it is reckoned at twenty-four divisions of regular infantry (eight to ten battalions each), some of which will be below strength owing to the absence of units in Yemen and the islands; perhaps four divisions of Asiatic first-class Redif, and about fifteen divisions of European second-class Redif, which are mainly composed of untrained men, and will count for very little at the outset, except perhaps in the case of the units from Prishtina, Elbasan, and Prizrend, which are composed of Albanians. The total will amount to some 400 battalions, averaging about 750 each (300,000 men), with some 50,000 artillery, cavalry, and technical troops. Against these we shall probably see arrayed in the first month 275,000 Bulgars of first-class quality, 150,000 Servians, 80,000 Greeks, and 30,000 Montenegrins. After about a month the Turks will be able to count on some twelve to fifteen divisions of Asiatic Redif, about 150,000 men, with perhaps 50,000 more auxiliary troops, volunteer corps, etc., while the Bulgars will probably be able to add 50,000, the Serbs 50,000, and the Greeks 30,000 to their original effective of about 530,000 men. It does not at all follow, therefore, that the Turks will be able to deploy their numerical superiority at any early stage of a war. They have the remains of some sixty battalions locked up in Yemen; a large force will be required to protect railways, bridges, etc., against the *komitadjis;* and it will not be possible to strip the Russian and Persian frontiers of the 120 battalions stationed there; while the forty battalions in Irak and Upper Mesopotamia can never reach the front in time to be of service. A defensive compaign is, therefore, to be expected, unless the Turks' are of better and the Bulgars' and the Serbs' first lines of worse quality than is generally believed. Assuming a fair equality between the troops which will meet in the first month of a war, it is hard to expect the Turks to be able to take that victorious offensive which their journals predict, though the Balkan Allies will probably be equally incapable of pushing far into Macedonia.

Italy and the War.

"Pour quelque chose malheur est bon," and the imminence of a Balkan war will, so the diplomats anticipate, bring the long-desired announcement of a Turco-Italian armistice into the region of practical politics. The Porte is optimistic with regard to the prospects of a speedy settlement; and though the rumours current here that Italy will declare herself a partisan of the maintenance of the Balkan *status quo* and will prevent the Greeks from seizing any of the Turkish islands are probably based rather on hopes than on facts, there seems to be little doubt that the Italian Government desires to terminate the war so as to be left with its hands free to meet Balkan possibilities. The conclusion of an armistice would leave the Turks free to remove all their troops from the Asia Minor littoral—for no sane person anticipates a Greek descent on Smyrna—and from the Dardanelles, which run no risk of attack from the Hellenic fleet.

Railway communication has broken down.

NOTES FROM SMYRNA.

(From Our Own Correspondent.)

Smyrna, October 1.

Liberals and the C.U.P.

Although not Grand Vizier, Kiamil Pasha has evidently as much influence in the present Government as if he actually held that post, or we should not have seen the return to Smyrna of Fouad Bey, a member of his family, as Director of Political Affairs of the vilayet. Fouad Bey held this post during the old régime, but left the country on the proclamation of the Constitution. During the tenure of power by the Union and Progress Committee there was no room in Smyrna for any political party except that of the Committee. The party very much in evidence now is the Liberal one, and to keep pace with their growing strength a new Liberal club has been opened, Dr. Riza Tewfik Bey coming from Constantinople to inaugurate it.

Italian Fleet's Activities.

The Italian fleet is still hovering round the entrance to the Gulf, and several ships have been stopped and examined. To-day it is rumoured that all ships flying the Greek flag have been ordered out of Turkish waters and to make for Piræus. The Bulgarian steamer that calls at Smyrna weekly came into port this morning as usual, but had hardly dropped her anchor when the captain gave orders to lift it again, and the ship went off at full steam for Piræus, having landed all passengers on board. No news has been received by the Turkish authorities of the declaration of war by Bulgaria, but this incident makes it appear as if war had broken out.

Affairs at Samos.

The troubles at Samos are still continuing. H.M.S. "Diana" has arrived at Vathy and the British and French have occupied the town. The Turkish garrison has received reinforcements from Scala Nuova, and engagements between them and the insurgents have taken place.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, October 2.

An Uneventful Week.

The past has been a particularly uneventful week. We are experiencing the traditional lull before the storm, so to speak. Lord Kitchener is due back from leave to-morrow, and with his arrival events may well be expected to recommence raining fast and thick on the land. Many projects were left by him to be matured and executed during the summer months. Chief among these are the system of cotton halakas and the Cairo-Alexandria road. Work on the latter is being feverishly pushed; certain sections of it are already in a comparatively finished state, and it is a foregone conclusion that if he does not carry out his avowed intention of motoring from Alexandria to Cairo to-morrow, Lord Kitchener will take an early opportunity of inspecting the progress that has been made. Similarly the provincial authorities are straining every nerve to get the halakas full up with cotton, so that the British Agent may be able to see the system in full working order when he pays these compounds his expected early visit.

The Advisorships.

The Council of Ministers this week accepted Mr. Dupuis' resignation of the Advisership to the Ministry of Public Works, but no successor was appointed. Sir Paul Harvey's appointment as Financial Adviser expires on Saturday, the 5th inst., when his leave comes to an end; the Council of Ministers at its next sitting will officially take cognisance of and accept his resignation. Mr. Dupuis, having served the Egyptian Government sixteen years, becomes entitled to a pension of a little more than quarter his pay; on the other hand, Sir Paul Harvey's service has been far too short to enable him to draw a pension, and unless any exceptional arrangement is made he will be accorded the usual indemnity or gratuity.

The Seditious Circulars.

Slowly the inquiry into the affair of the seditious circulars drags its weary way onwards, and apparently it is no nearer conclusion. A development, which may or may not have some significant bearing on the inquiry, has been the removal of Imam Waked, the ringleader in the plot against the Khedive and Lord Kitchener, from Tourah Prison, where he was undergoing the sentence of fifteen years' hard labour passed on him, and his despatch to Alexandria. This step was decided upon after an interview between Sarwat Pasha, the Procureur-General, and Abdullah Bey El Touer, his representative in Alexandria; so it is to be presumed that some connection between Sheikh Shawish or Mukhtar and Waked has been discovered. More documents are hourly expected from Constantinople; but it is understood that the Parquet is not entirely satisfied as to the complicity of Sheikh Shawish in the compilation of the circulars seized in Mukhtar's baggage. The authorities want to compare the style and type of these circulars with those of the *Hilal el Osmani* and the Sheikh's other articles. Saghcolagashi Blattner, who was present at the search of the domiciles of the Egyptians resident at Constantinople and at the arrest of Sheikh Shawish, and who recently returned to Alexandria, has again left for Constantinople, so we may hope for further definite news shortly.

Sheikh Shawish and the other suspects at present in custody have lodged a protest at their continued detention under arrest, but, of course, their action has been unsuccessful. The two men sentenced to four months' imprisonment for perjury committed during the conspiracy trial, have appealed against the verdict, and their case, which was postponed on Sunday last, will come on for hearing on the 6th inst. This completes this week's diary of the progress of the inquiry.

The Army of Occupation.

The Egyptian trooping season started on Sunday last with the arrival of the transport "Dongola," having on board the 3rd Dragoon Guards. The latter regiment has come up to Cairo, and has replaced the 21st Lancers —the regiment which made its name at Omdurman— and which is now on its way to India. The other "moves" will not take place until early in the new year. The British headquarters has now been transferred out to Abbasia to the new barracks, which have just been completed. Its old premises in the Sharia Kasr-el-Nil have been taken over by the Public Works Department, and in exchange the War Office has been given a site on the Ismailia Canal close to the main station, where a "guard-house" is to be erected for the accommodation of the military police and an infantry detachment. If and when the Kasr-el-Nil barracks are vacated, this arrangement will have a reassuring effect; for it will mean that some, though only a few, "redcoats" will still be stationed in the town, instead of, as everyone feared, the entire British garrison being withdrawn to such distant points as Abbassia and the Citadel. All the same, residents do not look with approval on the prospect of the abandonment of the fine strategic point at the head of the Kasr-el-Nil bridge.

The Nationalist Party.

The latest phase in what many consider to be the "last agony" of the Nationalist Party is the resignation of its leader, Mohammed Bey Farid. The party had already declared itself dissatisfied with its leader's attitude and declarations. To be strictly correct, one should perhaps say, a certain section of its dominant members had, after the disclosures made in the inquiry into the recent conspiracy, expressed their disapproval of Farid Bey's policy, in the hopes of disarming the suspicions which they feared the authorities entertained towards them individually; and with Ali Bey Kamel and the other members of the executive committee at their head, they had appointed a sub-committee to report on their leader's case and his fitness for maintenance in his position. What the tenour of the report would have been nobody doubts for one instant, but Farid Bey has cut the ground from under the sub-committee's feet, and incidentally has relieved it from its awkward position by voluntarily resigning.

Farid Bey's resignation was accepted at a meeting of the sub-committee on Friday last, and the appointment of a successor was referred to a general meeting of the party. It will be interesting to see who the new leader will be, and it would not b at all surprising if Aly Bey Kamel were to be elected. Although it was he who was most instrumental in bringing about Farid Bey's election for life, he has been most active ever since he came out of prison at the end of July last in his opposition to the late leader. It is, indeed, thanks in a great measure to him that his retirement has been brought about. One may, perhaps, be permitted to see a personal touch in this increased antagonism of Mustapha Kamel's brother to Farid Bey. Aly Bey Kamel was prosecuted in April last for having published in *El Lewa* the seditious speech which Mohammed Bey Farid had delivered at the annual meeting of the Nationalist Party. Farid Bey was prosecuted at the same time, but managed to escape to Athens, leaving Kamel Bey and the editor of *El Alam*, who had also published the speech, to bear the brunt of the prosecution.

Sir Joseph Saba.

I understand, on very good authority, that it is highly probable that Sir Joseph Saba Pasha, who is at present in Constantinople in connection with the Postmaster-Generalship, will not, after all, accept employment under the Turkish Government. The Porte has long been anxious to secure the services of Saba Pasha (who is an expert in the matter, as everyone knows) for the reform of the Ottoman Post Office Administration. The ex-Egyptian Minister of Finance laid down certain conditions under which he would accept the task. Those conditions have been agreed to by the new Turkish Cabinet, but the Pasha feels that he has had enough of public service, and that he is entitled to enjoy the rest which he has earned. However, having submitted to the Porte the conditions which he required and those conditions having been accepted by it, he considers himself bound to it. I understand that his present visit to Constantinople has for its object the obtaining of a release from his engagement rather than, as is asserted, a settlement of the final details connected with the appointment.

NOTES FROM THE SUDAN.

(From Our Own Correspondent.)

Khartoum, September 28.

Arrivals from the North.

The trains from the North are now becoming full of interest and full of people, and ladies' names are beginning to appear again among the lists of passengers. All this in despite of a sun which, without going to extremes, persistently refuses to recognise that the hot weather is over! Among those who have arrived this week are Major Moir, R.E., the newly appointed Director of Posts and Telegraphs, and the Rev. H. B. Rivington. Mr. Rivington, who had a long illness at the beginning of the year, has been on leave, and has now regained his health. Bishop Gwynne is still in England, and will not be out before the end of October. Mr. Simpson, the Assistant Director of Education, will reach Khartoum to-morrow, and the Gordon College term will begin on October 5.

Sports and Football.

As occasional puffs of the north wind remind us, the cool weather will be here before very long, and characteristically the Englishman's mind turns to those more violent forms of sport by which he may counterbalance any growing coolness in the weather. During last winter an attempt was made to start a British sports club in Khartoum, and efforts were made to enlist support and to secure a ground suitable for football, cricket, hockey, etc. These efforts have proved unavailing, and so the more energetic souls have resolved to take time by the forelock, and revive the old football club. A general meeting has been held, and evidence has been forthcoming that there are plenty of men in Khartoum who wish to play football, and not a few others who, while lacking this supreme courage, are prepared to support the club financially and to cheer on their more courageous brothers from the touch-line. Here again, as is not surprising in "desert" Khartoum (for Khartoum is a desert except where man's skill has defied Nature), the difficulty is to secure a suitable ground. However, the club hope that they will be able to obtain the loan of a ground occasionally from Gordon College, where there are beautiful grass courts for the use of the students. Other matches will be played against the various companies of the 4th Battalion Rifle Brigade on their own sandy ground. We wish the club success in this effort to keep sport alive in the tropics.

Two Deaths.

When Death comes, he usually comes suddenly in the Sudan, and we regret to record that he claimed two victims this week. A young Rifleman, Mountain, died suddenly on Sunday morning after a very few hours' illness, from heat stroke. Mrs. Davidson, whose husband is one of the inspectors under the sanitary service, and is stationed at Khartoum North, died on Friday. Mrs. Davidson's death is the sadder, because it is only ten days since she came out to join her husband. She had been in failing health for some time, and the strain of the journey and the heat proved too much for her.

FRENCH NATURAL SPARKLING TABLE WATER.

Perrier

"The Champagne of Table Waters."

KEEPS YOU FIT.

HOT CLIMATES.—Perrier, now famous all over the world, is the ideal drinking water for hot climates. Its delicacy and vigour stimulate the digestion and brace up the system.

NOTES FROM SERVIA.

(From Our Own Correspondent.)

Belgrade, October 6.

King Peter's Speech.

When King Peter entered the Skupshtina yesterday for the purpose of opening Parliament he was received with hearty cheers, the deputies being present in full force, and the public galleries, the diplomatists' boxes, and the reporters' seats all crowded.

The King said that this special sitting of the Skupshtina was absolutely necessary. Cries of distress, said he, of our oppressed brothers and threatened complete extermination of them aroused intense feeling in the whole population which we sought to appease in order not to disturb the peace of Europe. The kingdom of Servia felt justified in expecting that the Porte would begin the introduction of reforms which would assure the enjoyment of a peaceful life to our blood-relations, thereby putting an end to those obstacles which impede the progression and development of the Servian kingdom.

"The Great Powers, and I affirm this with pleasure and heartfelt gratitude," continued the King, "we have to thank for their sympathy and their friendly advice to the Porte, seeking to ameliorate the misfortunes which our Christian brothers in Turkey had to undergo. Unhappily all was of no avail, and instead of the expected reforms we were surprised a few days ago by the mobilisation of Turkish troops quite near to our boundaries. These acts which threatened our freedom could produce but one reply, which was my decree of the 17th of this month (O.S.), ordering the mobilisation of all the forces of our country. The situation is clear, it is our bounden duty to take measures to assure our freedom; it is our duty, in unanimity with other Christian Balkan States, to do all we can to obtain such a state of things as will secure an honourable and lasting peace in the Balkans."

The King then declared Parliament opened, and amid loud and enthusiastic cheers retired.

Public Feeling.

The mere fact of mobilising an army does not establish the certainty of war. But a small State, at great expense, mobilising all the forces of the country, with the passions of the people strongly roused, ready to face death from patriotic motives, does imply a critical, a very critical, state of things. When we regard all points of the political compass, it is not impossible still to believe that war may yet be averted. Such, however, is not the general belief in this country.

Patriotic Fervour.

The Municipality, the Electric Works Company, employers of factory hands, merchants, and very many private persons have behaved nobly, giving money, clothing, and fuel freely to the wives and families of poor men who have joined the ranks. One Macedonian workman, who from his hard earnings had saved 2,000 frs., presented himself to an officer in command of one of the divisions, saying that he had spent the best part of his life in Servia, that he was now too old to be able to go to war, but out of the 2,000 frs. that he had saved he begged the officer to accept one-half to help in the war. The officer took the proffered money, wrung the man's hand, and told him that if every man was filled with his noble sentiments Servia would be still more proud of her children than she is now.

Another case of patriotism. A married Servian lady went to reside in Switzerland when her son was only three years old. The lady became a widow, returned to Servia, but left her son in Switzerland for the sake of his education. When war with Servia was spoken of, the son, now a young man, wrote to his mother that he wished also to join the Servian forces. The mother replied that he could not come as he did not know the Servian language. But he replied: "If I do not know Servian I know how to shoot as well as a Swiss, and I shall be worth as much as three others."

Enthusiasm for war is found everywhere among the Servians, and if fighting does take place, whatever may be the issue, it is expected the Servians will give a good account of themselves.

NOTES FROM ROUMANIA.

(From Our Own Correspondent.)
Bucharest, October 5.

Roumania Calm.

The honour conferred upon King Carol by the Czar is here generally regarded as a recognition of the former's consistent pursuit of a strictly peaceful policy. While neighbouring countries, in spite of repeated warnings and good advice from higher Powers, are preparing to launch out into adventures which, after all, can hardly end otherwise than disastrously for themselves, and for reasons which the cries of "patriotism," "liberty," and "reform" cloak but poorly, Roumania calmly follows the even tenour of her way and seeks advancement and success by the share rather than the sword. Mobilisation to right and to left of her leaves her calm, her own state of preparedness at all points allowing her to remain a cool if not uninterested onlooker. If her help is needed in enforcing or restoring peace, she will not be found wanting.

Army Manœuvres Abandoned.

The grand manœuvres, which have been so much looked forward to during the last few months, have had to be countermanded on account of the terribly wet weather of late. Now only one army corps with its reserves will work out hastily made plans over the ground lying between this city and Ploesti. One effect is that Bucharest for the last day or two has had the aspect of a city in time of war, with the bugles of departing regiments in the early morning calling one from bed, and a constant stream of officers and orderlies going and coming in every direction.

Danube Catastrophe.

A terribly sad accident—catastrophe is perhaps the better word—has occurred on the Danube, costing the lives of eleven officers and eight privates of the 3rd Pontoon Regiment. A party was proceeding down river from Hirsova in the river gunboat "Tretus," when, about eight o'clock in the evening, near where the River Jalomitza empties itself into the Danube, a collision occurred with a Hungarian passenger steamer. The gunboat sank immediately, and of those on board only one officer and three soldiers could be saved by the passenger steamer's boats. Among those drowned were Colonel Stoenesco, Major Grigorca, and nine captains and lieutenants. How the accident occurred it is impossible to say until the divers have made their report. The Hungarian steamer is meanwhile held under arrest. A gloom has been cast over Roumania generally by the sad occurrence. The regiment is left with only four officers of its full complement.

NOTES FROM CYPRUS.

(From Our Own Correspondent.)
Nicosia, October 2.

The imminent outbreak of war against Turkey is the one topic of conversation and the one thought in mens' minds here. When it is remembered that the population consists almost entirely of Turks and Greeks, or more correctly Greek-speaking Cypriots, it can easily be imagined how closely allied they are by race, or, at least, by language, and certainly by sympathy with two of the contending parties and that their partisan feeling will be stirred to a high pitch. It is safe to say that the fortunes of war will nowhere be followed more keenly than by the native inhabitants of this island.

Emigration from the Island.

For some time past emigration from this island has been in progress, and we learn that this expatriation takes place mostly from the north-east portion of the island, known as "the Carpass." During a single week in September last upwards of twenty young men left different villages of that district for South America, and a further eighty persons are said to have left for other foreign countries. It would appear that they are tempted by reports that up to 7s. a day wages, plus food, is paid to workers on various railway lines, but they are probably ill-informed in regard to the cost of living.

NOTES FROM PERSIA.

(From Our Own Correspondent.)
Teheran, September 26.

Persia's Recuperative Powers.

It has been said so many times by competent authorities for the last few decades that Persia cannot last much longer as an independent state, yet she has survived so many crises that one is chary of prophesying her immediate decease. Her steady decline— and she must continue to decline so long as present conditions obtain—has been marked by occasional partial recoveries, for making which she possesses a remarkable capacity. This capacity to recover might give one hope that all is not yet lost, were it not for the fact that in large measure the organisers of the revivifying process are, and have been, animated by the very self-same spirit which is responsible for the decline. It is no doubt thought that it was Nationalist Persia that asserted itself last year against the Royalist incursions, but it was very largely the forces of corruption which won the day on that occasion. The Bakhtiaris came forward, and, with the help of the Caucasians, drove the invaders back, but their motives were purely mercenary. Their tribesmen fought for loot, whilst their chiefs were more interested for the most part in the personal benefits achieved than they were in Nationalism. There is therefore no hope for Persia, in that there is no hope that these conditions will ever be reversed.

Trade Routes.

Some hopes were entertained that the Swedish officers would succeed in organising in a short time a force sufficient to keep the Southern trade routes secure. But the process is a lengthy one, and at the present rate of progress it will take from two to three years to organise a force of gendarmerie adequate for the protection of the Shiraz road. It is a long time to wait; much may happen in the meanwhile, but the most serious consideration is the question of funds. The expenditure on the gendarmerie is rapidly becoming a serious matter, whilst continued insecurity on the trade routes will be accompanied by a restriction of the Treasury receipts.

An attempt is being made by the Bakhtiaris to reopen the Lynch Road, which passes through their country, and which has for the last four or five months been subjected to the incursions of the Kuhghelus from the South. During these incursions much damage has been done; villages have been ransacked, crops destroyed; moreover large quantities of British goods in transit have been stolen. Sardar Jang, who was sent down with a force to restore order, now reports the road open. Apparently he has had no fighting, most probably for the reason that the looters had already started on their annual migration south to their winter quarters before his arrival on the scene.

The Sardar will remain in the Bakhtiari country as Administrator, and the effect of his administration will be evident next spring when the tribes are on the move North again, when, unless stringent measures are taken, the troubles will break out again. For the moment, and until next May or June, this route will remain open and available for traffic.

Governor for Kerman.

The Amir Muffakham, the newly appointed Governor for Kerman, left Teheran about three months back, but has not yet arrived at his destination. His progress has been impeded by the hostile tribes en route. He has a small force with him, and, according to accounts recently received here, he has used it to good effect. He is stated to have subjected his prisoners to a very usual form of execution, viz., building them up alive in lime and leaving them as monuments to his journey, and as examples to the rest. It is perhaps a cruel death, but it seems to be one of the few forms of execution which has the effect of deterring these tribesmen from the path of brigandage.

THE RULERS OF TABRIZ.

(By a Persian Correspondent.)

[The publication of the following letter has been delayed owing partly to extreme pressure on our space, partly to other causes. In view of certain rumours from Tabriz—and elsewhere—its publication just now will, however, probably be of particular interest to our readers. It will be remembered that the Tabriz correspondent of the *Vossische Zeitung*, writing under date of September 11, stated that although the Sipahdar had arrived in that city the real power still lay in the hands of Samad Khan (Shuja-ed-Dowleh), who had "proclaimed himself, against the will of the Government and with the assistance of the Russians, Viceroy of the Province and restored the old order of things." The correspondent added: "The population has the greatest mistrust of the Sipahdar, believing that Samad Khan would remain his right-hand man, and would retain the executive power. The Sipahdar was appointed Governor a long time ago, but delayed his departure in the hope that he might become Regent, or at least Prime Minister, and thus be able to bring about favourable conditions for the return of the ex-Shah Mohammed Ali. Ultimately he was obliged to leave Teheran for fear of the Bakhtiaris, who saw through his designs. At Tabriz it is being publicly said that the Sipahdar and Samad Khan are preparing a new *coup d'état*. And as they keep the entire power in their hands they will find it a comparatively easy task to bring down Mohammed Ali to Tabriz and thence take him to Teheran. The diplomatic situation is to-day very favourable to these designs, and the Government, too, has never been more demoralised than it is at present. To-day nobody doubts that the Constitution is on the eve of a total collapse—the more so as the Democrats have concluded a singular alliance with Salar-ed-Dowleh, the most implacable opponent of the present régime." Mirza Firooz Khan tells of the Sipahdar's arrival in Tabriz and of his reception by Samad Khan.—Ed. The Near East.]

Tauris, August 25.

His Excellency Prince Nasir-es-Saltaneh, the Sipahdar Azam, has arrived at Namatabad as the Governor-General for this province. He comes as the nominee of the Cabinet and with the consent and approval of both the British and Russian Ministers.

Twenty minutes after his arrival the former Governor-General, Shuja-ed-Dowleh, called on him, accompanied by all the prominent nobles, the leading clergy, and the foremost merchants of the city. This was not going *pishvaz*. If Shuja-ed-Dowleh had to go *pishvaz* to him he would have gone as far as the frontier of the province. But to call twenty minutes after his arrival was to treat him as a *visitor*, not as a superior.

The Sipahdar did not originally intend to come to Namatabad. He intended to stay in another village, not far distant, until the end of Ramazan. But Shuja-ed-Dowleh, knowing that there was no suitable lodging for him there, wrote to place his own new summer residence at Namatabad at his Excellency's disposal. The Sipahdar accepted his offer, writing, "I accept the invitation of your Excellency to live in your new summer palace in Namatabad and become your guest there until the end of the blessed month of Ramazan." It is, perhaps, hardly necessary to explain that in offering his palace Shuja-ed-Dowleh did not intend that the Sipahdar should become his guest as well; it was merely the courteous offer of a vacant house. In writing, "I accept your offer," and adding, "to become your guest," the Sipahdar showed a good deal of "smartness." Shuja-ed-Dowleh, however, had no choice but to entertain him. When a friend tells you, "I am coming to dine with you to-day," you can't very well say, "No; I won't have you." That would mean an end of your supposed friendship. And the Sipahdar comes with a following of 600 men.

He arrived on the 9th of Ramazan, and was to stay in Namatabad for twenty-one days. To entertain a prince with a suite of 600 men for twenty-one days means a daily expense of at least 150-200 tomans, or a total of over 3,000 tomans for only three weeks. Shuja-ed-Dowleh (no doubt to cut off this needless expense) stayed in Namatabad for three days trying to persuade the Sipahdar to come into the city, declaring that his presence in Tauris was essential for the peace of the city, etc. But the Sipahdar's determination to remain in Namatabad until both fasting and the heat of the summer have passed remained unmoved; and Persian etiquette and the dignity of Shuja-ed-Dowleh forbid him—in entertaining the Sipahdar—to exclude his suite from enjoying his hospitality even down to the last stableman. To exclude his suite would be an insult to the Sipahdar and a reflection on the dignity of Shuja-ed-Dowleh himself.

Shuja-ed-Dowleh will remain here until the Sipahdar enters the city. Then he wishes to retire to Maragha or to visit some of the hot springs of the Caucasus. The Sipahdar desires him to remain and "assist" him; but Shuja-ed-Dowleh would "rather be the first man in a village than the second man in a city." In wishing to retire to the Caucasus he has, moreover, a purpose of his own. It does not mean inability on his part or resignation from the Governorship for all time. It must be acknowledged that he has governed the city fairly well since last December. True, he has done some hanging and used some severe measures; but without such things the city could not be governed nor the turbulent elements kept under restraint! Shuja-ed-Dowleh, who knows his people as no one else can know them, believes that, in order to govern Persians well, the bastinado and the knife are two necessities. And he is also quite sure that the Sipahdar cannot govern the people of Azerbaijan as well as he can. He will, reckons Shuja-ed-Dowleh, get disgusted with the unruly elements, and return to his Mazanderan estates in despair, and then the people will clamour for Shuja-ed-Dowleh to return as their Governor-General. And Shuja-ed-Dowleh, in his wish to retire just now, is sure of this ending to the drama.

At first, when the Sipahdar had just started from Teheran, Shuja-ed-Dowleh declared that he would not permit him to enter this province, and sent 300 horsemen to Zinjan (where his elder brother, Sardar-Mooayad, is Governor) to stop his progress. He also recalled his Maragha regiments, supplied them with modern revolvers, and prepared in every way possible to fight the Sipahdar. Secret volunteers (3,000 men, independent of his regular army) were also prepared, who were to attack the Sipahdar as soon as he dared to enter Tauris. Simultaneously meetings were held in the large mosques, protesting to the Cabinet by long telegrams against the Sipahdar's coming. The telegrams were signed "Millat" (Nation). The Cabinet replied: "We know no nation in Azerbaijan. We only know 'Vatan' (Country) and Azerbaijan, a part of this country. Therefore you must receive any man that the country's Cabinet sees fit to send as Governor!"

To one of these protest meetings the foreign Consuls also were invited. They refused to attend, and sent word that as the Sipahdar was coming by the order of the Cabinet, and with the consent of both Russian and British Ministers, it was no use to protest against his coming. Shuja-ed-Dowleh at the same time was advised by the Russian Consul-General to stop his preparations to resist the Sipahdar, remain in Tauris, and work together with the Sipahdar as an "Associate Governor-General." He stopped his preparations, stopped the protest meetings that were being held "without his knowledge," changed his tone, calmed down, and began other preparations—to receive Sipahdar-Azam as the lawful Governor-General and do his pleasure!

To this end, before going to Namatabad, he had a long notice posted all over the bazaars and the city, and also published in his official organ, *Fékre*, which read as follows:—

"The honourable gentlemen and citizens, the noble lords, the wise ulema—may they have many blessings—the commanders of the army, and the merchants are respectfully informed that—

"His most exalted Excellency the Sipahdar Azam—may his glory last long—will arrive soon, and, on account of the hot weather, will remain in Namatabad. In order to serve him it is necessary that I, too, should be absent from the city for one day and one night. His Excellency Sipahdar Azam comes to protect the interests of the people and to defend the faith of Mohammed—on whom be the peace of God!—I am going to be the first man to obey the commands and the nays of this most exalted personage. Let all the citizens do the same. Let the citizens attend to their pursuits, their duties, and their prayers, and—by the will of God—all will be well!"

Most people thought that Shuja-ed-Dowleh was leaving for good. But he has returned, and the people are now inquiring of each other in a low tone: "When is the Sipahdar coming? And what are his relations going to be with the Russians? And what with Shuja-ed-Dowleh?"

Mirza Firooz Khan.

TURKEY AND EUROPE.

A correspondent in Constantinople sends us the following account of a lecture delivered recently in that city. It is interesting as affording a Turkish view of the Turks and their relations with the European Powers:—On October 5, at the Union Française, Pera, a most instructive as well as interesting lecture was given by Santo Bey de Semo, who, as the standard-bearer of Prince Sabaheddin, is known to the European political world as an eloquent conferencier.

The subject-title of the lecture—"The War in Tripoli and European opinion"—dealt with three main points, which Santo Bey set himself to disprove, viz.:—1. Have the Turks oppressed the races they conquered? 2. Are the Turks incapable of reform? 3. Are they opposed to reform?

These points he dealt with as follows:—1. That the Turks have not been oppressors is shown by the fact that Mohammed II. granted the Christians whom he conquered, as an act of magnanimity, and not of necessity, a number of privileges which constituted a form of *imperium in imperio*. As far as the foreign nationalities were concerned, the granting of the Capitulations was another signal proof of the magnanimity of the Turk, seeing that they were accorded to the foreigners at the zenith of Ottoman power, under Suleiman the Magnificent, when the Sultan's realms extended over half Europe, Asia, and Africa. This did not coincide with the European view that the Capitulations were wrested from the Turkish Sultans.

2. As for the presumed incapacity of the Turk to reform, religion offered no obstacle, seeing that when the whole of Europe lay in mediæval darkness, Islam, in the Province of Audalusia, was the means of introducing civilisation, and formed the link with Roman and Greek art. Nor has the Uralo-Altaic race to which the Turks belong shown itself incapable of civilisation, seeing that the Hungarians, who have attained to a marked degree of civilisation, belong to the same race.

3. That the Turks are not opposed to reform is historically proved, first by the action of Mahmoud in the beginning of the nineteenth century, who had his Janissary bodyguard massacred; by the Hatti Sherif and the Hatti Humayoun of Abdul Medjid; and by the Constitution of Abdul Aziz. The lecturer, however, pointed out how the effect of these reforms was neutralised by the action of the Powers, who were far more concerned in slicing-up Turkey than in securing peace in the Near East.

THE BULGARIAN ARMY.

(By Our Military Correspondent.)

During the Russo-Turkish War of 1877-78 the Bulgarian forces consisted merely of a few battalions of militia, which, however, did good service in defending positions in the Shipka Pass for several months before the final Russian advance took place. At that time Bulgaria was just emerging from a condition of serfdom under the hated rule of the Turks. The spark of patriotism and national life as yet burned low. Insurrections had been stamped out from time to time by the Turks with their customary severity. All trace of the ancient Bulgarian nobility and gentry had long since disappeared, and the nation that Russia came to relieve from the Ottoman yoke consisted of a race of peasants, thrifty, hardy, and fairly well-to-do, for the Turks did not grind them down with excessive taxation or interfere with their ordinary domestic life, except on occasion to seize recruits for Constantinople or to abduct their women-kind.

With the advent of the Russians and the victory of the Czar Liberator, national aspirations were fanned to a flame, and the task of organising the army on a Russian model under Russian officers was taken in hand and well carried out. But the Bulgarians soon perceived that they were likely to experience merely a change of masters, instead of the liberation that they had now begun to taste, and, under the genius of Stambouloff and the gallantry and devotion of Prince Alexander of Battenberg, they proved themselves by no means the grateful and submissive people that the Emperor of Russia expected and intended they should be. The annexation of Eastern Roumelia in 1885, which was effected without consulting Russia, so angered the Czar that all the Russian officers serving with the Bulgarian Army were suddenly recalled, leaving the army practically officerless. The Bulgarians promoted their own non-commissioned officers, and, within a month or so of this catastrophe, were able to inflict a crushing defeat on the Servians, who had taken the opportunity of invading the country when the Bulgarians were watching their southern frontiers in expectation that the Turks would endeavour to wrest from them their newly-won province. From that time the troops of Bulgaria proper and of Eastern Roumelia, which till then had been developing on different lines, were amalgamated, and have continued to make the same phenomenally rapid progress that these remarkable people have effected in all the other paths of the life of a civilised state.

At the present time this little nation of four and a-quarter millions, smaller than the population of London, has a compact, homogeneous field army of first-class material, amounting to some 235,000 men. Service is universal and, of course, compulsory, commencing at the twentieth year. In the infantry two years are passed (three in the other branches) with the colours, and eighteen years (sixteen in the other branches) with the reserve. After that time the men are drafted into the militia. Some, but not all, reservists are called up for three weeks' training annually.

The infantry consists of thirty-six regiments, of two battalions of four companies; the artillery of nine field artillery regiments, of two divisions, of three batteries of four guns, of twelve mountain batteries and three fortress artillery batteries. On mobilisation each infantry regiment expands to four battalions, and each field artillery regiment forms a third division of three batteries. Besides this each regiment forms a reserve regiment of four battalions and a depôt battalion. The cavalry consists of eleven regiments, which, when mobilised, have four squadrons each. The militia, forming the third line, consists of thirty-six battalions and thirty-six half-battalions. These latter have not been included in the field army as they are intended for the final defence of the country, but some 30,000 of them would doubtless be used over the frontier should the necessity arise.

The infantry is armed with the .315 Mannlicher rifle, and the artillery with the 7.5 quick-firing Schneider-Canet gun, and also with 7.5 Krupp and Schneider mountain guns, the latter being of the most modern type. All war material and uniforms are of the most modern and serviceable type. The army is at the same time the most economical (the annual Budget is almost 1½ millions sterling) and one of the best equipped of European armies. New inventions are carefully watched and readily adopted in so far as, and even further than, the means of the country permit. At the same time, no officer in the world, except perhaps the Japanese, is more careful to get full value for whatever he spends on arms and equipment.

The Bulgarian artillery is not showy, but extremely serviceable. It contains the pick of the officers, and great attention is paid to accurate and deliberate shooting. This branch is particularly strong in mountain artillery, but has no horse artillery.

The cavalry is of the regular type, mounted, some regiments on big Austrian horses and others on the smaller Bulgarian breed. The Engineers consist of three battalions of pioneers, one railway, one telegraph, and one pontoon battalion.

The officers are an earnest, hard-working body of men, sober, simple in their habits, and commanding the respect of their inferiors in rank. They come practically from the same class as the men, but have been previously educated as cadets in the military college and preparatory schools before obtaining their commissions. Their numbers are augmented on mobilisation by the recall of retired officers and by one-year volunteers, similarly to the German system, by which men of superior education are enabled to cut short their two years service with the colours to one year, and pass to the reserve as ensigns.

The men are of extremely good physique, of moderate height, and resemble in many respects the Japanese troops, only they are, of course, bigger men. The uniform is very like the Russian. Bulgaria, being for the greater part a mountainous country, the men are particularly quick and active in hill fighting. They are cool-headed, and at the same time full of fire, and may with confidence be trusted to give a good account of themselves, even when pitted against such formidable antagonists as the Turks. They are inured to colds, are well clothed and shod suitably to the climate, and, although their transport and commissariat are not so highly developed as in the armies of the Great Powers, centuries of service under the Turks as camp followers have made the peasantry thoroughly competent to improvise both pack and draught transport from their own resources at the shortest notice.

It will be of the highest importance, should war occur, that the allied Balkan States should remain in close communication and accord with each other, a matter always difficult, but easier in these days of all kinds of telegraphs, etc., than in former times.

Had the Italians continued the war against Turkey the chances would have been all in favour of the Balkan States. As it is, the Turkish army is absolutely fresh, and delighted to find an enemy that they can at length cope with on terra firma; and it is clear that war—if war there be—will be carried out on both sides with ruthless severity. It is to the interests of the Balkan States that it be short, sharp, and decisive. They hope that the Powers will intervene in their favour, either to complete their victory or to save them from defeat. If they were left alone to fight it out with Turkey to the bitter end, there is little doubt but that Turkey would wear them down and beat them separately.

ENGLISH BOYS' SCHOOL,
CONSTANTINOPLE.

The New School Building will be opened on September 15th. The School House has accommodation for forty boarders. Resident staff, six English masters and English matron.

Healthy situation on Nishantash Hill, facing open country; drainage sanitary fittings, baths and lavatories by English sanitary engineers

Preparation for Commercial Education Examination of London Chamber of Commerce. French and Turkish visiting masters. SPECIAL ATTENTION TO FRENCH. Turkish and Latin optional. English games. Fees moderate.

PROSPECTUS can be had on application to the Chairman of the School Committee—

A. T. WAUGH, Esq., *British Consulate-General*, **Constantinople.**

NOTES FROM ODESSA.

(From Our Own Correspondent.)
Odessa, October 6.

The Balkan Crisis.

Hitherto persistently optimistic in face of the daily gathering intensity of the tenebrous and minatory war cloud in the Balkans, the Russian Press at last appears to have abandoned all hope of a pacific issue to the grave *impasse*, and it does not mince its phraseology in criticising the helplessness, or supineness—or both—of the Great Powers in having allowed the situation to reach so parlous a climax. It is quite pertinently urged that had the Powers, and more especially England, whose responsibility is individually greater than that of any other of the co-signatories of the Berlin Treaty, boldly adopted morally coercive means for compelling Turkey to undertake forthwith the reforms so long and so grievously desired in Macedonia the situation might have been saved. It was the bounden duty of the Great Powers, when the danger first threatened, to have categorically insisted upon Turkey's literal and plenary fulfilment of the obligations laid upon the Ottoman Government by Article XXIII. of the Berlin Treaty. It is now, apparently, too late. The war fever among Bulgars, Serbs, Montenegrins, and Greeks hourly threatens to break through all diplomatic restraints and plunge the south-eastern peninsula into a bloody war, and once the conflagration is kindled there is no saying to what outer boundaries it may extend before it be finally extinguished. The Great Powers, we are assured, will strain every effort to localise the convulsion, but what guarantee has Europe that the Powers, divided into groups with opposing aims and policies, will be more successful in circumscribing the area of the calamity than they were in preventing it?

Russia is extending her precautionary defensive measures in case of sinister eventualities. The so-called "test mobilisation" on the Austrian frontier is now being carried out on the Roumanian (Pruth) frontier in Bessarabia. These "test mobilisations" are, as a matter of fact, concentrations of troops of all arms closely adjacent to the more vulnerable sections of Russia's western boundaries.

Russia's desire to localise the war area to the Balkans is alike sincere and easy of comprehension. She is admittedly unprepared for any complication that might involve this country in war. If Russia were to-morrow at war with any Power, she would have an internal revolution to deal with the day after. That is more or less a moral certainty, and it is the cause of the extreme anxiety felt by all foreign residents in this country lest some unlooked-for development of the situation should precipitate such a disaster. It is this revolutionary spectre that has held Russia back from openly going to the aid of her Slav kindred in Bulgaria and Servia as she did in 1877-78.

The Russian steamer that left here this morning for Varna and Burgas carried seventy-six Bulgarian officers, who have resigned their commissions in the Russian army to join the national colours, and 500 Bulgarian reservists, including 110 University students. By the same boat there also left the first of the several Russian Red Cross corps hurriedly organised for service with the Bulgarian Army, and a party of seventeen Russian war correspondents. The Bulgarian and Servian colonies in South Russia are sending altogether about 4,000 reservists and volunteers to Sofia and Belgrade.

Mohammed Ali Shah.

Mohammed Ali Shah is to-day reported by one of the Odessa journals to have the other day assured a local personage that he is absolutely confident of ultimately regaining the throne of Persia, and that, too, in loyal and patriotic deference to the unanimous demand of the Persian people. When, eventually, that national mandate comes neither Russia nor England can legitimately oppose his restoration. It was not, the ex-Shah added, a question of personal ambition, but he alone was capable of delivering his country from the chaotic evils that now distract and afflict it, and he alone could make a civil war in Iran impossible. One must admire Mohammed Ali Shah's robust optimism!

LETTER TO THE EDITOR.

ISLAM AND EUROPE: WHERE IS THE RESPONSIBILITY?

To the Editor of The Near East.

Sir,—You have so frequently and fairly expressed in your columns not only a sense of sympathy towards the Moslem world, but also a wish to impress on your public the fact that justice towards Islam is not incompatible with our imperial interests in India, and the position of trust we enjoy in Egypt, that I venture to address you on the subject of the responsibility for the present troubles of Islam.

With the Tripoli coast-line packed with Italian soldiery, poured into a purely Moslem part of Turkey with barely a vestige of excuse; with Turkey herself exasperated beyond all measure by her impotence to bring her troops into the field; with the Balkan races ready to spring on their unfortunate neighbour; with Southern Arabia in revolt, backed up and reinforced by Italy; and with Persia in process of disintegration, connived at, so far as one can see, by the Powers interested; with Morocco handed over by agreement to France; what can we expect but bitterness among the Moslems of India, or among the Egyptians, when they see us, month after month, nay, year after year, either helpless to aid their co-religionists, or, as it seems to many, secretly conniving at their downfall.

The first stage in this unfortunate series of events, to follow the agreed upon absorption of the Morocco Empire, was the supine attitude of Europe, when Italy launched her armada against the shores of Libya a year ago. Why then was it impossible for England, in conjunction with Germany, to intervene? Firstly, because we had given a sort of tacit pledge that some day Italy might help herself to this slice of Africa; and secondly, because it was the official view that Italy's action might detach her from the Triple Alliance, and we must not, anyhow, quarrel openly with a friendly European nation owning a navy of such calibre as Italy. Therefore, we broke our pledged word to maintain the integrity of Turkey.

The Arabs of Tripoli, however, are a tough breed. It is believed that they would have accepted an English occupation, but they resolved to die to a man rather than acknowledge the sovereignty of a race for whom they had neither respect nor goodwill. Moreover, they were stiffened by the presence of Turkish officers and troops. Soon after the occupation of the town there was a rising against the Italians, to quell which an enormous number of Arabs of all ages and sexes were ruthlessly done to death. This has never been disproved, and never will; and try as Italy may, she will never be absolved from the cruelty attending these "reprisals." Meanwhile the small Turkish garrison in the hill range (only a few miles distant) began recruiting an army, not without success, among the incensed hill and desert tribesmen. A year has elapsed, and battle after battle has taken place, some being of a very sanguinary nature, but always of the same character, the Turco-Arab forces, with a few guns, attacking with unparalleled bravery the invaders in their fortified posts on the coast line. Generally the result is the same. After desperate fighting the Arabs retire before the machine guns of the Italians, who are always supported by warships, and if we are to believe the Italian accounts of the numbers killed and wounded, it is terrible to think that this land, a year ago full of peaceful peasants, must now contain many thousands of wounded and mutilated Arabs, whose only fault is that they are defending their olive groves, camel pastures, and oases. Is it possible to feel one sentiment of sympathy with Italy in this cause? Yet it is rare to read in our Press any article in which these Arabs are not styled "fanatics." Surely they are heroes if ever any men were.

A year has elapsed, and the Balkan races, ever ready for turmoil, and who have their grievances, have had time to collaborate on a system by which they may unite and spring on their sorely harassed neighbour. It is like jackals at a wounded lion. At once all Europe has a bad attack of "nerves." Persia meanwhile is prostrate, with apparently Russia ready with the knout to give the death blow, while Britain mildly expostulates, wondering how to find an outlet from the *cul-de-sac* into which her policy of "spheres" and "zones" has led her. The Persians look in vain for some sign of the old "hands off" policy of the British Government. The Arab sheikhs of Tripoli are said to have sent word to England that they would accept some form of British occupation similar to that of Egypt. The Turks themselves, a brave and manly race, struggling desperately to right themselves in the eyes of Europe, are gazing now at England in the hope of friendship and support. How is it all to end? Will Sir Edward Grey and his counsellors still cling to his policy of groups of powers, and will he, acting, as it seems to many, with distinct bias against Germany, continue to identify his policy with that of France and Russia, whose programme for years has been the abasement of Islam and annexation of Islamic possessions? At any rate it cannot be doubted that Mos-

Digitized by Google

lems of India and Egypt see with bitterness and dismay that Britain, who has, so far at any rate, neither plundered Turkey nor Persia, and has even refrained from annexing Egypt, is yet unprepared to hold out a helping hand to their co-religionists in their dire distress.

For, as a matter of fact, the responsibility for the coming Balkan war, the end of which no one foresees, lies first with Italy herself, whose folly set the example, and next with Great Britain, whose feeble foreign policy opened the way to Italy's act of aggression. Is it too late to amend such blunders, by bringing pressure to bear not only in the Balkan States, but also on Italy herself, the prime cause of all the mischief? Is it too late to reverse in some measure our policy and show our Moslem fellow-subjects that Great Britain will do what she can to support Turkey or Islam, threatened as they are by different forms of lawless aggression?

With the theory that "Islam must go" I am utterly at variance. It is not by certain inconsistencies in the Koran that this remarkable religious system must be judged. It is by the effect it has upon the moral standard and fibre of the races who profess it. What is, in fact, required is a spirit of sympathy and tolerance between two faiths, which are, indeed, but branches of the same; and, if I am not mistaken, the more enlightened Moslems were ready to receive and proffer this before the unprovoked attack last year on Moslem Africa.

The writer of a pro-Turk letter is often charged with never having visited Turkey. I have visited various parts of Asia Minor, have crossed Turkey from the Mediterranean to the Persian Gulf, and I have spent two or three winters among the Tripoli Arabs. I have not been in the Balkan States, so that though my experience might be fuller I can claim that the more I have sojourned in Moslem lands the more I have felt that the attitude of so many towards Islam is totally unworthy of Christianity and civilisation. The true duty of Britain is, I firmly believe, to adopt a policy of real benevolence and goodwill towards Islam, and a firm resolve to help any Moslem nation sincerely in its struggles to maintain independence, or towards the higher civilisation which I believe they are capable of.
—I am, Yours, etc.,

H. S. Cowper.

NEAR EAST BOOKSHELF.

THE ARMENIAN CHURCH.*

Bringing to his work a facile pen, Mgr. Ormanian has rendered ecclesiastical history in entertaining form; never ponderous or dull, he has handled his subject with a simplicity and clearness that throughout sustain the interest of the reader.

The Church of Armenia claims direct apostolic origin from the apostles Thaddeus and Bartholomew, whom she has designated as the "First Illuminators" of Armenia; and though there have been some savants of the western world who have tried to dispute this early origin, it has never been found that their disputations could be accepted. Moreover, a people have the right to know more about themselves than other people could claim to know about them, and the introduction of Christianity into Armenia by the apostles Thaddeus and Bartholomew is regarded by Armenians as an important chapter in the history of their Church. To their first Catholicos Gregore Partev, surnamed Lusavoritch, or "Illuminator," is awarded the honour of having accomplished the conversion of the whole of Armenia to Christianity in A.D. 301, or, as is claimed by some writers, in A.D. 285.

The noteworthy point, however, in connection with the Church of Armenia which Mgr. Ormanian has fully explained is not so much her early origin as the liberal principles by which she is characterised. She not only disavows infallibility for herself, but asserts that no one Church is infallible but that all Churches are liable to err in doctrine, and proclaims only the Church Universal as infallible.

Standing on her broad basis she has turned her eyes steadfastly upwards to the meridian without seeking to interpret the lights in the shifting shadows that fall around, and has thus accepted only three dogmas as essential to the faith: the Trinity, the Incarnation, and the Redemption. She has inculcated these three dogmas as imperative, and has devoted her energies to upholding them, and with unfailing tolerance has allowed a wide latitude in the acceptance or non-acceptance of others. In the words of Mgr. Ormanian:—

> It is with simpleness of purpose and a minimum of encumbrances that the Armenian Church has steered her course in the matter of dogmas. . . . The expression *Unitas in necessariis* (Unity in essentials) has been brought by her to a point of the most stringent necessity, that of *Libertas in dubiis* (Liberty in doubtful matters) she has applied in the broadest of senses.

"The small number of dogmas which is peculiar to the Armenian Church," Mgr. Ormanian continues in another page, "must not be ascribed to mere chance or to a result which has not been weighed. It is the outcome, above all things of a sober principle in matter of doctrinal regulation."

Commenting upon the principles of exclusiveness and strictness of the Latin Catholic and the Greek Orthodox Churches, he remarks (p. 110):—

> Such an intolerance is altogether foreign to the spirit of the Armenian Church, which cannot admit that any particular or national Church, however vast she may be, has the power to arrogate to herself the character of universality. In the sentiment that true universality can only be brought about by the combination of all the Churches, she upholds the author of the principle, *Unitas in necessariis*, wherein are summed up the fundamental principles of Christianity. Having once admitted that condition, each one is at liberty to differ on points of secondary importance.

Thus the Church of Armenia in the midst of centuries of ecclesiastical controversies and warring dogmas and doctrines, has held out her hand of Christian fellowship to all Christian Churches, and whilst never foregoing her own independence bound with her own flock as the national Church of the Armenians, she has respected all, and accepted all Churches, regarding them even as herself, as parts of the Church Universal of Jesus Christ.

The Church of Armenia is little known to western peoples, consequently the broad basis on which its principles rest have not been realised or appreciated. It is to be hoped that the wise forethought of the author which led him to write his book in French and authorise its translation into English, thus presenting the volume in two of the best known European languages, will lead to a better knowledge and consequent better appreciation of this most ancient Church.

D. A. A.

RECENT OTTOMAN LEGISLATION.*

The great authority for all desiring to make a systematic and thorough study of Turkish institutions is still undoubtedly Young's *Corps du Droit Ottoman*, that somewhat ponderous erudite work of seven volumes. Since the epoch created by the revolution of 1908, however, many changes have taken place in legislative and administrative conditions in Turkey, and Young's monumental compilation has not yet been brought up to date. We are therefore glad to notice that Messrs. Jouve and Co., of Paris, have published a volume by Dr. A. Biliotti and Ahmed Sédad Bey treating in detail the course of Ottoman legislation from the date of the re-establishment of the Constitution until November 1, 1909. This publication is to be followed by others, bringing the chronicle of legislation nearer still to the present day.

The joint authors, who are recognised authorities on their subject, have placed within reach of the many who are ignorant of the Turkish language the texts of all the laws and regulations promulgated since the fall of Abdul Hamid. Not only those laws and regulations referring to political matters are included, but also all decrees relative to commercial concessions of all sorts and financial agreements. For example, we find such of the conventions concerning the Baghdad Railway and loan agreements between the Government and the banks as were signed during the period covered by the volume.

We are looking forward to the publication of further volumes in this new series, which is destined to prove of the greatest use to everyone seriously interested in Turkey.

CURRENT COMMENTS.

Writing from Constantinople on the 3rd inst., a correspondent says:—"The situation is very critical here, though less acute, perhaps, to-day than yesterday. The firmness and calmness with which the Ottoman Government has met the situation may have produced a disconcerting effect upon the allied Balkan States. Turkey is ready and almost desirous for war, which many people hold is the only solution possible of the Macedonian difficulty. Win or lose, the question would, at least, be settled, and Turkey would be left alone to evolve its own future."

***

Writing in the *Leeds Mercury*, Mr. E. Burney tells a fine story of the pluck of the Turkish soldier. The incident occurred in the defence of Plevna, and this is how it is described:—"An isolated post in the Turkish position had been held by a mere handful of Turks, ninety-five men to be exact, against repeated and determined assaults. At last the Turkish fire ceased, and the Russians charged up to the trench. They found one solitary Turkish officer sitting on the ground, wounded in the leg. He was smoking a cigarette calmly. A Russian officer addressed him in Turkish. 'So your men have run away at last?' he said. The Turk looked at him phlegmatically. 'They couldn't run,' he answered, and pointed to the corpses round him. 'They are all here!'" No wonder that Mr. Burney, who holds that Turkey's back is up now and that she will fight to the last gasp, thinks that the Balkan States are making a mistake of the kind that leads to disaster. After quoting the warning, "Stop! Look! Listen!" that confronts pedestrians and vehicles at level crossings in the United States, he adds:—"To-day such a warning might be thrust under the noses of the Balkan States by their best friends. Let them look at what they have got to fight, let them think what they are likely to get out of a war—even a successful war—and then let them listen. Let them listen to the growing, ominous murmur of Turkish wrath.

***

The famous ridge in Stamboul, which is now crowned by a line of glorious mosques, was the heart and kernel of Byzantium, and it is tolerably certain that many masterpieces of ancient art are entombed beneath more modern buildings. The *Daily Chronicle's* correspondent reports an interesting "find" in the purlieus of the Mosque of Mohammed the Conqueror. While digging a new watercourse the workmen lit upon several richly carved capitals and bas-reliefs, which had evidently belonged to a Byzantine Church—not to a "temple," as the *Chronicle's* headline puts it. Excavations had been in progress for several days without any supervision, and many valuables, of course, disappeared, including a sarcophagus in excellent preservation, displaying a Greek cross on its lid.

***

A large marble slab, also adorned with a cross, was carried off by some Turks to a café, where it served the base uses of a paving stone. The Greek inhabitants of that quarter stood aghast at the sacrilege, and a riot began which might have led to bloodshed but for the intervention of the Patriarch. It is pleasant to learn that the Turkish authorities have directed this relic to be restored to the Greeks, and that the Director of the Imperial Museum, which Constantinople owes to the much-lamented Hamdi Bey, has taken measures to prevent such pilferings in future.

***

Sir Rudolf Slatin, who has been Inspector-General of the Sudan since 1900, reports trouble on its frontier from the Anuaks and other barbarous tribes. It seems that they are addicted to raiding territory over which *Pax Britannica* is supposed to brood, and keep the southernmost confines of Egypt in perpetual turmoil. So the Sudan, like North-Western India, has its thorny frontier problem.

***

The genesis of Asiatic empires was ably demonstrrated by Prince Gortchakov in a Circular addressed to the Great Powers on November 21, 1864, and intended to allay the suspicions excited by Russian conquest in Central Asia. He pointed out that European nations which gained a footing in that continent were bound to come into contact with communities on a lower plane of civilisation, whose predatory instinct must be held in check, either by armed force or convincing them that they would gain more by trading than by raiding. This policy produces a belt of territory occupied by friendly tribes, which gradually adopt the habits of settled life. But peace is never of long duration. The "friendlies" are attacked by remoter tribes still in a state of savagery, and clamour for protection. *Debellare superbos* is the motto of empire: punitive expeditions must be despatched to bring the aggressors to heel, and the process of subjection continues until the European Powers can secure a "scientific frontier," which may be an impenetrable mountain range, the sea, or an organised State strong enough to be mistress at home.

***

Abyssinia is to the Sudan what Afghanistan is to our Indian frontier province, and peace in either quarter depends on the attitude which these powerful neighbours may take up. Should they allow rifles and ammunition to be smuggled into the belt occupied by semi-independent tribes, friction is generated which may develop into war. The Indian Government has suffered severely from gun-running in the Persian Gulf, and Sir Rudolf Slatin complains that modern weapons reach the savage tribes of the Sudan by way of Abyssinia.

***

It is perhaps useless to think of putting pressure on the Negus, whose authority is often set at naught by powerful chiefs. Nor can morality be preached to a certain class of traders, for whom patriotism weighs as a feather in the balance against the huge profits yielded by gun-running. The only method of checking a grossly nefarious traffic is to empower our Customs authorities to detain, pending inquiry, consignments of arms and munitions destined for the Red Sea or Persian Gulf.

***

General Sir Alfred Turner's autobiography, which has just appeared under the title "Sixty Years of a Soldier's Life," gives us an interesting glimpse of the race for Khartoum in January, 1885. He was in command of the rearguard of that ill-fated expedition, and preserved many thousands of refugees from slaughter by the victorious Mahdi. Sir Alfred's opinion on the much-discussed question, "Who ought to be hanged for our failure to rescue Gordon?" has the value which always attaches to the words of an eye-witness. Mr. Smalley, who has also fallen into his anecdotage, blames Mr. W. E. Gladstone for the fiasco, on the score of his procrastination in permitting the relief expedition to get under weigh. Sir Alfred Turner, on the other hand, reminds us that four steamers arrived at Metemmeh from Khartoum on January 21, bringing the following message from Gordon:—"Khartoum all right; can hold out for years." In view of the beleaguered Viceroy's optimism, it is hardly fair to blame Sir Charles Wilson for his delay of three days in order to refit and fuel his crazy steamer. As all the world knows, the expedition started on January 24, 1885, to arrive just forty-eight hours too late.

***

"Railways in Mesopotamia" was the subject of a lecture delivered last month before the United Service Institution of India by Lieut. P. G. Loch, and his remarks showed that public opinion in India is keenly alive to the benefits that may accrue to that country out of the great irrigation works planned by Sir William Willcocks. A new rich and populous country would arise on the flank of our Indian Empire and the Baghdad Railway would prove a valuable auxiliary in the conveyance of the produce and trade to and from the Persian Gulf, especially if due measures be taken to link up this region with the Indian frontier. And if the contemplated trans-Arabian line be pushed across from Busreh to Port Said a still more important outlet would be provided towards Egypt and Arabia, apart from its higher use as a link of Empire and a valuable means of accelerating the present journey to India. We are glad to see an appreciative article in the last *Pioneer Mail*, commenting on the special advantages to England and Egypt of the trans-Arabian route for a railway to India. This reminder appears opportunely on the brink of the meeting of Parliament, for the subject is bound to crop up very soon for discussion.

***

What Professor Flinders Petrie does not know about amulets is hardly worth knowing, and his lecture, delivered a week ago at University College, casts a flood of light on these curious survivals of primitive belief. Magic was built upon the supposition that inanimate objects can influence the course of events; and this highly irrational notion has defied the much-vaunted "spread of knowledge." Upwards of 200 amulets were known in ancient Egypt; the living wore them, and they were placed on a dead body in order to benefit it in the world of spirits. "Similar" amulets may be regarded as passwords entitling the wearer to assistance from unseen powers. Thus a tooth was strung round a child's neck in the teething stage; the wooer wore a miniature fox's head; a small piece of hard stone was believed to confer strength and long life.

***

Amulets spread from Egypt to Carthage, and thence were carried to the uttermost ends of the earth; they are in vogue to-day among the Eskimos and aboriginal Australian tribes. In Europe itself the Scandinavian nations are alone exempt from a foolish and degrading superstition. In ancient Egypt the amulet was part and parcel of religion; its use, therefore, was not a symptom of arrested culture. A much lower depth is reached by millions of Europeans in this twentieth century. It is believed that one-third of the children in our elementary schools are provided by their parents with some charm or "mascotte." Classes where means of living are precarious are addicted to wearing some little object which happened to be on their persons when an unusual piece of good or bad luck befell them. Very few actors, aviators, "bookies," gamblers, motorists, or sailors are without their mascotte, and a piece of coal is always found in the pocket of a burglar who comes within the meshes of the law. Professor Petrie's lecture is sorry reading for those who try to believe in the "progress of the race."

PERSONAL & SOCIAL.

The Prince of Wales is expected to pay a visit to Egypt in the course of the coming winter.

The Khedive is staying at Joachimsthal, Austria, for a three weeks' radium cure.

Sir H. Bax-Ironside left London on Saturday for the British Legation, Sofia.

Lord Kitchener landed at Alexandria last Thursday, and was received by the Ministers, senior officials, and representative natives. After calling at the British Consulate and upon various ministers in the morning, he left in the afternoon by special train for Cairo, where he arrived at 6 o'clock.

Sir Percy Sanderson left London on Monday for Bucharest.

Lord and Lady Oranmore and Browne have left 12, Cavendish Place for St. Mary's, Wimbledon, which they have taken for a few weeks.

Colonel F. W. Mc. T. Bunny, Assistant Director of Ordnance Stores, will return to Malta on the 13th instant.

M. Tankoloff, the newly appointed Attaché to the Bulgarian Legation in London, has been recalled to Sofia in connection with the mobilisation.

Mr. C. M. Marling, Councillor of Embassy, has arrived in town from Constantinople. He and Mrs. Marling will be paying a few visits before settling at 33, Lowndes Square, which they have taken from November 15.

Sir Malcolm McIlwraith, Judicial Adviser to the Khedive, left town for Paris last week, and after a short stay in the French capital will proceed to Cairo.

Brigadier-General Granville Egerton, C.B., has returned to Malta from leave of absence and resumed command of the Infantry Brigade, Malta.

Dr. Ruffer, President of the Quarantine Board, was expected to return to Alexandria from Europe at the beginning of this month.

Capt. C. R. Champion de Crespigny, Grenadier Guards, has been appointed for duty with the Egyptian Army.

Mr. E. A. Harrison, general manager of Messrs. Thos. Cook and Son (Egypt), Limited, is leaving London on his return to Cairo on the 25th inst.

Mr. T. A. F. Critchley has returned to town from Scotland, and will shortly be leaving for Alexandria.

Dr. Beddoe, of Cairo, who has been on a short visit to London, left at the beginning of the week for the Continent on his return to Egypt.

Mr. and Mrs. John Ross, of Alexandria, have returned to London from Scotland and are staying at the Grand Hotel.

The Rev. J. H. Molesworth, who had hoped to return to Church House, Cairo, towards the end of September, has been detained in England on account of Mrs. Molesworth's health. Until his return it has been arranged that Canon MacInnes and the Rev. W. H. T. Gairdner shall assist Dr. Spoer in the work of the church.

Lieutenant-Colonel W. T. Bartlett, who has served twenty-nine years in the Devonshire Regiment, will vacate command of the 2nd Battalion, in Egypt, on November 21. The next regimental officer for promotion is Major J. O. Travers, of the 1st Battalion, in Jersey, who has been twenty-six years in the regiment.

The King has given Major J. F. Bernard, A.O.D., his Royal licence to wear the Insignia of the Third Class of the Imperial Ottoman Order of the Medjidieh, which has been conferred on him by the Khedive of Egypt, authorised by the Sultan of Turkey. Major Bernard is a brother of the Financial Secretary to the Sudan Government.

Mr. Oliver Bury, who has just resigned the position of general manager of the Great Northern Railway, was one of the Commissioners appointed to inquire into the working management of the Egyptian State Railways in 1904.

During the absence on leave of Major G. C. Bayly, Commissioner, Papho, Cyprus, Major W. N. Bolton will act in his stead.

The engagement is announced of Captain Adam Block, Royal Field Artillery, son of Sir Adam Block, K.C.M.G., and Lady Block, of Constantinople, and Winifred Ruth, third daughter of Mr. and Mrs. John Loring, The Cottage, Doddington, Nantwich.

Dr. Nolan, ex-Controller of the Public Security at the Egyptian Ministry of the Interior, has arrived in Turkey to take over his new post as Inspector in Chief of the Ottoman Provinces.

The marriage arranged between Mr. Walter Basil Graham Montgomery, only son of Sir Basil Graham Montgomery, Bart., of Stanhope, and Miss Fanny Zarifi, only child of the late Theodore M. Zarifi and Mrs. Theodore Zarifi, will take place at St. George's Church, Hanover Square, on Saturday, November 2.

The Hon. Lieutenant-Colonel E. P. S. Roupell, D.S.O., Postmaster-General, will act as Lieutenant-Governor and Chief Secretary to the Government of Malta until further orders, and Colonel H. W. Engerer will act as Postmaster-General.

At St. Mary's Church, Graham Street, on Wednesday of last week, the marriage took place of Richard Massie Graves, Inspector, Egyptian Ministry of Interior, son of Albert Graves, Esq., of Erin-Fa, Harlech, Wales, to Eva, daughter of the late Major H. C. Wilkinson and of Mrs. Henry Wilkinson. Mr. Robert Vansittart was the groom's best man, and the ceremony was performed by the Rev. George G. Wilkinson, Priest-in-Ordinary to the King, assisted by the Rev. J. C. Howell, vicar of the parish.

Dr. J. Grech-Mifsud, LL.D., of Cairo, who was staying at the Hotel St. Anne in Paris, has left there for Italy on his way back to Egypt, where he will arrive about the end of the month.

Mr. and Mrs. John Wells are now settled in London, where they are to be found at 66, Palace Court, W. It will be remembered that Mr. Wells acted for several years as Director General of Mines in Egypt, and since the abolition of this Government Department he has been actively employed in the development of the oil industry in Egypt. During the recent summer, however, he has established an office in London, Cross Keys House, 56, Moorgate Street, E.C., where his wide experience and practical knowledge of all branches of engineering and mining work are greatly in his favour in his new profession as consulting engineer.

A marriage has been arranged, and will take place quietly next April, between George Ehret Iles, of the Sudan Civil Service, third son of the late F. H. Wilson Iles, M.D., of Watford, Hertfordshire, and Lillian Gertrude, youngest daughter of the late James Meikle, of Brighton, Sussex.

The marriage arranged between Walter Innes, youngest son of Surgeon-General Innes, of Charmouth, Dorset, and Annie Jean, third daughter of E. W. Creswell (late) Royal Engineers, of Copse Hill, Ewhurst, Surrey, will take place at Suez, Egypt, on Saturday, November 16.

Our Bucharest correspondent writes that Major Thomson, of the British Army, has arrived in that city, having been specially invited to follow the manœuvres.

Mr. John Prioleau, late editor of the *Egyptian Morning News*, is serving as special war correspondent with the Montenegrin Army for the *Daily Mail*.

Mr. John Murray, the well-known London publisher, has presented thirteen volumes to the library of Victoria College, Alexandria.

OBITUARY.

J. E. CORNISH, C.M.G.

We deeply regret to announce the death of Mr. Josiah Easton Cornish, C.M.G., M.I.C.E., chairman of the Alexandria Water Company, which took place suddenly at Lancaster Gate on the 2nd inst. Mr. Cornish, who was one of the oldest and most respected members of the British community in Alexandria, was the son of Mr. Thomas Smerdon Cornish, of Bradford, near Taunton, and was born in 1841. Nearly thirty years ago he went to Alexandria from Beyrout, where he had been manager of the waterworks, and took charge of the Alexandria Water Company as managing director, a position which he relinquished a few years ago in favour of his son. During the "events" of '82 Mr. Cornish distinguished himself, and the conspicuous bravery and foresight which he displayed on that occasion gained for him the distinction of C.M.G., besides being mentioned in despatches and receiving the third class of the Medjidieh. With a handful of the European employés of the company he kept a native armed rabble of several hundreds at bay for many hours by the timely use of the fire-hose, and remained at his post until ordered, in common with the other members of the English community, on board one of the steamers in Alexandria Harbour. Mr. Cornish married, in 1872, Emmeline Mary, daughter of Mr. W. W. Baggaley. He leaves a widow and several children, one of whom is the wife of Mr. F. T. Rowlatt, governor of the National Bank of Egypt. The funeral took place on Monday at All Souls Cemetery, Kensal Green.

DOMESTIC ANNOUNCEMENTS.

The charge for Announcements under this Heading is 2s. for three lines and 1s. per line afterwards. Minimum charge, 3s. All announcements must be authenticated with the name and address of sender.

BIRTH.

DUMREICHER.—On October 8, at Dippenhall Grange, near Farnham, Surrey, the wife of André von Dumreicher, Ain-el-Shams, Egypt, of a son (stillborn).

MARRIAGES.

ALDERSON—BENSON.—On October 2, at the Parish Church, Huddersfield, by the Rev. C. H. Rolt, Arthur Roy, youngest son of George Beeton Alderson, Ramleh, Alexandria, Egypt, to Adèle Maude, younger daughter of the late William Boerne Benson, Hayward's Heath.

COLLEY—SHALLESS.—On October 2, at St. Matthias's, Richmond, by the Vicar, the Rev. Max Binney, M.A., assisted by the Rev. Drew Roberts, Robert William Colley, of Blatchington Road, Tunbridge Wells, and Cairo, to Alice Mary Shalless, elder daughter of Mr. and Mrs. Edwin Shalless, of Cardigan Gate, Richmond Hill.

FOOLHARDINESS.

No one who has the interests of the Balkan Peninsula at heart can welcome the turn that events have taken. In the second week of October Bulgaria, Servia, Greece, and Montenegro stand committed to war with Turkey. The ostensible object of this confederation of the four States is to secure for their fellow-countrymen in Macedonia freedom from Turkish misrule; the goal of their ambitions, the real incentive of popular enthusiasm, to drive the Turks out of Europe. That the time is ripe for the latter consummation not one of the four Governments that has mobilised its armed forces will be found to affirm. To achieve freedom for the non-Turkish races of Macedonia the confederation must overrun that province and Albania, and must be prepared to govern them in Turkey's despite; or it must bring about the submission of the Turks by force of arms and wring from them a reluctant grant of autonomy under the nominal suzerainty of the Sultan. By throwing down the gauntlet at this stage the four States proclaim their belief that, in spite of financial stringency, in spite of the difficulties of a winter campaign, their united forces are so superior to the Turks that, if they have recourse to war, the latter are inevitably at their mercy. It is a belief to which no one else will subscribe until it is confirmed by the march of events. And if Macedonia be detached from the Turkish Empire, is a peaceful solution of its complicated problems at the hands of the rival claimants assured? If, on the other hand, they count only on wresting from the Turks a grant of the autonomy, what guarantee have they that the province will fare better than it did after the Treaty of Berlin? None but what is afforded by the moral weight of the Powers behind them in any agreement they may ratify with Turkey. That support they had last week before a single shot was fired across the Turkish frontier. Herein lies the folly of the appeal of the Balkan States to the arbitrament of war. We do not dispute the wisdom and necessity of the mobilisations. Too often had the four peoples been cheated of their hopes to believe that Europe would appreciate their earnestness, unless they showed themselves ready to draw the sword on behalf of their claims. But with mobilisation their point had been gained; or at least, as we hold, they had advanced as far along the road of practical achievements in Macedonia as they are likely to advance even after a successful war with Turkey.

It is only for taking the final step, which even after mobilisation was not absolutely necessary, that we would hold the Balkan States to blame. To us it seems the negation of much of the statesmanship that brought the four countries so near to their goal—the sinking of their own differences, the exercise of pressure upon both the Powers and the Porte. For a war with Turkey, whatever be the result, is to be no light undertaking. Apart from the rigours of the winter season, it will be war as the term is understood in the Balkan Peninsula, not as it is interpreted in the armchairs of sentimentalists. If the brief struggle between Greece and Turkey of fourteen years ago forms any criterion, there may be deeds committed on both sides that will tell of the grimness of the struggle and the deadly hatred of the opponents. For the Balkan States there has been ample justification for the resort to arms; but let it not be supposed that, so far as moral responsibility is concerned, they will enter or emerge from the conflict with clean hands. The Kotchana massacre was preceded by the bomb explosion in the market place; the bands responsible for the revolutionary propaganda in Macedonia have not carried out their tasks with velvet gloves; the rival claims of Bulgarians, Servians, and Greeks in debated territory have often been adjusted by the rough-and-ready method of obliterating opponents. *Autres pays autres mœurs.* These things are not cited to the prejudice of one or other of the belligerents. Rather may we admire the courage—however much we may regard their action as mistaken—of the Balkan States in daring all for the gratification of an ingrained hatred. True statesmanship, however, we feel, would have realised that beyond a certain point the interests of the respective countries demanded that their Governments should not go. From the Balkan point of view the cup of Turkey's sinning has long since overflowed. Constitutional government brought no relief to the peoples of Macedonia; the rule of the Committee of Union and Progress only intensified in some respects the excesses of the Hamidian régime. But so long as the Powers are not prepared to dispense with the Turks in Europe, the Balkan States must kick against the pricks in vain. Their successes in war could hardly be allowed to extend beyond a certain point; their defeat would set back the clock in the Near East many years, unless the Powers intervened on their behalf. So far then as Macedonia is concerned, the result, war or no war, bids fair to be the same—the introduction of genuine reforms under the ægis of the Powers. This result might have been attained last week more effectually than it can now. The Balkan States have willed that it should be achieved at the cost of many lives and impoverished treasuries.

In these forebodings we have given the confederation of the four States full credit for their alleged intentions. Montenegro has already declared war, and fighting has taken place on its frontiers. The formal declaration of hostilities by Bulgaria, Servia, and Greece, foreshadowed by King Nicholas in a proclamation to his people, is expected daily, and the trial of strength would then begin. In the meantime, however, the door has not yet closed upon the crowning folly. Skirmishes on the Montenegrin frontier do not constitute of themselves a Balkan conflagration, nor does an exchange of shots across the Bulgarian border necessarily entail all the terrors of real war. Even with a formal declaration honour might be satisfied with an initial engagement. The closer the Balkan States are brought to the realities of the issue for which they are contending, the better they will realise that these cannot well be attained on the field of battle. An agreement must follow, and mutual trust must be exercised until the pledges are fulfilled or the benefits of Macedonia's liberation established. These lessons can still be driven home in Sofia and Belgrade; the determination of the Powers to allow neither side to benefit from the war has been announced, and must be reiterated. There remains, however, the attitude of Turkey. The war-fever has spread to Constantinople, and throughout the length and breadth of European Turkey. In the face of foreign aggression the Moslems know no domestic feuds, and war has no less attractions for them than for the firebrands of the Balkans. To this spirit must be added the knowledge that they have been roused to fight for the existence of their empire in Europe, and they will be in no mood to grant under friendly dictation the concessions which were to be the issue of a struggle that they awaited with confidence. But, whether peace be maintained or whether the war be short or long, the Powers cannot turn back now. Though no fault may attach to the Cabinet in power in Constantinople, Turkey's shortcomings leave no room for the play of susceptibilities. The administration of Macedonia has to be remodelled, and the Powers must see that it is done. While the Balkan States stand aside, the Porte, if it wishes to maintain its sovereignty over the country, must do its utmost to promote the scheme of reform, in the knowledge that the non-success of the new system can only bring worse trouble for Turkey in its train.

THE WAR IN THE BALKANS.

PRESS OPINIONS.

Montenegro's Motives.

Apropos of Montenegro's reasons for taking the fatal plunge the *Times*, in a leader on Wednesday, remarked:—

It would be interesting to know exactly why Montenegro has opened the campaign, and why she has taken the irretraceable step precisely at this moment. It is just possible that the desire to play a conspicuous part in the bloody drama which is now begun had something to do with it. A more probable explanation is that the Montenegrin action is part of a concerted plan. The other Balkan States, which have no plausible pretext for declaring war at this moment, may have feared that they might, before such a pretext could be provided by the presentation and rejection of their demands, be entangled in protracted negotiations with the Powers concerning the extent of the projected reforms and the nature of the guarantee for their due execution. If such negotiations had once begun it might have been difficult to prevent them from dragging on indefinitely; and, in the sequel, their whole plans might have ended in disappointment. They may have wished to confront the Powers with an accomplished fact, and to precipitate a conflict before they could open the conversation. Montenegro was already engaged in difficult negotiations with the Porte arising out of frontier disputes and incidents. She had some sort of a pretext for declaring war, and her geographical situation made it comparatively safe for her to do so. It may also have been hoped that by taking the offensive before the others she might draw away part of the Turkish forces from the main theatre of war and disorganise the war plans of the Turkish Staff. Whatever the motive or the explanation, the die has now been cast. Montenegro has defied the Powers as well as the Porte, and we cannot doubt that her action, whether by arrangement or not, will force the hands of the other confederates.

Passion and Prejudice.

The following is from a leading article in Thursday's *Morning Post*:—

What, then, is the position of the five mobilising States? None of them can gain territory by victory, because the Great Powers are committed to the maintenance or restoration of the *status quo*. Any victory by either side must, therefore, be fruitless so far as territorial gain is concerned. The four Kingdoms aim at securing good government in those Turkish provinces inhabited largely by their kinsmen. The Powers declare that they will take in hand reforms in those provinces. Turkey can gain nothing by a war to resist reforms, because even if she were to crush the four Kingdoms, she would still have to face the demand of the six Great Powers. The Turkish Government, moreover, professes to intend to introduce reforms in the administration of the European provinces. Thus, if the matter be considered coolly, without passion or prejudice, a war has no purpose for any of the five States if the declaration of the Powers is taken seriously.

Danger of Sentimentalism.

The *Daily Graphic* (October 10) declines to accept the theory that the Montenegrin coup is merely a form of pressure on the Powers, designed to make them offer a higher bid than is contained in their Collective Notes, and believes that the move is strategical. It adds:—

Assuming that that is so, it is to the larger localisation that Europe must now give its most earnest attention. A heavy responsibility in this respect weighs not only on the Governments but also on what the late Lord Salisbury used to call "the unofficial people." The Governments may, we think, be trusted, though here and there disquieting symptoms are perceptible. The real sources of mischief are to be found in the morbid sentimentalism of public opinion and the ill-instructed demagogy of certain schools of political thought. The Eastern question, with its moving appeals to strongly rooted race and religious feuds, has never failed to find a dangerous response in such quarters; and it is to be feared that this war, which is certain to be waged with little mercy, if not with actual savagery, may repeat the disquieting experience. But the international circumstances are different now from what they were in 1876, or even in 1896. No Great Power can move without endangering the peace of the whole of Europe, and thus a catastrophe far worse than anything that may happen in the Balkans may easily be provoked. The sentimentalists and their organs in the Press will, therefore, do well to restrain their emotions.

It would be an excellent thing if "the sentimentalists and their organs in the Press" would take this advice to heart.

The Powers and the Nettle.

In the *Pall Mall Gazette* (October 8) Mr. J. L. Garvin writes:—

Why has peace been broken? Partly no doubt because the Powers fumbled at their nettle but never grasped it—partly because, after seventy years of evasions, delays, dead-letter decrees, and refusal to execute even the solemn Articles of the Treaty of Berlin framed under Lord Beaconsfield's auspices, the concession of reforms in principle was no longer the question. The question was to secure at last absolute guarantees for the execution of the reforms under European supervision. Towards a solution in that sense the Powers, so far as can be seen, never advanced an inch. Their unanimity was only secured by a common avoidance of the practical issue, the sole crux of the problem. Day after day last week the chief experts in the Balkans warned the world in the most positive language that the States of the Balkan League were desperate; that without satisfaction they dare not turn back; that without definite guarantees for reform war would be inevitable; that nothing but a miracle could save peace. They were right. The miracle has not happened.

The Dilatory Powers.

The *Daily Chronicle* (of Thursday) is of opinion that if the Powers only acted with decision, and gave the Balkan States some adequate, if informal, guarantees that their pressure on Turkey would be real, the situation might yet be saved. The Bulgarian statesmen who lead the Balkan Alliance have done nothing that would bar the door against peace. M. Gueshoff and M. Venizelos both know the folly of adventure and the wisdom of preferring a bird in the hand to half a dozen in the bush:—

The diplomacy of the Powers has not here to deal with impossibilists. It has only to deal with men who are tired of being given stones for bread, and are anxious in a practical way to get better fare. If it can meet them honestly and offer them assurances that are worth anything, it will succeed. But to do so it must make up its mind to take as firm a line towards Turkey as it tries to take towards them. Of this there is still less evidence than one could desire. It was on Sunday that the Powers are said to have agreed what they should say to Turkey. It was not till yesterday that their Ambassadors said it; and it is not reported that any of them said it then except the Ambassadors of France and Russia.

The *Daily News* also thinks very highly of Bulgaria's statesmanship—and not very highly of the Great Powers. The following passages are extracted from a leader in Thursday's issue:—

We have always believed that Bulgaria would not threaten action for nothing. She is too sagacious to wish for war for its own sake, and, as the official *Mir* of Sofia admits, the virtual concession of her demand for Macedonian autonomy, backed by guarantees which she could enforce, would still stop her. The vague promises of the Powers, which have promised fruitlessly several times before, and of Turkey, who has neither the will nor the capacity to fulfil her word, will not.

If Austria Intervenes.

Examining the conditions which would, in its opinion, probably result from a war in which all four Balkan confederates would actively participate, the *Matin* (Oct. 8) concludes:

Voici la dernière hypothèse la plus importante, la plus grave. Dans le cas où la guerre éclaterait et où l'Autriche, pour une raison ou une autre, ne resterait pas neutre, la Russie marcherait également. Ce serait alors un conflit entre la Russie et l'Autriche-Hongrie.

Mais les conditions de la Triple-Alliance ne joueraient pas et celles de notre alliance avec la Russie non plus.

Une guerre russo-autrichienne, à notre avis, n'est pas à prévoir: mais si par malheur elle éclatait, l'Allemagne et la France ne seraient pas obligées d'intervenir.

Balkan Demands—Their Ultimate Aims.

The Paris *Journal* (October 8) expresses very succinctly what appear to be the undoubted ultimate aims of the four Balkan States now face to face with Turkey:

Ce que ces états veulent, c'est la constitution de provinces qui ne seraient que nominalement turques, qui auraient leurs Chambres propres, leurs budgets, leurs milices nationales, sans un seul soldat ottoman, enfin qui seraient toutes prêtes à s'annexer à la Serbie, à la Bulgarie, au Monténégro, à la Grèce à la première occasion.

A Little Consolation.

M. Raymond Recouly, writing in the *Figaro* (October 9) on the position brought about by the declaration of war by Montenegro, finds some degree of consolation in the third paragraph of the joint note presented to the Balkan States:—

Il faut relire avec une extrême attention le paragraphe 3 de la note officielle remise hier aux différents états balkaniques:

"Si la guerre vient à éclater, les puissances n'admettront, à l'issue du conflit, aucune modification au *statu quo* territorial dans la Turquie d'Europe."

Là se trouve, pour l'Europe, le salut, l'unique salut. Cet engagement pris par tous les gouvernements, ceux qui sont plus directement intéressés aux affaires balkaniques et ceux qui le sont moins, doit rester la base même de toute l'action diplomatique, pendant et après le conflit qui vient si malheureusement d'éclater.

Digitized by Google

M. Marcel Hutin, the well-known French writer on foreign politics, also emphasises this point of view in an article which we notice in the *Echo de Paris* (October 9) :—

Il faut remarquer l'énergie du paragraphe 3 et l'engagement pris par les puissances de ne pas admettre de modification dans le *statu quo* territorial de la Turquie, quelle que soit l'issue de la guerre.

Les puissances vont, je le sais, continuer, sur l'initiative de M. Poincaré, à localiser le conflit qui a éclaté hier et à éviter que le feu ne s'étende.

The *Petit Journal* (October 10) also dwells on the capital importance of the third paragraph of the joint note of the Powers :—

On voit que le 3e paragraphe a une importance capitale puisque l'Europe fait savoir qu'elle est résolue à ne rien changer aux frontières des divers états balkaniques.

Si l'Europe reste fermement attachée à cette thèse, la guerre pourrait être localisée sans trop de difficultés.

En tout cas, le chef du gouvernement français aura tout mis en œuvre pour y réussir.

Views in Brief.

The following extracts from various journals speak for themselves :—

We are told that the action of Montenegro caused general surprise among the Powers. The only surprising thing is that the Powers should have been surprised. It will be their business henceforth to reckon with the reality of the forces in play, to be prepared for all calculable possibilities, and to guard as much as may be against further surprises if they wish to keep secure the general interest of Europe. From that point of view the prompt vigour with which Germany has associated herself with the efforts of the Triple Entente is among the most reassuring facts of the situation. It helps us all to keep cool heads.—*Pall Mall Gazette*, October 9.

The fact that the 1880 scheme was to apply to all the European provinces of Turkey became its undoing, and by fiddling alternately on the two strings Abdul Hamid contrived at once to use it and to render it useless. Hence, when it was brought out again last week, the States merely replied that the Turk was up to his old game. For our part, we do not assume that necessarily to be the case, but the differences between the new Turkish régime and the old have unfortunately not been so obvious as to disarm the suspicion among those who have been eye-witnesses of recent events in the Near East. —*Westminster Gazette*, October 9.

There is reason to hope that the Powers are so anxious to avoid a general conflagration that they may be able to agree to make a ring fence and let the Allies and the Turks fight it out. This will at any rate postpone the dangers and difficulties of the final settlement. The chief source of anxiety is, of course, the conflict of interests that exists between Russia and Austria-Hungary. It is to be feared that their views in regard to the Balkans are at bottom incompatible. Still, it is always possible that "the course of events" may bring a solution and that something will turn up to prevent the worst happening—a Micawberish aspiration, but the best that can be devised.—The *Spectator*, October 5.

The rashness of Montenegro has brought about a state of affairs which can only be remedied by the most skilful diplomacy, and by almost superhuman patience on the part of Turkey.—*Manchester Courier*, October 9.

The Bulgarians and Greeks, wishing above all to provide opportunities for their own territorial expansion, would not allow the restoration of order, and no matter what scheme of reform is set on foot there will be no success unless these States are taught that they must cease to trouble the waters.—*Yorkshire Post*, October 9.

THE PRESS ON THE NEAR EAST.

England in Persia—German Views.

Commenting on the visit of M. Sasonoff to Balmoral, the *Hamburger Fremdenblatt* (October 1) paints a gloomy picture of England's position in Persia. How nearly does the following extract approximate the truth, we wonder?

England has no longer any influence in Persia. Already before the end of the Nineteenth Century she had practically lost her trade in Northern Persia. Whatever it is possible for Russia to supply comes into the country by Russian railways and ships. Politically, also, Persia will become whatever Russia desires to make of her. On a sign from the Tsar, Russian regiments will move in, not merely into the frontier districts, but as far as Ispahan and even to Shiraz. England can no longer offer any resistance since the Persian Governmental organisation has so woefully collapsed.

Another journal, the *Fränkischer Kurier* (September 29), writes on the same subject :—

. . . All that Sir Edward Grey can now do is to avoid any definite decision as long as possible—to gain time. And it is in this manner that he will act. A clear, openly declared settlement of the Persian question is, therefore, hardly to be expected to result from M. Sasonoff's visit. The Russians will continue the strangling process and England will continue to look idly on.

Austria and Bulgaria.

The relations between the Balkan States and their powerful neighbour, Austria, are of particular interest and importance at the present moment. We therefore reproduce for the benefit of our readers a short extract from an article in the *Gaulois* (October 3), in which M. René d'Aral seeks to elucidate the *rôle* played by Austria in the present crisis :—

Ce n'est un secret pour personne que le roi Ferdinand, déçu par l'attitude de la Russie à son égard, s'est depuis quelques années rapproché insensiblement de l'Autriche. Ce rapprochement s'est manifesté dès 1908 sous une forme concrète. Rappelez-vous la singulière coïncidence entre la proclamation de l'indépendance bulgare et l'annexion par l'Autriche de la Bosnie-Herzegovine. Il est dès lors permis de se demander si nous n'allons pas assister demain à une réédition de cette secrète et mystérieuse entente? Le roi Ferdinand s'est rendu, le mois dernier, à Vienne, au moment du congrès eucharistique; il a profité de ces solennités qui lui permettaient de passer inaperçu pour avoir de fréquents entretiens avec le comte Berchtold. En a-t-il rapporté des garanties qui ont déterminé l'attitude qu'il vient d'adopter et la grave décision qu'il vient de prendre? Il y a là, en tous cas, un légitime sujet de préoccupations pour l'Europe.

Italian Nationalists and Peace.

The *Morning Post's* Rome correspondent reports that:—

The rumoured signature of peace has caused great indignation in Nationalist circles in Italy. The Nationalists do not desire that what they call an "ignominious peace" should be signed at a moment when Turkey is so much embarrassed by the Balkan Quadruple League. The *Giornale d'Italia*, the most widely circulated of the Roman evening newspapers, has for the last few nights attacked the Government for its conduct alike of the war and of the peace negotiations; at Naples the students of the University have made an anti-peace demonstration, and have applauded the action of Montenegro in standing up to Turkey; while, at the opposite end of the political scale, the Central Committee of the Reformist section of the Socialist Party has passed a motion expressing the hope that "the cause for which Bulgaria, Servia, Montenegro, and Greece have armed will be crowned with success." On the other hand, I hear that Signor Giolitti, the Prime Minister, is of opinion that he is strong enough to make his fellow-countrymen accept such concessions to Turkey as he may deem necessary.

Articles to Note.

"Mecca," in the *Globe* (October 9).

"Bucharest and Its People," in the *Daily Chronicle* (October 4).

"Constantinople and the Holy Cities of Islam," in the *Oxford and Cambridge Review* (October).

"A Trip to Montenegro," by H. J. Fuller, in the *Evening Standard* (October 9).

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

The opening of hostilities by Montenegro came as a surprise to the City, and prices suffered accordingly, but at the moment of writing there is a slightly better tendency. Discount rates are slightly harder, but call money is unaffected. The effect of the Balkan situation seems to be more appreciable in the shipping and produce markets, especially in the latter, owing to anticipated interference in collecting and forwarding crops, caused by mobilisation operations in Turkey.

***

In both Bulgaria and Servia a general moratorium has been proclaimed, in the former for three months' duration, and in the latter until the date of the demobilisation of the army. Under the provisions of the laws passed for the purpose of a moratorium, all private persons and financial and commercial companies are allowed the stipulated time of grace for payment of their debts resulting from commercial or civil transactions. The declaration of a moratorium does not usually affect the accretion of interest on debts.

***

The fact that Bulgaria has been the first of the Balkan States to resort to the expedient of the moratorium, coupled with the reports of unsuccessful efforts made in Paris and elsewhere to raise "hand-to-mouth" loans, does not point to a very flourishing condition of the Bulgarian Exchequer. Failing funds, winter weather and Turkish tactics will, in my opinion, prove too strong for the Balkan Entente.

***

The Constantinople correspondent of the *Daily Chronicle* has, I see, been writing about the shallowness of the waters of the Tigris, which, as he states, is causing no little uneasiness to the German company who hold the singularly liberal concession for the so-called "Baghdad Railway." The directors of the company are said to be "making every effort to secure uninterrupted construction of the railway, and to find ways and means of bringing building material in larger quantities." But even the oldest inhabitants of Irak el Arabi "cannot remember the time when this river contained so little water"; the steamer service is carried on with great difficulty already, and "it is believed that the Tigris has not yet reached its lowest tide level."

***

This is, indeed, a serious state of affairs, and one to which the Turkish Government should—despite its many preoccupations at the present time—give its earnest *and prompt* attention. And as British interests are intimately concerned, our own Government also should take steps in the matter without further loss of time. As to the German railway directors, they must, of course, look after their own interests. And, judging by their past success in this direction, I should think they were very well qualified to do so.

***

Our own interests are too well recognised to require recapitulating here. The boats that show our flag on the Tigris do more, perhaps to keep up our prestige in that part of the world than the presence of many consuls and vice-consuls; and if only for that reason, it behoves us to see that the river is kept open to navigation. The danger just at present is that, shallow as the Lynch boats are, there will soon not be sufficient water left in the river to float them unless steps are taken to prevent its running to waste in the lower reaches. The whole subject is dealt with very clearly in Sir William Willcocks's report, which shows that the wastage is due to the lack of regulating heads for the Chala, Majar Kebir, and the Machera, and states that, "looking at the state of the river as it is to-day," there is a not remote possibility of Baghdad being completely isolated ere long. Sir William estimates the cost of providing the necessary regulating heads at less than £T50,000. They should be provided without more ado. And, if necessary, England should find the money for the work.

***

I notice that a contemporary bewails the fact, mentioned by Consul-General Lorimer in his report on the trade of Baghdad, that a cinematograph show was inaugurated there in 1911. This our contemporary affects to regret, as the final triumph of western vulgarity over the ancient traditions of the last stronghold of Eastern romance. I am unable in this particular case to condole with the London journal, for in the cinematograph I see an instrument, simply invaluable, for the education of native populations which would otherwise remain impervious to modern ideas, perhaps for generations to come. Even here, in Europe, the potentialities of the cinematograph as a factor in education are only just beginning to be understood, but I venture to prophesy that in a very few years we shall see our own Government, among many others, officially introducing cinematograph apparatus into even the remotest corners of the Empire, for educative purposes. I would therefore suggest that manufacturers of such appliances give some thought to the production of a suitable model for use in out-of-the-way places—"fool-proof" and provided with, say, paraffin, petrol, or acetylene burners.

***

The question of roads is receiving a good deal of attention at present from the Egyptian Government. Work in connection with the great trunk road from Alexandria to Cairo is being actively pushed, and there is no doubt that, when finished, it will do much to encourage new agricultural and industrial developments. There are, of course, what are called agricultural roads, but these are in reality little more than rough earth embankments, suitable only for donkey and camel transport. Moreover, they follow the line of least resistance, which entails a route even more meandering than that of an average Surrey lane. It is encouraging to know that both the Egyptian and Turkish Governments are doing all possible to develop systems of roads adapted to carriage and automobile transport.

***

A correspondent in Roumania informs me that according to provisional figures published by the Director-General of State Accounts, the surplus of revenue over expenditure for the financial year 1911-12 up till August 31 amounted to 105,028,000 frs. As the financial year does not close until September 30, the total surplus is expected to reach 110 million francs. This is evidence of prosperity of a most indisputable kind, which I hope will long continue. When a country can show such financial results as this, would it not be a thousand pities that war should intervene, with its inevitable consequence of budgetary deficits?

***

I notice in the *Observer* the following optimistic comment on Egyptian securities, which advices from Egypt authorise me to fully endorse:—"The Egyptian group has suffered with the rest, but only to a slight extent, as a result of the recent troubles in the Near East. But the cotton crop outlook continues good, and the heavy gold demands are an indication of the satisfactory position resulting. There may easily be a considerable impetus given to this group of securities, pessimism as regards which was overdone last year, allowing for untoward happenings, which were serious enough, as must be admitted."

***

I hope that soon we may be able to see a change in the system under which adjudications on tenders are made in Constantinople. The procedure at present followed allows opportunities for all sorts of trickery, which is detrimental to the interests of the Government. Preliminary tenders are first asked for, and subsequently tenderers are invited to attend collectively, and bid against one another by successive reductions (5 per cent., 10 per cent., 15 per cent., and so on) in the amounts of their tenders; that is to say, the contract is practically put up to auction among the preliminary tenderers.

***

Commenting on the placing of Government orders in Turkey by tender, the *Mercantile Guardian* draws attention to the evil to which I have alluded. Our contemporary states that the Turkish War Office spends some ten millions sterling a year, or one-third of the national revenue, and the great bulk of its orders have perforce to be placed abroad. The fact has doubtless some connection with the more numerous visits by Englishmen, of which Mr. Waugh (British Consul) takes approving note. He gives manufacturers warning against "certain local firms"—not more specifically named—who attend the public adjudications for the purpose of finding out what manufacturers quote and who then underbid them, taking their own chance of succeeding in placing the order at a profit. These free lances are apparently natives, and their operations are made possible by the absurd system under which the contracts are let. Their intervention is hurtful to both sides, for the War Office has to put up with loss of quality, and the manufacturer has an aggravated risk of finding the goods left on his hands. Manufacturers are advised, in their own interest, to refuse to deal with some of these parties, but Mr. Waugh does not take the responsibility of advising refusal to deal with all or any of them.

Constantinople Business Letter

(From Our Special Trade Correspondent.)

Constantinople, October 5.

Constantinople Tramway Co.

In my letter of May 31 I described at some length the details of the convention signed between this company and the Ministry of Public Works, granting to the former a concession for fifty years for a system of new lines of a total length of 20 kilometres, thereby exactly doubling the length of the lines worked by it.

The first ten kilometres of these newly ceded lines are to be completed within a period of three years, and with a view to providing the necessary funds for the execution of the works covered by the convention, and the completion of the electrification of its existing lines, the shareholders, at an extraordinary general meeting held on September 23, authorised a further call of £T4½ on the company's unredeemed shares, and the issue of debentures, over and above the £T400,000 authorised at the extraordinary general meeting of December 23, 1908, for an amount not to exceed the total subscribed share capital.

The nominal share capital of this company, which was founded in 1869, was originally £T400,000, in 20,000 £T20 shares, of which £T8 was called up. This was increased to £T800,000 in 1873 by the emission of 20,000 new shares. Owing to losses incurred in the working of omnibuses and small cars, the £T20 shares were reduced to £T17 in 1875, and the £T8 paid up per share was written down to £10. In 1910 a further call of £T7½ per share was authorised, but of this amount only £T5 has so far been called up. These shares of £T10 paid up are quoted on the market at the present moment at about £T20. There has also been a third issue of 20,000 £T20 nominal shares (£T10 paid up). Since its foundation the company has annually redeemed a certain number of its shares at par, against which it has given beneficiary bonds. These bonds are quoted on the market at £T11. The subscribed capital, according to the last published balance-sheet in December, 1911, was represented by 17,914 unredeemed shares of the first and second emission, and 17,617 shares of the third emission, i.e., 35,531 shares on which £T10 has been paid, £T355,310. The board is now authorised to make further calls of £T7 on these shares, and to issue debentures not to exceed the amount of the subscribed capital. It was mainly to acquire and control the electrification of the Constantinople Tramways, the Underground Railway between Galata and Pera, and the electric lighting of this city, that the Electric Trust, known as the "Consortium of Constantinople," was formed.

Societe Generale des Routes.

The Imperial Ottoman Bank has waived its privilege in the matter of an issue of Treasury Bonds for £T440,000, to be taken up by the Banque Française pour le Commerce et l'Industrie on the same conditions as the last issue, 7 per cent. and ½ per cent. commission, for payments due to the French company constructing the roads of the Empire.

Ottoman Steam Navigation Co.

The three boats built by the French St. Nazaire firm for this company, mentioned in my last letter, are said to have left Marseilles for this port, flying the French flag under an arrangement made with the French Government.

Adjudications.

The delay has been extended for the receipt of tenders by the Prefecture of the City for the 40 to 100 double-acting fire pumps, mentioned in my letter of August 24, required by the local municipalities and those of certain cities of the provinces. The preliminary adjudication will now take place on October 31, and the final on November 4. The time limit for the delivery of the 40 to 100 pumps on wheels, suitable either for animal traction or to be carried on the shoulders, as well as the same number of hose waggons having been considered too short, this has been increased to six months. The delivery of those intended for the provinces, which will be bought as the orders come in from the interior, has been extended to one year. As a result of the adjudication which has just taken place, the price of each pump has been fixed at Ps 5,000 (Medj. at 20), £41 13s. 2d., and that of the hose waggons at Ps 1,600, £13 6s. 7d. Those who wish to make reductions on these prices are invited to apply to the Council of the Prefecture of the City, of whom further particulars can be obtained.

Tenders are invited by the Ministry of Marine for 134 bedsteads, with mattresses, for the Naval College; 200 ft. of single leather machine belting, 2 ins. wide, 200 ft. 2¼ ins. wide, 200 ft. 2½ ins. wide, 200 ft. 3 ins. wide, 200 ft. 3¼ ins. wide, 200 ft. 3½ ins. wide, and 200 ft. 4 ins. wide; 200 ft. double leather belting 3 ins. wide, 200 ft. 3½ ins. wide, 80 ft. 10 ins. wide, in all 1,880 ft. different widths, and 500 laces 5 ft. in length; 101,756 metres of "English linen" for trousers and shirts. Unfortunately the dates for obtaining details and samples of these supplies are October 5, 7, and 8, respectively, so that only locally represented firms can expect to compete.

Sugar Refineries.

It was recently stated in The Near East that American capitalists had applied for authorisation to establish a number of sugar factories in Turkey. It is now reported that a Franco-Ottoman group have asked for a concession to establish a sugar refinery at Erzeroum, and that the demand is under consideration at the Ministry of Agriculture.

Suspension of Railway Traffic.

I have tried to avoid saying anything on the subject of the Balkan situation, although the temptation is great, because this does not fall within my province, but there are certain reflex conditions which I cannot ignore. Since the 3rd inst. both the Conventional and Orient Express services between Constantinople and Western Europe have been suspended, and we are dependent upon the tri-weekly Roumanian service, viâ Constanza, for our postal communications. A notice issued to-day advises that the transport of merchandise on the entire Oriental line, Constantinople-Mustapha Pasha-Dedeagatch, has been suspended. The Anatolian Railway Company also notifies that all merchandise traffic on its lines, including Konia-Ouloukichla, is suspended until further notice.

Prohibition of Export of Wheat and Flour.

The Council of Ministers having decided to prohibit the export of wheat and flour from the whole Empire, telegraphic instructions to this effect have been sent to all the provinces.

BOSNIAN RAILWAYS.

In placing the railway programme for Bosnia before the Bosnian Committee of the Austrian delegation, Dr. von Bilinski, Common Minister of Finance, stated that the programme also included the construction of a line from Bugoino to Arzano, as desired by Dalmatia, a cross line for traffic from Servia to Spalato, on the Adriatic, being thus provided. Servia would thereby economically, and perhaps also politically, achieve what she had aimed at with the so-called Adriatic railway in the Balkan countries.—Reuter.

ATTAR OF ROSES.

The warlike preparations in the Balkans have already had the effect of "firming up" the market for attar of roses, an important product of Bulgaria, exported by way of Constantinople, says the *Morning Post*. An actual state of war would cause a further sharp advance in the price of this precious substance, which already stands at an unprecedented figure, and this would be followed by a rise in the cost of many popular perfumes in which the attar is the main ingredient. The present wholesale value of best attar of roses—notwithstanding that it now has to compete with an artificially prepared substitute—is well over 2d. per drop. At all times, but especially in bad seasons, the buyer of attar has to use great caution, for it is one of the most adulterated products in commerce, and a further addition to the present fabulous price would increase the temptation which "fakers" already find too strong.

INDUSTRIAL DEVELOPMENTS IN TURKEY.

The *Board of Trade Journal* contains the following information from the report by Mr. B. A. Altintop, of the British Consulate-General at Smyrna, on the trade of that district in 1911-12, which will shortly be issued:—

It was only natural that, on the downfall of the old régime, a reaction should set in and a new spirit of commercial and industrial activity in the country manifest itself. That is precisely what happened. The restrictions which formerly stood in the way of promoters having been withdrawn, quite an army of concession seekers inundated the country, principally for mining concessions and for various works of public utility, municipal and otherwise.

Foreign Capital.

It soon became evident, however, that the new régime was averse to the development of the country's latent resources by the instrumentality of foreign capital and enterprise. The great army of foreign concession seekers soon realised the situation, and left the country, but the new spirit awakened was kept alive and manifested itself in the erection of factories, formation of new companies, etc., by foreigners established in the country, and by the wealthier or more enterprising classes of the native population. Even the Turks themselves have begun to take to commerce and other ventures of an industrial nature. The result is that quite a number of mills and factories have been erected in the Smyrna district during the last few years. The most important of these are for spinning and weaving (cotton and wool), and for extracting oil from cotton seed and tannin from valonia. The industrial awakening referred to is further evidenced by the establishment of a large number of machine workshops, by the steadily increased imports of machinery, and the gradual substitution of mechanical appliances for hand labour.

A new brewery is in course of construction in Smyrna, and the staple industry of the district (carpet manufacturing) is visibly extending. Under the name "Société Anonyme Ottomane de Manufactures de Coton" a company has been floated for the purpose of manufacturing cotton goods locally. The machinery has been bought in the United Kingdom at a cost of £36,000.

Dissatisfaction with the present, and uncertainty as to the future, extreme caution and reserve in all dealings, tightness of money, restricted credit, and scarcity of labour, may be said to be the characteristic features of the present situation. The great hopes raised as to the country's economic and other developments a few years ago have not been realised. No steps have been taken to develop the agricultural and mineral resources of the country, and no appreciable improvement has been made in municipal administration or public security. Signs of improving conditions, however, are visible.

Progress of Smyrna.

Great activity is noticeable in the building trade of Smyrna. The town has been undergoing a veritable transformation during the last three or four years. Substantial bank buildings, business premises and warehouses, theatres, factories, educational establishments, and private houses both in the town and suburbs, have been built, and others are now under construction. The increase in the importation of building material, such as cement, timber, tiles, iron, sanitary appliances, etc., is an additional evidence of activity in this respect.

Despite the absence of encouragement on the part of the Government agriculture is slowly but steadily developing. Machinery is being more and more introduced, and, indeed, its use is absolutely necessary in view of the growing scarcity and costliness of hand labour.

Foreign capital, despite the unsettled condition of affairs, is steadily introducing itself more and more every year into the country. A few years ago the only banking establishments which had branches in Smyrna were the Imperial Ottoman Bank and the Crédit Lyonnais, and neither owned its own premises. At the present time there are, in addition, branch offices of seven other public banks, most of them installed in their own substantially built premises.

Openings for Business.

TURKISH REQUIREMENTS.

The *Board of Trade Journal* gives the following information from the report of Mr. B. A. Altintop, of the British Consulate-General at Smyrna, on the trade of that district in 1911-12, which will shortly be issued:—

It cannot be denied that British goods are coming more and more into favour in Turkey. Cotton textiles and machinery have always formed the chief imports from the United Kingdom. Sporting outfits, sanitary appliances, preserved food, leather goods, salted fish, oil engines, and all description of labour-saving machinery (owing to the increased cost of labour) are meeting with a steadily increasing demand.

STOCKINGS.

Socks and stockings are in brisk demand at Salonika, says the *Mercantile Guardian*. The sorts required are cotton socks at fifteen pence to two shillings, ladies' stockings from two shillings to eighteen shillings, silk thread from ten to twenty shillings, and Scotch woollen from six to fifteen shillings, and heavier Scotch up to twenty-five shillings. The goods are packed in boxes of one dozen ordinarily, but in half-dozens for the better qualities.

BAGHDAD'S REQUIREMENTS.

The demand for oil engines and agricultural machinery in Baghdad, to which we have frequently directed attention, appears to be well maintained, according to the report of the British Consul-General (Mr. J. G. Lorimer), just issued. The report says: "There is a steady increase in the import of machinery, but the high figure reached in 1911 was due to the arrival of about £25,000 worth of Continental machines for the Turkish military factory at Baghdad, and must be regarded as exceptional. Practically the whole of the remainder was from the United Kingdom, and the bulk of it consisted of oil engines and centrifugal pumps for agricultural purposes, a department which the British firms at Baghdad have well in hand."

Another requirement of Baghdad that would seem to be worth notice is referred to in the report in the following sentence:—"A general demand at Baghdad for finer clothing is revolutionising the local industries, and larger quantities of worsted yarns were imported during the year for weaving the better qualities of cloth from which Abbas or nation cloaks are made."

CEMENT.

Arrangements have, it is stated, been made for the erection and equipment of five large hotels in Bucharest. It is also proposed to build a Palace for the Senate, a Town Hall, University, Military Club, the Roumanian Credit Bank, and offices for the "Agricola" Assurance Company. Cement manufacturers in Roumania can only supply 12,000 wagons of cement this year, though they have orders for more than 24,000 wagons. British manufactures should, therefore, be able to secure some remunerative business in this progressive country.

OPENINGS IN ROUMANIA.

Roumania is enjoying a period of greater prosperity, which, we hope, will not be interrupted by war, and the prospects of more trade with foreign countries are encouraging importers. The *Mercantile Guardian* says that there is a demand for ready-made clothing, especially dresses, underclothing, etc., for the working women. Soft shirts of cotton and flannelettes and some woollen shirts of sporting patterns are in request. Hard felt hats find buyers, but the lighter, flexible article from Italy is obtaining a wider vogue. There is also a demand for linen collars and high-class goods for men's wear.

BEER IN EGYPT.

From January 1 to August 31 of the current year there were imported into Egypt 78,014 barrels of beer, valued at £E36,070, and 99,860 dozen bottles, valued at £E24,590. The three chief countries importing the beverage are England, Austria-Hungary, and Germany. England contributed 12,243 barrels, of a value of £E11,722, and 56,350 dozen bottles worth £E14,246.

TENDERS INVITED.

EGYPT.

Supply of Red Calico Bags.—Tenders are invited by the Postal Administration for the supply of 10,000 red calico bags for the transmission of registered mail matter, to be delivered free at the Central Postal Stores, Alexandria, by February 1, 1913. Copies of the specification and samples can be obtained from the Central Postal Stores, Alexandria. Tenders, to be submitted under double covers, the outer addressed to H.E. the Postmaster-General, and the inner endorsed: "Tender for registered mail-bags." Date, October 31.

Supply of Wooden Labels.—Tenders are invited for the supply of 100,000 wooden labels for mail-bags, to be delivered free at the Central Postal Stores, Alexandria, during the year 1913 in quantities according to the order of the Superintendent of Stores and at such times as required by him. Copies of specification and samples may be obtained free from the Central Postal Stores, Alexandria. Tenders should be forwarded under double covers, the outer addressed to H.E. the Postmaster-General, and the inner endorsed: "Tender for Wooden Labels." Date, October 13.

Supply of Lead Seals.—The Postal Administration invites tenders for the supply of five tons of lead seals for the closing of mail-bags. Such seals to be packed in boxes of 50 kilos each, 170 seals to the kilo, and delivered free to the Central Postal Stores, Alexandria, between January 15 and 31, 1913. Tenders should be forwarded under double cover, the outer addressed to H.E. the Postmaster-General and the inner endorsed: "Tender for Lead Seals."

Copies of the specification and samples of the seals may be obtained from the Central Postal Stores. Date, October 31.

Supply of Various Articles.—Tenders will be received by the Khedivial Boats Administration for the supply of paints, oils, ropes, coal, sail, wood, nails, etc., needed for 1913. Samples and conditions at the offices of the Khedivial Boats Administration. Tenders must be made on the special forms issued for the purpose, which may be obtained, together with a list of the articles, free of charge, from the Administration offices. They should be accompanied by a 3 P.T. stamped paper, and should be enclosed in double sealed envelopes, the inner addressed to H.E. the Chief A.D.C. to H.H. the Khedive, Abdin Palace, Cairo, and the outer bearing the inscription: "Tender for the supply of articles wanted by the Khedivial Boats Administration," and sent by registered post. No tender will be accepted that is received later than noon on November 5, 1912.

Supply of a Self-inking Gold Blocking Press.—Tenders will be received at the Printing Department, Cairo, for the supply of a self-inking gold blocking and embossing press especially suitable for book covers. The machine must be fitted with gas heating apparatus, but should be equally suitable for hot or cold blocking, and must be supplied with electric motor and switch for continuous current of 115 volts. Dimensions of blocking plate, 14 ins. by 20 ins., approximately. Tenders should be enclosed in sealed envelopes bearing the inscription, "Tender for blocking press," and addressed to the Direction, Printing Department, Cairo. No tender will be considered unless accompanied by a declaration from a bank or the Government Treasury to the effect that it holds at the disposal of the Printing Department a sum equal to 10 per cent. of the calculated total value of the tender. The guarantees of unsuccessful tenderers will be returned to them on demand. The machine must be delivered within sixty days from the date of the order, and in the event of non-compliance the Printing Department will then have full right to either cancel the order or to inflict a fine not exceeding 4 per cent. on the total value of the order. Date, October 31 (11 a.m.).

BULGARIA.

Supply of Iron and Steel.—Tenders are invited for the supply of iron and steel required for the Bulgarian State Railways. Estimated value, £1,300. Particulars and specification from the Direction du Matériel, Chemins de Fer Bulgares, Sofia. Date, October 21.

NEWS FROM ALL SOURCES.

The Constantinople branch of the Gresham Life Assurance Society has been removed to new offices in Rue Moumhané, Galata, since September 30.

The merchants and manufacturers of Craiova, Roumania, recently held a meeting to consider what measures to adopt in order to induce the Direction of the State Railways to provide a larger number of goods trucks. This is a subject to which our Bucharest correspondent has more than once referred in his letters.

The Direction of the Roumanian State Railways has instructed the engineers of its traffic department to examine personally and report upon the condition of the railway bridges affected by the recent severe floods, and all the bridges damaged will be repaired without delay.

It is stated that an agreement has been arrived at between the Alexandria Municipality and the Behera Mudirieh regarding the construction of a road between Alexandria and Aboukir, and the scheme will shortly be put into execution.

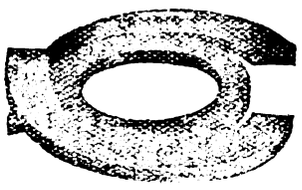
Mr. Richard Abdy has been appointed Vice-President of the Council of Administration of the Land Bank of Egypt.

A steamer lately arrived at Alexandria from Chili with 7,500 tons of chemical manure for the Khedivial Agricultural Society. This manure is worth £90,000. Three-quarters of this amount has already been paid. Three more shipments are on order.

A Reuter's message from Constantinople, dated last Saturday, states that freight shipments for Servia coming from England and Germany viâ Salonika have been detained in Turkish territory.

Petroleum is now being obtained in the Sinai Peninsula.

An Egyptian contemporary states that the *Ikdam*, a well-known Constantinople journal, has been purchased by an English syndicate through the Stamboul firm of LaFontaine and Sons.



Mr. G. H. Stephenson, of the English Pharmacy in Cairo, has been spending a well-earned holiday in England after fourteen years' residence at Singapore and Egypt. He returned this week to Cairo with his family.

On Saturday last, the football team of the Anglo-Egyptian Bank entertained College Park on their ground at Beckenham Hill, the visitors winning by the odd goal, the score being three goals to two. For the A.-E. Bank, J. B. Kiddell, at centre forward, played a strong game, and scored both goals. Tomorrow, the A.-E. Bank meet the British South Africa Co. Club.

Near East Markets.

SPECIAL REPORTS.

(From Our Own Correspondent.)

Braila. Sept. 29.

We have had continuous and general rain the whole of this week, which has done considerable damage. It is uncertain what percentage of the maize will ripen this year and whether any part of it will be fit for shipment this autumn. It is said that 60 per cent. will have to remain until next spring, but much naturally depends upon the weather we shall be having.

Oct. 5.

The condition of the maize crop is still critical, as the weather is still unfavourable. We have not had any further rain, but the temperature keeps low, and in Upper Moldavia it has been snowing since yesterday evening. A spell of dry, warm weather is imperatively needed.

The following information is compiled from the weekly bulletins received at the London offices of the Imperial Ottoman Bank from its correspondents in the Near East:—

Beyrout. September 24.

The market has been more or less heavy and continues to be difficult in consequence of quarantines, which impede communication with the interior.

Imports and Exports.—Arrivals of English manufactures have been relatively normal this week. On the other hand, produce, such as sugar and coffee, is imported in small lots in anticipation of the expected decline in prices, especially in coffee.

Cereals.—A considerable number of dealers are storing wheat and barley, expecting a strong rise soon in consequence of the failure of English crops. Meanwhile prices have been practically identical with those of last week.

Dry Cocoons and Spun Silk.—The export of spun silk has resumed its normal course since the recommencement of the Messageries Maritimes service, and prices of cocoons have risen slightly. Dry cocoons are quoted PB56 to 58 per oke.

Busreh. September 14.

Imports.—The market is passing through a period of calm caused by the Mohammedan and Hebrew festivals. Stocks of cotton goods and produce are normal.

Exports.—Some deals in cereals are carried through in order to fill up the space left vacant in vessels chartered for transport of dates. Prices are firm, exporters buying directly either at Baghdad or Amara. Shipments this week have been about 3,500 tons of barley, of which 3,000 tons by s.s. "Almeria" for Hamburg, and the balance for Jeddah per s.s. "Hosseinee."

The date season is in full activity. Prices here are:—

£T21.30 for Hallawi.
£T16 for Khadrawi.
£T14 for Sayer.

One lot of 1,300 cases of Hallawi consigned to London on July 31 is said to have realised 16s. Two ships are leaving to-morrow loaded with dates for America. One, the "Tabaristan," goes direct with about 60,000 to 70,000 cases, and the other, the "Almeria," with 20,000 to 22,000 cases, will tranship at Hamburg.

Mitylene. September 28.

Crop.—The great drought and high temperature have caused a deterioration in the olive crop in several districts. The same report comes from Adramit and Airaly. The coming yield of oil will be in deficit, both as regards quality and quantity. Holders of stocks have therefore raised prices and so hindered exports.

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna, report as follows for the week ending September 27:—The sales this week on our market amount to 96 cases, 30 of which are for account of local speculators and the balance for England and the U.S.A. Our quotations have not altered since issuing our last circular of the 20th inst. The arrivals are 1,540 cases, against 737 at same date last year.

PRODUCE REPORT.

London, October 10.

The war news from the Near East has not, so far, had much effect on the produce markets, which have shown little animation during the past week. Values, however, are well maintained. Sugar is dearer for beet. Coffee in moderate demand but steady. Dried fruit firm and in some instances dearer. Linseed steady, also cotton seed. Oils quiet, and in some instances cheaper. Opium quiet but firm. Corn steady.

Sugar.

Beet is steady and rather dearer on buying orders and reserved sellers. Closing prices are:—October, 9s. 9d. to 9s. 9½d.; November, 9s. 8½d.; December, 9s. 9d. to 9s. 10d.; May, 10s. 0½d. to 10s. 1½d.; August, 10s. 2½d. to 10s. 2¾d.; October-December, 1913, 10s. 0½d., f.o.b. Hamburg. The Paris market is firm, October, 31frs. 12½c.; November, 31frs. 25c.; January-April, 32frs.; and March-June, 32frs. 37½c. Refined sugar continues firm with fair business passing. English, Tate's cubes No. 1, prompt, 21s. 3d.; November-December, 18s. 3d.; January-March, 1913, 18s. 6d. Foreign, German cubes, October, 14s. 6d., f.o.b. Dutch cubes, prompt, 17s. French cubes, November-January, 15s. 10½d. Russian crystals, ready, 11s. 10½., f.o.b. Dantzic.

Coffee.

A fair supply was offered at public sales this week, and met a moderate demand at steady prices. Washed Dumont small to bold was sold at 76s. to 81s.; Salvator mid. to bold, 80s. 6d. to 84s.; Guatemala mid. to bold, 80s. to 83s. 6d. Futures advanced 3d. to 6d. Decembers sold at 65s. 6d.; March, 65s. 3d.; May, 65s. 6d.; and July 65s. 3d.

Currants.

The demand is very limited, but prices are well maintained. Bags selling at 24s. to 24s. 6d.; ¼ cases, Pyrgos, 26s. to 27s.; Patras, 27s. 6d. to 30s.; Gulf, 28s. to 32s.; Amalias, 27s. to 29s.; Vostizza, 30s. to 38s.; Zante, 28s. to 30s.

Sultanas.

There has been a fair amount of business doing, and quotations remain practically unchanged. There is a fear, however, that in case of a war in the Near East prices will be much higher.

Figs.

The demand has been very good, and holders are inclined to ask higher prices, which will, undoubtedy, obtain if war breaks out. Fine Eleme layers are offered, 44s. to 58s.; fine Loucoums, 72s. to 75s.; good Naturals, bags, 29s.; choice, 31s.

Seeds.

The market is steady. Linseed, London-Calcutta afloat (September bill of lading) sold 60s. 3d.; September-October is quoted 59s. 3d.; November-December, 57s. 9d. Rapeseed steadily held. September-October, 49s. 3d. Cotton seed, London-Egyptian, afloat, quoted £8 13s. 9d.; October, £8 10s.; November-January, £8 7s. 6d. per ton.

Oils.

Business has been on a fair scale, and quotations in many instances favour sellers. The demand for Linseed oil is moderate, spot pipes landed, 33s.; barrels, 33s. 6d. Rapeseed oil, ordinary brown naked, 30s. 9d.; refined casks, 33s. 6d. Cottonseed oil meets with a fair inquiry, crude, spot, old, 25s. 9d.; new, 26s.; refined sweet, 30s.; ordinary pale, 27s. 3d. Olive oil on the spot is very firm, and business is restricted owing to scarcity. Petroleum, Roumanian and Russian, 7⅞d. to 8¼d. per gallon. Lubricating oils: there has been an advance in prices, and Russian No. 1 pale is quoted £11 10s., and No. 2, £10; Residuum, £7 15s.

Opium.

The market is very quiet and little business is being done; 20s. 6d. is offered for Carahissar, but holders remain firm in their quotations, 21s. 6d. to 22s. 6d.

Corn.

Wheat.—Notwithstanding the Near Eastern war preparations the market for cargoes showed little activity. Sellers held steadily at late rates, but there was a quiet tone: Blue stem, November-December, 39s.; choice white Karachi, October-November, 39s. 3d.; Azoff-Black Sea on sample, October, 37s. 6d. to 38s. 6d. Barley.—Firm, and Russian is sparingly offered: Azoff-Black Sea, due out to load 11th inst., sellers 26s., with 25s. 7½d. obtainable; October-November held for 25s. 7½d., with 25s. 4½d. bid. Parcels firm: 25s. 1½d. paid Azoff-Black Sea, September-October. Maize is firm with a fair inquiry, but with more offering. Oats are steady, but very quiet.

Various.

Oilcakes.—Linseed, £9 to £9 10s. per ton. Cottonseed, Egyptian, £6 7s. 6d. Beeswax, per cwt., £5 to £8. Gums.—Arabic, £1 15s. 6d. to £2 7s. 6d.; Kowrie, common, 55s. to 80s.; Olibanum, drop, 35s. to 55s.

Barley in Southern Russia.

According to the *Board of Trade Journal*, the Acting British Consul-General at Odessa (Mr. F. Watson) reports, under date September 26, that the Russian barley crop has greatly deteriorated through bad weather during the last six weeks. In the Odessa district barley is from 50 to 60 per cent. worse than was predicted in July. Since it was cut, about the middle of August, the weather has hindered threshing, and in many cases the grain is still (September 26) lying in the fields. The quality is bad except where it has been stacked, a practice only followed by large landowners. It is said that there will be little for export and that none will be fit for brewing purposes. Until threshing has been completed there will be little for sale, which accounts for high prices and slow shipment.

The above remarks also apply more or less to the zones for which Kherson and Nicolaiev are the ports of shipment. It is believed that conditions are somewhat better in the zones of which the Azov ports are the outlets.

Sennar Dura.

From the August report of the Sudan Central Economic Board we learn that the highest and lowest prices of dura during August at Singa were P300 and P240 per large ardeb (of 216 kilos).

The prospects for the new crop are good if the rains continue, except in parts of Sennar district. The rains were late to start, and so the crops are backward for the time of the year. If they continue to be regular and last, there should be a very big crop of grain.

Sudan Gum.

The *Sudan Times* states that the total value of the gum exported from the Sudan during the first half of the present year amounted to £E445,312. The following list shows the names of the countries to which the gum was exported and the value exported to each:—

Austria	£E14,090
Belgium	26,439
Egypt	89,536
Eritrea	4,690
France	69,539
Great Britain	79,614
Germany	83,915
Italy	7,004
U.S. of America	60,227

Abyssinia's Coffee.

In a Consular report on Gambela (Abyssinia) it is stated that coffee grows wild in the forests of Western Abyssinia, and is picked by the natives under Government control without regard to its condition. It is collected in January. The usual price of a farasula of 37½ lbs. at Gore is 6s., but owing to abnormally high prices in Omdurman buying has been brisk, and as much as 10s. was paid in 1912. It is sold in a dirty state, with the bean generally immature. None is yet shipped in transit to Europe, though the through rate from Gambela to Port Sudan is 5s. 11d. per cwt. It is consumed in the Sudan, normal Omdurman prices being £2 18s. per cwt., but in 1912 they rose to £4, and coffee was changing hands on Gambela Quay at £3 1s. In the Omdurman market the Abyssinian is preferred to the Brazilian bean. It is only since 1911 that the Gallas have been encouraged to bring in coffee for sale, and the capacity of the forests cannot yet be estimated. The hills within fifteen miles of Gambela itself appear admirably suited to the cultivation of a quality superior to the wild sorts at present exported and saleable in a European market. The cost of transport from Gore to London is about £19 per ton, including Customs, but coffee could be grown much nearer to Gambela, the port of shipment.

Cotton and Cotton Goods.

EGYPTIAN COTTON MARKET

(From Our Own Correspondent.)

Alexandria, October 4.

Prices have been maintained at a comparatively high level, in spite of the rapid moving of the crop. Speculators, although active, are not embarking on any operations of a big character. The bulls are waiting for a more favourable time to advance prices, and the bears are afraid to sell heavily owing to the renewal of the demand for spot. Spinners are anxious to make big purchases, and this fact is evidently a bullish factor, which must not be overlooked; but it is to be noted that the renewed inquiry is due almost entirely to the fact that the better grades of cotton are the first to come on the market. The inferior qualities come on afterwards, and then the superior counts are at a premium. The inquiry will, therefore, continue until November 15 next, and then a marked slackness will set in, unless the results of the American crop should prove disappointing.

Cotton seed has lost the advance gained. The future of the article is very uncertain, and it would seem that the price of seed is at a dangerously high level on the eve of a big crop.

Exports of Egyptian cotton from September, 1911, to August 31, 1912.

MANCHESTER REPORT.

Messrs. Reynolds and Gibson telegraph that in spite of the various disquieting features quite an optimistic tone continues in the market. Naturally, the threatened rupture in the Near East is causing anxiety among shippers whose commitments in that market run for months. Egyptian spot is in very fair demand. In addition to spot inquiry there has been a brisk business in c.i.f. cotton. However, quotations have fallen ¼ for fair and extra fair, ⅛ for good, and 1-16 for fair to fair and extra fair. Upper is reduced ⅛ for fair to fair good fair, while good to extra fair is 3-16 lower. Estimated sales, 2,100 bales.

EGYPTIAN COTTON FIGURES.

INTERNATIONAL COTTON CONGRESS IN EGYPT.

Final arrangements have now been completed in connection with the International Cotton Congress which will be held in Egypt from October 28 to November 8. The English delegates are as follows:—Sir Charles W. Macara, Bart., and Messrs. P. B. Barlow (Bolton), John Charnock (Bolton), John Emery (Stockport), J. P. Garnett (Manchester), Francis Gregory (Bolton), Joseph Hilton (Oldham), E. Hinmers (Oldham), W. Howarth (Manchester), Lees H. Marland (Ashton-under-Lyne), S. Newton (Ashton-under-Lyne), John Smethurst (Manchester), J. B. Tattersall (Royton), F. A. Tomlinson (Manchester), Handel Whittaker (Oldham), C. H. Woods (Bolton), and Arno Schmidt (Manchester).

SUDAN COTTON.

The August report of the Sudan Central Economic Board contains some interestisg notes on the cultivation of cotton in the Sudan, concluding with the following general observations:—

The value of cotton is based chiefly on length, strength, regularity, and fineness of the staple, and on the cleanliness and colour of the sample.

Of the varieties grown in the Sudan (Egyptian, American, and Baladi), the Egyptian has the most valuable staple, but requires heavier irrigation and a longer period of maturity. American has a shorter staple, but on rainland, where the amount of moisture is limited, yields considerably more heavily.

Of the Egyptian varieties Afifi is generally the most suitable for the Sudan. It is the variety at present grown on the Tokar delta, and the chief variety on land artificially irrigated. On rainland a cotton with a shorter period of growth appears to be necessary, and from experiments at present being carried out it seems probable that an American variety will be found more suitable.

The Baladi cotton at present grown, though poor in staple, could be enormously increased in value by clean picking and proper marketing.

In the Sudan seed cotton (i.e., prior to ginning) is generally sold by the kantar of 100 rottles. In Egypt a kantar of seed cotton is 315 rottles; this, when ginned, is presumed to give 100 rottles lint and 200 rottles seed, 15 rottles being waste.

TOKAR COTTON CROP.

The following note on last season's cotton crop, compiled chiefly from information supplied by the Governor, Red Sea Province, may be of interest:—

Out of a total area flooded of 43,923 feddans, of which 30,061 feddans were taxed, 29,721 feddans were planted under cotton, the yield of the resulting crop being 112,669 kantars (of 45 kilos). The whole crop consisted of Afifi cotton, with the exception of Government experimental plots of American. The first flood of the season occurred on July 18 and the last on September 5, 1911. There were five strong flushes and twelve slight ones. Sowings took place in August, September, and October, 1911, and pickings commenced on January 15 and concluded June 15, 1912. Cloudy weather and absence of sun in February and March prevented the cotton ripening and seriously affected the total yield. On the average the yield per feddan was 4 kantars approximately. The largest yield for Afifi on the experimental area at Tokar was 8 kantars per feddan on a tested area of 3 feddans. On this area, however, the cotton trees ran excessively to wood, and the yield was thus reduced. On smaller measured areas of about 1-8 feddan plots the yield was some 13 kantars. On favourably situated areas in the ordinary cultivation carried on by the natives the maximum yield is estimated at from 10 to 11 kantars per feddan.

The quantity and yield of Afifi cotton was as under:—

First-class	10,306 kantars.
Second-class	67,940 „
Third-class	22.381 „
Fourth-class	11,902 „

The charge for ginning at Suakin is P12 per kantar.

The average cost of transport from Tokar to Trinkitat is P20 per camel load of 800 rottles (359 kilos); from Trinkitat to Suakin, P5 per bale of 400 rottles (179 kilos), equivalent to P3¾ per kantar for the whole journey.

Shipping Intelligence.

BRITISH SHIPPING IN THE BLACK SEA.

(From Our Own Correspondent.)

Odessa, October 6.

The Balkan war scare has had the effect not only of arresting the downward tendency of freight-rates, but of further booming them. The L.H.A.R. quotations have advanced from 17s. to 18s. and 18s. 6d. A further cause of the rise is the unlooked for paralysis which has overtaken the Greek steamers in all Euxine ports. They have all been formally warned by their Consuls not, pending further notice, to return to the Mediterranean—that is, not to attempt to re-pass the Dardanelles. The Turks have certainly taken time by the forelock in their high-handed procedure of blocking the Straits to the passage, inwards or outwards, of all Greek merchantmen.

The pity of it is that there are so few British steamers in these waters to take advantage of the peculiarly favourable position. Nicolaieff is the only Black Sea port doing an active business, and even there there are not more than a dozen British bottoms, whereas, in normal seasons, there are double that number. British steamers in the Azoff are reaping the greater advantage of the enforced inactivity of Greek ships.

BRAILA NOTES.

(From Our Own Correspondent.)

Braila, October 5.

Greek Boats Detained.

The Danube freight market has been uneasy since Monday noon, when the first news reached here of probable complications in the Balkans; the Greek Consul received orders to advise Greek steamers to sail as soon as possible, so as to pass the Bosphorus and the Dardanelles before any trouble occurred. These orders were altered on Wednesday, when the Consul was instructed to detain all Greek steamers in port, as the Turks, without any legal justification, were detaining all Greek shipping at the Dardanelles.

The Greek steamers forming a large proportion of the tonnage that is usually seen in the Black Sea, London rates jumped up immediately, but merchants here show no inclination to pay the high rates of freight that are being asked before the situation is clearer, as in the event of war being averted there will naturally be a substantial drop in the present abnormal freights. It is true that three steamers were fixed in London on Wednesday from Sulina at 19s. 4½d., but I understand tnis was in execution of an order to do best, when there was no inkling here that rates would rise so sharply.

There are no tramp steamers loading either here or at Galatz. One liner is berthed here for Antwerp, and another for Rotterdam, and both are asking 19s., but so far this rate has not been paid. The last business done was at 17s., one small parcel only paying 18s.

The Greek steamers being out of the market, there is no open tonnage for the Mediterranean, except the Austrian mail boat, which is booking cargo at 19 frs. for Venice or Trieste.

Sulina Tonnage.

There is very little tonnage open at Sulina, and business is practically stagnant. To-day two parcels only were booked, one for Antwerp at 18s. and one for Rotterdam at 17s. 6d.

It is certain that no business is possible until the political atmosphere gets cleared up; the fact that Roumania means not to be dragged into the conflict is, however, giving some confidence. This country has not mobilised, and has even withdrawn some regiments that had been manœuvring in the province of Dobruja, near the Bulgarian frontier. The Royal manœuvres that were also to take place in Dobruja are now taking place near Bucharest, so that they cannot possibly be considered as a veiled mobilisation or a hint to Bulgaria.

There are heavy stocks of grain awaiting shipment at all Roumanian ports, and as soon as transport facilities are provided and freights reach a steady and lower level business will be resumed.

The water in the Danube fell six inches since last week, river draft now being 23 ft. The depth of water on Sulina Bar remains unchanged, vessels being able to cross drawing 23 ft. fresh. For the last two years the water in the Danube has been kept permanently at a very high level, and the thanks of the shipowners are due to the chief engineer of the European Commission, who has arrived at this result by continual dredging.

STEAMSHIP MOVEMENTS.

NATIONAL BANK OF TURKEY

ESTABLISHED 1909 BY IMPERIAL FIRMAN.

CAPITAL - - £1,000,000 Sterling.

BOARD OF DIRECTORS.

CONSTANTINOPLE.

SIR HENRY BABINGTON SMITH, K.C.B., C.S.I., Chairman.
SIR ADAM BLOCK, K.C.M.G.
F. EDWIN WHITTALL.
H.E. AHMED DJEMAL BEY.
HUSSEIN DJAHID BEY.
RECHID SADI BEY.

LONDON.

HON. SIDNEY PEEL, Chairman of London Committee.
HON. HUGO BARING.
HENRY BIRCHENOUGH, C.M.G.
C. S. GULBENKIAN.
R. H. MACAULAY.
E. N. MEYER.

Head Office: CONSTANTINOPLE (KENADJIAN HAN, STAMBOUL).
MANAGER - - H. P. KINGHAM.

London Agency: 50, CORNHILL, E.C.
MANAGER - - - R. HECHT.

The National Bank of Turkey undertakes every description of Banking business. It opens current accounts according to the custom of Bankers. Customers have the facility of discounting approved bills and of obtaining advances upon negotiable securities. The Bank will undertake the purchase and sale of bonds, shares, etc., on the London Stock Exchange, on the local and on all Continental Bourses, the safe custody of customers' securities and valuables, and the collection of drawn bonds and coupons when due. The Bank issues drafts and telegraphic transfers payable in all principal towns in the world. Letters of credit for the use of travellers are also issued. Advances made on merchandise. The purchase and sale of coupons, foreign bank notes, coin and bullion are undertaken. Bills negotiated or sent for collection. Mercantile credits opened.

Deposits received for fixed periods at rates of interest which can be ascertained on application.

BANK OF ROUMANIA, Ltd.

Head Office: 7, GREAT WINCHESTER STREET, LONDON, E.C.
Branch: 94, STRADA LIPSCANI, BUCHAREST.

CAPITAL (fully paid), £300,000. RESERVE FUNDS, £169,688.

DIRECTORS:

THE EARL OF BESSBOROUGH, C.V.O., C.B.
SIR R. HAMILTON LANG, K.C.M.G.
THE VISCOUNT GOSCHEN
E. W. H. BARRY, ESQ.
P. NAVILLE, ESQ.

The Bank was originally incorporated in 1869 under Roumanian law, but in 1903 was transformed into an English Company under the Companies Acts. It is the oldest bank in Roumania, and the only one with a London office.

A general banking business is carried on. Correspondence is invited from those doing business with Roumania, and should be addressed to THE MANAGER in LONDON or BUCHAREST.

ANGLO-EGYPTIAN BANK, LIMITED,

LONDON, PARIS, ALEXANDRIA, CAIRO, MALTA, GIBRALTAR, TANTAH, MANSURA, BENI-SUEF, ZAGAZIG, and PORT-SAID.

Subscribed Capital - -	**£1,500,000.**
Paid up Capital - -	**500,000.**
Reserve - - - - -	**640,000.**

The Bank undertakes every description of Banking Business on most favourable conditions.

NATIONAL BANK OF EGYPT

(Established by Khedivial Decree, June, 1898, with the exclusive right to issue Notes payable at sight to Bearer.)

CAPITAL - - - - £3,000,000.
(In 300,000 Shares of £10 each, fully paid.)
RESERVE FUND - - £1,500,000.

Governor: F. T. ROWLATT.

HEAD OFFICE: CAIRO.

London Committee:

HON. HUGO BARING,
HON. ALGERNON MILLS,
SIR CARL MEYER, Bart.,
HON. SIDNEY PEEL.

London Agency: 4 and 5, KING WILLIAM STREET, E.C.

MANAGER: J. T. BEATY-POWNALL. ASST.-MANAGER: A. F. GILLBEE.

Accounts opened with traders and private persons. Every kind of Banking Business transacted.

Offices in Egypt at Cairo (Head Office), Alexandria, Assiout, Assuan, Benha, Beni-Suef, Chibin-el-Kom, Damanhur, Fayoum, Keneh, Luxor, Mansourah, Minieh, Mousky (Cairo), Port Said, Sohag, Tantah, Zagazig; and in the Soudan at Khartoum, Port Sudan, Suakim.

LONDON, October 10.

A Small Panic.

In spite of the fact that the bull account in London is very small, we had quite a small panic on Wednesday. No one wants to speculate in stocks and shares if there is any chance of war. Everyone who had anything open at once closed his account if he possessed only a grain of common sense. London has not financed the Balkan States to any important extent. Montenegro issued a small loan in 1909 through Messrs. Boulton Brothers, but it does not now amount to more than £240,000. Servia offered a certain amount of her '95 loan in London, but very few people here hold any, and in '97 another issue was made which practically stands in the place of the '95 loan as far as London is concerned. The bonds were sold at 68 and under a million is in circulation. The issue was made by Parr's Bank. The Bulgarian Government Loan of 1892 was offered in London through the Imperial Ottoman Bank, and the same bank joined with Stern Brothers in a further loan in 1902. This loan is secured upon the tobacco tax. In 1907 a further loan was offered by Messrs. Stern Brothers and the 1909 loan was offered by Schroder. An attempt to borrow money was made by an American group last year, but it came to nothing.

Greek Bonds.

Very few people in England are interested in the Bulgarian securities, but it is quite another matter with Greek bonds. There have been a long series of Greek issues to arrange for by Messrs. Hambro, who are the financial agents for the Greek Government. Greek finances have been improving rapidly of late, and there is no doubt that if the country could keep out of war the credit would improve very much. The trouble will be a very serious matter for holders of Greek securities in England, and we look for much lower prices.

The Bank Rate.

We must not expect the present rates for money to continue much longer. There will be a keen demand this autumn for cash, and many good judges think that the Bank rate may touch 6 per cent. before the end of the year.

Internationals Disorganised.

The Foreign market has been completely disorganised. Bulgarian 4½ per cents., which made up at 89½, were dealt in on Wednesday as low as 81. Egyptian Unified remained, however, very firm and practically showed no difference, the make-up price being only a quarter lower. German Threes show a fall of 1½ on the account. Greek 4½, which made up last account at 56, were down to 48½, having made up at 50. Hungarian Rentes made up at 90 last account and dropped a point and a-half. Italians, however, showed very little change, being down only a quarter. Turkish Fours, made up at 99 on September 25, were three points lower on the account, and afterwards fell to 82. In stocks where there has been a considerable amount of gambling, such as Perus and Tintos, great weakness was shown. Peru Prefs. fell from 56¾ to 51½, and Tintos from 84⅞ to 76½. Fortunately there is very little gambling in these stocks in London, otherwise we should have a very difficult Settlement to face, but Paris has been very hard.

Railway Stocks.

Home Rails were, of course, dull, for nobody wishes to speculate, and very few people feel inclined to invest money until they see exactly how things are going to turn out. It is hardly likely that there will be any rise in this department, in spite of the fact that trade is booming and traffics show large increases. Yankee Rails were dull, partly because the United States wants finance and is likely to have to pay heavily for it if money goes dearer, and partly because Berlin got scared and turned out all its favourites. Canadian Pacifics dropped to 280, and Unions were as low as 177¾, at which price they look cheap. Steels were quoted 80, and Chesapeakes 85½. Amalgamated kept moderately firm. There is a strong syndicate at the back of this stock.

Rubber and Oil.

There are no features worth mentioning in the Rubber market. Prices generally are dull. Plantation rubber has fallen to 4s. 4d., at which price it looks rather too low, unless, of course, the Brazilians have been unloading their big stocks. Oil shares were dull with all the rest; but it is said that some good news has come in from Maikop. Two important strikes have been made, one on the deep drilling ground and another a few miles away from the Black Sea blocks. If both these oil shows turn out well it should give Maikop heart to go on prospecting. But this is not the moment to speculate in oil shares.

Mines.

Mines are flat, the Continental speculator having turned out all his mining shares. Fortunately, there is no bull account open. The public seem to have quite lost its interest in both Kaffirs and Rhodesians, being somewhat disgusted that the promised boom has not materialised.

GREEK FINANCES.

Reuter's Athens correspondent reports that the Greek Minister of Finance declared last Saturday that the position of the Greek Treasury was absolutely flourishing. Greece could, he said, meet all exceptional requirements without having recourse to credit. The State deposits in foreign banks, after the expenditure for war requirements had been met, amounted to over 58 million frs. The deposits in the National Bank exceeded 100 million frs. The year 1911 left a surplus of 10 millions, and the current year showed considerable surpluses.

WAR INSURANCES.

The *Times* (October 9) states:—"Various inquiries were yesterday received by underwriters for rates of insurance in connection with the outbreak of war in the Balkans. One proposal was made on behalf of insurance offices doing business in Bulgaria and was for terms on which reservists already on their books could be specially reinsured against the risks of war. The proposal no doubt indicated a preventive measure lest owing to fighting the higher rate of mortality should try the original offices' resources severely. Eight guineas per cent. on each man was quoted.

"To cover warehouses in Varna, Bulgaria, for six months against the risk of bombardment £2 10s. per cent. was accepted, while property in Salonika was covered against a similar risk for £5 5s. per cent."

NOTES FROM ALEXANDRIA.

(From Our Own Correspondent.)

ALEXANDRIA, October 4.

The Share Market.

Our market continued to show favourable conditions during the first part of the past week, but subsequently transactions were paralysed by the monetary stringency which is commencing to be felt. Moreover, the news of the Balkan mobilisations has provoked a slight decline, which should, however, prove transitory, unless war should actually break out. Egypt, being situated so close to the theatre of war, would inevitably suffer to some extent. The Turco-Italian war has virtually closed the principal Red Sea markets, and many important interests in Turkey, and notably in Syria, have greatly suffered. A Balkan war would greatly hinder, or even entirely stop, our grain trade with the Black Sea, and our commerce with Turkey would be rendered difficult.

The Bank of Mitylene.

It is, of course, known that the Egyptian tribunals have declared the bankruptcy of this bank. But as it has its head office in Constantinople, the directors have ignored the judgment of the Egyptian courts, and the Egyptian receiver has not yet succeeded in obtaining the confirmation of the Ottoman courts. However, this circumstance has enabled the creditors in Egypt to disregard the debt due to the head office by the Egyptian branch, and to profit by the claim of the bank, amounting to £E40,000, against the bankrupt estate of Georges Zervudachi.

It is to be expected, after settlement of the pending law suits and the recovery of all debts, that the creditors will receive between 47 per cent. and 92 per cent. The offer of the Constantinople liquidators to pay 40 per cent. to the Egyptian creditors may therefore be regarded as absurd.

A Company in Liquidation.

The general meeting of shareholders of the Artesian Boring and Prospecting Co. has taken place, and has decided on the liquidation of the company. This concern has effected the boring of a large number of wells in the Delta, but this business has ceased to be remunerative in consequence of native competition. On the other hand, the land concessions granted to the company by the Egyptian Government at Marsa Matrouh have been abandoned, as the company could not find sweet water in any of the wells sunk.

Levant Steamship and Heliopolis Oasis.

All the shares of these companies on the Alexandria and Cairo bourses have been bought up at surprising figures. Should the rise continue, our bourse will be cleared of these shares at a good profit, although they are destined to show well in the future.

Failures.

Dimitri Souki, with liabilities of £E52,549, obtained a *concordat préventif*, under which he bound himself to pay 40 per cent. to his creditors. However, as he has failed to carry out his undertaking, bankruptcy proceedings have been reopened.

John Vekri has assets £E903 and liabilities £E2,527. The bankrupt made excessive drawings and mismanaged his business.

E. R. Silvera and Co.—Silvera has disappeared, leaving liabilities of £E9,482, and assets of £E817 only.

Dimitri Apostolides has failed with a deficit of £E350. The bankrupt has deposited his balance-sheet in order to escape imprisonment by the Greek Consulate.

POOK, BROS. & CO., Ltd., Merchant Bankers, Brokers and Contractors,
1, METAL EXCHANGE BUILDINGS, LONDON, E.C.,
BUY, FINANCE and PROMOTE Estates, Plantations, Metalliferous, Oil and Industrial Concerns IN ANY PART OF THE WORLD.
Fixed and moderate inclusive fees for conversion of Private Businesses under The Companies (Consolidation) Act, 1908.
COMMUNICATIONS ABSOLUTELY CONFIDENTIAL.
Deposits are received for fixed periods which may be ascertained on application.

Digitized by Google

F. J. Cotsiomites.—The liabilities are £E7,214 and assets £E9,180, but the latter are almost entirely irrealisable, as they consist of land in the Sudan, which is now unsaleable at reasonable prices, and an irrecoverable debt.

Selim Dimitri Boulad is an old firm interested in ginning and cotton business for fifty years. This firm failed last year with liabilities of about £100,000. The courts have just authorised the sale of the bankrupt's estate at Chtora, on Mount Lebanon, for a sum of not less than £8,000.

Habib el Mallakh has assets of £E4,712, and liabilities of £E30,351, occasioned by speculating on the bourse.

Hassan el Bambi has liabilities amounting to £E6,408, and assets practically nil.

Turkish Tobacco and Egypt.

The sudden rise in Turkish tobaccos has greatly alarmed our cigarette manufacturers. The famous Egyptian cigarettes are made exclusively of Turkish tobacco, as all the world knows, and the cigarette industry is the most important and the richest in the country. But the American Tobacco Company, with its allied concerns, which form a powerful trust, have just purchased practically the whole of the new crop, as well as the old stocks, of the Ayasolouk tobacco. It is estimated that the crop this year will not exceed three million okes, all of which is said to have been absorbed by the trust. The rise in prices of Ayasolouk tobacco amounts already to 60 per cent., and the Macedonian tobaccos have also experienced a very sharp rise in consequence of a large deficiency in the crops. These abnormal rises and the manipulations of the trust have together provoked a grave crisis in the hitherto flourishing cigarette industry, which employs thousands of workpeople, and which furnishes the whole world with delicious cigarettes. Has not the moment arrived for authorisation by the Government of tobacco culture in Egypt? The fiscal reasons for prohibiting this culture no longer exist.

Mediterranean Oilfields.

A company with the above title was registered on October 4, by Mackrell and Ward, of 3, Walbrook, E.C., with a capital of £25,000, in 5s. shares. The objects are: to carry on the business of producers, refiners, storers, and distributors of petroleum, and other mineral oils, natural gas, bitumen, asphalt, ozokerite, and other similar substances, etc., to acquire any petroleum or oil-bearing lands in the Near East or elsewhere. The minimum cash subscription is 400 shares.

COMPANY NOTES.

Ottoman Tobacco Regie.

The general meeting of the Société de la Régie Coir téressée des Tabacs de l'Empire Ottoman was held at Constantinople on October 2, under the chairmanship of M. Ch. Sallandrouze de Lamornaix, owing to the unavoidable absence of the President, Baron de Neuflize. The chairman stated that the somewhat unsatisfactory results which he last year advised shareholders to anticipate had unfortunately been realised, the net divisible profits amounting to only £T484,265, being a decrease of £T211,574 (or 30 per cent.) on the figures of the preceding year. This decrease was due to some extent to higher prices of raw material, but the most influential factor had been the inadequate support afforded by the authorities for the punishment of contraband operations. It is true that the Ministries of Finance, Interior, and War had been good enough to give formal orders in favour of the company to the civil and military provincial authorities, but these orders are rarely carried out owing to the lack of means of repression and to the indifference of the provincial officials. The consequence was that contraband traffic and cultivation increased in enormous proportions to the detriment of the Régie and consequently of the State also. Another contributory cause of the unfavourable position was the uncertainty weighing over the future of the Régie. It was to be hoped that the Government would no longer delay taking energetic steps to protect the interests involved, both those of the Régie and of the Empire.

Oriental Tobacco Trading.

At the annual general meeting held at Budapest on the 30th ult., a dividend of 20 per cent. was declared for the business year ending April 30, 1912, and the Coupon No. 6 is payable from October 8, 1912, on presentation at the Hungarian Banking and Trading Company, Ltd., Budapest, V. Vaciközut 32, or at the Banque Commerciale et Industrielle, Paris, 25, Rue de Clichy.

Grecian Refined Oil Company.

An extraordinary general meeting will be held in Paris on the 25th inst. to consider and, if thought fit, to pass extraordinary resolutions, altering the articles of association.

Oriental Carpet Manufacturers.

The directors have authorised the payment of an interim dividend of 10 per cent.—that is, 10s., or 12.50 francs, or 55 piastres gold, on each share, which will be payable on October 24 next—in Smyrna, at the headquarters of the company, and at the Imperial Ottoman Bank; at Constantinople, at the Banque de Salonique; and in Paris, at the Société Générale and the Banque Industrielle and Commerciale.

New Egyptian Company.

At an extraordinary meeting of the New Egyptian Company, held on Wednesday, it was decided that Mr. P. G. Hamilton Carvill be removed from the board of directors.

THE COST OF WAR.

The mobilisation of their armies entails heavy charges for Servia and Bulgaria, says the *Neue Freie Presse*. If the whole of their armies were levied it would mean for Bulgaria a daily expense of about 2,000,000 crowns, and for Servia some 1,800,000 crowns. The costs of transport are also very onerous. "It is true that both in Bulgaria and Servia the railways are the property of the State, but the transport of the troops would, nevertheless, entail great expense. The defrayment of the costs of these military operations must be made at first from the funds in the hands of the Governments. It is difficult, however, to arrive at the actual means which they have at their disposal. In the month of July Bulgaria demanded from the Paris banks an advance of 25 million francs, a portion of which has probably passed into the hands of the Minister of Finance. Servia has not contracted any loan, but the administration of the monopolies has every year a certain surplus, which has probably now been handed over to the Treasury. While these military operations are in progress neither country can dream of raising money abroad."

Seeing, also, that in both countries internal loans would only suffice to raise a small amount of capital, the only means available would be a forced paper currency, and without doubt both countries would have recourse to this method. "At the present time the situation of the banks of these countries is somewhat strained," continues the writer. "The National Bank of Bulgaria, according to its last balance-sheet, had, in metallic reserves, 59,000,000 frs., of which 40,000,000 were in gold and 19,000,000 in silver. The note circulation had reached 122,000,000 frs. The National Bank of Servia held 42,000,000 frs. in gold and 7,000,000 frs. in silver, while its fiduciary circulation amounted to 70,000,000 frs. In both countries the premium on exchange is very high, and it is certain that any important increase in the unguaranteed note circulation would cause a sensible further advance in the exchange and exercise a deplorable effect upon commerce."

THE EASTERN BANK, LIMITED.

Head Office: 4, CROSBY SQUARE, LONDON, E.C.

Subscribed Capital, £1,000,000. Paid up, £400,000. Reserved Liability of Shareholders, £600,000.

The Bank of Egypt Liquidation

Adverse Egyptian Criticism.

(By Our Alexandria Corrrespondent.)

The extract from a letter from a correspondent regarding the Bank of Egypt, published in The Near East of September 13, has attracted a certain amount of attention in local commercial and financial circles because it in many respects reflects their opinion on this unfortunate affair.

Your correspondent has struck the true note of importance when he refers to the manner in which the liquidation has been and is being carried out. That point has bidden fair to be overlooked in the desire for revenge—and a very reasonable desire that is, too, under the distressing circumstances—which the shareholders have evinced in such a keen manner vis-à-vis the directors. No doubt the unsatisfactory part played by the directors in the management of the bank requires the most searching investigation and the taking of strong legal proceedings against them, but whilst all the fuss and turmoil incidental to this investigation and these proceedings have been going on, no attention has been paid to the progress of the liquidation by the shareholders.

No doubt this shows implicit confidence in the official receiver and his special manager; still, the position of affairs and the mode of management of the liquidation, as well as the flagrant manner in which the hopes of a collection of debts sufficient to stave off the necessity of making all the calls—not to mention a return of some of the capital—which were at first held out to them, were disappointed, should surely have prompted the shareholders to ask for a fuller account of the work done and the system instituted than has so far been vouchsafed them.

Financial and commercial circles in Egypt have been simply astounded at the extraordinary manner in which everything has been managed. Your correspondent is quite right in laying stress on the fact that the official receiver and special manager are resident in London, and that they have to rely on the information which their correspondents in Egypt see fit to send them, whilst a local firm of chartered accountants superintends the realisation of assets.

Lack of Control.

Why, is the question asked by local business men, did the liquidator wait six months before sending anyone out? Why did he not send out a delegate as soon as the bank closed its doors? Why has no local committee of business men been appointed to superintend and advise on the conduct of affairs? Has the London Advisory Committee of shareholders any knowledge of Egyptian affairs or any means of obtaining exclusive information *re* the bank's business? Why were the men who had charge of the bank's affairs during the period preceding the failure retained in their responsible and uncontrolled positions by the liquidator? And, finally, why within ten days of the closing of the doors was the staff summarily dismissed without any consideration of their possible eventual utility to the liquidation?

Financial circles are bitterly disappointed that the official receiver should have displayed in this matter such a glaring lack of appreciation of the peculiar circumstances. Anyone conversant with Egyptian affairs would have told him that the one great necessity was absolute control of the realisation of the assets, and that that could be obtained only by having one of his own men out in Egypt, or better still, since his representative would necessarily not be conversant with the local mode of doing business, by appointing a local board of independent business men, who might be given a retaining fee and a percentage on results. Local people scoffed when six months after the start of the liquidation the special manager's senior partner visited Egypt in order to "hasten the settlement." Egyptian affairs—and especially Egyptian banking affairs—require very special knowledge and a peculiar mentality, which are only acquired after years of residence in the country. Consequently the special manager's partner, who expected to move mountains in three weeks, and ended by staying nearly two months, had to return to London with his mission incomplete. Brilliant man that he is in dealing with English liquidations, he, naturally enough, was quite at sea when he came to deal with this peculiarly Egyptian liquidation on the spot. The money spent on his mission was so much money thrown away; and I am positive that if he were in a position to give his candid opinion he would admit that his mission was six months too late, and that an almost irreparable blunder had been committed at the very outset.

Indeed, when they read the remarks made by the official receiver anent the directors' control of the bank's affairs and think of the liquidator's policy, commercial circles are inclined to murmur something about "glass-houses." Is the liquidation in any better position with regard to control? Not one whit.

The official receiver and special manager, who have no acquaintance with Egyptian affairs, sit at home and receive periodical reports and returns from their correspondents at Alexandria. Those correspondents are the two men who were in charge of the bank's affairs for eighteen months, and played a leading part in the conduct of the business for two years previous to the suspension. One of them is an Italian subject, who left the bank's service in 1906 to go on 'Change, and, coming to grief, was taken back in 1908. The other is an Englishman, whose knowledge of Egyptian affairs dates from his appointment as joint manager in Alexandria in the fall of 1909, and whose experience of banking was gained in about six years' service in Khartoum.

The firm of chartered accountants whose task is to "superintend the realisation of the assets" has no experience of practical banking or of Egyptian business affairs, and in the decisions which its representative takes it is entirely led by the opinion of the local managers—*i.e.*, the special manager's correspondents. Further, since the principal of this firm, who has had a lot to do on behalf of the special manager, is also the liquidator for one of the Bank of Egypt's large debtors—the Egyptian Estates, Limited—the dual position must necessarily become very awkward for him and unsatisfactory for both his clients. Whether he relies on his correspondents or on the chartered accountants, the official receiver in nowise obtains an independent opinion, and he has no assurance that the information given him is complete and unbiassed. No reflection on the integrity of the gentlemen in question is intended to be conveyed hereby, but this is a plain statement of the commonsense view of the management of the liquidation held by local expert business men, who consider that the liquidators have committed the very same errors of lack of control as those for which they blamed the directors.

A Report Wanted.

The shareholders of the Bank of Egypt will be well advised to move before it is too late for a full report of the liquidation, and if necessary to appoint a committee to investigate any points on which they consider sufficient information has not been given or an erroneous policy has been adopted. Special attention should be paid to the liquidation expenses, especially telegraphic and legal charges, the chartered accountants' fees and the expenses incurred by them, and compensations to staff and others, as also to the compromises effected with many of the bank's debtors; in the latter cases shareholders should be furnished with the figures of the original debts and the sums accepted in full settlement, as also a full explanation of the reason these compromises were effected. They could then satisfy themselves by taking the independent advice of local experts as to whether the bank's interests, in view of the calls having, after all, been made, had really been served by these compromises.

It is all very well to say that once a liquidator has been appointed the shareholders should be prepared to give him full scope and not hamper him by any action. Considering, however, how the hopes held out to them have been disappointed, and how the liquidator has been prepared to drop all action against the directors, and in view of the fact that he has by the system and policy initiated by him—and notoriously condemned by experienced business men—shown such glaring incapacity to grasp the peculiar circumstances surrounding the business he has been called upon to wind up, and to take the necessary measures to safeguard the assets which those peculiar circumstances demanded, it is clearly the right of the shareholders, who have so much at stake, to intervene, and to protest, and to insist not only on a full and explicit account of the past, but on steps being taken forthwith to safeguard what remains of these assets.

Progress of Investigation.

We are informed that considerable progress has been made in the movement initiated by Mr. G. J. Fowler, J.P., of Oatlands Chase, Weybridge, for a complete investigation into the affairs and management of the Bank of Egypt. Application has been made to the Court on Mr. Fowler's behalf, and an order obtained enabling the Official Receiver to furnish copies of material documents which are required in connection with the case, which is now being prepared for submission to eminent counsel, and if, as is confidently anticipated, counsel advises favourably, adequate funds will be forthcoming for the prosecution of a test action to determine the liability of the directors and auditors of the bank.

FINANCIAL NEWS IN BRIEF.

The town of Craïova, Roumania, has been authorised to issue a 4 per cent. loan of 14 million francs at 85.

It is reported that the Servian Government has approved the creation of the Banque serbe-italienne, in Belgrade, with a capital of 2 million lire, under the auspices of the Banco di Roma. We alluded to this new institution in our issue of September 13.

The receipts of the Egyptian Delta Light Railways, Limited, for the ten days ended September 20 amounted to £E6,760, as compared with £E5,481 for the corresponding period of 1911. The total receipts from the commencement of the financial year (April 1) amount to £E114,684, being an increase of £E2,323 on the figures of 1911.

The Commission of the Egyptian Public Debt announces that the coupon of the Privileged Debt, due on October 15, will be paid on and after that date, in London at the Bank of England, in Paris and Alexandria at the Crédit Lyonnais, and in Cairo at the Caisse de la Dette.

Coupon No. 3 of the debentures of the 4 per cent. Ottoman Loan of the Hodeida-Sanaa Railway is now payable, in France at the Banque Française pour le Commerce et l'Industrie, and in Constantinople at the head office of the Banque de Salonique.

An extraordinary general meeting of the shareholders of the Anglo-Russian Bank, Limited, will be held on the 15th inst., for the purpose of considering and (if thought fit) passing the following resolution as a special resolution, viz.:—"That the name of the bank be changed to the 'British Bank for Foreign Trade, Limited.'"

The receipts of the Piræus-Athens-Peloponnesus Railway for August (O.S.) amounted to Drs.784,295, against Drs.669,106 for the same period of last year, making the total receipts from January 1 to August 31 (O.S.) Drs.4,648,933, against Drs.4,200,274 for the same period of last year.

The receipts of the Ottoman Railway (Smyrna-Aidin) for the week ended October 5 amounted to £13,800, an increase of £2,769 over the same period last year. To July 1 the receipts were £141,735, an increase of £17,204.

The receipts of the Egyptian Markets for the week ended October 3 were £577, a decrease of £235 compared with the same period of last year. The total receipts from the commencement of year were £37,757, a decrease of £3,764.

COOK'S NILE STEAMERS AND DAHABEAHS.

THOS. COOK & SON have unequalled facilities for Travellers visiting Egypt, now the premier Winter Resort of the World. Their fleet of **Fourteen Large Passenger Steamers** consists of the finest vessels on the Nile, specially built luxuriously appointed throughout, and fitted with every modern convenience.

TOURIST SERVICE.—These large and handsomely-fitted Steel Steamers sail once a week from **Cairo** to **Assuan,** and twice a week from **Assiut** to **Assuan,** the sailings from **Cairo** beginning in November, and from **Assiut** in January.

EXPRESS SERVICE.—The Express Steamers also leave **Cairo** twice a week, the Friday departures commencing in November, and the Monday departures in December.

There is thus a Service of **Five Cook's Steamers per week** ascending the Nile to the **First Cataract** during the Season—three from **Cairo** and two from **Assiut**—calling at all points of interest on the Nile, in connection with which complete arrangements for sightseeing and excursions are made, enabling Travellers to visit, to the best advantage, all the famous

PYRAMIDS, TEMPLES, TOMBS, RUINED CITIES, etc.

SECOND CATARACT SERVICE.—In connection with the above Services there is also a Service twice weekly by First-class Steamer from the **First** to the **Second Cataract,** with through bookings to **Khartoum, the Sudan,** and **Uganda.**

PRIVATE STEAMERS AND DAHABEAHS. — **Thos. Cook & Son** have several small Steamers for charter at moderate rates, specially adapted to the requirements of Families, Private Parties, Sporting Parties, etc., accommodating from eight to sixteen passengers, with competent crews, and thoroughly equipped. Also a large Fleet of First-class Sailing Dahabeahs, the best on the Nile.

Illustrated Nile Pamphlet free from:

THOS. COOK & SON,

NOTES OF THE WEEK.

The preliminary agreement for peace between Italy and Turkey was signed at Ouchy at 6 p.m. on October 15. Six hours later the time-limit set by the Italian Government would have expired, and the story of the Turco-Italian War might have assumed a very different character. Until the treaty is signed the precise wording of the agreement is withheld, but the main outlines of its terms are foreshadowed in the *Times*. Italy maintains her full and entire sovereignty over Libya, and denies to Turkey any form of sovereignty whatsoever in the territories in question. Turkey will neither recognise nor impugn the sovereignty of Italy; she ignores its existence, and the Italian Government will require no formal acknowledgment on her part. The Turkish Government undertakes to withdraw her officers and soldiers from North Africa and to desist from furnishing the Arab resistance with money or supplies. In return Italy offers generous terms of pardon to all those Arabs who make their submission. Italy will restore to Turkey the islands in the Ægean Sea now occupied by her troops, but on the following conditions: That the widest form of amnesty be accorded to the inhabitants, that all local autonomies be respected, and that public liberty be guaranteed. Italy reserves to herself the right of taking action against Turkey should the latter fail to fulfil these conditions; moreover, she is not to restore the islands except as the various clauses of this agreement shall be severally and loyally applied. Italy accepts a clause identical with that contained in the Austro-Hungarian Treaty regarding Bosnia-Herzegovina dealing with the exercise of religious authority by the Kaliph. There shall be no question of a payment of an indemnity by either side; but Italy will contribute annually that part of the Ottoman Public Debt which is guaranteed by revenue from Tripoli and Cyrenaica.

From later information received by the *Times*, it appears probable that the ratification of the actual treaty will be preceded by a series of acts fulfilled by both parties. A firman issued by the Sultan will grant the inhabitants of Tripoli and Cyrenaica complete autonomy, and a Consul will be appointed for the protection of Ottoman interests. The Italian Government will then issue a decree to the Arabs of Libya promising them full amnesty and calling upon them to lay down their arms under penalty of being treated as rebels. Thirdly, the Sultan will issue an Iradeh granting full political amnesty to all the inhabitants of the Ægean islands and ample guarantees for reforms in their favour. By means of these anticipatory acts it will be possible for the terms of the preliminary agreement to be embodied in a brief treaty.

Thus ends a desultory conflict that dates from September 29, 1911. Into the various causes that led up to Italy's action in regard to Tripoli we need not stop to inquire. The first intimation of the steps that the Italian Government felt constrained to take was conveyed in a Note to the Porte on September 26, warning it that any attempt to send reinforcements to the existing garrison in Tripoli would be regarded as a *casus belli*. But already the mobilisation of Italian army corps had begun, and two days later an ultimatum was delivered to the Turkish Government demanding that the state of disorder and neglect in Tripoli and Cyrenaica should be ended, and that these regions should be allowed to enjoy the same progress as that attained by other parts of Northern Africa. The Italians complained of systematic opposition to all their enterprises and of an agitation fomented by the authorities against Italian subjects. Turkey offered a conciliatory answer, but made no attempt to meet the Italian demands. The Powers, who had already been appealed to by the Porte, were once more approached in the hope of averting the threatened disaster, and Turkey refrained from any warlike measures. Italy, however, followed up the expiry of her ultimatum by a declaration of war, and the first engagement took place off the coast of Albania, when a Turkish torpedo boat was sunk. The bombardment of Tripoli began on October 3, and two days later the Italian flag was hoisted over the town. In the course of a twelve months' struggle the Italian arms gained possession of the entire seaboard of Tripoli and Cyrenaica, but failed to penetrate into the interior much beyond the range of the naval guns. Throughout this period the Turkish and Arab forces continued to offer a stubborn resistance. Every Italian post was attacked in turn, and no repulse seemed to dismay the tribesmen. In view of the conclusion of peace, the attitude of these staunch allies of the Turks becomes a question of considerable interest. From the terms of the treaty to be signed by Turkey and Italy, it is clear that some uncertainty exists in the minds of both the belligerents regarding the reception that the Arabs are likely to accord to the new order. We cannot bring ourselves to believe that the Turks will leave the gallant Arabs to their own devices. Unless they have already been prepared for the cessation of hostilities, it will be incumbent upon the Turkish Government to despatch a special mission

Digitized by Google

to the hinterland to win over the inhabitants to a *modus vivendi* that will safeguard the respective interests of Italians and Arabs.

But when shells are hurtling in the Balkans, interest fades in the measured steps that marked the negotiations of the closing days of peace. The Montenegrin troops have invaded Turkish territory at three points. While one force is operating in the Sanjak and has occupied Bielopolye, the two other armies are advancing southwards with the intention of investing Scutari. In the course of the week the latter forces have succeeded in closing in upon their objective, not, it is true, without heavy losses, but the systematic capture of each Turkish fortress and of prisoners to the number of five thousand must be held to leave the balance well in the favour of the Montenegrins. It is clear that the Turks are concentrating their attention, as, indeed, they must, on the operations against the Bulgarians and Servians, and that they regard both the Montenegrin and Greek incursions as of secondary importance. Scutari has been reinforced by Essad Pasha with twelve guns and Maxims, and may be relied upon to offer a strenuous resistance to the Montenegrin forces.

In the event of any general conflict in the Balkans it is probable that the Bulgarian and Servian irregular bands will prove useful allies to the invading forces. The Servians are reported to be able to count on thirty bands of a hundred men each, while the Bulgarians will number many more. To these irregulars belongs the doubtful honour of investing war in the Balkans with the major part of the horror with which the words are associated. European ideas are also likely to be shocked when it is realised how inadequate are the preparations on both sides for dealing with the wounded in the war. Some indication of the possible state of affairs has been given by the first few engagements between the Montenegrins and Turks. It is the more gratifying, therefore, to find that from all parts of the world assistance to Red Cross work is being offered. Great Britain, without doubt, will bear her full share in this noble work, both among the Balkan armies and with the Red Crescent on the Turkish side. Appeals on behalf of these two organisations are being issued, and we would call attention to the generous response that is coming from India as a confirmation of the close attention with which the struggle in the Balkans is being watched by the Moslem subjects of Great Britain.

So long as war had not actually broken out the efforts of the Powers to provide for its "localisation" were unrelaxed. A definite proposal put forward by M. Poincaré for a conference has been under consideration, and may be acted upon as soon as it appears likely to be productive of concrete results. The general opinion would seem now to be that the contending armies must be allowed their baptism of fire, and that shortly afterwards the Concert of Europe may hope to be able to intervene. As we believe that all the Governments concerned, with the negligible exception of Montenegro, are desirous of peace, if some justification for it could be given to their respective peoples, this view is not unduly optimistic. In the meantime a steady pressure must be exercised on the Balkan Governments, not from any hostility to their States, but in their own interests.

A week after the Montenegrins had taken the field against the Turks found the three Allies still intent upon the finishing touches of their respective mobilisations. As there has been no undue delay in these operations it becomes more probable that King Nicholas's action was spontaneous. The relative unimportance of a Montenegrin incursion into Turkish territory in comparison with the real issue may have rendered Bulgaria indifferent to the precise degree of co-operation that her western ally proposed to offer, and there could be no doubt that the honour of being the first to hurl themselves against the Turks would be coveted by these simple mountaineers and their Sovereign. The events of the past few days have shown that the Turks are not likely to be distracted from their settled plan of campaign by anything that happens on the western confines of their territory. Beyond Albania the Montenegrins will scarcely venture to penetrate, even if their arms are successful. Within this region such Turkish garrisons as there are, with or without the help of the Albanians, must make the best they can of the situation. Montenegrin victories will not throw Constantinople into a paroxysm of fear; and even the loss of ten thousand troops, killed or taken prisoners, would have little effect on the operations in the chief theatre of the war, which is much nearer to Constantinople. Many preconceived ideas may have to be modified in the course of this struggle, and to Britons it may well prove an object-lesson to watch closely the demeanour of four or five belligerents in whose vocabulary the word sentimentalism finds no place.

While the Bulgarians, Servians, and Greeks were completing their mobilisations the fiction of a status of peace was maintained. On October 8, as we have seen, the Powers, through Austria-Hungary and Russia, made an explicit declaration to the Balkan States regarding their attitude towards war and the steps that they were prepared to take to ensure the actual introduction of reforms in Macedonia. The formal reply to this communication was made by the Allied States on October 13, when a *Note verbale* was delivered to the Austro-Hungarian and Russian Ministers in Sofia. Gratitude was expressed at the interest shown by the Great Powers in the condition of the populations of European Turkey and cognizance was taken of their promise to undertake the realisation of reforms in administration on the basis of Article XXIII. of the Berlin Treaty. After so many promises made by Turkey and recorded in international documents, continued the *Note*, it would be cruel to these populations not to endeavour to obtain more radical and definite reforms in order to ameliorate their condition. The three States had, therefore, addressed themselves directly to Turkey, indicating the general nature of the reforms and the necessary guarantees for their application. Should the Turkish Government act as proposed, order and tranquillity would be established in the Ottoman dominions, and durable peace would be assured between Turkey and the Balkan States, towards which Turkey had too often assumed an arbitrary and provocative attitude. The tenour of this reply had been foreshadowed, as the Balkan correspondent of the *Times* has since disclosed, at the time of the presentation of the Powers' message to the Bulgarian Government. Using the words that the Russian Government had employed in similar circumstances in 1877, M. Gueshoff pointed out that after the sacrifices which the three States had incurred in the stagnation of industry and commerce, and in the enormous expenditure necessitated by mobilisation, the armies could not be demobilised until some tangible results had been obtained in regard to the amelioration of the condition of the Christian population in Turkey. The wisdom or unwisdom of this attitude on the part of the Balkan States will be proved by the issue of the struggle from which they seemed resolved to allow nothing to turn them.

Earlier in the evening of the same day the Identic Note of the allied States had been delivered to the Turkish Chargé d'Affaires in Sofia. In this communication the three Governments invited Turkey to apply the reforms indicated in Article XXIII. of the Berlin Treaty on the lines set out as an annex to the Note, and they demanded an undertaking on the part of the Porte to execute the reforms within six months and to recall the order for mobilisation. The required reforms were specified in the following terms:—(1) Full autonomy for the separate nationalities of the Ottoman Empire; (2) proportional representation for each nationality in the Turkish Parliament; (3) admission of Christians to all public posts in the provinces inhabited by Christians; (4) equality of standing as between Christian and Moslem schools of all grades; (5) an undertaking on the part of the Porte not to attempt to modify the ethnological character of the provinces by settling Moslem populations in them; (6) territorial enlistment of Christians in Christian cadres; (7) reorganisation of the gendarmerie by vilayets under

Digitized by Google

Swiss or Belgian organisers; (8) Swiss or Belgian Governors for the vilayets in which Christians are domiciled; the Governors to be nominated by the Powers and to be supported by *Conseils Généraux;* (9) formation of a Grand Council of State, composed of Christians and Moslems in equal number, to supervise the application of these reforms; the Ambassadors of the Great Powers and the Ministers of the four Balkan States to keep in touch with the operations of the Council. If Turkey stands in need of consolation at this moment, she may reflect that, unlike the Great Powers, she is not denied the satisfaction of replying to the Note in the only way possible.

While the Powers were admonishing the Balkan States they also called upon the Porte for an undertaking to deal with Macedonia on the lines indicated in the promise to the allied Governments. To this Note, which was communicated on October 10, the Turkish Government replied on October 14 in the following terms: "The Minister for Foreign Affairs of his Majesty the Sultan has the honour to remind their Excellencies, as they will, moreover, be good enough themselves to admit, that the Imperial Government has already recognised the necessity of introducing reforms adapted to the administration of the vilayets of Turkey in Europe. The Imperial Government has, in view of these reforms, all the more the conviction that it contemplates introducing them independent of all foreign interference, and anticipates that in these circumstances their execution will not fail to contribute to the prosperity and economic development of the country by assuring in the liberal spirit of the Ottoman Constitution the concord and good harmony of the heterogeneous elements composing the population of that part of the empire." The communication proceeded to point out that any failure of the attempts to ameliorate the internal situation was due in large measure to the state of disturbance and insecurity produced by criminal outrages. While repudiating any wish to examine up to what point Article XXIII. of the Berlin Treaty may have preserved more than other articles an actual value, the Porte added that it had undertaken spontaneously the decision to submit the draft law of 1880 "in its entire historic *ensemble*" to the opening of the next session of Parliament for approbation and Imperial sanction in accordance with the fundamental charter of the empire. Throughout the controversy no real attempt has been made to bridge the gulf separating the Porte and the Balkan States. The contention of the former is that the present Ministry is not to be held responsible for the crimes and omissions of its predecessors; the Balkan peoples maintain that nothing good can ever come out of Constantinople. On the Turkish side it has to be admitted that the régime of the Committee of Union and Progress was resented by Moslems as well as by Christians, and the new Cabinet represented an expression of popular antipathy to the Committee and all its ways. It is impossible to expect that the present Ministry, after only two months of office, will admit its incapacity quite as unreservedly as it has been asked to by the Balkan States. On the other hand, the reference to the Vilayets Law of 1880 might have been accepted in good faith as an instalment, and the measure of the new Cabinet could thus have been taken.

The appointment of Lord Edward Cecil as Financial Adviser to the Egyptian Government, which had already been forecasted in THE NEAR EAST, has now been gazetted. This was one of the changes in the higher Government *personnel* that was awaiting the return of the British Agent for confirmation. The process of tightening up the administrative machinery of Egypt is likely to be gradual; but it is obvious that the reputation already acquired by the new régime for an emphatic insistence upon economy and efficiency is exercising the native mind. Rumours of Ministerial changes have been current for some time past, and the reports have been made to serve the purposes of a variety of private interests. A telegram received yesterday from our Cairo correspondent states that the forecasts of impending changes in the Legislative Council appearing in the Press are both premature and largely untrue.

BRITISH RED CRESCENT SOCIETY.

The following appeal, signed by Syed Ameer Ali, president, M. Kazim Hosain, hon. secretary, A. S. M. Anik, hon. treasurer, and Edwin Hayes, hon. auditor, has been issued by the British Red Crescent Society:—

In view of the appalling distress and suffering that will be caused both among combatants and non-combatants in the theatre of the war in which the Balkan States have involved the Ottoman Empire, the Committee of the British Red Crescent Society earnestly appeal to the humanity of the people of Great Britain, India, and the British Colonies for funds for the relief of the sick and wounded and distressed. Considering that help of all kinds is pouring in from other quarters to the belligerents on the other side, the British Red Crescent Society feel confident that in response to the universal feeling of their Musulman fellow-subjects the British with their usual generosity will accord to the British Red Crescent Fund their prompt support.

Subscriptions may be sent to the bankers of the British Red Crescent Society, Messrs. Coutts and Co., 440, Strand, W.C., or to the hon. treasurer, 2, Fenchurch Avenue, E.C.

In sending from Moscow a contribution of £2,000 to this fund for the relief of the Moslem sick and wounded in the Balkan War, Sultan Mahomed Aga Khan expressed the hope that all other projects which have been engaging the attention of the Indian Moslems, including the Aligarh University scheme, will be laid aside for the present so that all effort may be concentrated on relieving the suffering and distress with which the Turkish people are confronted. The announcement that the British Red Crescent Society are organising relief measures for Turkey was telegraphed to India at the end of last week, and already £200 has been received from Mr. Abdul Latif Jamal, of Jamnagar, £144 from Lahore, £50 from Calcutta, and £25 from Karachi. The president, Mr. Ameer Ali has subscribed £10, and Sir James B. Lyall and Mr. Abdul Latif £5 each.

THE BALKAN COMMITTEE.

At a meeting of the Balkan Committee held at the House of Commons on Thursday of last week, Mr. N. Buxton in the chair, the following resolution was unanimously passed:—

"That the officers be instructed in the event of war to hold a public meeting in London to insist that no settlement of the crisis can be permanently effective which does not provide for autonomous government of the European provinces of Turkey or for their administration by governors responsible to the Great Powers."

The Committee has issued a manifesto stating that it will "do its utmost to rally opinion in support of a policy which it believes to be more in accord with public feeling in this country" than that hitherto pursued by the Foreign Office. The manifesto concludes:—

No solution short of autonomy under the protection of the Powers or of effective control by the Powers can bring finality. The last phase of Turkish misrule has produced the miracle of Balkan unity. The democracies of Europe can impose upon the Powers a unity as solid and even more effective. At any moment the fleets of the Concert could achieve without bloodshed what the armies of the League may win with slaughter. It lies with public opinion to insist that the Concert shall act.

THE NEAR EAST.

THE NEAR EAST is on sale at all Bookstalls and Newsagents in Great Britain. Should any difficulty be experienced in obtaining the paper, readers will oblige by notifying the Manager. Abroad THE NEAR EAST may be obtained in:

PARIS. Librairie Hachette, 79, Boulevard Saint-Germain; Librairie Galignani, 224, Rue de Rivoli, and at Railway Bookstalls.

VIENNA. Goldschmiedt Brothers, Zeitungsbureau, Wollzeile, 11.

CONSTANTINOPLE. Economic Co-operative Society, Pera; Benjamin Rawe, British Oriental Bazaar; D. Marianopoulo, 280, Grande Rue de Pera; Otto Keil, Librairie Internationale, Pera.

SALONIKA. Librairie Francaise, Rue Sabri Pasha.

SMYRNA. Dem. Tzannou, Petite Rue de Rose.

BEYROUT. Sarrafian Brothers.

JERUSALEM. Palestine Educational Store, Jaffa Road; Librairie Internationale et Artistique.

CAIRO. Diemer and Company, Shepheard's Buildings.

ALEXANDRIA. Librairie Schuler, Rue Cherif Pasha; Nacamulli and Company, 12, Rue Sesostris; F. Diemer, Cairo Station.

PORT SAID. Charles Evans.

KHARTOUM. Sudan Stationery and Bookstore.

PORT SUDAN. E. A. Zoides.

ATHENS. Eleftheroudakis and Barth, Place de la Constitution.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)

Constantinople, October 11.

The Wish for War.

The situation is worse than ever, and at the moment of writing the chance that peace is likely to be preserved is extremely small. The publication by the Porte on Sunday of its decision to adopt a scheme of reforms based on that prepared by the European Reform Commission for the organisation of the Eastern Roumelian Administration in 1880 in pursuance of the Treaty of Berlin relieved neither the external nor the internal situation one whit. On Monday a crowd of several hundred students, led by Dr. Nazim, Muhieddin Bey, and other shining lights of the Committee of Union and Progress, appeared before the Porte and called on the Grand Vizier to make his appearance. Ghazi Mukhtar asked for a delegation to visit him, but the crowd refused to accept this proposal. The Grand Vizier and his son Mahmud Mukhtar finally appeared, and were saluted with shouts of "Down with the Government!" "We want no reforms!" "We want war!" Mahmud Mukhtar then spoke. The reforms, he said, were not identical with, though based upon, the law of 1880, but in any case the Government was not going to listen to dictation from Balkan States or riotous students. Ghazi Mukhtar spoke in the same strain, and the arrival of soldiers put an end to the demonstration. The situation looked ugly in the evening, and the Government proclaimed martial law. Next morning the Turkish population of Constantinople, especially the members of the "Effendi" class, looked more sullen than at any time in the last four years, when, at mid-day, the news that Montenegro had declared war on the Turkish Empire caused a general revulsion of feeling, and the general public resumed its expression of easy-going contentment.

Popular Feeling.

At present the cry here is all for war. The army believes that it is going to win, and the great mass of the public takes the same view. Even if the effect of demonstrations, processions, and what not in the way of hypnotising forces be taken into account, it must be admitted that the majority of the inhabitants of Constantinople are animated by a very real patriotism. The troops go forth from their barracks, their ranks swollen by reservists, and entrain without any hysterical outbursts of emotion; the coachmen and carters whose beasts have been requisitioned, and who have been paid merely in promises of reimbursement at low rates, accept the inevitable stoically; and gifts and subscriptions for the army are pouring in. But underneath the impassive exterior of the Turks, and especially of the peasant classes, there lurk cruel misgivings. What is to become of the families that they have left in Anatolia? Who will pay the taxes when the breadwinner has gone? Is this "the real thing," or are the men being called out on another of the endless mobilisations that have plagued them for the last twenty years, and never more than since the Constitution, since when there have been mobilisations for Albania, Yemen, the Hauran, Macedonia, and the Italian War? These are questions which many soldiers and reservists are asking to-day.

Tableaux.

On a Bosphorus steamer. Crowds of Turks sitting and reading their papers drop their reading and look up as a Young Turk orator breaks into an extempore speech. "We want war," he cries. "We must stamp on the Bulgar, the Serb, and all our former slaves till they whine for mercy. We must kill wholesale, and the Crescent must fly over Sofia if we are to be left alone by these upstart States for a generation. As for the reform schemes, what do they all mean, my brothers? Simply that we are to have foreign control, that foreign influence which we thought our glorious revolution had rid us of for ever. No! We have no confidence in Europe. Let her leave us alone, and let us fight it out and destroy the Bulgar and the Greek. And if Europe intervenes, then we shall leave Europe in blood. Therefore, let us be united and abandon all party feuds. I myself am ready to seek a martyr's death and fight for the integrity of the Empire, and for the Empire and Islam shed the last drop of my blood." The speaker, who looks as if he would have to go into training before he could render any service to any cause, sinks, twitching with emotion, into his comfortable seat in the first-class saloon. Some of his audience look bored. Others applaud.

Forward, amid the third-class passengers, sit some woebegone peasants. Tears are in their eyes, and from time to time they look hopelessly at the Asiatic shore which they are leaving. They do not speak of the war to which they have been called out. One of the youngest gives way silently to his emotion, and the tears run down his cheeks. An officer passes. "Why crying, my boy?" he asks. "Is it for the black or the brindled cow?" "The brindled one," he answers; "she gave the best milk."

And this war, if it be fought, will be fought without gloves. Stories, mostly monstrously exaggerated, of Bulgarian cruelties to Moslems are being circulated, and are inflaming the minds of the lower classes against their foes. "We shall kill every Bulgar, man, woman, or child," says your boatman. "Why?" you ask. "Don't you know, they have massacred all the Moslems at Bourgas or Varna?" So the tale runs, propagated by seedy Jewish quillmen, Young Turk revolutionaries anxious to work up the fanatical spirit of the population, which they regard as a good fighting asset, worthy simpletons who believe everything their Press tells them and all the rest. We are likely to hear much of the horrors of war, if war is declared.

NOTES FROM SMYRNA.

(From Our Own Correspondent.)

Smyrna, October 5.

Signs of the Times.

The Turkish authorities are taking every precaution in the event of war breaking out with Greece and the Balkan States, but several of their measures are, to say the least, rather irregular. No Greek steamer nor sailing vessel is allowed to leave the port, and, notwithstanding the repeated protests of the Greek Consulate, the decision taken by the Turkish Government is maintained on this point. The same order has been given at other Turkish ports, and the local Smyrna Greek Shipping Company of Messrs. Pantaleon have one steamer held up here and two at Nagara and Salonika. Two or three Greek sailing ships are also being detained in Smyrna.

Turk and Greek.

The order issued by the Greek Government for the general mobilisation of their army is posted up at the local Greek Consulate. So far no restriction has been placed in the way of any Greeks wishing to leave; but as the Greeks are intensely patriotic towards their country, whether they be Hellenic subjects or Ottoman subjects, it remains to be seen whether this freedom to leave Smyrna will last long. A large part of the population of Smyrna being Greek, a great number of telegrams handed in and received at the telegraph office are written in Greek characters. A notice has just been issued by the Telegraph Department to the effect that only telegrams in Turkish, English, French and German will be accepted.

Military Authorities' Measures.

Ottoman subjects wishing to escape military service were able to do so on payment of a sum of money. This facility has for the present been stopped, and is another sign of the times. The Smyrna-Cassaba and Extension Railway Company has received orders from the military authorities that from to-morrow all passenger and goods traffic must be completely stopped until further notice on the line between Alasheir and Afion-Kara-Hissar. Between Smyrna and Alasheir and between Magnesia and Karadjalar the company will continue its regular service as far as possible. This order coming at such a busy season will cause great inconvenience to the export merchants. One good effect of the dangers of war has been the closing up of the dissensions among the political parties of the Turks, and the local Union and Progress Committee has appealed to its members to put aside all party feelings and to unite against the common enemy.

SALONIKA LETTER.

(From Our Own Correspondent.)

Salonika, October 5.

A Foretaste of War.

Since I last wrote, the outlook here has become much worse, and we are beginning to have a foretaste of what we may expect should hostilities really begin. For one thing, we are practica'ly shut off from the rest of Europe, and are without mails. Trains only run to Zibefcheh, the last Turkish station on the frontier, and no Ottoman is now allowed to enter Servian territory, while, as a set-off, no Servian is admitted into Turkey; so passengers of other nationalities going hence to Europe have to leave the train at Zibefcheh, carry their own luggage across the boundary, and board the other train at Ristovatz. In consequence, the incoming European mails are held up at this last-named station, there being no acceptable porters available to carry them across the frontier to the train at Zibefcheh. We are told our outward mails have gone through, as, being light, the British postmaster has sent them by special messenger; but we do not know how long this will last, nor how soon all communication will be closed. The Austrian mail being a much heavier one, the Austrian postmaster has now gone to the frontier to take the matter in hand, but unless he can get porters who are neither Ottoman nor Servian it is difficult to see how he will work it. One thing in his favour is that the Austrian G.P.O. has much more go in it than the British, and is quite capable of sending men down from headquarters to solve the transport problem, which in its case is a more important matter, as its parcel post is a very heavy one owing to it being possible to get through its medium, from those countries served by it, anything from a reel of cotton to a Krupp gun as an *échantillon sans valeur*, so saving duty and all the worry of the Turkish Customs formalities. Should the traffic be completely stopped, as is threatened, we shall all be badly off indeed; for the Turkish Government do not allow the foreign post offices at any time to send their bags over the line to Constantinople, so all the mails will have to go either through the Turkish Post Office, which is not reliable, or by sea, which route is both irregular and long. As no goods, in transit or otherwise, now cross the Servian frontier, and the same state of affairs exists between this country and Bulgaria, it can easily be imagined how completely business is already disorganised and brought to a dead stop.

Shipping Detained.

It seems carrying things somewhat far that, without war having been declared or even diplomatic relations being broken off, Greek and Bulgarian ships have been ordered not to leave this port. Three days ago two of the former and one of the latter were warned by the Turkish authorities that they were not to proceed; but the captains very naturally replied that without express orders to the contrary from their consuls they would certainly leave when ready. Accordingly, at the appointed time they left, but were stopped at Cape Kara and told that if they attempted to pass they would be fired on by the batteries. So they had to come back. According to a telegram, the Minister for Foreign Affairs, replying to the protests of the Greek Minister on this subject, said these detained ships would serve as transports for Ottoman troops.

To-day it is said the Government have forbidden all subjects of the Balkan States in Turkey to leave. One would have thought it would have been desirable to get rid of them, and that they would even have been expelled, as were the Italians.

Of course, the Servian war material which was on its way through Salonika in transit has now been definitely stopped, and some 360 wagon loads have been held back and discharged. The Servians seem to have brought this upon themselves by not allowing some aeroplanes and other material from Germany for the Turkish Army to pass through. So it is no wonder the Turks retaliated.

No Demonstrations.

The telegrams published here by our local papers are most warlike, but somewhat contradictory. One says an ultimatum from the combined Balkan States to the Sublime Porte is hourly expected, but has been delayed owing to the said States being unable to communicate telegraphically with their representatives, as the lines are out of order. The next message says the cipher telegrams sent to the Ottoman Government by its Legations in Sofia and Belgrade are purposely so mutilated that they cannot be deciphered, so the central authorities do not know what is really passing in the neighbouring States. Meanwhile Albania is never even mentioned, is evidently forgotten, and the Sultan's birthday is referred to in only thirty words. In fact, the sole topic of the hour is war. All the same, we have had no demonstrating here so far, as has been the case in Constantinople. We see accounts of enthusiastic parading, speech-making, etc., there, but here everything is very quiet, with a pretty general hope that there will still be found a way to avoid war.

We learn that in case of war Bulgarians remaining in Turkey are to be under British, Greeks under French, Montenegrins and Servians under Russian protection, the Triple Alliance being evidently out of it.

NOTES FROM SYRIA.

(From Our Own Correspondent.)

Beyrout, September 30.

Enver Bey and Peace.

The father of Enver Bey, the hero of the Turkish Revolution and of the Tripolitan war, arrived at Beyrout on September 24 from the seat of war, viâ Egypt. Asked about the progress of the war, he declared that arms and ammunition were plentiful, and that the defenders' zeal is unabated. He confirms the arrival of the Senussi at Jaghabub, and he would have gone to meet him were it not for the hardships of the long journey and the urgency of his departure. He acknowledges that the Italians facilitated his passage through Egypt, against his assurance that he will not return to Tripoli. He repeats what the papers have often declared, that his son is bent on continuing the fight, even if the Turkish Government were to conclude peace. He expressed some surprise at the news published by Egyptian papers that his son had come to Egypt. When he left, Enver Bey had no such intention. It is supposed that the Egyptian papers may have mistaken the father for the son.

Incident at Damascus.

A remarkable incident is reported to have occurred on September 20 at Damascus. After performing the Friday prayers in the Ommiade mosque, a Moslem Sheikh happened to meet in the street an Orthodox priest with his son, and without any provocation he struck the former with a dagger in his neck. Leaving him bleeding profusely on the ground, he rushed through the Jewellers' street firing wildly on several persons, fortunately without hitting any. At last a man had the courage to strike the Sheikh with a chair, and thus render him harmless until the police came on the scene and arrested him. It is reported that 250 cartridges were found on him, and that while making his mad attack he was violently cursing the Christians. The party of the Entente Libérale is said to be accusing the C.U.P. of having used this mad fanatic as a tool in the hope of bringing about disturbance and massacre; and it is rumoured that twenty others were to commit similar acts simultaneously. But the "mad Mahdi's" precipitousness caused the plot to be abortive.

Druse and Moslem.

A recrudescence of trouble between Druses and Moslems is reported from the Hauran. Over a fortnight ago the Moslems of Hirak are said to have killed a Druse while repairing to the village of Sheikh Meskine and to have wounded another seriously. This caused intense excitement among the Druses of As Suadia, the capital of the Hauran, who destroyed the Moslems' school and were preparing to attack the village of Hirak, when the Government intervened and calmed them with promises to punish the offenders. Seventeen persons of the village of Hirak are said to have been arrested, and meantime 200 horsemen and three battalions of infantry have been despatched from Damascus to prevent any further trouble.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, October 9.

Lord Kitchener's Return.

Although Lord Kitchener's return from leave had less of a dramatic touch about it than had his arrival last year, yet it created a certain amount of excitement in the country, and his welcome at Alexandria and on his way up to Cairo was of a nature which, as far as I can recollect, never characterised that extended to his predecessors on their return at the end of the summer. The British Agent reached Alexandria on board the s.s. "Schleswig" at eight o'clock on Thursday morning, and was met on arrival at Zizinia by the Ministers in residence (with the exception of Said Pasha, who was indisposed), the Sub-Governor of the city and his staff, Lord Edward Cecil, Acting Financial Adviser; Ismail Sidky Pasha, Under-Secretary of State for the Interior; Rear-Admiral Robinson, and a crowd of other officials, as well as Mr. Cameron, the British Consul-General, the Agency staff, and a number of prominent natives. A guard of honour consisting of police was drawn up on the quay.

Lord Kitchener drove off at once to the new summer residence of the British Agency at Bulkeley, and subsequently called on the Prime Minister at his residence at Zizinia to inquire after his health. After lunch his lordship left by special train for Cairo. A stop was made at Damanhour and Tanta. At the former town the British Agent visited the new cotton halaka and made inquiries as to the benefit which the fellaheen are deriving from the institution of these markets. At Tanta he was welcomed by the Mudir and the notables, and received the former's report on the progress of the various new reforms in his province. On arrival in Cairo Lord Kitchener was welcomed by the other Ministers and a number of high officials. There was quite a large number of people outside the station and along the route to Kasr-el-Dubara, who were attracted by the arrival of the British Agent and saluted him as he passed.

Sound Advice to the Fellaheen.

Lord Kitchener has lost no time since his arrival, and has been busy interviewing the heads of the administrations and receiving deputations. Amongst other notable residents his lordship received Dr. Nimr, the Editor of *El Mokattam*. In the course of the interview, the publication of which he authorised, his lordship expressed his great satisfaction at the improvement in the cotton crop, which will result in a considerable sum of money passing once more into the hands of the fellaheen, and he asked his interviewer to lay stress on his advice to the natives to employ this money in the payment of their debts rather than in the acquisition of luxuries and other, in the circumstances, unnecessary possessions. Even those who had money in the savings banks he recommended to withdraw their savings and liquidate their indebtedness. In no other way could the fellaheen expect to derive full benefit from the reforms which the Government has been and is instituting. This is, in short, the advice which his lordship gave to the natives with whom he conversed on his way up, and although the Gyppie fellah is the most conservative and obstinate of mortals and is hard to turn from his thriftless and extravagant habits, there is every reason to hope that, in view of the respect which the natives have for him, the British Agent's sound advice will not fall on barren soil.

The Savings Bank.

Apropos of the savings bank, the further figures which are now available provide interesting reading. On January 1, 1912, £E480,687 was the sum on deposit in the Post Office. On August 31 that amount had increased to £E575,333. No less than 108,329 new subscribers were registered during that period, an increase of nigh on 100 per cent. The actual amount deposited in the eight months was £E326,691. The withdrawal of a large part of this was due to the necessity of sowing, tending, and picking the cotton crop. At the same time it should act as an excellent advertisement, for the facility with which money deposited was withdrawn will go a long way towards removing the idea which has obsessed the fellaheen that this savings bank scheme was but a novel means of imposing a tax on them.

Alexandria and the Balkan Crisis.

On Monday Mohammed Said Pasha, the Premier and Regent, presided over the ceremony of the removal of the Holy Carpet from the Citadel to Abbassia. The morning the Carpet and its escort left Cairo for Alexandria, where Said Pasha will finally hand it over to the Emir-el-Hagg, and it will embark in the Khedivial steamer en route for Haifa, Medina, and Mecca. A strong force of troops has been drafted into Alexandria as in view of the state of feeling aroused by the war and the Balkan crisis it has been thought better to provide for all emergencies.

A certain amount of excitement has existed in all circles anent the events in the Balkans, but in spite of the occasion offered by the passage of the Mahmal for an exhibition of fanatical tendencies and the extreme excitability of the Levantine population of the port, it is not thought that any untoward incidents will arise there. At any rate, although we never know what may happen at Alexandria, we may rest assured that the authorities are on the alert, and that the predictions of the pessimists, who, either wittingly or unwittingly (it is difficult to say whether their attitude is quite free from ulterior motives) do their country so much harm on such occasions, will prove to be unfounded in so far as any serious trouble is concerned.

The greatest enthusiasm has been displayed by the Greeks, and a great number of them have already left for Athens, either to join their regiments or to offer themselves as volunteers. The Greek firms and even some of other nationalities have treated those of their employés who have left for Piræus most handsomely, and, in addition to advancing them their pay, have promised to keep their posts open for them.

The Seditious Circulars Inquiries.

So far there is no further development in regard to the inquiry into the seditious circulars affair, and the authorities maintain their Sphinx-like attitude. Somewhat of a flutter was caused on Sunday evening and Monday morning by the rumour that a plot against Said Pasha had been discovered, and that several arrests had been made. A *communiqué* published in the course of the day threw the proper light on the matter, and showed that what the police had believed to be a serious plot was after all but a mare's nest, and that if any plot did indeed exist they had got on to the wrong scent. An expert has been appointed to examine the question of Sheikh Shawish's connection with the composition and publication of the seditious circulars. Sheikh Shawish and his three fellow-prisoners made another appeal to the courts against their maintenance in custody. Judgment was given yesterday by the Attarin Summary Tribunal, and whilst the appeal of the Sheikh and two of the prisoners was rejected, that of the fourth man, Osman Mertada, was admitted, and he was released.

The two medical students who were recently sentenced to four months' imprisonment for perjury committed in the conspiracy case were successful this morning in their appeal against the sentence passed on them, which was reduced to one of forty-five days' imprisonment. As they had already spent fifty-five days in prison, they were at once released.

LETTRE D'ATHENES.

(De Notre Correspondant Particulier.)

Athènes, le 10 octobre.

L'explosion de la crise.

La mobilisation simultanée des états des Balkans que je faisais déjà pressentir dans ma précédente lettre n'a pas tardé de s'effectuer. Tout le monde comprenait, à la marche des choses, qu'elles ne pouvaient qu'aboutir à ce résultat et seules les chancelleries européennes s'obstinaient à ne pas y croire. Aussi devant le fait accompli sont-elles trouvées prises au dépourvu. Les grands diplomates européens ont été joués par les hommes d'état des petits c'états balkaniques et l'action commune de ces derniers est venue prouver jusqu'à l'évidence qu'il existait entre eux une entente que les chancelleries européennes considéraient comme impossible. Pourtant, comme je le disais à cette même place déjà le 24 octobre de l'année dernière, il était bien à prévoir que le rapprochement et l'entente intervenus entre les chefs religieux de la Grèce et de la Bulgarieà Constantinople ne pouvait qu'être suivis d'une entente similaire entre les états eux-mêmes, puisque cette entente avait fait disparaître les seules causes de discorde qui les divisaient, non seulement en faisant cesser les luttes qui existaient entre leurs congénères et correligionnaires en Macédoine, mais en créant même entre eux une coopération.

Cette mobilisation inopinée a été justifiée par les mesures militaires et menaçantes de la Turquie. Mais en réalité ce qui a poussé les états balkaniques à la mobilisation ce fut moins la peur inspirée par les troupes turques que la conviction, corroborée par leur mobilisation, que ni la Turquie ni les puissances n'ont jamais songé sérieusement à appliquer des réformes radicales. La triste expérience des interventions intéressées des puissances a contribué à leur faire prendre la ferme résolution de régler directement une fois pour toutes tous leur comptes avec leur récalcitrante voisine et d'assurer à leur congénères irrédimés des conditions d'existence supportables afin que ces états puissent aussi vivre ensuite en paix avec la Turquie sans avoir à se préoccuper sans cesse du sort de ces populations opprimées. Inutile d'ajouter que la nécessité urgente de donner aussi une solution à la question crétoise a été pour beaucoup dans la détermination qu'a prise la Grèce d'accéder à cet accord militaire.

L'armée mobilisée qui comprend toutes les classes de la réserve, sauf les exemptés, s'élèvera, croit-on, à un effectif d'environ 120.000 hommes bien exercés et parfaitement équipés. Aussitôt que l'enrôlment de ces réservistes aura été parachevé, le gouvernement compte appeler sous les drapeaux les exemptés ainsi que les conscrits de cette année aussi bien que ceux de l'année 1913. Tous ces contingents pourront former avec les volontaires un chiffre global d'environ 40.000 hommes qui, après avoir été exercés, constitueront un second corps d'armée. D'autre part, en Crète on a appele également sous les armes toutes les classes de la milice et on prépare des corps de volontaires qui prendront part à la guerre. Mais reste à voir si les puissances protectrices, dont quatre navires de guerre surveillent les movements des Crétois, permettront le départ de ces troupes.

Le général Garibaldi a écrit qu'il se tient prêt à venir en Grèce avec un corps de volontaires, comme à l'époque de la guerre de 1897.

Quant aux deux missions militaires, française et anglaise, leurs contrats seraient résiliés de droit aussitôt que la guerre aura été déclarée. Il paraît cependant probable que leurs membres resteront en Grèce en simples particuliers tout en continuant à être payés par le gouvernement hellénique, jusqu'au moment où, la guerre finie, ils pourront reprendre leurs fonctions. On affirme que quelques-uns des officiers français demandèrent à être incorporés définitivement dans l'armée grecque.

La chambre devait se réunir la semaine dernière mais sa convocation a été remise pour plusieurs raisons, notamment à cause de la même difficulté qui l'a empêchée de se réunir en été, c'est-à-dire la question de l'admission des députés crétois, qui se tiennent encore tout prêts à y entrer. Tant que la guerre n'est pas déclarée leur admission constituerait de la part du gouvernement grec un acte de provocation dont la Turquie pourrait s'autoriser pour commencer la guerre, alors qu'au contraire, il s'efforce de l'éviter. On s'efforce de persuader les Crétois de s'en abstenir mais ils ne veulent entendre raison. Cependant, en cas de guerre, on affirme que le gouvernement et la chambre n'hésiteront pas à accepter l'union votée par les Crétois en 1908 pour trancher défin itivement cette question avec la Turquie et ensuite, si les puissances ne s'y opposaient pas, on y enverrait des préfets pour gouverner l'île. Mais, comme je le disais dans ma dernière lettre, les puissances ne paraissent pas disposées à accorder plus que le rétablissement du Haut Commissariat. D'autre part les Crétois n'en veulent pas et déclarent que si les puissances essayent de réoccuper leur île, ils sont décidés à opposer une résistance armée au débarquement des matelots étrangers et qu'ils ne ménageront plus les Mussulmans. Dans de telles conditions la réoccupation ne serait pas facile sans une expédition de troupes que les puissances ne seraient probablement pas disposées à entreprendre.

La déclaration faite mardi dernier par la Russie et l'Autriche en leur nom et au nom de toutes les autres puissances pour faire savoir qu'elles s'engagent à prendre en mains les réformes sur la base de l'article 23 du Traité de Berlin n'a pas reçu un meilleur accueil que la promesse spontanée de la Turquie d'appliquer les règlements de l'acte de 1880 qui découlent du dit article. La menace des puissances de faire respecter l'intégrité de la Turquie, coïncidant juste avec les négociations de paix avec l'Italie, qui lui arrache toute une vaste région, a produit ici une pénible impression. On a qualifié de cynisme cette manière de voir injuste et égoïste des puissances, contre laquelle la presse proteste avec indignation en faisant appel à l'opinion publique européenne et surtout à celle du peuple anglais, si éminement libéral. Ainsi au lieu de calmer les esprits la communication des puissances n'a fait que les exaspérer d'avantage. L'embargo des vapeurs grecs à Constantinople, et surtout l'usage que compte en faire la Turquie en transportant des troupes, ne fait qu'ajouter à cette exaspération.

Cette effervescence belliqueuse s'est manifestée hier par l'enthousiasme avec lequel le peuple a reçu le roi. Les rues conduisant de la gare au palais étaient encombrées par la foule depuis trois heures. Sa majesté n'est arrivée cependant qu'à neuf heures et demi. Ce retard joint au fait que le président du conseil, M. Vénizélos, s'était porté à sa rencontre jusqu'à Corinthe avec une escadre de contre-torpilleurs, a donné lieu à des bruits très singuliers. On a dit qu'une divergence de vues s'était produite entre le roi et son premier ministre dont la politique prétendue belliqueuse ne serait pas partagée par le souverain. A l'appui de cette assertion on invoquait le ton plutôt pacifique de l'allocution adressée par le roi au peuple rassemblé devant le palais. La presse ministérielle dément tous ces bruits qui sont aussi démentis par le fait que le roi, au cours de son allocution, a exprimé son entière confiance dans le gouvernement en lui adressant même des éloges pour sa sollicitude patriotique. La foule a ensuite accompagné M. Vénizélos jusqu'à son habitation. Là le président du conseil a dit qu'il espère que la guerre pourra encore être évitée, mais quoi qu'il arrive, ce que les quatre états balkaniques demandent est une condition indispensable pour qu'ils puissent à l'avenir vivre en paix avec l'empire voisin.

A la suite de la démarche faite par les puissances et de la déclaration de guerre du Monténégro, la note identique que les quatre états allaient adresser à la Turquie a dû être modifiée. C'est ce qui en fit retarder la remise.

A moins que la Turquie et les puissances ne consentent à donner les garanties qui seront demandées par cette note, et ne donnent une solution satisfaisante à la question crétoise la guerre est considérée ici comme inévitable et imminente.

Insurrection de Samos.

Les troupes turques, malgré tous les renforts qu'elles sont parvenues à recevoir de l'Asie Mineure, ont dû quand même quitter l'île, grâce à l'intervention des puissances. Après une armistice de cinq jours, elles ont reçu l'ordre de partir sur cinq voiliers pendant que les marins étrangers et les insurgés mêmes leur rendaient les honneurs.

L'attitude courageuse du gouvernement grec, qui a donné à entendre qu'il avait la résolution d'y envoyer un bateau de guerre, a contribué à cette heureuse solution, qui a été reçue avec une grande joie à Athènes.

NOTES FROM ROUMANIA.

(From Our Own Correspondent.)
Bucharest, October 12.

Roumania and the Balkans.

Events in the Balkans are watched here with the greatest anxiety, and the strain is beginning to make itself felt in financial and business circles, if not otherwise. Especially in banking and grain quarters are matters getting daily more serious, the former having lent largely on the grain lying in silo or lighter at the Danubian ports, which for want of tonnage cannot be shipped, and therefore cannot be realised except at ruinous prices on the market here. Securities are also falling somewhat, though this is only to be expected at such a time.

The newspapers are naturally making capital freely out of the situation, and the streets are flooded of an evening with special editions, which always manage to have something of a sensational nature. Roumania's attitude in the event of war is, of course, the sole topic of discussion. All sorts of rumours are afloat of secret preparations on the part of the army, the truth of which it is exceedingly difficult to estimate. One thing is known, and that is that Roumania is as well prepared as it is practically able to be. Whether she will be forced into armed activity the next few weeks will show. Students of politics aver that she will be able to hold aloof, except, of course, should her vital interests become involved, which does not seem to be the case at present.

A Significant Rumour.

One significant fact is that, though the manœuvres are over, nearly the whole of the troops lately engaged therein are still under arms in and about the capital. It is passed from lip to lip here that some 20,000 men are billeted in the outskirts, whilst at Buftea and Chitila others are still with the colours. In any case, the time-expired men of the 1910 contingents are not allowed to leave their regiments, whilst the new levies, who should join in November, are called up a month earlier. These facts in themselves cause much uneasiness.

The manœuvres, cut down on account of the heavy rains, were at best a scrambled affair, and the first day the opposing parties got hopelessly clubbed. It would perhaps have been better had they been abandoned altogether for all the good they did to either officers or men, apart from the political effect of such a move.

Some little time ago the *Universul* published what was termed an authorised (though not official) statement as to Roumania's attitude, stating, among other things, that she would also have to "compensate" herself if Bulgaria, after an eventual victorious campaign, claimed increase of territory. This was loudly condemned by the opposition papers as ill-judged and ill-timed, whilst they also challenged the statement's reliability. The *Universul* has repeated that it is not official, but people generally think it to be at least inspired, and most ask which direction will expansion take—west (Transylvania), east (Bessarabia), or south (Bulgaria itself).

"It is an ill wind," etc. The crisis has disorganised the Eastern European Railway services completely, and now the only direct route to Turkey and Constantinople is by the Roumanian State service line viâ Constantza. The tri-weekly sailings either way are crowded, whilst the mails gladly avail themselves of this route. I hear that the two new steamers for the Rotterdam line have now been definitely ordered in England (or, rather, Scotland), and that the building of same is shortly to be commenced.

Owing to the continually increasing demand for "The Near East," difficulty is occasionally experienced in obtaining copies. The Manager will be obliged if, in such cases, readers will at once communicate with him at Devonshire Buildings, Devonshire Square, London, E.C.

NOTES FROM SERVIA.

(From Our Own Correspondent.)
Belgrade, October 13.

A Time of Suspense.

As day after day advances each setting sun brings us nearer to the moment that every Servian is looking forward to with unrestrained impatience, when the reply of the Servian Government to the collective note of the Great Powers will imply the unfurling of the banners of peace or will be the signal for the beginning of the horrors of war.

On the evening of the day when the decree of mobilisation was signed we heard that in several isolated parts of Servia, in far-scattered villages, men were busily employed bringing and heaping on some high point of many a hill faggots, wood, straw, and turf, which, being lighted, soon became huge bonfires.

Servian Feeling.

The local authorities' fiery speeches have awakened in the peasants the ardour and patriotic love described in Servian ballads, and sung by minstrels throughout the land. On the plains of Kossovo their forefathers perished; and for five hundred years the invaders, who were men of another race and creed, oppressed the fallen Christian Servians. This state of things, Servians maintain, has continued in the European provinces of Turkey up to now; but to-day the free and unfettered subjects of the kingdoms of Servia and Bulgaria are no longer inclined to close their ears to the cries of distress of their brethren still dwelling on the plains of Kossovo and in other parts of Old Servia and Macedonia.

Two Incidents.

During the first days of mobilisation there was a great deal of work going on at the Belgrade railway station, put under military control and worked by soldiers. One fine-looking fellow, a sentinel, who had been on guard for many hours in the early morning, but since then off duty, seeing that there were not sufficient hands for executing an order given to unload a wagon of salt, at once voluntarily joined in the work. An officer of the reserves, who had just arrived, approached, and was greatly surprised to discover that this man, acting so vigorously in the capacity of a simple soldier, was a gentleman from a foreign town, a University professor of Servian nationality, well-known to him. "Yesterday," said he, "I was a professor; to-day I am likewise doing my duty, as you see."

A day or two ago a woman of the peasant class entered a newspaper office and requested the editor to put her into communication with some poor man who was going to the war, as she wished to find someone who needed an outfit, which she would supply out of her small means. She had, she added, had two sons of her own, both of whom had joined revolutionary bands in order to help their Macedonian brethren, and both of them had been killed. So having none of her own family left to help her country in the war, she wished to do what she could by proxy, so to say. "And all I ask in return," she added, "is that the man whose outfit I provide will, when he prays to God before the battle, pray also for my two lost sons."

Such incidents may be trivial, but they serve to exemplify the depth of feeling and earnestness of the Servian people in this time of crisis.

THE PERSIA COMMITTEE.

Mr. H. B. F. Lynch presided at a meeting of the Persia Committee held in the House of Commons on the 10th inst., at which the following resolution was passed.

While welcoming the assurances of the Government that no partition of Persia is contemplated, and that the undertaking given by Russia to withdraw her troops still holds good, this Committee urges on the Secretary of State the desirability of making a fuller statement to Parliament than has yet been made as to the effect of the recent conversations with M. Sazonoff and as to the situation in Persia. The Committee also urges on the Government that they should co-operate in the appointment of an independent financial adviser or board of advisers, and should do what they can to reorganise Persian finances and to secure the summoning of a Mejliss as soon as possible.

THE RUSSIAN PRESS AND THE BALKAN CRISIS.

(From Our Own Correspondent.)

Odessa, October 13.

It is difficult to understand the curiously shifty attitude of the *Novoye Vremya*, which claims to be, *par excellence*, the most authoritative mouthpiece of intelligent political opinion in this country. Not very long ago, when discussing questions nearly touching the common interests of the Triple Entente, it showed itself to be more British than the Briton. Now it has made something like a *volte face*, so far as England is concerned. Its jeremiads are for the moment equally directed against Britain and Austria. This change of front was coincident with the Balmoral meeting. A few days ago the *Novoye Vremya* published an article over the signature of A. Stolypin, a brother of the late Premier, violently attacking England and denouncing the tortuous and treacherous methods of British diplomacy. Russia was solemnly warned not to be beguiled into reposing an unquestioning trust in a Power which has never abandoned its traditional *modus* of employing another nation to rake the chestnuts out of the fire for its own consumption. England and Germany were the two great conquerors of the world's markets, and were irreconcilable rivals. The rivalry had now developed into irreconcilable enmity, and an eventual life and death struggle had become inevitable. It was to be borne in mind that with the close of the current year Britain's supremacy of the sea would finally pass to another Power; the Teuton was destined to rule the ocean in Albion's stead. With that coming Armageddon Russia had no concern whatever, and it must, therefore, be the chief aim of this country's diplomacy to steer such an unswervingly straight and neutral course as to avoid the remotest possibility of complication.

The *Novoye Vremya* questions the sincerity of England's professed solicitude as to the view her huge Mohammedan population in India may take of her attitude in the Near Eastern crisis.

The British Foreign Minister places an unbounded confidence in the wisdom and statecraft of Kiamil Pasha, and supports the maintenance of the *status quo* in the Balkan Peninsula; and yet he would appear to desire that the Balkan Coalition declare war against Turkey. As a matter of fact, those who for the last thirty years have most loudly preached peace in the Balkans have at heart desired war. The greatest immediate danger, however, is that Austria may mix herself in the Balkan turmoil. What, in that case, will be England's attitude? Thereupon depends the fate of Europe.

After severely criticising Russia's vacillating diplomacy, the *Novoye Vremya* adds:—

Thanks to the circumstances that our diplomacy did not bestir itself until too late, the Balkan Peninsula is now covered with a million bayonets. It was not to be expected that England and France would move ahead of us. In this acutely critical hour the one vital point upon which we crave to be enlightened is what England's attitude will be in case of Austria's active intervention? Thereupon, we repeat, hangs the fate of Europe.

Discussing the same sinister contingency, the *Golos Moskvi* concludes its observations with the threat:—

Let only Austria dare to send her troops to Belgrade and there will be instantly raised, from one end of Russia to the other, such a wildly indignant popular outcry that we shall be compelled to keep a rendezvous with them in the Servian capital, but Russia's army will proceed thither via Vienna.

The *Retch*, an ultra-nationalist organ, says that without the quadruple coalition the Balkan States would not and could not oppose themselves in arms to Turkey.

Austria appreciated this fact when she recently accused Russia of having initiated the federation; but Count Berchtold forgot or ignored the further fact that the coalition alone made it possible to localise the war to the Balkan Peninsula. For the first time a new political system has been created in the Balkans—a system intended, of course, to replace the control of the Great Powers. The wave of national enthusiasm now sweeping over the whole peninsula is not to be misinterpreted as a passing ebullition. It connotes the future political independence of the federated Balkan States.

The *Russkoye Slovo* falls back upon a historical theory to explain Austria's ulterior designs in the Balkans.

Bismarck solved the rivalry between the German and Austrian Empires and between the Hapsburgs and the Hohenzollerns by finally closing North Germany to the Dual Monarchy. Austria had to turn her back upon Germany and her face towards South-Eastern Slavdom, and beyond the latter she has of late years strained her vision to the Ægean, the Marmora, and the Euxine. She lost one competitor in Germany to find another in Russia. Austria would do well to bear more constantly in mind that this country is the Slav Motherland.

The *Rossia, Sviet, Zemstchina, Znamya*, and *Russkia Viédomosti* all hold the diplomacy of the Great Powers directly responsible for the Balkan tragedy. It did not believe in the vital gravity of the approaching crisis until, as the *Sviet* bluntly puts it, the foreign chancelleries began to smell blood. In its modern history Europe has seldom, if ever, witnessed so flagrant an exposure of culpable diplomatic inertia and blind and blundering tactics as those which have permitted the Balkan imbroglio to reach its present tragic stage.

Carlyle somewhere says that if we only knew with what little wisdom the world is governed we should be amazed. The Balkans to-day furnish us with a striking illustration of the truth of the Scottish philosopher's *obiter dictum*.

CHRISTIAN TOLERANCE IN THE BALKANS

Writing from 65, Portsdown Road, W., to the *Westminster Gazette* (October 7) with reference to the attitude of Roumania in the Balkan troubles, Mr. M. Beza states:—

". . . I am one of these Vlachiotes or Vlachs. And all that we aim at is—having first of all the security of our lives—the freedom of our language, for which we have to struggle hard, not with the Turks, but with the Greeks, who are, as ourselves, *Christians*. I purposely underline the word, as in some quarters still lingers the old religious point of view: the Christians must be right just because they are Christians. As a matter of fact, never have cruelties been more atrocious than those committed by Greeks and Bulgars on each other, and by the former on the Vlachs. And what for? Only because the Vlachs want to use their own language in learning and worship. Hundreds of my countrymen have been murdered, many of them horribly mutilated, by the armed *bands* sent out from Greece. As for the Turks, we find them more human, and at any rate most tolerant. This counts for our friendly attitude towards them. We do not meet with any hindrance, as far as they are concerned, in our peaceful endeavours, in which we have the whole support of Roumania. She sustains our schools; seven years ago she broke off her relations with Greece on our behalf; in the same year she obtained from the Sultan an *iradé* which fully recognises the existence and rights of the Vlachs as a nation in Turkey. Now, after this, can anyone suppose that Roumania will give up all, and leave her kindred race unprotected?

"Without nourishing bitter feelings towards any of the Balkan States, it is well known that Roumania is an eager supporter of peace. And, if the four kingdoms really want—not territorial extensions, but reforms to be introduced in Turkey, I think Roumania cannot ask better; only the reforms must be of such a nature as to put on the same footing all the nations concerned."

IMPROVEMENTS IN PILGRIMAGE CONDITIONS.

We welcome the announcement of the *Times* that the Government of India have initiated a comprehensive inquiry into the possibility of improving the sanitary arrangements at centres where Mohammedan and Hindu pilgrims congregate for worship or for starting their journeys to Mecca, Kerbela, or elsewhere. It is expected that for each province the inquiry will not, save in exceptional cases, exceed a month. The local members will report to the local Government, and at the conclusion of the several inquiries the Imperial Sanitary Commissioner—who alone will serve in all provinces—will draw up a report on the whole subject.

In asking the co-operation of the local Governments the Secretary of the Sanitary Branch of the Education Department pointed out that improved facilities for travel have largely increased the number of pilgrims gathering at each centre and also the distance from which they come. The risk of the importation and exportation of disease from these centres has consequently become greatly intensified, and they form an ever-present menace to the public health. Much has been done by the local Governments to improve the sanitary arrangements at some of the larger fairs, but a comprehensive inquiry is expected to have most useful results, helping in co-ordinating the sanitary arrangements at the different centres and in the reduction of mortality from cholera and other diseases.

The Editor of "The Near East" cordially welcomes letters or short contributions from readers on matters relating to countries coming within the scope of the journal.

The Editor does not hold himself responsible for the return of contributions which he is unable to accept, but, where stamps are enclosed, every endeavour will be made to return rejected contributions without delay.

RAILWAYS IN PALESTINE.

(By a Jerusalem Correspondent.)

In connection with a paragraph which appeared in "Notes and News" of No. 70 of The Near East, I may point out that there is every hope that before long "the visitor to Jerusalem" *will* be able to "dispense with the tempestuous landing at Jaffa." The Turkish Government are pushing forward rapidly the construction of a Jerusalem branch of the Hejaz Railway from Afuleh, in the plain of Esdraelon, one of the stations on the Haifa-Damascus line. The line from Afuleh to Jenin is now nearly complete. It is said that the section from Jenin to Nablûs will be complete by the end of 1913, and that the line will reach Jerusalem by the end of 1914. The site for the railway station at Jerusalem has been selected; it is near the so-called "Stork Tower," at the north-east corner of the walls.

This new line should be an immense benefit to both residents and visitors. For the former in particular it should secure a regular mail, as one can land at Haifa in all but very severe storms, and a proper harbour is in course of construction, whereas at Jaffa a whole succession of mail boats may have to pass and as much as three weeks may sometimes elapse between one mail and another. Another advantage will be that the excellent fish of the Lake of Tiberias can be brought in ice from the lake to the city, where the demand for fish is great. The journey will be, with any reasonable service of trains, not more than twelve hours. For all it will be a great gain to have Jerusalem linked up with the system of lines which now runs to Haifa, Damascus, Beyrout, Homs, Hama, and Aleppo, not to mention El Medina, and which will soon be joined on to the great Baghdad Railway.

The Hejaz Railway.

The Hejaz railway is one of those Turkish enterprises which has done great credit to the Turkish Government, backed up as it has been by Germany; for not only has it been constructed extraordinarily cheaply, soldiers having been employed as labourers throughout, but it has been done with an energy and push which is unlike what we are accustomed to see in the easy-going Oriental. Rumour says that the stimulus whereby this was done was Germany's impressing on the Turks that England — the ever "perfidious Albion!" — had ambitious designs upon Arabia. Happily the energy has not dissipated, and it may be said that, as a whole, the Haifa-Damascus railway is well worked. The first-class accommodation is good—a great improvement upon the French lines in Palestine and Syria—and the officials are polite. Recently the convenience of the public has been met by deciding to adopt European instead of Turkish time for the running of the passenger trains. Both to and from the coast they now start at 6 a.m. A useful little steam launch, built at Stony Stratford, has now been placed upon the Lake of Galilee. It meets the morning train to Damascus at Es Seneakh (at the south end of the lake), takes the passengers to Tiberias and to Tabigha, at the north end of the lake, and returns in the early afternoon to meet the afternoon train to Haifa. This boat, though far from ideal and too small for thorough efficiency, is a great improvement upon the two still smaller steamboats which plied the lake before, each of which successively sank off Tiberias. It is possible now to book from Tabigha or Tiberias all the way to Haifa or Damascus—soon, let us hope, also to Jerusalem.

Jaffa and Haifa.

The effect of the opening of a branch of the Hejaz railway upon the trade of Jaffa is likely in time to be serious, and it will probably deal a death-blow to the schemes which have from time to time been put forward for making a harbour at Jaffa. Jaffa may have been an excellent harbour in the days of Solomon, but for modern ships it has absolutely no natural advantages, and it is impossible that it could be a financial success to spend many thousands on making a harbour against so many natural drawbacks, when at Haifa, not four hours north by steamer, nature has already prepared the way for what, with a reasonable amount of labour, should become an excellent harbour.

A TURKISH POINT OF VIEW.

By RAHNUMA.

Exactly a year ago it fell to the lot of the writer to be sitting in a modest little room looking out upon the shores of the Ægean and discussing with a Turk this very problem that is now before us—a war between Turkey and the allied Balkan States. The room was the central office of the then all-powerful Committee of Union and Progress, and my companion was perhaps the most influential, and certainly one of the most interesting and attractive of all the Young Turk leaders.

"It will surely come one day," said he, "and I, for one, shall be glad. We can never really settle down to progress and reform until all these little neighbouring States have been thoroughly beaten, taught their inherent inferiority, and how to keep their places. That we can only do by war."

"But are you certain of success?" I ventured to suggest. "Are you really sure you would win? Individually these little States may not be very strong, but collectively—you know the fable of the old man and the sticks?"

"I feel quite confident of success," he said. "Our General Staff have long foreseen the possibility of this combination. It forms the basis of our new army reorganisation scheme. Our Intelligence system is perfect, and we can calculate to a nicety the forces which would be arrayed against us. For Bulgaria we allow 250,000, for Servia 120,000, and for Greece 80,000. If Greece takes Crete another 40,000 must be added to the Grecian army, which is the principal reason why we can never agree to let Crete go. The Montenegrins we do not count at all; our Albanian tribesmen can well look after them. The present maximum total is, then, 450,000 fighting men, and accordingly we aim at being able rapidly to mobilise 500,000 men in European Turkey as our first line, backed by a second line of 300,000, who, in the event of trouble, would be rapidly brought across to Europe from our provinces in Asia Minor. That gives us a total of 800,000, and, by a yearly increase of 100,000, the intention is shortly to reach 1,000,000. Eight hundred thousand minimum against 450,000! How can we fail to win?"

"Numerical superiority, it seems, then, you would certainly enjoy," said I; "but how about the training of these 800,000 men? Bulgaria I believe to be highly efficient, and the other Balkan States are reported to be making progress."

"The Turk is a soldier born," said he, "and does not require to be trained. He requires only to be armed, and of first-class weapons we have far more than enough."

Allah, no doubt, is gracious to the Faithful, thought the writer to himself, and changed the conversation. So much for the boundless self-confidence of the Turk: his obstinate refusal to face facts.

Numerical superiority in war is certainly of great importance, but always on one condition—that means are available to apply and maintain that superiority at the decisive point. Have the Turks those means? But first we must decide where is that decisive point.

The point is almost certain to be the area in which Bulgaria decides to fight her biggest battles. The big battles may not end the war, but they will probably decide it. Where is that area? No one yet knows: but probably in Eastern Macedonia, if not in Thrace. Numerical superiority means vast numbers of troops: for the Bulgarian army alone is more than twice as big as Lord Haldane's "expeditionary force." How do you move vast numbers of troops to any given point, and, having moved them there, how do you manœuvre and feed them? It is on railways that modern armies are forced to rely, or, failing railways, they may rely upon the sea. Both railways and sea must be amply protected and safe. Where are the railways in Turkey, and which of them are safe? And who will command the sea?

If the Young Turk leader could have reassured the writer on these and many similar points the latter would no doubt have fully shared his confidence.

ANGLO-TURKISH RELATIONS.

Interview with Halil Halid Bey.

Some fourteen months ago, it will be remembered, Halil Halid Bey granted a representative of THE NEAR EAST an interview which was published (under the title of "Young Turkey and the English Press") in our issue of August 23, 1911. Shortly afterwards he returned to Turkey in order to take an active part in the affairs of his own country, and in the last Chamber of Deputies he represented his native city, Angora. He is now in this country on a visit, and a few days ago he kindly consented to give his views upon the present state of affairs in Turkey to a NEAR EAST representative.

The first question put to him was one concerning the work accomplished by the C.U.P., and it was pointed out to him that many people considered that the party had failed utterly to justify the high hopes raised by its accession to power. He was aware—only too well aware, he said—of that view, but he was far from sharing it. The Young Turks could hardly be said to have had a fair chance to carry out their programme; and those who were best acquainted with the facts of the case would best appreciate the truth of this statement. Yet they had, in fact, accomplished much. For one thing, they had established freedom in the land, as his own case showed. Prior to the establishment of the Constitution he could not safely visit his own country, and many others were in similar plight. Now they could return in absolute safety. Then, too, they had made marked progress in the way of improving education. They had opened over 300 new schools. Socially, the progress of the country had been great; the position of Turkish women had been vastly improved, in spite of ill-timed manifestations by those who desired to run before they had learned to walk. And, to take one other sphere, many public works of great importance had been undertaken, and others, even more important, had been under consideration. Roads, railways, and harbour works bore testimony to the spirit of progress in Young Turkey; and in this direction much more would have been accomplished but for the opposition of interested Powers. There was, for example, the great scheme for a network of railways in the north-east part of Asia Minor, which was delayed solely by Russia.

As to the relations existing between the Party of Union and Progress and the present Cabinet, he would prefer to say very little at present. This was not the time to speak of party differences, but rather of national unity. It was said in some quarters that the C.U.P. would endeavour to take advantage of the Cabinet's difficulties for its own advancement. That was quite false, and he would give a categorical denial to all such reports. Then, drawing a letter from his pocket, Halil Bey said: "I have here a letter which I have just received from Prince Said Halim, the leader of the Union and Progress Party, in which he writes, 'With one heart and with one tongue everyone is praying for the unity of the nation. All parties are united!' That, surely, shows the baselessness of such statements as those to which I have referred."

"Is it correct to say that Turkey is better disposed towards Germany than she is towards England, and especially that several leading members of the C.U.P. are pro-German?" Halil Bey was asked.

"No; certainly not. Such a statement would be quite false. But if it were true, it would be the fault of this country. Germany is *not* in high favour in Turkey. But Germany follows a settled policy, and she does not interfere with Turkey. She does not annoy Turkey or irritate her. In a word, Germany owes such popularity as is hers to-day in Turkey to the fact that, up to the present, she has done Turkey no wrong; so that her popularity may be said to rest on a negative, rather than a positive, basis. We do not wish to quarrel with a great intellectual Power like Germany. But neither do we wish to quarrel with England. Far from it. It would, in fact, be impossible to find an Anglophobe in all Turkey to-day. Yet because we wish to be friendly with England, why should we be expected to quarrel with Germany? Some Englishmen appear to be angry because Germany has to a large extent captured the very important Turkish markets for her trade and commerce. But does not Germany also capture British and British colonial markets? That is due, I think, to the steadfast way she works and, more particularly, to her readiness to meet local requirements and adapt her goods and her terms to the Turkish markets. At the same time, I must point out that since the Constitution, business between Turkey and Great Britain has increased considerably; and, as readers of THE NEAR EAST must be well aware, British firms have now in hand some very important contracts for harbour and irrigation works and shipbuilding."

"It is most unfortunate," Halil Bey continued, "that a very influential portion of the British Press is not friendly—is, indeed, distinctly unfriendly to Turkey. This, I believe, is due to ignorance of the true facts and to misrepresentation by interested parties. But I must admit that Turkey is not well served in Europe either by her diplomatic representatives or in the way of disseminating accurate information about what goes on within her borders. For example, the troubles in Albania and Macedonia are frequently spoken of—and written of—here as if they were due to the same, or very similar, causes. As a matter of fact the recent troubles in Albania may be said, in a word, to have been due to election questions and electioneering manœuvres. Those in Macedonia, on the other hand, are undoubtedly due chiefly to provocation by interested Powers. Were there no 'bands' and bombs, supplied by outside parties with their own axes to grind, no *agents provocateurs*, there would be no trouble at all to-day. To many Englishmen that will sound a far-fetched statement, no doubt; but it is literally true. And it is Turkey's misfortune that she cannot drive the truth home into the minds of the British public because she has no organised Press bureau to do the work—no agents capable of gaining publicity for the simple truth in the ready way that the agents of the other interested parties seem to find it so easy to obtain a hearing for *their* version of the case.

"Finally, I cannot help reverting to a subject on which I have already spoken recently to the representative of another London paper—the harm, the great harm, that is done to Anglo-Turkish relations by that irresponsible body that styles itself 'The Balkan Committee.' You must understand that whenever the Balkan Committee renews its agitation people in Turkey—misled by the air of officialdom with which it has contrived to invest itself—believe that it is inspired to do so from Government quarters. The Turks say that the Committee 'smells trouble.' It is undoubtedly true that it *makes* trouble. And that is deplorable. Of the 'chivalry' of those who, having seen Turkey struggling against such odds as she has been struggling against ever since she threw off the Hamidian yoke, who see her now faced by a combination of four States, while still suffering from the unjustifiable attack made upon her by one of the 'great civilised Powers' of Europe, and think the moment propitious to endeavour to stir up feeling against her amongst their own countrymen, I find it hard to speak. Fortunately there is a small body of better-informed opinion in England and in Europe. May our friends rally to us and maintain the old British tradition of seeing 'fair play.' That is all we ask for the moment. For the rest, we must face our difficulties as best we can. And I am sure you will see that, whatever comes, we shall face them bravely."

WAR IMPRESSIONS.

(From an Occasional Correspondent.)

I am writing from Sirkedji siding, the railway terminus on the Golden Horn, whence, via the Oriental and Salonika Junction lines—now closed to all but military traffic—troops are being hurried off by night and day for the Adrianople and Uskub bases.

I am watching the greatest confusion since the time of Babel—men, horses, packages, forage, all being crowded pell-mell into the narrow yard, and brought thither by every conceivable form of vehicle, from ox wagons of the Turkish type to up-to-date military motor lorries.

The Turk in time of war is above material things, and in the matter of ways and means of transport the Seraskierate is somewhat behind the times. Slipshod and clumsy, rough and ready, the Turkish soldier is decidedly below the standard of European military etiquette; but what impressed me was the care that the individual private takes of his brand-new Mauser, handling it as a child would fondle a toy, and wrapping up its lock with strips of waterproof sheeting—and, after all, it is the rifle which will decide—not the clothes.

I am reviewing perhaps the most heterogeneous force that the world ever put into the field. Swarthy Carouchiuzi cavalry, tall men, looking archaic under their grey-blue head-dresses, jostle the fair-haired, blue-eyed Circassian, the stolid Anatolian, and fierce Arnaout. There are men who have fought under the broiling sun of Tripoli and the snows of Kars, war-scarred veterans of the Ghazi Mukhtar type, but they are few and far between; Turco-Arabs from Egypt, Ottomans from Coele-Syria, Karamanians from the Taurus, Arabs from the far Nejd—most of them beardless youths—all united under the banner of the Crescent, the symbol of Islam.

***

From a military point of view, the coming fight will be fought over the area of three irregular triangles formed by the natural barriers of the Rhodope and Pindus—as a glance at the map will show. In all probability the Bulgarian point of contact will be the apex to the northward of Adrianople—the base of General Abdullah Pasha's army corps—where Turks and Bulgarians will fight like the cats of Kilkenny. Servia's move will be on to the Plain of Kossovo. Montenegro is firing from her mountain fastnesses, leaving Greece with an army of observation on the Thessaly side ready for a march and combined sea and land attack on Salonika. The Allies have no doubt the advantage of high ground to favour their descent, and, especially in the case of Bulgaria, with her fine army of 235,000 men. Their military organisation has much improved of late; but they have to fight the Osmanli on his own ground, and, deficient though he may be in point of mobilisation, it must not be forgotten that there are 750,000 men of all arms distributed by now throughout the three vilayets, backed up by artillery second to none.

***

Montenegro has opened the ball. To those who have been closely observing the trend of events in the Near East since the Constitutional Reform, this last move, which has precipitated the Balkan crisis, is quite clear. Its strategical design is to draw up into one corner of the field a considerable body of the grand army which is being steadily poured into Roumelia, and to create a diversion in favour of a joint flank attack on the part of Bulgaria and Servia.

The issue is "on the knees of the gods." But one fact is plain as daylight. Montenegro, with a diminutive army of 50,000 men, has not thrown down the gauntlet of her own free will, nor have the other three Balkan kingdoms planned a general action against the Turk of their own choice. The political weathercock points rather to Russian inspiration and moral encouragement than to Austrian covetousness beyond Transylvania; and the recent Russian mobilisation in the southern provinces of the Empire abutting on the Balkans certainly supports this theory.

LETTERS TO THE EDITOR.

MOSLEMS AND THE WAR.

To the Editor of The Near East.

Sir,—The amazing manifesto of the Balkan Committee, published in Saturday's issue of the *Times*, will produce the worst possible effect on the King's Mussulman subjects. The Committee of the London All-India Moslem League beg, therefore, the favour of your courtesy to allow them to direct the attention of your readers to the incalculable mischief likely to be caused by these open incitements to England to take a hand in the dismemberment of Turkey and in the mutual slaughter of Moslems and Christians. The manifesto, which presents the promise of "peace and goodwill on earth" in a new light, is issued with the deliberate object of influencing British public opinion and rousing English feelings against a friendly Mussulman State by painting in lurid colours its shortcomings, whilst the tremendous difficulties under which it labours are designedly ignored. The malevolent activities of hostile organisations, animated by racial and religious hatred; the machinations of the numerous secret committees in the Balkan States, whose avowed object is to incite the Sultan's Christian subjects to disloyalty, treason, and organised violence; the movements of the revolutionary bands that have been let loose in Macedonia from every direction; the outrages, fiendishly designed and diabolically carried out; the aggressive ambitions of Turkey's neighbours to bring about a dismemberment of Turkey, with a view to their own aggrandisement; and, not least, the persistent instigation given from quarters from which better counsel might be expected to keep alive agitation in distracted European Turkey—difficulties which have produced the calculated result of paralysing the efforts of the Turks to establish peace and order—are not even referred to. Evidently in the Balkan Committee's view the end justifies the means. Whether the flagrant injustice of the manifesto and its ill-concealed appeal to religious and racial passions and antipathies draw, or not, the condemnation of thoughtful and fair-minded Christians, they are certain to rouse the deepest resentment among Moslems.

In this connection it should be borne in mind that 80 to 90 per cent. of the vast millions of Moslems within the British Empire acknowledge the Sultan as their Caliph and religious head; many of them are sure to be deeply touched by his dignified and pathetic address to his own people. The British Empire includes an even larger number of antagonistic races and creeds than Turkey; and I would ask your readers to consider what the consequences would be if such propagandism were adopted by malevolent enemies against England, and what the effect is likely to be of such partisan fulminations on the Eastern World.

We quite anticipate that our appeal to the proverbial sense of justice of English people may be called a "threat" by persons who lose sight of the world-wide responsibilities of England. Such an accusation would be a calumny. At this critical moment we are endeavouring to do, to the best extent of our power, what we believe to be our duty to our Sovereign and the Empire. When we read in newspapers expressions like the following: "Jerusalem has been too long in the hands of the Turks," and find even a Minister of the Crown using dubious phrases, which might be construed to imply partisanship, it becomes incumbent on us to raise a voice of warning. If Englishmen cannot extend their sympathy to a Moslem State which has been the deliberate victim of persistent intrigues and constant attacks, they might at least refrain, in the name of humanity, from offering incitement to a fresh crusade, with all its attendant misery, suffering, and distress.—I am Sir, yours faithfully,

Mirza Kazim Hosain,
Hon. Secretary.

"THE ASS IN THE LION'S SKIN."*

To the Editor of The Near East.

Sir,—I much regret that you could not see your way to insert my letter of September 10 in reply to "Ghara." Presumably it was too lengthy. May I now crave a short space to say that "Ghara" has misconceived and misrepresents the objectives of my articles. They were not intended as a "campaign," but merely to present to the British public the truth about Persian affairs as viewed from my standpoint; events have shown, and will continue to show, that my opinions had at least the virtue of exactitude. It is only natural that they should be distasteful to "Ghara"

* Vide Forbe's Persian Grammar: I make "Ghara" a present of the little story.—B.W.S.

Digitized by Google

and his congeners. They were not dictated by any "City capitalist," but are merely my own plea on behalf of the people and country (for whom and which I confess to a sincere affection, not less even than that of "Ghara" himself or of "The Master"), as against those who were plunging them into irretrievable disaster. My sympathies are, and must be, in hearty accord with the "Persian Constitutional Government" and with the "Nationalists" *as such*. What I and many others deplore and deprecate and vehemently protest against are the pernicious and suicidal methods adopted and resorted to by the perfervid ultra-Nationalists—the protagonists of violence and terrorism, whose actions have rendered nugatory the efforts of the different Parliaments and Cabinets—to the betrayal and undoing of the poor deluded people, who, as events show, would much prefer the pre-Mashroota "slavery" under the "iron hand in the velvet glove" to the "freedom" of the present disordered "mailed fist" kind all the time.

I do not know Samad or Saqat, but I know *of* them, and I *do* know their type. I accept "Ghara's" estimation of Samad, but at the same time I am quite certain of the sources of my information and that my estimation of Saqat is correct. With due deference to "Ghara," I would say that I know the kind of document to which he refers. I have seen many such, and know how they are prepared and the value to be placed on them.

Despite "Ghara's" angry and vulgar counter-attacks, his "preposterous abuse," and "atrocious insinuations," I am entirely unrepentant for the expression of my opinion regarding the unctuous, "upright and pious," venerable ecclesiastic, whose "execution was regarded by the majority with indifference, and whose dead body was reviled and treated with contumely by the populace of Tabreez, who held him chiefly responsible for the disorganisation and sufferings of the last few years." I reiterate that the parallel was iniquitous and degrading and a gross outrage on Christianity, especially when viewed in the light of the occasion, and the motives underlying the occasion, on which the parallel was drawn.—Yours obediently,

B. W. STAINTON.

Horndean, October 12, 1912.

"IT HAPPENED IN SMYRNA."

To the Editor of THE NEAR EAST.

Sir,—In your issue of September 27 there appears an appreciation of a romance recently published under the title of "It Happened in Smyrna." Had the sayings and opinions of the hero, Charles Paynter, remained within the realm of fiction they would have been treated with the contempt they deserve. As, however, you accept them as the personal experiences of the author founded on fact, allow me to make one or two statements, likewise founded on fact, for the enlightenment of the few who may have read the book and taken it seriously.

On his own admission the author's position was an impecunious one when he arrived in Smyrna. He was, nevertheless, received most hospitably by several people, English more especially, whose misfortune it subsequently was to have come into contact with him. Trading upon the kindness so freely extended, he then appealed for pecuniary assistance and met with a ready response. Unlike the Turk, for whom the author professes such deep admiration, he evidently does not consider benefactions received as deserving of recognition, nor the hospitality accorded him as a sacred obligation. A discreet silence on the subject of what "happened in Smyrna" would have been wiser on the part of the author, whose book is so warmly and surprisingly eulogised by THE NEAR EAST. The feeling paramount with all Englishmen here, whether born in the Levant or in England, is one of regret, I may almost add of shame, that foreigners should have occasion to form their opinion of men, British born and British bred, by such a standard.—I am, etc.,

SYDNEY LA FONTAINE.

Bournabat, Smyrna, October 5, 1912.

To the Editor of THE NEAR EAST.

Sir,—Plainly your reviewer of "It Happened in Smyrna" uses the adjective Levantine in qualifying Englishmen in the Near East in a disparaging sense. Now, sir, let me state once for all that Englishmen who happen to have been born in Turkey don't and never have admitted to any inferiority—physically, mentally, or morally, to their compatriots born in the Mother Country; so that, when you allude to Britishers as Levantines, you give offence, and you have no right to do so unless you can show good reason.

The British colony in Smyrna need only point to its record to justify its claim to equality with British-born Englishmen, and I defy you, Mr. Editor, to point to a community of equal numbers that has achieved more. In 1800 the colony consisted of a handful of Englishmen, and has since grown to about 800. In these odd 100 years it has built and endowed three churches, it started horse-racing (the only meeting in Turkey), and established the Races Club, which it has kept going under very discouraging and adverse circumstances. The colony kept up two excellent British schools until it was able to afford to send its sons and daughters to the United Kingdom for their education, when their *raison d'être* disappeared. It runs the British Seamen's Hospital, as well as the Victoria Relief Fund, instituted to help indigent Britishers, and the last but not least of its children is the Chamber of Commerce.

The colony leads in shipping, in commerce, in industrial enterprise, and in the mining industry. It has introduced football, tennis, golf, athletic sports, and yachting to Smyrna, and it claims some of the best exponents of each of these games, and among its members are some of the best shots and most enthusiastic fishermen in the city. Its young men are to be found in Canada, Newfoundland, India, China, Singapore, Uganda, South Africa, Egypt, the United Kingdom, and the Continent, among them being a Colonial Secretary, a Consul, a Vice-Consul, two Indian civilians, an Edinburgh M.D., a lately deceased M.R.C.S., and two officers serving in H.M.'s Indian army. During the Boer war the colony sent a bigger proportion of volunteers to South Africa than did the United Kingdom (*vide* Sir Edwin Pears' memorial to the Foreign Office re denationalisation of the third generation).

The colony only failed in one respect (to please Mr. Edgelow), and that was to produce an adequate number of young men whose sole idea of life is to drink whisky and soda and smoke cigarettes.—Yours, etc.,

R. J. WHITTALL.

Smyrna, October 7, 1912.

THE LONDON MOSLEM LEAGUE AND THE BALKAN COMMITTEE.

At a special meeting of the Committee of the London Moslem League held on Saturday morning with regard to the action and utterances of the Balkan Committee, which in the opinion of the London All-India Moslem League are calculated to exacerbate Mussulman feeling in India and elsewhere, the following resolutions were adopted:—

1. Resolved that the Committee of the London All-India Moslem League, as loyal subjects of the British Crown, in their anxiety to maintain unimpaired the confidence of the Moslem nations in the British sense of justice and love of fair play, and to prevent so far as possible any suspicion among them that Great Britain is in sympathy or complicity with the fresh attempt to strangle Islam in Europe, emphatically protest against the policy and tactics of the Balkan Committee which, besides embarrassing His Majesty's Government in its desire to hold the balance evenly, is certain to encourage and inflame racial and religious bitterness and to leave behind a legacy of hatred that may last for years.

2. That should the Balkan Committee carry out their intention of holding a public meeting it will still further excite and exacerbate Mussulman feeling, and is certain to lead to the holding of counter-meetings.

3. That the Committee of the London All-India Moslem League desire to place on record their unhestitating conviction that the encouragement afforded by irresponsible enthusiasts, which has kept the Balkan Peninsula in a state of ferment, paralysed the endeavours of the Ottoman Government to reconcile races and creeds and establish an equitable system of administration, is largely responsible for the present war with the dreadful prospect of suffering and distress in Eastern Europe and Asia.

4. That in view of the unquestionable loyalty of the Mussulman subjects of His Majesty, whose most cherished feelings are involved in the unimpaired preservation of the dignity, prestige, integrity, and independence of the Ottoman Empire, and in view of the fact that that loyalty is a valuable asset to the British Empire, and the identity of interests between the two principal Mussulman Empires, and also in view of the great, though forgotten, service rendered by Turkey to England at a time of dire peril in India over half a century ago, the Committee of the London All-India Moslem League strongly deprecate the ill-will towards Turkey which characterises the utterances of a section of the British Press, serving no useful purpose, but only adding to the prevailing resentment among Mussulman peoples at what is regarded as the injustice and intolerance of Europe.

CURRENT COMMENTS.

October 5 marked a glorious anniversary in Malta's annals. On that day ninety-nine years ago Sir Thomas Maitland, the first to assume the title of "Governor and Commander-in-Chief in and over the Island of Malta and its Dependencies, in the name and on behalf of his Britannic Majesty" (his predecessors in office having been merely "His Britannic Majesty's Civil Commissioners") issued a proclamation announcing the Prince Regent's "gracious determination henceforth to recognise the people of Malta and Gozo as subjects of the British Crown, and as entitled to its fullest protection," at the same time declaring his intention "to adopt every measure that may be requisite to secure to the inhabitants a full share of that happiness, wealth, security, and prosperity, fortunately enjoyed by all the subjects of the British Empire in every part of the world."

***

According to a Jerusalem correspondent, a wave of pro-British feeling is passing over Palestine, which finds expression in various strange but amusing rumours. It was freely stated that "six English Generals" were arriving in Jerusalem by the afternoon train on October 7, to "take" the city—thus quite outdoing the seven against Thebes—and various expectant spirits turned out to see the arrival. Another rumour is that the English will immediately make the Khedive a king, add Palestine to Egypt, and openly annex both countries. This rests upon the excellent testimony of one who with his own eyes has seen the flag which is to be hoisted at the ceremony of annexation! He describes it as "very big and fine," showing the combined arms of England and Egypt, with "a large gold fringe." This description of the flag, which inevitably reminds one of the late Herbert Campbell's famous song, "All very fine and large," would seem to describe the rumours themselves quite admirably.

***

A consul's life is not always a happy one, if we are to judge by some remarks made by Sir Roper Parkington, Consul-General for Montenegro, in the course of an amusing speech delivered at a meeting of the Sphinx Club this week. The position, in his case, is an honorary one, but stranded Montenegrins nevertheless expect him to pay their fares back to their own country. One of these gentlemen waited for a considerable time outside his house, and remarked at length: "If he does not come, I will shoot every one in the house." In this case Sir Roper says that the passage money was immediately paid over at the urgent request of his wife! But the Consul-General seems nevertheless to entertain a warm affection for the country and the people of Montenegro. He considers them to be a chivalrous people, and their king a man of peace obliged to go to war.

***

An English resident in Constantinople, who has had excellent opportunities of studying the Turkish soldier, writes us as follows on the subject:—"In the last four years of Constitutional regeneration a wonderful change—almost a revolution—has taken place in the Turkish soldier. Once an uncouth and slovenly tatterdemalion, dull of intellect, the abject slave of a notorious system of Government, he has to-day been transformed, as 'twere, by the wand of some Arabian magician, into a fighting unit quite the equal of any European private. The old Prussian blue uniform and soiled top-boots, as well as the age-worn fez of the Hamidian times, have been sold to the old clothes man, whose name is Legion, and your Turkish soldier of to-day steps briskly along in well-fitting khaki and putties, stout and serviceable yellow boots that are daily polished, the whole crowned by a brown kalpak—or, as in the case of the Kurdish troops, with a turban much of a muchness with that worn by our own Bengal cavalry.

***

"But it is not alone in externals that the change is to be noted. The man himself is quite a new being. Education has made great strides in the last four years—in a land where not so long ago the expression *art nouveau* was criminal—and the Turkish soldier has not been slow to realise the benefits of civilisation. So, to-day, he is an ardent disciple of modernism, a mechanic of no mean order, an aeronaut of remarkable audacity, and can drive a motor-lorry as well as any Westerner. For science has already borne good fruit in the Turkish rank and file. I saw the first change in the Turkish soldier in the stirring times of the Sheriat Rebellion, when the Army of Macedon dethroned Abdul Hamid and despotism. Since the Battle of Pera this new spirit has been brought into being, and for all its shortcomings, which are manifest and manifold, I am still confident in the fighting worth of the mighty army which is awaiting the shock of battle on the slopes of the Balkan uplands."

***

Our comments upon the bestowal of a Field-Marshal's bâton upon King Carol of Roumania by the Tsar find an echo in a communication we have received from Russia. Our correspondent writes:—"The Tsar's conferment of the dignity of a Russian Field-Marshalship upon King Carol of Roumania at this acutely critical juncture in the Balkan situation has not unnaturally given rise to much curious comment in this country as well as in certain foreign political circles. That the Imperial act of 'distinguished courtesy' was diplomatically inspired goes without saying. Why, it is not unreasonably asked, was not the well-deserved honour accorded to King Carol some three decades ago, at the close of the Russo-Turkish war? It was the Roumanian troops, admittedly, who saved the Russian arms from an imminent débâcle at Plevna. And for that vital service Roumania was deprived of Bessarabia and 'compensated' with the Dobruja tundras! The monstrously ungrateful act has ever since rankled as bitterly in the hearts of King Carol, and his people as the loss of the Rhine provinces has rankled in the memory of the French.

***

"The more immediately inspiring motive, however, of the supreme military honour conferred upon King Carol is probably to be found in Russia's latent fear as to Roumania's attitude and action in case of a Balkan conflagration. The belief obtains in this country that a military convention between Roumania and Turkey was secretly ratified some three years ago. The *Golos Moskvi* was last week informed by its Bucharest correspondent that the Roumanian Army had been very quietly and unostentatiously mobilised, and that Bulgaria's invasion of Turkish territory would be the signal for the crossing of the Bulgarian frontier by a powerful Roumanian force, thus placing Tsar Ferdinand between the devil and the deep sea, so to speak. That, of course, is an alarmist assumption. Given that a military convention exists between Roumania and Turkey, Roumania will probably maintain a passive attitude so long as Turkey proves herself capable of successfully beating back the united onslaught of the four Balkan States. What she will do in the contrary result remains to be seen."

The report of Coles Pasha, Director-General of Prisons in Egypt, which has just issued, draws attention to the steady increase in the number of inmates of the various prison establishments. In 1911 there were 12,559 prisoners, whilst at the end of 1911 this number had increased to 13,436, the respective daily averages being 12,843 and 12,955. This rise in the criminal statistics has exercised the minds of the authorities for some time past, and the question of accommodation is involved. It was thought that the employment of convicts on public works would contribute somewhat to the settlement of this point, but Coles Pasha draws attention—and very rightly, too—to the risk that is run by entrusting convicts under life sentences to the limited security of a labour camp. The great danger is that these men, if they escape, will form the nucleus of bands of brigands, since they dare not return to their villages.

***

The suggestion that part-time-expiring men might be allowed to remain on parole at the Khargeh Oasis, and thus relieve the congestion in the prisons, is met by the objection that the oasis is within too easy reach of Egypt proper, and the men might escape unless a very complete system of police supervision were instituted. Evidently increased prosperity is responsible for an augmentation of crime, whilst the spread of civilisation and the development of the country set up, of themselves, additional difficulties in the way of accommodating and guarding the convicted criminals. It looks very much as if the Egyptian Government will have to renounce its heroic endeavours to keep expenditure down by adopting novel means of accommodating its black sheep, and will have to make up its mind to erect additional convict prisons. Certainly the risks of the present system, to which Coles Pasha draws attention, are not worth running, no matter how much immediate expenditure that system may save. Most probably it would turn out to be false economy in the long run to persevere with the existing system.

***

The International Quarantine Board at Alexandria has done most wisely in declaring the Mecca pilgrimage affected with cholera. The returning pilgrims have been in the past mainly responsible for the introduction of that scourge into Egypt and Europe; and with war in progress in the Balkans the dangers of a widespread epidemic from infection become very great. Now every pilgrim passing through Suez will have to go into quarantine; and if the Turkish sanitary authorities can control them, all those returning by the Hejaz Railway will have to do likewise. At any rate, the authorities at all the Mediterranean ports have now received warning, and there should be little likelihood of the outbreak of a cholera epidemic.

***

Ibrahim el Masri, son of an Arab sheikh, has, we learn from an Egyptian contemporary, just come to this country in order to enter as a student at Pembroke College, Cambridge. He is, we understand, the first true Bedawi to attend any English university, and it would be interesting to know how the quiet and well-ordered life—for life at the 'varsity is always quiet and well-ordered, is it not?—will strike him. To exchange the *Kefiyeh* and *Abba* for the "mortar board" and college gown, the freedom of the desert for the confinement of the study, argues no small share of courage in Pembroke's new recruit. And, regarding him as a plucky pioneer, we wish him every success.

PERSONAL & SOCIAL.

Prince Yussef Izzeddin, the Turkish Crown Prince, who has been staying for several weeks at Edlach for the cure, has left for Constantinople.

Their Royal Highnesses Prince and Princess John George of Saxony will arrive in Alexandria to-morrow. After a stay of three days there they will proceed to Cairo for the winter.

Sir William Garstin has returned to London from Canada.

Major-General Sir John Maxwell expects to return to 40, Half-moon Street from Egypt at the beginning of November.

Sir Reginald and Lady Oakes have returned to Cairo from Europe.

Lieut.-Colonel E. I. Ward, Army Service Corps, has been selected for service in Egypt.

Lord Edward Cecil was appointed on Tuesday Financial Adviser to the Egyptian Government, in place of Sir Paul Harvey. In our issue of August 16 we announced the imminence of this appointment.

M. Michel G. Holban, Commercial Attaché to the Roumanian Legation, has left London for Paris on his way to Bucharest, and will be absent about a month.

It was expected that the Khedive would remain in Europe until the latter part of this month, when he would go to Constantinople for a week, then on to his Doloman estates, and then to Egypt, where he would arrive about the middle of November. Now, however, in consequence of the outbreak of hostilities in the Balkans these arrangements may possibly be subjected to some slight modification.

H.H. the Khedivah Mother arrived in Alexandria from Constantinople on the 10th inst., and was received and accompanied to Cairo by H.H. Prince Mohammed Ali Pasha.

Sir John Roper Parkington, Consul-General for Montenegro, was one of the principal speakers at a meeting of the Sphinx Club of London, held at the Connaught Rooms this week, under the presidency of Sir William Treloar, Bart.

Lady Roper Parkington makes an appeal on behalf of the families of the Montenegrins now in the field. Tinned foods, woollen clothing, blankets, etc., are especially acceptable. Parcels should be sent, carriage paid, to Lady Roper Parkington, Montenegrin Consulate, 24, Crutched Friars, E.C. Cheques should be crossed "Union of London Bank."

Mme. Grouitch, wife of the Servian Chargé d'Affaires in London, stated in an interview which she granted to a representative of the *Standard* (and which was published on Wednesday) that she was leaving on Thursday for America, to collect money to help the Servian Red Cross Society.

Mr. Hoffmann Philip arrived in Constantinople at the beginning of the month to act as First Secretary of the U.S. Embassy, but the departure of the Ambassador has been indefinitely postponed, says the *Orient*, on account of the outbreak of war.

MILAN.—Bertolini's Hôtel Europe. Entirely renovated. Quiet.

Mr. Arnold White is at present in Egypt on a short visit.

Mr. A. B. Geary, H.M.'s Vice-Consul at Alexandria, left Egypt on the 2nd inst. for a short visit to Constantinople.

Dr. A. R. Neligan left London on Saturday last for the British Legation at Teheran.

Mr. H. Macdonald, Under-Secretary of State in the Department of Public Works, has returned to Cairo from leave.

Lewa Thurneyssen Pasha, Chief Equerry to the Khedive, has returned to Egypt in excellent health after undergoing a successful operation in Paris.

Mr. Douglas Dunlop, Adviser to the Egyptian Ministry of Education, has returned to Cairo off leave.

Mr. Sidney H. Wells, Director-General of Technical Education, returned to Cairo from leave last week, and has resumed his duties.

Captain Hall, traffic manager of the State Railways, arrived in Cairo on October 9, returning from England.

Borton Pasha, Postmaster-General, and El-Lewa Hunter Pasha, Director-General of the Coast Guards Administration, have returned to Egypt from leave by the "Helouan" of the Austrian Lloyd.

Miralai Hayes Sadler Bey, Director of the Sudan Customs, has returned to Egypt from leave, with His Excellency the Sirdar.

We regret to learn that Mr. Boyd Carpenter, of the Egyptian Ministry of Education, has lately been somewhat indisposed. He is leaving for Europe shortly for a holiday.

Mr. F. H. Russell has left London on his return to Cairo.

Mrs. K. P. Birley is leaving Scarborough this week on her return to Ramleh, Alexandria.

It is understood that Prince Karl Max Lichnowsky has been designated to succeed the late Baron Marschall von Bieberstein as German Ambassador in London. Prince Lichnowsky began his career as Attaché in London, and was afterwards Secretary in Constantinople and Bucharest. He held his last diplomatic post as Chancellor of Embassy in Vienna, whence he was recalled to a position in the political division of the Foreign Office.

Our Odessa correspondent writes, under date of the 13th inst.:—"Dr. Collins, Bishop of Gibraltar, has just completed a diocesan tour of the British colonies in the Black Sea ports, coming last from Nicolaieff. His lordship preached to-day in the Anglican Church here. He leaves to-morrow for the Danube. It was his intention to have proceeded hence to Constantinople and Smyrna, but owing to the unsettled state of affairs in those Ottoman centres Dr. Collins has postponed for the present his journey to the Levant.

The engagement is announced of Percy A. Baumgartner, of London, and Joséphine, elder daughter of Chevalier C. Aquilina, of Alexandria.

A marriage has been arranged, and will take place at Tangier, Morocco, on November 20, between Nora Crena, eldest daughter of Kaid Sir Harry Maclean, of Drinmin House, Tangier, and Philip Howard, Lieutenant R.A., elder son of Mr. P. E. Evans, of 10, De Vere Gardens.

A marriage has been arranged, and will take place very quietly early in December, between Reginald Hebert, of the Ministry of Public Works, Cairo, son of Mr. and Mrs. Edward Hebert, of Waveney Hill, and Joan, only daughter of Mr. and Mrs. Henry Nesfield, of Kensington House, Kensington Court, and granddaughter of the late Mr. Charles Hill, of Rockhurst, West Hoathly, Sussex.

A marriage has been arranged and will shortly take place between Mr. A. Aubrey, formerly second master at Victoria College, Alexandria, who is now farming in British East Africa, and Miss D. M. Grant, of East Bergholt, Suffolk, who has been for some years matron at Victoria College.

At Cigoli, Italy, the country seat of Count Martinoni, there took place, on the 9th inst., the civil ceremony of marriage between Cyril L. Barker, youngest son of the late Henry Barker, Esq., of Alexandria, Consul-General for Norway, and Mrs. Barker, and Gabrielle, youngest daughter of Cavaliere Paul Fenderl and Mrs. Fenderl, of Alexandria. The religious ceremony was performed the following day at the Palazzo Martinoni, Brescia, Monsignor Lombardi officiating, assisted by his clergy. The witnesses for the bride were Count Martinoni and Mr. Max Fenderl. Mr. Godfrey H. Barker, brother of the groom, acted as best man. The bride's train was carried by the two sons of Count Maggi. Mr. and Mrs. Cyril Barker left for the Lago di Garda, and are spending the honeymoon on the Riviera.

The death has occurred, at his residence in Cadogan Gardens, of Sir Gerald Fitz-Gerald, formerly Accountant-General of the Navy. In 1877 Sir Gerald accepted temporary service under the Egyptian Government, and was Director-General of Accounts in Egypt and a member of the Financial Committee, being in 1882 attached to the Intelligence Department for the military operations at Alexandria, which obtained for him the medal and bronze star. He was nominated a C.M.G. in 1880, and also received the 3rd Class of the Osmanieh, was given the 2nd Class of the Medjidieh in 1884, and the Grand Cordon in 1885. In the latter year, also, he was created a K.C.M.G.

Among the passengers who left Marseilles October 16 and Naples, October 18, for Alexandria, per Norddeutscher Lloyd s.s. "Prinz Heinrich," were the following:—M. and Mme. Maurice Aghion, M. and Mme. Maurice Cattaui, Mr. and Mrs. S. R. Cookson, Mr. and Mrs. Hanford Crawford, Miss Ruth Crawford, Mrs. Cecil Crawley, Mr. and Mrs. H. V. Hawkins, Conseiller Herzbruch, Mme. Herzbruch, Judge Kraft, Baron and Baronne Jacques E. de Menasce, Rev. J. H. Molesworth, Mr. and Mrs. R. C. Poole, Countess della Salla, Professor and Mme. Schubert, the Rev. and G. A. Sowash, M. Alexandre Sursock, M. Dimitri Sursock, Mr. and Mrs. G. W. Weakley.

Mr. John Kennedy, an American banker, who left a fortune of nearly £14,000,000, has bequeathed £310,000 to Robert College, Constantinople.

DOMESTIC ANNOUNCEMENTS.

The charge for Announcements under this Heading is 3s. for three lines and 1s. per line afterwards. Minimum charge, 3s. All announcements must be authenticated with the name and address of sender.

BIRTHS.

LOYD.—On the 14th October, at 101, Clarence Gate Gardens, N.W., the wife of A. T. Loyd (Egyptian Civil Service), of a daughter.

MOLESWORTH.—On October 15th, at 5, Knaresborough Place, Cromwell Road, S.W., the wife of the Rev. J. Hilton Molesworth, British Chaplain in Cairo—a daughter.

FRIDAY, OCTOBER 18, 1912.

PEACE AND WAR.

At last the rupture between Turkey and the Balkan States is complete. The mobilisation of the allied armies had been sufficiently far advanced to make it unnecessary to hide any longer by a diplomatic fiction the fact that relations between the Porte and the three Governments had been strained to breaking point. Under the guiding hand of Bulgaria the allies have made the most of their cards, if war was really their fixed resolve. By Fabian tactics Turkey has been goaded to the last stage of exasperation, and every opportunity for a false step has been put in her way. When silence could no longer be maintained an Identic Note was presented to the Porte, and care was taken that its terms should carry with them greater sting than an ordinary ultimatum. Throughout this period no fault could be found with the Turkish attitude, which has been at once dignified and consistent. On receiving the allies' Note the Porte turned at bay, and, deeming that the time had passed for answering Notes, recalled its representatives from Sofia, Belgrade, and Athens. The guns stand trained, but before the first shot is fired the onlooker can hardly refrain from reflecting whether the allied Governments, as distinct from the peoples, were really as keen on war as they were devoted to the cause of reform in Macedonia. It is a question that they will have occasion to answer before long. Very wisely the Turks have freed themselves from the additional embarrassment of the war with Italy. The preliminary agreement for peace was signed on October 15 at Ouchy, and the formal treaty is expected to be ratified before the end of the week. This turn of events can hardly be a source of gratification to the allies, who are now confronted with a formidable opponent able to give his undivided attention to a conflict that is not altogether unwelcome. The peace may also have accounted for the further delay in the formal declaration of war. In our reluctance to believe that war was inevitable from the outset, we have looked beyond the deep-seated antipathy of the Balkan peoples to the Turks, and have placed our confidence in the sound judgment and common sense of the Bulgarian Government. But when mobilisation is decreed, a stage may easily be reached at which military exigencies have to override political caution. It is possible that this has been the experience of the Balkan States, for it is evident from the tenour of the allies' reply to the Powers' representations that caution has been thrown to the winds.

For the moment the Balkans have expressed their determination to rid themselves of the leading strings of the Powers. It may be that the old-fashioned steam-roller of Europe has lost some of its terrors for these vigorous young States, that their diplomatic experience teaches them that, however much the Powers may threaten, they lack the machinery to make good their word. If this be the case, it is well that the theory should be put to the test as soon as possible, that both the Powers and the Balkan States may know where they stand. To the latter it has been made clear that, whatever the issue of the war, no change in the territorial *status quo* will be allowed. The charge is explicit, but we must await events to know whether it is to mean nothing or precisely what it says. In more directions than one the Allies may find that their quarrel is not a simple one with Turkey alone, but that it is inextricably bound up with international obligations. Already the Greeks would appear to have discovered this drawback to a contest with Turkey. On Tuesday M. Venizelos was understood, both in the Chamber and in Crete, to have roundly announced the annexation of Crete to Greece. The Cretan deputies were admitted into the Assembly, and the Premier stated that the Greek Government accepted the Cretan Assembly's resolution in favour of union with Greece, and formally declared that in future there would be one single Chamber for Greece and Crete together. M. Venizelos invited the Cretan deputies to return to Crete, and to hold fresh elections in conformity with the Greek Constitution. Within twenty-four hours the Greek Government was able to appreciate its mistake, and was obliged to inform the Cretans that "it had been deemed necessary to restrict itself to a new transitory arrangement of the Cretan question by which the international *status quo* of the island would be maintained." For the rest, added the Greek Government, the island would be governed virtually by Greece, and the delegates of Crete would have the right to take part in the sittings of the Greek Chamber. When it is remembered that at the time of M. Venizelos' pronouncement in the Chamber on the previous day war between Turkey and Greece had neither broken out nor been declared, it will be seen that Montenegro is not the only one among the allied States to be carried away by the excitement of the moment.

While there may be some excuse for the protagonists in the Near Eastern crisis losing sight of the essentials of the present situation, there can be none for those whose interests in the struggle are not the life and death interests of Greece and the Balkan States. So long as war was not actually declared it was permissible to urge every possible consideration upon the opposing parties in the cause of peace. When Turkey and the allies are at war every right-minded person will hold his peace on the merits of the dispute, and will refrain from taking sides or from any action calculated to embitter one or other of the belligerents. In a conflict of this nature susceptibilities will be quickened. Moreover, the struggle will be fierce enough, if fought out merely in the normal temperament of the belligerents; ruthlessness will become intensified, if to it be added a sense of injustice suffered at the hands of those who should be impartial onlookers. To the people of Great Britain it ought not to be necessary to emphasise our obligations of honourable neutrality. While on the one hand personal predilections may incline us to side with the Christian States, on the other hand we have to recognise that millions of our fellow-subjects would for the same reason be ranged on the Moslem side, and for this reason alone a true Briton, as he is not called upon to interfere, would gladly stand aloof. Nor must it be taken for granted that in the horrors of a Balkan war the excesses will be all on one side. Where the main forces of the belligerents confront one another, the canons of legitimate warfare will be observed; in the guerilla operations that may well play a prominent part in the struggle other methods are likely to be adopted, as much by the Balkan peoples as by the Turks. If they should be, the latter will remain inarticulate, and we should like to believe that the former, too, will hesitate to cry out. We have stigmatised the resort to war as unwise and unprofitable, and we have admitted the provocation under which the Balkan States have suffered and the mistakes for which no Turkish Government can escape all responsibility. But when the gauntlet has been thrown down the time for blame is passed, and all efforts should be concentrated on the speedy conclusion of hostilities.

THE PRESS ON THE NEAR EAST

The Peace and the War.

The *Morning Post* of Wednesday says in a leader:—

In Constantinople the Note of the Balkan League is considered to be a piece of colossal impudence. Had this Note never been presented it is possible that the Turks might have submitted to the placing of their case before a European conference, although the reply of the Porte to the recent representations of the Powers hardly encourages such a supposition. As it is, however, the Turkish Government is almost certain to shape its attitude in accordance with the feeling of its people, and to decide that the heritage won by force of arms must be defended by the same means.. . . . In the meantime, it is reassuring to learn that peace has at last been concluded between Turkey and Italy. . . . Obviously, if Italy had been forced to continue the war she would have felt impelled to act with greater freedom than she had hitherto allowed herself, and an Italian attack, either in Asia Minor or in the Balkan Peninsula, might have been attended with serious results. It would certainly have tried very severely the patience of certain other Powers, who, as it is, have no desire to intervene in the struggle. In fact, the most hopeful feature of the present situation is the strong sense of responsibility which is displayed by the Governments most deeply concerned in the crisis.

Under the title "The Delay in the Balkans," the *Daily Graphic* of Thursday says:—

The irrepressible passions of the Balkans seem to take an unconscionable time to blaze forth. Whatever the reason for their delay, however, there is no ground for thinking that it implies any essential modification of the situation. The Confederates have said their last word and Turkey has said hers. If, then, the combatants are not already at grips, it can only be because their military dispositions are not yet all they wish them to be. . . . Meanwhile the signature of the peace preliminaries between Turkey and Italy may in some measure account for the thoughtfulness of the Allies. Were Bulgaria and Servia alone it would, of course, make very little difference, but there is Greece to be considered, and in her case the new fact has a very considerable significance, inasmuch as it must seriously diminish her freedom of action on the seas. Given a concerted plan of action on the part of the Allies, it will be seen that the elimination of the Italian factor must render certain changes necessary. From the beginning Greece has been the weak spot in the Confederacy, and now that she finds her fighting chances very considerably diminished, it is not difficult to see that the whole military situation may require to be reconsidered.

A Friendly Role for France.

The *Temps* (October 12) protesting against the allegation of the *Matin*, that Britain was to blame for the outbreak of war, indicates a useful and friendly *rôle* for France:—

En présence de cette situation, la France a un rôle à jouer, qui est de rapprocher, dans la mesure de ses forces, les points de vue divergents. Il est indiscutable que le gouvernement britannique est, dans les circonstances actuelles, en deçà de ses traditions. Mais comme disait le prince de Bülow, la politique ne se fait pas d'après d'invariables principes. La Grande-Bretagne agit selon la conception momentanée qu'elle a de ses intérêts. La politique et le commerce britanniques, en Turquie, en Chine, au Congo et ailleurs, jouent souvent de l'humanité avec un zèle un peu indiscret et trop bien rémunéré. Mais quoi? Chaque peuple a ses habitudes et ses défauts, qui méritent une tolérance réciproque. La Russie trouve l'Angleterre trop tiède. La France peut s'interposer entre elles; rappelor à la Russie qu'il est de l'intérêt de la Triple-Entente que la Grande Bretagne retrouve à Constantinople son influence d'autrefois; à l'Angleterre que dans l'intérêt même de la Turquie il vaut mieux agir énergiquement sur elle en vue des réformes que l'exposer à tous les risques d'une guerre. Au-dessus des divergences de détail doit s'élever l'idée de l'entente. Il nous appartient de l'interpréter.

The French Attitude.

From the *Matin* (October 15) we quote a view of the conduct to be observed by the French Government and people, which should recommend itself to others also:—

Tous les efforts des gouvernements des grandes puissances s'exercent activement dans ce sens. Mais ces gouvernements pourront-ils résister au courant de l'opinion publique de leur pays? Pourront-ils toujours rester maitres chez eux du sentiment national?

Quand on constate la défiance profonde qui se manifeste déjà aujourd'hui entre la presse et l'opinion publique autrichiennes d'autre part on n'a pas le droit de dire que le conflit dans des Balkans ne nous regarde pas.

La France, qui a su, en présence de dangers plus grands et plus directs, garder son sang-froid et son calme, saura, nous en avons la certitude, suivre, avec un intérêt passionné, mais avec un calme digne, les événements historiques qui se dérouleront devant elle.

The *Eclair* of Paris (October 12) evidently does not feel called upon to adopt an impartial attitude towards the combatants in the Balkans:

Nous souhaitons la victoire aux peuples généreux qui se sont unis avec l'espoir de chasser, à eux seuls, les Turcs d'Europe: mais victorieux ou vaincus, ils ne travaillent pas pour eux. Si les chances tournaient contre leur rêve, s'ils expiaient par de sévères épreuves un emballement si périlleux, quelle ne serait pas leur déception et celle de leurs protecteurs lointains, de leurs conseillers trop ardents, le jour où ils verraient l'Autriche-Hongrie bénéficiant seule de tant d efforts et de sang versé?

Our Paris contemporary is in a quandary; it wishes success to the Allies, but apprehends that such success would ultimately benefit only Austria.

Balkan Self-Reliance.

A leading article in the *Times* (October 17) points out a vital distinction between the present conflagration in the Balkans and those which have previously occurred:—

The Balkan peoples have taken their fate in their own hands. They seek no liberators from elsewhere, and ask no help in the settlement of their differences. When the Balkans have flamed with war before it has generally been through the direct intervention of other nations. The vital difference of the present conflict is that, for the first time for centuries, all the peoples concerned think themselves strong enough to decide their own future by the sword. We have yet to see the degree to which their confidence is justified. The calm preparedness of the Turks is equalled by the resolute determination of the Bulgarians and their allies. The day is at hand when the fighting qualities of both sides will be put to the severest tests. The issue will probably depend less upon strategy than upon staying power.

Europe's Present Duty.

The Paris *Journal* (October 15) has some useful advice to offer Europe in the present circumstances:—

L'Europe a maintenant quelque chose de mieux à faire que d'étaler son imprévoyance et sa faiblesse. Elle doit d'abord s'employer à limiter le conflit. Pour le moment, toutes les puissances paraissent décidées à assister impassibles aux premières scènes du drame. On s'est ému à tort d'une conférence ministérielle qui a réuni, hier après-midi, au quai d'Orsay, les ministres de la guerre, de la marine, des finances, les chefs d'état-major généraux de l'armée et de la marine, le directeur de la comptabilité au ministère des finances. Il serait, certes, exagéré de prétendre que cette réunion soit sans rapport avec la crise balkanique. Mais elle ne sort pas de la limite stricte des mesures de précaution les plus élémentaires qu'un gouvernement a le devoir de prendre en face d'un conflit extérieur. Aucune puissance ne songe à intervenir maintenant. Les difficultés ne se présenteront qu'à l'heure de la liquidation, et elles peuvent être évitées si on prépare la solution en temps utile.

L'Union fait la force.

The *Levant Herald* (October 4), commenting on the manifesto of the C.U.P., in which the committee announce their intention of supporting the Government in the event of war in the Balkans, states:—

Encore une fois, nous nous réjouissons d'un événement devenu indispensable surtout depuis un an et que nous n'avons cessé de conseiller. L'union entre tous les Ottomans était nécessaire même pour l'œuvre de réorganisation de l'empire, c'est à dire même si la paix n'avait pas été troublée; depuis que l'état de guerre existe elle était devenue d'une néces-ité ineluctable. Nous aurions voulu que l'Union et Progrès annocât sa belle résolution en deux lignes; c'est à dire plus simplement et sans phrases; mais nous nous garderons de critiquer la longueur d'un document résumé dans ce beau cri enthousiaste: Tout pour la patrie!

The Berlin-Vienna "Duet."

Die Information, of Vienna (October 11), complains with some bitterness of the indifference at present shown by Germany towards Austrian interests. We quote the following extract:—

Depuis quand l'Allemagne garde-t-elle cette tranquillité? Depuis quand l'empereur d'Allemagne est devenu le souverain le plus taciturne d'Europe? Qu'arrive-t-il dans cet empire qui nous donnait l'assurance de sa fraternité et de son amitié éternelle? Nous nous rappellons fort bien d'une époque, pas trop éloignée—où on parlait de "fidélité nibelungienne," d'un temps où le chancelier allemand montrait autant de tempérament fougeux que son empereur, qui lançait des discours aux quatre régions du Ciel, un temps où les rêveurs politiques chez nous étaient bien plus satisfaits de ces saillies, que les hommes politiques positifs. Les premiers regretteront certainement de voir changer subitement la scène internationale et cette perte sera douloureusement sentie chez nous—il manquera à ces messieurs une des plus belles attractions du théâtre d'Europe—le duo touchant des sœurs siamoises Berlin—Vienne!

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

Friends of both Turkey and Italy will welcome the news of the conclusion of peace between these countries. British trade, which was considerably hampered by this war, will probably suffer less from the effects of that which is beginning in the Balkans. Undoubtedly the chief sufferer will be Austria, in whose hands lies the bulk of the trade of Servia, Bulgaria, and Roumania.

***

In a recent note I referred to rumours current in Jerusalem with reference to plans for a railway to unite the Holy City with Cairo, and stated my belief that it would be some time before visitors to Jerusalem would be able to dispense with the often tempestuous landing at Jaffa. An esteemed correspondent, who is a high authority on all that appertains to Palestine, now writes pointing out that there is every probability of visitors being able, at a comparatively early date, to reach Jerusalem by way of Haifa and the new line which it is proposed to construct via Elfouleh (a station on the Haifa-Damascus railway). This fact had not escaped my memory; what I wished to express was my belief that many a long year would pass before visitors to Jerusalem could avoid a rough landing at Jaffa by taking rail from Cairo.

***

The interesting communication provoked by my note will be found on another page, and I would recommend its careful perusal to my readers. At the same time, I profit by this occasion to say that nothing is more agreeable to me than to receive such letters from readers—be they never so critical.

***

In the forthcoming consular report on the trade of the Smyrna district for the year 1911-12 readers will observe with pleasure the statement that the English language is every year becoming more popular in the Levant. French still holds its pre-eminent position, but English is becoming more and more indispensable. The daily increasing direct communication with the American continent, the continued emigration of native youths, the growing number of British and American businesses in the country, and the activity displayed by the British and American educational institutions established at Smyrna are responsible for the genuine popular demand in this respect.

***

In Egypt, too, English is gradually ousting French, a larger proportion of the pupils in the Government schools opting for the former than for the latter as their European language. The coming generation in Egypt will therefore be English-speaking, in contrast with their fathers, who have generally preferred French. But the Egyptian citizen is, as a rule, the most versatile of linguists, and, although he may become more proficient in English, he is unlikely to abandon French—the main medium of such culture as the Levant possesses.

***

Some time ago I mentioned that the Egyptian Government had despatched their official entomologist to India, in order to discover, if possible, a natural enemy of the cotton-worm. I am glad to hear from a Cairo correspondent that the Government's scientific adviser has now returned to Egypt, bringing with him a parasite which it is hoped will serve to exterminate, or at any rate keep in check, the ravager of the cotton plant. The results of the introduction and culture of this new ally of the fellah will be awaited with eager interest.

***

Last Friday a curious theft took place in Paris. Important documents connected with the liquidation of the Bank of Egypt were being conveyed from Alexandria to London by a representative of a firm of accountants employed on the investigation of the bank's affairs. This agent arrived in Paris on Friday morning, and on his way to the Gare du Nord stopped at a hairdresser's shop. When he came out his taxi-cab had disappeared with his luggage and papers. The driver, who was subsequently found and interrogated, stated that while waiting outside the shop a man, whom he took to be his original customer, entered the cab and ordered him to drive to the Gare du Nord. On Saturday a large packet containing the missing papers was found behind the street door of a house in the Rue Laffitte with a note attached to the effect that the thief had made a mistake. The agent's private baggage, however, is still missing. I agree with a financial contemporary that the whole circumstances surrounding this incident are worthy of the closest investigation.

***

On another page will be found an extract from a very instructive and interesting report on the commerce and industries of Syria by U.S. Consul-General Hollis, of Beyrout. It will be seen that my repeated advice with regard to the growing importance of the demand for oil engines is confirmed, and I seize this opportunity of again urging that British engineering firms make every effort to obtain and retain a commanding position on this market in the Near and Middle East.

***

It may be taken almost as an axiom that with dwindling trade goes loss of political influence. I would therefore direct special attention to the observations (page 709) of our own correspondent in Baghdad, with reference to the serious loss of prestige suffered by England in Southern Persia. Irresolute policy—or, perhaps more correctly, lack of all policy—is fast undermining the influence, political as well as commercial, which we once possessed in Persia. It is high time that commercial interests in this country made their voice heard in more emphatic tones by the Foreign Office, insisting on immediate restoration of order on the southern roads and on active steps being taken towards the construction of the Mohammerah-Khoremmabad railway.

***

A culture that might well be taken up in many parts of the Near East is that of pistachio nuts. In Syria and Persia large quantities of this nut are produced, but the greater portion is consumed locally. It appears that the demand in Europe and the United States is steadily increasing, and that crops on the present scale will no longer suffice to meet requirements. The pistachio tree (*Pistacia vera*), which demands a dry climate for most favourable growth, attains the size of an ordinary olive tree, and commences to bear fruit after eight years. The imports to the United States for 1911 are stated in a recent American Consular report to amount to $115,745.

***

I have frequently referred in these columns to gun-running in the Persian Gulf and the Red Sea, and my readers will doubtless be interested to read the following extract from a recent issue of the New York *Morning Sun* on this subject:—"A big deal in discarded breech-loading rifles has just been completed with Austria by an unnamed American. The rifles are of the Werder type and number 206,000. The American purchased them at 20 cents apiece, and immediately resold them to a French firm at 40 cents. The guns were then transhipped to Liège, Belgium, where slight alterations are to be effected. Then they will be sent to Jibuti, and thence to Abyssinia. Their ultimate destination has not been disclosed, but the significance of the deal rests in the growing warlike activity of tribes in remote parts of the Sudan, where early this year two expeditions had stiff work with natives who were armed with modern rifles and showed considerable military training. Where these rifles were obtained has been a mystery on which the present purchase seems to throw some light."

***

A recent visit to the Imperial Institute revealed the fact that the Cyprus stall of exhibits is far from representative. The Institute authorities are anxious that all portions of the British Empire and its dependencies should avail themselves of the facilities which the Institute offers of making known their respective products and of presenting specimens for the inspection of the public, and it is a matter greatly to be desired that before long a more complete and attractive collection of Cyprus exhibits will be displayed in the court reserved to it in this permanent and central exhibition of Imperial products. *Verb. sap.*

***

Apropos of the remarks of our Salonika correspondent on another page, I have received a further communication from him, in which he contrasts the methods of the Austrian and British postal organisations, especially with reference to tranmission of matter as *échantillons sans valeur*. He states that it is possible to get, through the medium of the Austrian post, "anything from a reel of cotton to a Krupp gun as an *échantillon sans valeur*, so saving duty and all the worry of the Turkish Customs formalities. We, unfortunately, have no such facilities, as our grandmotherly officials at St. Martin's-le-Grand look upon, say, an odd sock as a genuine sample, but not so a pair. Likewise a pattern shirt is not considered legitimate, and must come out by parcel post, taking three or four weeks on the way and costing more than its worth by the time it is received; so that very many orders go elsewhere by reason of this absurdity, and British trade loses much in consequence." I recommend this point of view to the consideration of those in authority.

COMMENTATOR.

Digitized by Google

Constantinople Business Letter

(From Our Special Trade Correspondent.)

Constantinople, October 12.

British Limited Liability Companies Abroad.

In your issue of September 20 "Commentator" quotes from The Near East's Salonika correspondent in regard to the recent registration of a limited liability company under the title of "Stein's Oriental Stores, Ltd.," to take over the old-established Vienna ready-made clothing business known as La Grande Fabrique S. Stein. The same correspondent incidentally refers to the existence of some four or five such limited liability companies in Salonika "with never a Britisher in them," and also to "steamers regularly coming here, flying the red ensign, of which not one of the officers and crew speak a word of English."

In the current number of the *Trade Journal* of the British Chamber of Commerce of Turkey a similar reference is made to a local company whose steamers fly the British flag, and against whom a judgment has been obtained in H.B.M.'s Supreme Consular Court, execution of which cannot be obtained. The article in question closes with the query whether a matter of this kind should not receive the serious attention of our authorities, as being detrimental to the prestige of the British flag. Of this particular case more anon.

Whatever the real reason may be for foreigners constituting themselves into joint-stock companies under British law, there can be no two opinions in regard to the misleading effect such incorporations have upon those having dealings with them in a country like Turkey. In regard to the case cited in the *Journal* of the Chamber of Commerce I am able to give some details which may not be without interest.

The P——— S.S. C., Limited, of London, had offices in Constantinople, with agencies in the Marmora and at Salonika, Cavalla, Dédéagatch, and Smyrna, at which port its several steamers called. The Constantinople office was managed jointly by H———, a German subject, and T——— and C———, Ottoman subjects. The company obtained recognition as a British concern by the Ottoman authorities on official documents emanating from London. It issued bills of lading, receipts, debit notes, etc., etc., in the name of the company. It instituted proceedings not later than February, 1912, in the name of the P——— S.S. Co., Limited, H———, director. A Swiss subject, under French protection, having a claim against the company, his legal adviser addressed the managers of the P——— S.S. Co., Limited (London), Constantinople, and suggested an amicable settlement of the claim. A receipt was taken for the safe delivery of the letter, and this bore the stamp of the company, "The P——— S.S. Co., Limited, (London, Constantinople), Constantinople." Failing an amicable settlement, an action was brought a few days later in the British Consular Court to the jurisdiction of which the Swiss subject submitted. The summons of the Court served on the company was not receipted for in the same manner, but simply by H———. When the action came before the Court, this party's legal representative pleaded that the company no longer existed and that H——— was not its director. Judgment was given, however, in favour of the plaintiff. The next move of the company was to paint out the word "Limited" from its sign, and H——— went on a journey. When the judgment was communicated it was received by T———, who said that the offices were not those of the P——— S.S. Co., Limited, but of another company with a similar name. At a further hearing the Court decided that for the present and the future in the action before it the offices were those of the P——— S.S. Co., Limited, and ordered that judgment be served at these offices. The judgment not being executed, the Court ordered the Registrar to make a detailed report on the whole case. H———, having returned from his journey, attended with his associate T——— before the Registrar, and furnished information refuting the claim of the plaintiff. The matter again coming before the Court, another verdict in favour of the plaintiff was the result. When this judgment was served on the company H——— was again conveniently absent on a journey, and the sign over the offices was no longer even the P——— S.S. Co., but the P——— Compagnie d'Armaments et de Navigation, etc. K——— and T———, and in the corner of the sign underneath the above, H———. Judgment was nevertheless served, but was returned to the Court with the statement that the P——— S.S. Co., Limited, no longer existed here, and that it should be addressed to London. (This was also done, but London returned it, saying that they had no knowledge of the matter, and that these parties were not authorised to sign for the company, although proof to the contrary had been furnished the Court during the hearing of the action and accepted by it.) The Court now ordered the seizure of all property belonging to the company. The ships were found to be no longer in the name of the company, some having been transferred to C———, the father of the manager in London; others were in the name of H——— and his associates under different flags. The books and documents of the company could not be sequestered as "The P——— Compagnie d'Armaments et Navigation" claimed to be an Ottoman company, and, further, the offices were rented in the name of H———, a German subject. Nevertheless, four days later this same company took delivery of a propeller arriving for one of its steamers by a Wilson liner, and addressed the P——— S.S. Co., Constantinople, Galata, the bill of lading for which it signed as the P——— S.S. Co. Even now the company is using printed forms of the P——— S.S. Co., Limited, with the name scratched through and the new style added.

We have here the whole gamut of commercial misdemeanour by misrepresentation and subterfuge, to which might also be added contempt of court. Unless we are to become the laughing stock of the other communities, surely this is a case for the Public Prosecutor? I leave comment for others.

Prohibition of Export.

The General Direction of Indirect Contributions notifies, under date of October 7, that the export of wheat, barley, oats, maize, rice, flour, beans, straw, forage, and potatoes from the Roumelian Provinces and the ports and roadsteads of the Marmora and Archipelago is prohibited from that date.

Suspension of Train Services.

I mentioned in my last letter the suspension of merchandise traffic on both the Oriental and Anatolian lines. The Oriental Railway Company now notifies, under date October 10, that the train service between Constantinople and Kutchuk Tchekmedje is entirely suspended. The Anatolian Company has also cancelled the time-tables for its passenger traffic, and is running at intervals of two hours from 7 a.m. to 6 p.m. suburban trains only, but notifies that from the 13th inst. all traffic will be suspended.

TRADE IN SMYRNA.

Changed Business Methods.

The *Board of Trade Journal* publishes the following information from the report of Mr. B. A. Altintop, of the British Consulate-General at Smyrna, on the trade of that district in 1911-12, which will shortly be issued:—

It must be evident to everyone interesting himself in commercial matters in Turkey that business methods there have in recent years undergone a complete change. Both export and import business is now conducted on lines quite different from the old methods. The export branch is becoming more and more speculative every year. It is no longer a practice of buying first, as far as one's own capital will allow, of shipping the goods to some foreign market, of watching for a good opportunity, and then selling and realising a handsome profit; then to renew the operation at leisure. This method is now considered antiquated and obsolete.

The Turkish merchant of to-day begins at the other end. He sells first what he has not yet bought, what has not yet even, perhaps, been produced, and afterwards begins to buy, very often with money that is not his own, but has been advanced by a bank. This facility of disposing of other people's capital, together with the enormously increased transport facilities, enables him to transact a volume of business in a comparatively short space of time, altogether out of proportion to his own means, contenting himself with a very small margin of profit. This method, however, despite the apparent advantages, is fraught with great risk. A slight fluctuation in the market price means a heavy loss and often leads to the discomfiture of the merchant. According to a writer in the *Journal* of the British Chamber of Commerce at Smyrna, no less a sum than £200,000 was lost in 1911 by speculation in figs and sultanas.

Among the signs of changed business methods may be mentioned the formation of trusts and limited liability companies, the extension and generalisation of the credit system, the starving or squeezing out of small dealers, etc. During the last three or four years a number of limited liability companies have been formed at Smyrna.

As regards the import trade, it is no longer the practice for store-keepers to visit Continental markets, returning to Smyrna with well-assorted stocks to be retailed at leisure and at a big profit. Cash payment for goods bought is now out of date. Credit and long terms of payment are the rule, while local commission agents act as intermediary between the store-keeper and the foreign manufacturer.

A local paper, commenting upon the successful activities of Continental firms, gives the following as the principal reasons for their successes:—(1) Personal visits to Turkish markets and a thorough study of the same on the spot by the manufacturers themselves; (2) frequent supplies of samples and regular dispatch of travellers; (3) acceptance of the smallest orders; (4) ungrudging replacement of unsatisfactory goods; (5) grant to native buyers of great facilities for payment; (6) co-operation between banks and shippers, with special banking facilities to suit the convenience of each individual customer (shipper); (7) c.i.f. quotations; (8) combination of land and sea freights; (9) insertion of attractively worded advertisements in Turkish newspapers.

BRITISH SAMPLE EXHIBITION.

From the *Quarterly Journal* of the British Chamber of Commerce of Smyrna we extract the following particulars regarding a proposal for a British sample exhibition in Smyrna:—

"In view of the increasingly successful efforts that were being made by our foreign competitors to capture the Smyrna market, the British Chamber of Commerce of Smyrna last year proposed the formation of a British sample exhibition of purely British products in Smyrna. A guarantee fund of £1,000 was subscribed locally, and circulars were sent to all the firms in the United Kingdom known to be trading with Smyrna. Many of the Chambers of Commerce in the United Kingdom promised their co-operation and gave publicity to the scheme in their journals, but the response was not sufficiently encouraging to warrant the opening of the sample exhibition. The Chamber therefore voted a sum of money for the purpose of sending a representative to the United Kingdom to visit as many firms as possible with a view to interesting them in the scheme, and Mr. J. MacDowall Russell was selected. Mr. Russell visited some 300 important firms in London, Birmingham, Nottingham, Liverpool, Manchester, and other cities in England, but owing principally to the present war a sufficient number of exhibitors was not secured. Convinced as it is of the great services such a sample exhibition would render to British manufacturers, it is with regret that the Chamber has been forced to give up the idea of its establishment."

We hope that this scheme may yet be carried out. Unfortunately the new war will prolong the delay.

Turkey's Financial Situation.

(From our Financial Correspondent.)

CONSTANTINOPLE, October 10.

During the past few months the financial situation of the Ottoman Government has not been at all clear. The sudden and unexpected closing of Parliament left the Treasury without a Budget for the current year, and, while for ordinary expenditure the Budget of 1327 (1910-1911) is being used as a basis, there exists a good deal of vagueness and uncertainty as to how matters really stand.

The political upheaval and the many changes in the staff have caused great confusion in all departments, and for the present very little is being done at any of the Ministries.

The revenues from March to June show an increase over the corresponding period of last year, it is true; but this is chiefly due to the fact that special efforts have been made to get in certain taxes earlier than usual, and there is likely to be a considerable falling off in the later months of the year. The revenues of the Public Debt Administration in the same period show a diminution of some £T200,000, and these revenues are a pretty sure indication of the state of the country. The drop in the debt revenues, however, need cause no anxiety to the holders of Turkish stock, as the comparison is with last year, which was the best on record, and there is an ample margin to meet all contingencies.

War Expenditure.

The more serious side of the question is that the spending departments, more especially the Ministries of War and Marine, have somewhat got out of control, and have considerably exceeded the limits laid down in their budgets. This is in a great measure due to the war, and on this account there is a certain reluctance in criticising it; but the fact remains that in the first six months of the year the Minister of Finance has had to borrow from the Ottoman Bank and other financial establishments over £T6,000,000 for current expenditure at a rate of interest varying from 7 per cent. to 7½ per cent., and it is now almost certain that a similar amount will be required before the end of the year. This procedure is very much to be regretted inasmuch as it involves advances for short terms and a high rate of interest. The advance, it is true, will be repaid out of the proceeds of loans already contracted and not yet issued, but when the loans are issued the money will all have been anticipated, and the Government will be no better off than it was before. All this savours too much of the old methods of finance, which it was so confidently hoped had been left behind for ever after the declaration of a constitutional form of Government. No doubt much has been accomplished and considerable progress made in the collection of revenue and control of expenditure, but the strain on the Treasury is beginning again to get unbearably heavy. Peace and the re-establishment of a stable government free from party strife are urgently needed to relieve the pressure and enable the Treasury to carry on the reforms which were inaugurated after the Constitution.

The Tobacco Monopoly.

Another result of the present unsettled state of affairs is that the question of the tobacco monopoly remains in abeyance. The negotiations which were being carried on early in the year between the Government, the Debt Administration, and the Tobacco Régie Company with the object of handing over this revenue to be administered directly by the Public Debt have come to a standstill. It now seems probable that the result of this check will be that, in view of the short time that remains before the expiration of the present concession (March, 1914) and the difficulty of organising anything to take the place of the Régie Company, the latter will obtain a prolongation of its concession, doubtless with certain modifications of the present conditions. From the point of view of the Fisc it must be regretted that owing to the dilatoriness in handling the question the Government does not find itself in a stronger position for making the best terms possible in its own interests.

Public Debt Revenues.

During the past few weeks there have been various rumours afloat, and even paragraphs in the local Press to the effect that the Ministry of Finance contemplated seizing the revenues of the Public Debt Administration during the war. This report even found its way to Paris and Berlin, where it not unnaturally caused a certain amount of uneasiness. The Minister of Finance, however, has just published an official "démenti" in the Press, and he certainly is to be congratulated on taking such prompt steps to deny this report, which, had there been any truth in it, would have had most disastrous results for the credit of the Ottoman Empire.

The mobilisaion of the Army is, of course, causing a very heavy drain on the Treasury, as large sums are being paid out to troops leaving for the frontier, and for payment of requisitioned horses, carts, etc. This increased expenditure, however, has been met to a certain extent by the large returns from the increased military exemption tax which has given between £T200,000 and £T300,000. This sum, however, is only a drop in the ocean, and, as the expenses of mobilisation are very considerable, and require ready money, credence may be attached to the report that the Minister of War has at his disposal a secret war chest of £T2,000,000 or more, which was left to him by Mahmoud Chefket Pasha.

CYPRUS TRADE.

(FROM OUR OWN CORRESPONDENT.)

NICOSIA, October 1.

The export and import returns for the half-year ending June 30 last show an excess of exports over imports of £34,868 10s. 1d. The principal exports were: Animals, £32,191; carouba, £120,890; wheat, £16,686; barley, £15,298; oats, £2,145; oranges and lemons, £4,694; grapes, £3,238; olive oil, £2,819; potatoes, £5,393; wine, £30,418; cotton, £22,727; wool, £8,016; asbestos, £3,389; raw hides, £6,480.

The principal imports included: Butter, £4,620; coffee, £6,916; flour, £13,839; sugar, £16,199; tobacco and tumbeki, £14,683; raw metals, £6,418; machinery, £10,634; manufactured metal, £11,397; cotton yarns, £15,730; cotton woven goods, £40,215.

SYRIAN SPONGES.

A recent American Consular report states that the most productive parts of Syria are the coasts of Batroun (Lebanon), Tripoli, the small island in the neighbourhood of Rouad, and Latakia.

The gathering of sponges is done not only by the natives, but also by the Greek inhabitants of the neighbouring islands, the Sporades. Greeks employ diving apparatus. Sponges are subdivided into three classes: the first and second quality and the kind called "red." Syrians export the first and second quality of sponges immediately to Paris and the third to Trieste. As to the Greeks, they send their products through the sponge markets of the Sporades to Europe. The Batroun sponges rank first among the best, and sell per pound as follows: First quality, average $7; second quality, $3.60 to $3.80; third quality, $0.40 to $0.60. Those of Tripoli, Latakia, and Rouad are 10 per cent. cheaper. The first quality also is subdivided into three kinds, the first being sold at $10.50 to $12.25 per pound. They are packed in sacks made of common linen, which weigh 44 to 55 lbs. The choice quality only is put into cases, weighing 22 to 33 lbs., and only 20 to 30 cases are exported yearly.

The production amounted to 4,000 okes in 1909, equal to about 11,280 lbs., of which Beyrout produced only 220 lbs. The sponge fishing of Syria is undertaken by Batroun (Lebanon) companies, which receive advances from Beyrout merchants and the Imperial Ottoman Bank. The sponge fishing in Batroun, Tripoli, Rouad, and Latakia employs 100 boats, 200 gigs, and 809 sponge fishermen.

TRADE AT BAGHDAD.

(FROM OUR OWN CORRESPONDENT.)

BAGHDAD, September 13.

There is still a certain amount of misgiving here regarding the domestic political situation. Commerce, however, is little affected by that, but it is much disturbed by the news of fresh troubles in Persia. The reports are that the Governor of Kermanshah has taken refuge in the Ottoman Consulate, and that Salar-ed-Dowleh is now master in Kermanshah, which means that there will be looting of the town, pillaging of the caravans, etc. British commercial interests are large in that part of Persia, and yet people see with amazement that Britain's representatives have little to say in regard to the happenings in Kermanshah and Hamadan. This is lessening British prestige. Merchants who relied in the past on British influence for the protection of their commerce are now beginning to lose confidence.

As regards progress in enterprises here, there is no sign of any activity just now either amongst foreigners or Ottoman subjects. Only the railway is going ahead in its construction. But roads, public conveyances, sanitation, town improvements, etc., etc., are hopelessly lacking. There is money in many enterprises which require the skill of the European engineer and the employment of European capital. The authorities discourage all Ottoman subjects from such undertakings as the provision of motor services, river boats, and so forth. The foreigner, on the other hand, although not so much hampered by the inexplicable opposition of the authorities, does not seem to be able to start any. There is, however, one British concern which is busy in constructing motors for a service between Baghdad and Kanakin, but this is an exception, insomuch as the enterprising spirit is that of the partners who are Baghdad-born, and are capable of conducting the affairs of the concern with the required knowledge of men and matters.

JANINA IMPORTS.

A French Consular report just issued states that the importations of the vilayet of Janina vary between twelve and fourteen millions of francs per annum. Austria and Italy, who share in these transactions to the extent of three millions francs each, are by far the largest importers. Then comes England with her supplies, valued at 1,600,000 frs. (mainly of cotton goods); Bulgaria, with nearly a million francs, thanks to the importation of her flour, which has unfortunately replaced the French; and, finally, France. French imports, although at one time important, hardly reach 600,000 frs. per annum these days. Austrian and Italian manufacturers know quite well that, in order to sell their products on the local markets, it is at least necessary to present themselves personally and to gain the acquaintance of the merchants. Both have, therefore, not hesitated to retain agents at Janina, who, under the control of the Consuls, secure minute information as to the needs and the tastes of the places, and hasten to transmit the knowledge thus gained to their principals. The agent exhibits the samples sent to him by the manufacturers, and constantly invites the native merchants to view the said patterns. He furnishes all useful particulars on this subject, thus facilitating commercial transactions with the country the interests of which he represents.

Openings for Business.

BOOTS AND HOSIERY.

According to the *Mercantile Guardian* Roumania is one of the best of the newer markets for the factory-made boot. For the better qualities there is a very fair demand and little competition. The semi-American model meets local requirements, and these retail at from 13s. to 20s. the pair. Trade is done on bills at four and six months from date of invoice. Hosiery and ready-made underclothing of good quality are an increasing import into Roumania. All wool goods are at present the fashion. There is some demand also for embroidered linen goods. The business is in the hands of agents, as the retailers do not import direct. Prices are quoted to them with free delivery and payment at six months.

POCKET HANDKERCHIEFS.

A report of the Italian Legation at Teheran states that the demand for pocket handkerchiefs in Persia is increasing, although they are still regarded as an article of luxury rather than of practical necessity. The kind preferred is the printed fancy article of white linen or cotton with embroidered border or with coloured edge, printed squares, and handkerchiefs with stripes or coloured flowers on a white ground. Prices are from 4½d. to 1s. 2d. each. Women generally use the same kinds of handkerchiefs as men, only in smaller sizes.

COTTON GOODS AT VARNA.

Cottons find a good sale at Varna. Tissues for men (says the monthly *Bulletin* of the Chambre des Negociants-Commissionaires et du Commerce Exterieur) mainly come from France; they are delivered in widths of 140 centimetres at the price of 6.30 francs to 6.55 francs per metre, free (cost, freight and insurance) Varna, with six months' credit. Italy imports stuff for the making up of peasants' clothes at the price of 0.70 francs per metre, in widths of 68 to 70 centimetres. Plushes are imported from Germany in the quality of 15½ per cent. of silk and 84½ per cent. of cotton at the price of 1.85 marks per metre. They are delivered in cases of 25 metres. England and Italy sell cotton satins respectively at the rate of 4s. 5d. per yard, and 1.35 francs to 2.70 francs per metre (cost, freight, and insurance), Varna.

Sacks for flour are supplied by Austria-Hungary; more than 400,000 of these were imported in the month of June last.

INK IN TURKEY.

The *Boletin del Centro de Informacion Comercial*, of Madrid, announces that there is a demand for ink in Turkey. The consumption of this article increases yearly. Owing to the great development in the publishing of journals and other publications, the importation of printing ink is becoming greater. The average annual importation of all kinds represents the value of 90,000 frs., of which the region of Smyrna accounts for 30,000 frs. The principal supplying countries are Germany, Austria, England, and France.

PARCEL POST TO PERSIA

The Persian Customs Department states that in the year from March 21, 1911, to March 20, 1912, the number of postal parcels delivered in Persia amounted to 320,126, and that they were valued at 34,004,139 frs. In 1905, when the system was introduced into the country, the total value of parcels dealt with was under 13,000 frs. These figures offer strong testimony to the possibilities of doing business by this means, to which we have frequently directed attention, and it is much to be hoped that British traders, as they come to realise the facilities offered them by the system, will show a greater readiness to avail themselves of the same.

Holding so many advantages, it is natural that Russia should occupy the premier position amongst the countries forwarding goods. But it is somewhat surprising to find her share of the business amounting to over 90 per cent. Goods supplied by her account for 31,547,858 frs.; Germany sent 653,289 frs. worth; France, 481,510 frs. worth; and England, 382,384 frs. worth. Other countries availing themselves of the system were:—Holland, 264,764 frs.; Switzerland, 251,709 frs.; and Turkey, 228,340 frs.

TENDERS INVITED.

EGYPT.

Supply of Felt.—The Egyptian Postal Administration invites tenders for the supply of 290 pieces of felt for stamping purposes. The felt should be packed in bales or boxes, each ten pieces fastened together, and should be delivered free at the Central Postal Stores, Alexandria, between January 15 and 31, 1913, under the usual conditions applicable to Government contracts. Tenders should be addressed under double envelope, the outer to H.E. the Postmaster-General, Alexandria, and the inner endorsed: "Tender for the supply of felt." Specification and samples may be obtained from the Central Postal Stores, Alexandria. Date, October 31 (noon).

Supply of Carbon Paper.—The Postal Administration invites tenders for the supply of 60 reams of single-faced blue carbon paper of 500 sheets each. The paper must be packed by the ream, sub-divided into 100 sheets, and delivered free at the Central Postal Stores, Alexandria, between January 15 and 31, 1913, under the usual conditions applicable to Government contracts. Tenders should be forwarded under double cover, the outer addressed to H.E. the Postmaster-General and the inner endorsed: "Tender for carbon paper." Specification and samples of the paper may be obtained from the Central Postal Stores, Alexandria. Date, October 31 (noon).

Supplies for Prisons: Cotton Thread, Soap, Leather, etc.—Tenders will be received by the Inspector-General of Prisons, Cairo, for the supply of the following articles required by the Prisons Administration during the year 1913:—Indian cotton thread, coloured cotton thread, English yellow soap, materials for the manufacture of brushes, English leather, and vegetable fibre. Local representation is necessary. Tenders should be made out on stamped paper of 30 milliemes, obtainable from Mr. A. L. Webb, Queen Anne's Chambers, Broadway, Westminster. The conditions of contract and samples may be seen at the Prisons Administration, Cairo. Date, November 11 (noon).

Supply of Lead Seals, Calico Mail Bags, and Wooden Labels.—With reference to the three notices of tenders invited, which appeared in our last issue (page 679), it may be noted that copies of the specifications and forms of tender, together with samples, may be obtained from Mr. A. L. Webb, C.M.G., Queen Anne's Chambers, Broadway, Westminster, free, except in the case of the calico bags, for which payment of 6d. and 3½d. per large and small samples, respectively, is required. They may also be seen by British manufacturers at the Commercial Intelligenece Branch of the Board of Trade (73, Basinghall Street).

ROUMANIA.

Electric Lighting Installation.—Tenders are invited by the municipality of Targu-Ocna (Bacau) for plant for the electric lighting of the town and the installation of the same. Estimated cost: Mechanical part, £4,400; electrical part, £8,200. Date, October 25.

Steel Water Pipes.—Tenders are invited at the Roumanian State Railway Offices, Bucharest, for the supply of steel water pipes. Date, November 25.

DESIGNS FOR MUSEUM.

The Commercial Intelligence Branch of the Board of Trade is in receipt of particulars of a competition of designs for a national library and museum, which it is proposed to erect at Sofia at an estimated cost of 2,000,000 frs. (£80,000). Prizes of 4,000 frs. (£160), 2,500 frs. (£100), and 1,000 frs. (£40) are offered. Designs, in sealed envelopes, must reach the "Euphorie—Frères Evloguie et Christo Gueorguieff," Sofia, not later than December 1 next. Full particulars can be obtained from the same address.

A copy of the programme (in French), together with blue prints, may be seen by British architects at the Commercial Intelligence Branch of the Board of Trade, 73, Basinghall Street, London, E.C.

MACHINERY IN SYRIA.

A recent report by Consul-General Mr. Stanley Hollis, of Beyrout, contains the following:—

Inquiries among the importers of agricultural machinery elicited the following information: Imports of agricultural machinery through the port of Beyrout in 1911 comprised one 30 h.p. steam plough, valued at $5,840, and ten reapers, valued at $730, from the United States, and a quantity of small horse ploughs, valued at $850, from other countries. Much of this class of machinery is imported into Syria through the ports of Haifa, Tripoli, and Alexandretta. Beyrout, however, is not an agricultural centre, and those wishing to establish agencies for such goods should bear in mind that an agent in Beyrout can cover only a narrow strip of territory between the desert and the Mediterranean Sea, extending to the north only as far as the southern boundary of the Vilayet of Aleppo. At present Haifa is the principal centre in this district for the importation and distribution of agricultural machinery.

The small amount of the imports in these lines during 1911 may be accounted for by the fact that the farming population felt severely the effects of the financial and other disturbances of the year, and were short of the necessary ready cash for any large purchases. Manufacturers, however, should not be discouraged, as this district, on the whole, will turn out to be a very fair market. The principal efforts of manufacturers should be directed towards making the peasants familiar with the use of modern agricultural implements.

The first steps in this direction in the Beyrout district were the establishment of a Jewish agricultural school near Haifa, similar institutions at Sidon by an American mission, and in other parts of Syria under different auspices. A number of American steam ploughs are at present in use in this country, and do excellent work in the great plain of the Bakaa, between the Lebanon district and Damascus.

Britain Leads in Engine Sales.

Great Britain furnished more engines than any other country, the imports from there consisting of four 16 h.p. engines for use in the Hauran, costing $3,407 each; a number of gas engines of 15 to 20 h.p., valued altogether at $16,500; 30 oil engines of 2 to 4 h.p., value at a total of $5,850; and one 20 h.p. marine engine, valued at $779. One 10 h.p. marine engine, valued at $584, was imported from the United States. Small oil engines are becoming rather popular here, and it seems that American engines of this class should find a good market.

Four Deutz 30 h.p. engines, valued at $2,433, were imported into Beyrout from Germany for use at Aleppo. These engines were sold on eighteen months' credit. More engines of this kind will probably be sold if the manufacturers continue to give the same liberal credit terms. Although there is not a large field here for motor boats, three were imported during 1911. Owing to misunderstandings and other unforeseen events, two of these boats are still lying idle at this port.

There are not more than a dozen automobiles in this district, and these are all used either for pleasure or travelling. More than half of these machines were imported from France, two came from England, and one each from Germany and the United States. Owing to the poor roads of this district, the lack of means of a great majority of its inhabitants, and the difficulty of obtaining the skilled labour necessary for the successful running, care, and repairing of these vehicles, there will never be much of a market here for automobiles while these conditions last. At present, under the best conditions, it is doubtful if more than two cars can be sold per annum.

The Roumanian State Railways will shortly call for a contract for 550,000 tons of fuel oil, to be delivered as follows:—Present year, 50,000 tons; 1912-13, 50,000 tons; 1913-14, 50,000 tons; 1914-15, 200,000 tons; 1915-16, 200,000 tons; total, 550,000 tons. M. Cottesco, general manager of the State Railways, is asking the Roumanian refineries to fix one price for all this quantity, which will then be allotted to all the refineries to supply, in proportion to the amount of petroleum they annually refine.

OIL TOPICS.

There is serious trouble going on in Russia with regard to the great oil trust which was to be formed by the Shell, the Royal Dutch, and the Standard Russe. These companies had agreed to make a big oil trust, to regulate the prices of oil and its products throughout Russia, and, although the price of oil in Russia is now at a record, it was believed that the trust would make it still higher. The latest news, however, is that the Ministry of the Interior have declined to allow the company to be formed, on the ground that the board was composed of Jews. Russian laws are very strict with regard to Jews, and it is a curious thing that the promoters of the trust should have forgotten this fact. Naturally the Shell and Royal Dutch are somewhat upset at the contretemps. The St. Petersburg people, however, are quite firm, and they decline to allow the business to proceed. Indeed, they have no choice in the matter. You can do almost anything in Russia if you have money, but you cannot break a constitutional law such as that directed against the Jews. We may all hold our own opinions as to the wisdom or otherwise of the laws, but we are compelled to abide by them.

The German Combine.

Oil combines seem to be springing up all over the world. In Berlin the Imperial Government have approached the big banks, who have agreed to finance an oil company which shall fight the Standard Oil. The Deutsche Bank and all of the leading banks have joined in, and the company will be called the Imperial Petroleum Company. The name of the Disconto Gesellschaft does not, however, appear amongst the list of the banks forming the combine, and it is understood that this bank is interested in the Deutsche Erdol, which is a branch of the German Petroleum Company. This company has concluded an agreement with a subsidiary of the Standard Oil. It is difficult at this moment to see exactly what will come of the squabble. Probably the new company will in the end make terms with the Standard.

Maikop Combine.

It is announced that the Maikop Mutual Oil Transport Company will be amalgamated with the Maikop Pipeline. The Maikop Mutual has issued 200,087 preference shares and 302,029 deferred shares. There are also 41,000 6 per cent. debentures. These will be exchanged for 43,050 debentures in the pipeline company, and the holders of the preference shares will receive 100,044 fully paid ordinary shares in the pipeline, whilst the holders of the deferred shares will get 60,406 deferred shares in the pipeline. The Maikop Pipeline will increase its capital in order to be able to convert the debentures that are now to be issued. The whole thing seems to us inevitable, but it is also very hard lines on the unfortunate shareholders in Maikop Mutual. Very few of these shares are held outside the companies who have wells in Maikop. The Mutual Pipeline has not been a success, and although some people are making a fuss in the papers, everyone knew that sooner or later the Mutual would have to be absorbed by its opponent, and when the big Maikop amalgamation, about which we wrote some time ago was completed, it was known that the Mutual would eventually disappear.

Roumanian Consolidated.

The production of the Roumanian Consolidated is improving, and we hear that this company is now getting very valuable oil on its Bana Hill properties. Indeed, we do not know that such oil has ever been baled before. It goes over 40 per cent. of pure benzine. It is said that some of the oil on the Taman peninsula is so full of benzine that it can be used in a motor-car without refining; but the oil from the Roumanian Consolidated would appear to be quite as good, if not better, for 50 per cent. of pure benzine is phenomenal. Naturally, such oil requires the greatest care in handling, as the slightest suspicion of a spark would produce the most terrible conflagration. However, the oil fetches a very high price. The latest output from Roumania Consolidated is 1,247 tons, and 2,155 tons were delivered to purchasers.

Engineering Notes.

Exhibition at Olympia.

The Engineering and Machinery Exhibition at Olympia is considered as the largest of its kind that has ever been held in London. It is attracting engineers from all parts of the country, and especially from abroad. In his opening speech Lord Selborne who has occupied the position of First Lord of the Admiralty and of High Commissioner in South Africa, made a remark which, we hope, British engineering manufacturers will take to heart, coming from such an authority. He knew, Lord Selborne said, that on the Rand British machine tools were in chief evidence, but agricultural machinery unfortunately came from Canada or the United States. This was because American manufacturers looked ahead and arranged for future markets. The policy of our manufacturers, he said, should therefore be to look ahead for possible developments, for the study of prospective markets was a matter of the first importance.

There are nearly 300 exhibitors, every part of the hall, the gallery, and the annexe being occupied. Among the novelties the Surface Combustion Boiler is attracting great attention, for it is the first time that surface combustion, viz., complete gaseous combustion in contact with hot refractory materials, has been exhibited. It will be remembered that Professor Bone delivered last year before the Royal Society and in the United States some very interesting lectures on the phenomenon of surface combustion which created great excitement in engineering circles, and prepared the way for the practical application of the process. Now at Olympia there is fitted up a gas-fired Bonecourt furnace, capable of evaporating 5,500 lbs. of water per hour, producing steam at a pressure of 120 lbs. per square inch. The boiler, which is but a fraction of the size of the ordinary type that would be required to generate the same amount of steam, and which requires practically no mounting and no stack, supplies steam to several exhibitors, and is shown for the first time in any country. What may specially interest our readers in the Near East is that by this system of boilers equally good results can also be obtained in cases where heavy petroleum or even alcohol, instead of gas, as fuel is employed, and considering the simplicity and portability of the boiler and the cheapness in which heavy petroleum and alcohol can be obtained in the Near East, we think that the system of surface combustion will be a great help for the extension of local industries in Near Eastern countries. There are also shown small furnaces and stoves fired by gas on this remarkable system, and in operation refractory diaphragms suitable for heating and domestic purposes.

A Ventilating Fan.

Manufacturers of ventilating fans have often tried to supply a fan suitable for use in out-of-the-way places, where electric current or the heavier classes of motors are not available, but their efforts hitherto have met with little success. It will be of great interest to our readers in the Near East to know that there is now a fan, fixed or portable, which can be driven by heat from paraffin or petroleum, ordinary coal gas, air gas, or methylated spirit, and which produces a most effective current of cold air. The fan we have seen has an ornamental appearance, fitted with wings moving in a circle of 20 or 24 ins. diameter. A lamp was filled with ordinary petroleum, lighted in the usual way, and placed under a small hot-air motor in the body of the ventilator. In less than half-a-minute the fan was set revolving, increasing to a speed of 400 per minute, running noiselessly without smell, and sending out a powerful current of cold air. It is said that with one filling of the reservoir this fan will run for 24 to 30 hours, the consumption of petroleum for that period being 1 1-3 to 1½ pint. The machine is easily taken to pieces and packed in a small compass for transmission.

Work on the Baghdad Railway.

Reporting on the actual construction work on the Baghdad Railway in Mesopotamia, the American Consul at Baghdad reports that the plan of the construction company is to build from Baghdad viâ Mosul to Telhelif, 100 miles west of Mosul, where in four and a-half to five years this branch will meet the other branch which is being built east from Constantinople and has now reached a point near Adana. The surveys to Telhelif were completed in February. A considerable amount of construction material has already been brought to Baghdad. The preliminary work was in charge of the Deutsche Bank at actual cost to the Turkish Government. With the formal inauguration of the work of building, the construction company, Philipp Holzmann and Co., of Frankfort-on-Main, Germany, assumes charge.

From Baghdad to Samarra, ninety miles north of Baghdad, the tracks of the road must be laid upon an embankment to be built slightly higher than the highest flood water of the Tigris. The ballast, whether of gravel or of crushed rock, must be brought down in "gouffas" (circular boats) from Samarra, and is very expensive. However, the greatest difficulty for the first eight months or one year will be to get supplies and material up the Tigris from Busreh. All material from abroad must be shipped viâ Busreh. For the time being the supplies will be brought up the river by the two shipping companies. During the autumn, when the water in the river is very low, the imports are heaviest, and there is always a heavy congestion of traffic at Busreh, causing goods to be delayed there often for months. It seems that for five or six months after October 1 the company will have extreme difficulty in getting material up the Tigris. It is understood that the company has under construction five river steamers which will be used to carry up the river the material for the railroad construction. When these are completed, in eight to twelve months, the work of construction is expected to go on rapidly.

THE WAR AND THE COAL TRADE.

The situation in the Balkan States has not so far had any effect on the local coal market (says a Cardiff contemporary), but it may be taken that any notable extension of the outbreak would lead to a heavier demand for coal. Many ports in the vicinity of any hostilities which may take place would, no doubt, have to be closed, but the effect of the falling off in exports, which would be occasioned thereby, would be more than counteracted, not only by an additional demand from those engaged in the war, for many of the big Powers would, it is more than likely, require increased quantities of coal in order to concentrate battleships near the scene of hostilities.

Up to the present, however, no real influence has been discernible, and the only inquiry for coal, as a direct result of the crisis, is one from the Greek Government for 10,000 tons of steams. There are, however, possibilities in the situation, and future developments are being keenly awaited.

Near East Markets.

SPECIAL REPORTS.

(From Our Own Correspondent.)

Baghdad. September 13.

Opium is now at record price in Hamadan and Kermanshah. Wool has been shipped this year in larger quantity than in many past years. Gum tragacanth is going up north, and, it is said, will never come again here for shipment to England as it did before. Grain is too dear for export. As to dates, there is yet time for the Baghdad quality that goes to India.

Imports.—The market is steady. But for the check caused by news of the fresh disturbances in Persia trade in all imported goods was very good indeed.

The following information is compiled from the weekly bulletins received at the London offices of the Imperial Ottoman Bank from its correspondents in the Near East :—

Smyrna. October 1.

Opium.—The market has been moderately animated. The greater part of the purchases, amounting to 79 cases, has been effected by speculators. Total arrivals have been 1,540 cases, against 737 of the similar period of last year.

Cotton.—25 bales have been sold. Stocks practically nil.

Sultanas.—In view of the large stocks held, prices reached 10 per cent. Sales of the week amounted to 26,000 sacks. Total arrivals amount to 180,000 sacks since the beginning of the season, against 80,000 sacks last year.

Barley.—Arrivals this week are 50,000 sacks, of which 38,000 are Ushak. Sales, 55,500 sacks.

Figs.—The disputes between the "Smyrna Fig Packers, Limited," and the growers seem to be settled. Figs are arriving in quantities. Stocks are somewhat heavy, and purchases are made without enthusiasm.

Manchester Goods.—The position is very satisfactory. Sales are in good volume, and are effected with facility. Stocks are not excessive.

Beyrout. October 1.

Market.—Maintained with difficulty. Local market is suffering by reason of decrease in transactions with the interior.

Imports and Exports.—Arrivals of both manufactures and provisions have not been quite satisfactory. Our dealers order only by small lots, to meet their immediate requirements, but do not venture to lay in stocks. They await a more favourable time, and are anticipating a fall in prices.

Cereals.—Large dealers continue to accumulate stocks of wheat and barley, as they expect a strong rise as a result of bad crops in almost all districts.

There are about 600 tons of wheat and 1,000 tons of barley in different stores against warranty for export. These quantities are continually increasing by reason of the large arrivals each day. Quotations are per kantar of wheat "Anatolia." PB. 355-370; "Syria," PB. 290-310. Barley, PB. 220-230, according to crop and quality.

Mitylene. October 5.

In consequence of the political situation no business is being done.

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna, for the week ending October 4, state :—The sales this week on our market amount to 136 cases, 85 of which are for America, 24 for England and the Continent, and the balance for account of interior and local speculators. Rain is now needed for the early autumn sowings, but it does not come, so the longer it delays the stronger our market will become; and with this coupled to the active demand, it is very likely we shall again see the high prices we had at the end of last year. Our quotations to-day are firm, as follows :—Current mixed talequale, 17s. to 19s.; Carahissar mixed talequale, 19s. to 21s.; extra selected Carahissar, 19s. 6d. to 21s. 6d.; Yerlis as to quality, 19s. to 23s.; very fine extra Yerli, 24s. to 25s. The arrivals are 1,614 cases against 767 at same date last year.

PRODUCE REPORT.

London, October 17.

The declaration of war by Montenegro and the war preparations in the other Balkan States have had the effect of hardening prices in the produce markets, and in the event of a general outbreak of hostilities it is quite impossible to foretell how far the supplies, especially from the Near East, may be affected. Already the position of currants and sultanas is seriously affected, for, owing to the war preparations, all internal means of transport have been commandeered by the Greek and Turkish Governments for the transfer of troops and war supplies. In addition to this, labour is difficult to obtain, and freight is unprocurable at the moment. The markets, however, have shown a moderate activity during this past week, and prices were well maintained. Sugar is steady. Coffee has advanced. Currants are firm. Sultanas dearer in some kinds and cheaper in others. Seeds rather quiet. Oils steady. Corn dearer. Opium quiet. Petroleum firm.

Sugar.

The beet market is quiet, but prices show very little change. If, however, the reported favourable weather continues, the result may be a better yield of beet than has been expected, and in such a case it may be difficult to maintain prices where they are now. The refined sugar market has been steady, with a considerable business being done in foreign f.o.b. sugar available for prompt shipment. Closing prices for beet :—October, 9s. 6½d. to 9s. 8d.; November, 9s. 8½d.; December, 9s. 7d.; May, 10s.; August, 10s. 1½d.; and October-December, 1913, 10s. f.o.b. Hamburg. Refined, English, Tate's cubes No. 1 prompt, 20s. 6d.; November-December, 18s. 3d.; January-March, 18s. 6d. Foreign cubes, November-December, 14s. to 15s. 10½d.; prompt, 16s. to 16s. 6d. Russian crystals ready Dantzic, 12s., and ready Hamburg, 12s. 4½d. f.o.b. Granulated, Dutch, ready, 12s. 3d. f.o.b. Rotterdam.

Coffee.

A good demand has caused a further advance. Advices from Brazil have been anything but favourable, and the market has risen 1s. 6d. per cwt. This month is always a critical time in Brazil, but it is well to bear in mind that the record crop was grown when all reports from Brazil up to the beginning of November were much the same as this year, stating that frost had destroyed young trees and drought was affecting the older ones. Moderate supplies were offered at auction, and washed Dumont small to bold was sold 78s. to 82s.; unwashed 72s. 6d. to 79s., Mexican small 76s. Rather more inquiry has been noticeable for East India, and its relative cheapness is becoming more apparent.

Currants.

According to the Board of Trade returns, the stocks of currants under bond in the United Kingdom at the end of September were 6,350 tons, against 8,050 at the corresponding period last year, when prices were on the average 1s. to 2s. dearer. Evidently the buyers consider the present stock of currants sufficient to supply Christmas wants, for the demand is not such as might be expected in view of an outbreak of war. Business has been good, however, in all grades, and there was a sharp advance of 1s. 6d. to 2s. in Pyrgos last week, but prices are quoted as follows :—Pyrgos bags, 25s. to 25s. 6d.; ¼ cases Pyrgos, 26s. to 28s.; Patras, 28s. to 33s.; Gulf, 29s. to 34s.; Vostizza, 29s. to 48s.

Sultanas.

In common with currants, the position of sultanas is seriously affected by the war troubles, and a firmer tone exists in the market. A general advance in prices might reasonably be expected. There has been a heavy business in all varieties. Old fruit has received a considerable share of attention, and very little remains on offer under 30s. per cwt. Greeks are some shillings per cwt. cheaper, which was not unexpected, as the opening prices placed the fruit out of its relative value with the Smyrna growths. Smyrna, old, 30s. to 56s.; new, 36s. to 70s. Persian, old, 37s. to 38s.

Cretan Raisins.

Considerable interest is displayed in Cretan raisins, and a few consignments sold for September shipment are already on the way to London. It is very unfortunate that the situation in Crete has restricted operations in the fruit, as a few thousand tons consigned here would have been helpful to the buyers. It is considered that the price of this fruit may advance to somewhere near the quotations of Valencias.

Figs.

Business has up to the present been restricted, but prices show no easier tendency, and the general impression is that layer figs are more likely to appreciate than depreciate in value.

Seeds.

The market is quiet, with a tendency to lower prices. Linseed, London-Calcutta, October-November, 58s. 6d. November-December, 56s. Rapeseed is firm, brown Cawnpore, 50s., October-November. Cotton-seed, London-Egyptian, on passage, held for £8 15s. 9d.; November-January, £8 7s. 6d.

Oils.

Linseed oils spot pipes landed is 32s. 9d.; barrels, 33s. 3d. Rapeseed oil, ordinary brown naked, 31s.; refined, casks, 33s. 6d. Cotton oil as per last report.

Corn.

Wheat.—The cargo market ruled strong, and 6d. to 1s. dearer, with a fair demand at the advance. Two steamers, 6,000 tons choice white Kurrachee, October-November, was sold at 40s. 6d., and one of those was resold at 41s. the same day. Barley is strong, and fully 6d. dearer. Azoff-Black Sea, due out October 18th, 27s. 9d.; April-May, 27s. 6d. 18,000 quarters were sold, steamer Black Sea, October-November, at 26s. 10½d., and 15,500 quarters, Azoff-Black Sea, to load October 30th, 27s. 9d. Oats firm, and 3d. to 6d. dearer.

Various.

Haricot Beans : Danubian and Hungarian, both on the spot, and new crop to arrive in November, have appreciated in value, shipments being late this year. Cloves : Zanzibar, in bales, 8d. to 9d. lb.; picked, in cases, 11d. Lentils : Egyptian, flour, 17s. per cwt.

SUDAN MARKETS.

Ivory.

The market continues firm, and there has been a slight increase in prices, as much as £E48 to £E50 being paid for ivory of first-class quality. These prices, unfortunately, are very misleading to merchants buying in the interior, who do not understand that these high prices are only paid for large sound soft tusks, and are under the impression that all large sound tusks will fetch a good price. Should they wish to avoid loss, however, on their purchases, it will be well for them to remember that there is a great difference between large sound soft tusks and large sound tusks of the hard description of ivory. The former at present are selling at £E48 to £E50, whereas the latter will only sell at £E38 to £E40.

Kordofan Gum.

The stocks, both in Sudan and Europe, appear to be considerable, and the fact that only a few occasional purchases are made locally leads the most sceptic to believe that prices will continue their downward course until and after the new arrivals early in December next. Prices : There are actually three distinct qualities on the market. April-May arrivals, stored, P.T.138/140; June arrivals, slightly rain damaged, P.T.136/135; July arrivals, rain damaged, P.T.132. Hashab Gedarefi : Prices are about the same as for Kordofan Hashab. Hashab Gezira : P.T.130/35, according to quality. Talh : There is a certain stock; prices are also falling; offers are made at P.T.65/70.

Bleached White Gum.

Stocks on hand are larger than in previous years, and sellers, unlike the traders of red gum, are anxious to dispose of their gum at the best price obtainable.

Cotton and Cotton Goods.

EGYPTIAN COTTON MARKET.

(From Our Own Correspondent.)

Alexandria, October 11.

Prices have fallen in sympathy with the reaction in America. Our term market shows a certain degree of independence, but owing to considerable arrivals daily we had to submit to the fluctuations of overseas markets. In spite of unfavourable rumours regarding our crops, news from the provinces is excellent. The yield at the ginning factories is 3 per cent. less than last year, but the crop will certainly prove to be at least eight million cantars.

The Minet-el-Bassal market is very active. Spinning requirements absorb daily 2,500 to 4,000 bales, and sales will increase in proportion to the augmentation in arrivals. All the cotton arriving at Alexandria is promptly bought by exporters on account of its good quality. The cotton yielded by the second and third pickings has less demand.

Cotton seed is firm.

MANCHESTER REPORT.

Messrs. Reynolds and Gibson telegraph :—Business in Egyptian spot has been on a very small scale during the past week. Ginners take only what they require to fill immediate needs. Prices throughout the week have had a downward tendency and close with quotations for brown cotton below those of last week, and for Upper cotton $\frac{3}{8}$ per lb. down, except for good fair Upper, which is exceptionally reduced $\frac{1}{4}$ per lb. Estimated sales for the week, 1,400 bales. Cloth.—The Near East is out of the market altogether, but there has been more inquiry for Egypt.

EGYPTIAN PROSPECTS.

Mail advices from Egypt, dated October 4, bring further information as to the recent progress and the prospects of the crop, says the *Manchester Guardian*. With regard to the date of the Nile flood, which is now regarded as so important a factor in the yield of the crop, it appears that though the date of commencement of the rise of the flood in the higher reaches was very late, yet the levels at Roda (Cairo) rose so rapidly that flood height was actually reached there two days earlier than in 1910, and considerably earlier than in 1911. This means that the flood, though late in beginning, advanced so much faster than usual that it reached the critical height much earlier than had been expected. The result is that so far as flood conditions are concerned the present prospects more closely resemble those of 1910, and are *not* quite so favourable as 1911. To some extent, therefore, this may neutralise the undoubted advantages of this crop in other respects, and it has caused some reduction of the highest estimates. It may explain the statement in the Alexandria General Produce Association's report of October 2 that the present prospects for the third picking are for a yield considerably less than in 1911, which, of course, was the highest for a number of years. The first picking, however, is showing prospects much better than in 1911. The arrivals to date are more than double those for the same date of last year, but it must be remembered that these depend almost as much upon the financial condition of the fellah and his estimate of the probable movement of prices during the immediate future as upon the state of the crop, and are very little indication indeed of the final outturn. As early as September 1 the bulletin issued by the Agricultural Department gave an estimate of not less than eight million kantars, and this may quite well be realised or even exceeded, but the more cautious opinion of officials in Alexandria is that no serious estimate can be expected before the end of October.

According to Messrs. Brooke, Bond and Co.'s tea circular, wherein are given figures relating to the distribution of the Indian crop up to September 11 (season 1912-1913), Constantinople took 143,195 lbs. of this tea, the Persian Gulf 1,384,990 lbs., and Bombay 1,941,315 lbs., as compared with 143,956 lbs., 1,011,469 lbs., and 1,401,570 lbs. in the same period of the 1911-1912 season.

EGYPTIAN COTTON FIGURES.

For 6th week, ending October 11.

SEPTEMBER EXPORTS.

The following are the particulars of cotton yarn exported to the countries of the Near East in September this year, as compared with the corresponding month of 1910 and 1911, viz. :—

	1910. Lbs.	1911. Lbs.	1912. Lbs.
Bulgaria	537,800	562,200	689,000
Roumania	493,900	749,700	738,400
Turkey	620,900	697,800	1,246,600
Egypt	260,300	188,400	202,000

The undermentioned were the quantities of cotton manufactured piece goods exported in September, 1912, as compared with the same period of the two preceding years :—

	1910. Yards.	1911. Yards.	1912. Yards.
Greece	1,886,100	2,640,700	2,844,000
Roumania	1,040,000	3,621,900	3,252,400
Turkey	44,707,600	34,820,900	39,476,000
Egypt	26,674,000	26,122,100	23,497,100
Persia	5,494,600	1,145,600	5,554,800

Reuter's Larnaca correspondent reports, under date of the 14th inst., that the contract for the weekly mail service between Cyprus and Egypt, held by the Limassol Steamship Company, has terminated. A fresh contract with the Khedivial Line for a period of seven years began on Tuesday.

TRADE WITH THE NEAR EAST.

The Manchester trade in cotton goods with Turkey and Greece has come to a standstill. Goods despatched many days ago have not reached their destination, there being no one to handle them at the ports or to accept delivery. Another disquieting fact is that there is a complete absence of remittances from agents and customers in the disturbed countries.

Staffordshire manufactured-iron masters were in receipt on Tuesday of inquiries for iron from the Crimea and the Near East, necessitated by the mobilisation operations. Some of the most urgent orders are for cavalry horseshoe iron, and immediate despatch is impressed. The volume of individual inquiries runs from 100 tons and upwards, and it is specified that the iron must be of a soft and homogeneous nature and of special sections. Ironmasters were on Tuesday quoting for the orders, but fears are entertained of the material being seized in transit.

It is stated that in Manchester the shippers to the Balkan district, Turkey, and Greece have suspended shipments for the present, pending developments. This course has been adopted not because interference with their goods on passage or at port of distination is anticipated, but mainly for fear that the financial situation may cause trouble. At the same time, says the *Shipping Gazette*, it is fully recognised that communication by water and rail may be stopped, and that merchandise may lie at the port of destination with the risk of loss or damage. This applies particularly to goods going via Constantinople, Varna, Kustendje, and Galatz to inland points. Meantime, goods on passage have been insured against all war risks, etc., at 20s. per cent., which is a fairly substantial rate.

TRADE IN SOUTH RUSSIA.

Our Odessa correspondent calls our attention to the following passages in the annual report of Mr. Consul-General C. S. Smith, just issued. They bear out what has been written by our correspondent before, and deserve all the publicity that can be afforded them :—

Much of the trade of South Russia is in the hands of small people without capital, who are enabled to compete with capitalists by the support of the banks. Thanks to this, they can handle merchandise to the value of twenty times their capital. For instance, if at the sales of timber owned by the State the buyer pays down 5 per cent. of the purchase money the timber becomes his property, save that he cannot take it away till the balance is paid. He gets financial backing from a merchant or a bank on the security of this timber, and so pays off his liability. It is obvious that a person who can play about with other people's capital in this way can afford to take a smaller profit than sound firms which find their own capital. Consequently these speculators are a thorn in the side of firms of good standing, and the rashness of their enterprise is injurious to trade.

The same thing happens on a larger scale in the grain trade. Speculators handle large quantities of grain, as they are financially supported by the banks. These buyers sell in advance, and then, if the market goes against them, are often unable to fulfil their obligations. Having nothing, they pay nothing, and the purchaser loses. The banks themselves are sometimes left in the lurch when grain on which cash has been advanced is not up to sample. Heavy losses were sustained in this way by the banks last year.

The Cairo Tramways Company has submitted to the Egyptian Government proposals for the extension of the tramways system by the creation of three new lines, one from Mena House to Kardasa, another from Saft-el-Laban to Mansourieh, and a third from El Talbieh to Sakkara. The company is soliciting, in addition, the concession of a line from Mahmasha to Abu Zaabal.

The sale to the Greek Government of the Chinese cruiser "Chao Ho," now completing at the Elswick works, is understood to have been definitely arranged in London on the 16th inst., the price being rather less than £300,000.

Shipping Intelligence.

SHIPPING IN THE BLACK SEA

(From Our Own Correspondent.)

Odessa, October 13.

Greek shipping in these waters is absolutely paralysed, and ruinous losses are being incurred alike by shipowners and charterers. There are thirteen grain-laden Greek steamers in the Taganrog Roads, ten in the Bay of Kertch, four in Odessa, one at Kherson, one at Nicolaieff, and three at Burgas, all held up by the action of the Turkish authorities. They have been instructed by the Greek Consuls in the various ports not to attempt to repass the Dardanelles pending further advice. When that liberating advice is likely to be given it is now difficult to say.

Black Sea Freights.

Messrs. Sydney Reid and Company furnish me with the following weekly report :—Odessa.—Freights have continued to advance during the past week, although the market is very uncertain, and high rates are dependent upon the political situation. For spot tonnage 19s. Rotterdam was paid to-day, and for Hamburg 20s. was done for small parcels. Antwerp is inactive, and a spot steamer has difficulty in getting completion, although asking much under the market rate. There is very little open room in the port, but, on the other hand, the inquiry is extremely limited. The local banks are naturally disinclined to take risks in face of the political situation. Nicolaieff.—A brisk business is doing, chiefly on the Hamburg berth, and much room has been booked for spots at 20s. to 21s., whilst for a steamer four or five days off 20s. 3d. was paid to-day. Rotterdam is for the moment a quiet berth, but 19s. would be paid for a very prompt ship. For the London berth there is a little better inquiry, and 19s. 6d. is paid for prompt loading. Marseilles continues steady at 18 frs. heavy, and 20 frs. to 22 frs. for oats, spot tonnage being nearly exhausted. Kherson.—Business continues to be very restricted. Rotterdam is nominal at about 18s. 6d., but for a very prompt steamer for Hamburg 20s. is paid, and a little more for small parcels. A Liverpool steamer has been berthed to leave in ten days at 19s. Bar draught, 23 ft., fresh. Novorssisk and Theodosia.—A limited business is doing for spots and very prompts; for the latter, 18s. 6d. is paid for Rotterdam and 19s. forHamburg. There are free berth turns at Odessa, Nicolaieff, and Novorissisk.

The Dardanelles.

A Constantinople telegram received here last night stated that the Dardanelles are daily expected to be closed, and that they are again being mined. So far there is no confirmation of the disquieting report.

THE S.S. "BARROWMORE" DAMAGED.

We have received from Salonika a letter, signed "Poppy," protesting against some remarks of our Salonika correspondent which appeared under the above heading in our issue of September 27. As we are not favoured with the name and address of the writer, we are unable at present to publish "Poppy's" letter, but in the meanwhile we are communicating with our Salonika correspondent concerning the matter.

WAR ITEMS.

According to the *Daily Freight Register*, the state of war in the Balkans has enabled British tonnage practically to claim the monopoly of trade with the Black Sea markets, a monopoly which may become more effective should the trouble spread beyond its present area. At present cargo boats in that trade are reaping the full benefit of appreciably higher rates.

A Reuter telegram from Constantinople last Friday stated that the Porte proposed to purchase the foreign cargoes in the Greek steamers now detained in Turkish waters.

STEAMSHIP MOVEMENTS.

Cunard Line.

"Caria."—At Liverpool for the Levant October 7. "Carpathia."—Patras for New York. Left Gibraltar October 6. "Cypria."—At Constantinople for Smyrna October 11. "Pannonia."—At Trieste October 13. Stock and Share Markets.

Bank Rate 5 per cent. (Oct. 17, 1912).

SETTLING DAYS.

CONSOLS.
Wednesday, November 6.

STOCKS AND SHARES.

In Mining Shares the next carry-over is October 25.

Continuation Days.	Ticket Days.	Pay Days.
Mon., Oct. 28.	Tues., Oct. 29.	Wed., Oct. 30.
Tues., Nov. 12.	Wed., Nov. 13.	Thurs., Nov. 14.

LONDON, October 17.

Since we wrote last week many things have happened. Paris and Berlin have slumped as they have not slumped for many years. London followed suit, and on Saturday we had one of the blackest days we have seen If an improvement had not set in this week there is very little doubt that a great many members of the Stock Exchange would have been hammered on Settlement Day. Now we have a nineteen-day account in front of us, and everyone is determined to make things safe. The Continent is less nervous, and the continued delay in the war would appear to make for peace.

Internationals Recover.

The foreign market is gradually recovering its tone. The bears are taking their profits, and as we are without stock the effect on prices is important. Bulgarians are now quoted very widely at 76 to 79. Egyptian Unified are at par. They have kept very firm all through the trouble. French Rentes are 88½, and have fallen less than most securities. Hungarian Rentes are quoted 86 to 89, a seven points fall since last year, and the yield to-day is very attractive. It is hardly likely that the Austrian Empire will ever default upon its debt. Italian 3½ show little improvement in spite of the conclusion of peace. They are a shade higher at 95½. Russians, which were sold in Paris last week, are gradually recovering. The Fours are now quoted 89, the Four and a-Half are under par at 98, and the Fives are only 103 It must not be forgotten that this security can be redeemed at par at the will of the Russian Government. Tintos have shown wild fluctuations; in the slump they tumoled to 71. Indeed, we believe that business was actually done below this figure. On Wednesday, however, people began to see that a war would hardly affect the copper market, and the price was run up to 76. Turkish Unified are now quoted 81. This stock remains remarkably steady, for a year ago the price was 87½. Montenegrins are quoted very wide prices indeed, the dealers calling them 77-87. Greek Fours are 50.

Home Rails.

The Home Railway market, like all the other markets, has hardened up. Metropolitans have been a great gambling counter and showed great fluctuations. The latest price is 55¾. The talk of amalgamation still goes on. Traffics are good all over England, and as an investment there is nothing to beat our leading heavy railway stocks.

Yankees and the War.

Yankees should benefit by the war. Roumania, Servia, Russia all compete with the United States, and the war will put up the price of commodities. The increased profit will improve the already growing prosperity of the States. The big bankers bought steadily throughout the whole week, and we are promised a rise in Atchisons, Unions, Chesapeakes, and Southern Pacifics.

Rubber and Oil.

The only interesting report that has come out has been the Malacca. This was not liked in the market, and shareholders were disappointed. They had been promised quarterly dividends of 5s. each, and they only received 45 per cent. during the year. Oil shares have steadied like all the other securities, and Shells are talked higher. But candidly speculation in oil appears dangerous at the present time. There is very little chance of any new issues coming out, although Mr. Barnett has a prospectus this week.

Mines.

Mining shares are quite out of fashion. Diamonds have been dealt in, but it cannot be said that the public are interested. It is a tip to sell De Beers, but it is only fair to say that is circulated by people who have already done this and do not like their position.

Egyptian Firmness.

The Egyptian market has stood the panic with great firmness. Considering that Egypt would be severely affected by any war between Greece and Turkey, it is a remarkable testimonial to the strength of the Cairo and Alexandria Bourses that the fall should have been so limited. Aboukirs are quoted just over 1⅞, Agricultural Banks are steady round about 6, Beheras continue to be bought, and the price is now 15½. Delta Lands are 16s., and show a small improvement. Egyptian Investment and Agency are 9s., Egyptian Markets 25s. ex dividend, Salt and Sodas at 16s. 6d. show only 6d. drop on the make-up price, Gharbieh Land are now 2¾, Khedivial Mail ordinary are 11s. 6d., and there is some buying of the debentures, which look very cheap at the present time, as they are redeemable in 1914, and would thus yield 7¼ per cent. They are, of course, well secured. Land Banks have improved to 7, National Bank shares have been dealt in at 17. New Egyptians are steady at 12s., Sidi Salem have hardly been mentioned, but they cannot be bought under 25s. Union Fonciere are 2½, and United Egyptian Lands 3s. 9d. It is said that the second picking of the crop has not shown up well, but the success of the crop is assured.

GREEK DEBT SERVICE.

The Council of Foreign Bondholders has issued the following information, compiled from figures published by the International Financial Commission at Athens, with regard to the revenues assigned under the Law of Control for the service of the Greek Debt from January 1 to August 31, 1912 (New Style, January 14 to September 13, 1912) :—

—		Monopolies, Tobacco, Stamps, Stamped Paper, Naxos Emery.	Pirœus Customs.
Gross receipts, Aug., 1912		Drachmæ. 2,840,291.13	Drachmæ. 2,206,000.00
Do. Do.	1911	2,798,263.53	2,153,000.00
Estimated receipts for 8 months (Law of Control)		19,266,666.67	7,133,333.33
Actual receipts	Do. 1912	23,678,210.69	16,768,432.40
Do. Do.	1911	22,210,068.50	17,657,293.22
Difference between estimated and actual rec'pts for 8 months	1912	+ 4,411,544.02	+ 9,635,099.07
	1911	+ 2,943,401.83	+ 10,523,959.89

Of the surplus over the estimated receipts from monopolies, tobacco, stamps, stamped paper, and Naxos emery 49 1-5 per cent. is applied towards increasing the minimum rates of interest and sinking fund of the External Gold Loans of 1881 to 1893. The receipts in gold from both Naxos emery and the Pirœus Customs are converted into drachmæ at par.

The coupon due on November 1 next on the Five per Cent. First Mortgage Debentures of Thos. Cook and Son (Egypt) will be paid by the London County and Westminster Bank, Temple Bar branch, on and after that date between the hours of ten and two (Saturdays excepted). The coupons must be left three clear days for examination.

NOTES FROM ALEXANDRIA

(FROM OUR OWN CORRESPONDENT.)
ALEXANDRIA, October 11.

The Share Market.

The events in the Balkans and the unfavourable condition of the markets of London and Paris have caused a fresh disturbance in our markets. Several well-known Greeks, especially, have had to sell precipitately before leaving to take up arms in Greece.

This week about £100,000 of bonds of the Crédit Foncier Egyptien have been sold by small holders. On the other hand, large operators, and the public in general, are holding aloof while awaiting events. In spite of these facts, local securities are scarcely affected; whereas the Egyptian shares dealt in abroad, such as Agricultural Banks, National Banks, and so on, have suffered considerable depreciation.

Effect of War.

The Balkan war has commenced to provoke an increase in the prices of foodstuffs here, but it is not to be expected that Egypt will suffer to any considerable extent.

Our trade with Turkey will certainly be hampered, but the conclusion of peace with Italy will reopen the Red Sea, Tripoli, and the Islands of Ægean.

The Monetary Crisis.

The monetary crisis continues, in spite of considerable imports of gold, but it does not show a grave character, as in previous years.

This year growers show less anxiety to sell their cotton, and the fellah prefers generally to await higher prices. In general, the farmer is selling just enough cotton to pay his taxes, and the Egyptian Government immediately puts into circulation the money collected, so that the lack of coin currency is not so severely felt. The annuities due to the Agricultural Bank of Egypt have been collected earlier than usual this year, which gives an additional sum of £800,000 for the requirements of the monetary circulation. In this way we hope that we will be able to overcome the difficulties arising from the large cotton crop during the European crisis.

The Cairo Bourse.

This building is to be expropriated, and will be sold for the benefit of creditors. Established scarcely ten years, the Cairo Bourse has at times enjoyed moments of great celebrity. The years 1905, 1906, and 1907 were particularly fortunate, but since then it may be said that this bourse has done scarcely any business, almost all transactions taking place in Alexandria.

The Cairo Bourse is not to be confounded with the Khedivial Bourse of Alexandria. The latter town has possessed a Stock Exchange for forty years, which has become a kind of official bourse on the whole Levant. On the other hand, the great Cotton Exchange is held only in Alexandria, and for this reason Alexandria is regarded as the commercial capital of the country.

Bank of Abyssinia.

We are receiving excellent reports with regard to the future of this institution. In spite of the incertitude which somewhat impedes negotiations in Abyssinia, trade and financial affairs are developing quite rapidly. Mr. B. Hornsby, accountant-general of the National Bank of Egypt, has left for Adis Ababa to supervise the business of the Ethiopian national bank.

Bolto Cotton.

As has been the case with almost all the varieties of Egyptian cotton, it is again a Greek who has discovered the new cotton, Bolto. The creator of this new variety is a modest dealer and planter at Kafr-el-Zayat. This new cotton gives an excellent yield, and the quality is very fine. This is a valuable acquisition for Egyptian agriculture.

Company Notes and Reports.

L'Auxiliare Immobiliere d'Egypte.

A new company has been formed in Antwerp, under the above title, for the purpose of carrying on the business of buying and selling shares and debentures of property and public works companies, making loans and opening credits, with or without mortgage or other guarantees, building and demolition of houses, etc. The capital is 4,800,000 frs., divided into 6,000 preferred shares and 3,600 ordinary shares of 500 frs. each. The 6,000 preferred shares have been subscribed for as follows:—Banque de Reports, de Fonds Publics et de Dépôts, 2,000 shares; Banque Sino-Belge, 800 shares; Banque Liégeoise, 600 shares; M. J. Allard and Fuchs, De Decker and Co., each 500 shares; Banque de Commerce, 400 shares; MM. F. Jacobs Fils. J. Cousin, Le Crédit Anversoise, and Witteroos and Co., each 200 shares; M. L. Nawvelaerts 160 shares; M. Ch. Verbeke and l'Association Financière et Industrielle, each 100 shares; and M. F. Sohr, 40 shares. To each of these preferred shares is attributed one founders' share, without capital value. The 3,600 ordinary shares of 500 frs. each have been allotted in payment of assets acquired from the Compagnie Immobilière d'Egypte. The board is empowered to increase the capital to 6,800,000 frs. by the issue of 4,000 preferred shares.

The profits will be distributed as follows:—5 per cent. to the reserve fund, then a sum sufficient to pay to the preferred shares a dividend of 6 per cent. cumulative on the amount paid up. Of the balance 1½ per cent. will go to each director and ½ per cent. to each auditor. The surplus will be divided between the ordinary and founders' shares in the proportion of 75 per cent. to the former and 25 per cent. to the latter, unless part be utilised for the creation of a special reserve fund.

The board of directors consists of MM. L. Van den Bosch, J. Cousin, A. Van Damme, R. De Decker, Th. M. Hegener, and L. Ranscelot.

Policiori Oilfields of Roumania.

A limited company with the above title was registered October 9 by L. M. Biden, 20, Bucklersbury, E.C., with a capital of £125,000, in 5s. shares. The objects are: To carry on the business of producers, importers, exporters, manufacturers, and refiners of and dealers in oils and petroleum spirit, etc. The first directors are: J. W. Bryan, G. Houston, 58, Wellwood Road, Goodmayes, Essex, and J. J. Spenser, Leafwood, Frant, Kent. Remuneration, £100 each per annum (chairman, £150). The registered office is at 20, Bucklersbury, E.C.

Othon G. Tattarachi and Co.

A limited company with the above title was registered on October 8 by Edwin Collier and Co., 3, York Street, Manchester, with a capital of £5,000, in £1 shares. The objects are: To carry on the business of shipowners, ship-brokers, shipping agents, merchants, carriers, etc. It is a private company. The first directors (to number not less than two nor more than five) are: W. Simpson and R. H. Littledales. The qualification is £250, and the remuneration is to be fixed by the company.

New Egyptian Company.

An extraordinary general meeting will be held at Winchester House, Old Broad Street, E.C., on 30th inst., to confirm, if thought fit, a resolution removing Mr. P. G. Hamilton Carvill from the office of director of the company.

Constantinople Telephones.

"A Shareholder" writes as follows to the *Financial Times*:—"Immediately after the flotation of the Constantinople Telephone Company the unfortunate war with Italy broke out, and now on the morrow of the second call comes the war in the Balkans. The dates for the remaining calls are also fixed at intervals of two months. It seems to me impossible for the company to make any progress with its installations in the present unsettled state of Turkey, and I venture to suggest that the directors—whose names carried great weight with me—would do well to defer making the calls until a more settled state of things has been reached."

Anglo-Adriatic Syndicate.

On Wednesday, at 33, Carey Street, meetings of creditors and contributories were held in the liquidation of the Anglo-Adriatic Syndicate, Limited, Mr. H. E. Burgess, Assistant Official Receiver, presiding. The company's statement of affairs showed liabilities amounting to £3,966, against assets £14, and a deficiency of £36,563, as regards contributories. The Assistant Official Receiver reported that the company was formed in February, 1910, with a nominal capital of £50,000, to acquire concessions for carrying on a gaming business at the Casino at Corfu, and for works of a public nature in Greece. The company carried on the business for about three months, but the weather conditions were so bad that visitors did not go to the island in any numbers. Eventually the furniture was seized by the local authorities and sold to pay local debts. The liquidation was left in the department of the Official Receiver.

STOLEN SUEZ SHARES.

Reuter's Paris correspondent reports that on Monday the Seine Assize Court concluded the trial of a former head of the Bonds Department in the Suez Canal Company, named Lepreux, charged with the embezzlement of shares and money to the amount of some 2,000,000 francs (£80,000). The prisoner admitted the defalcations, and was sentenced to seven years' imprisonment, loss of civil rights, and a fine of 100 francs. The Suez Canal Company is awarded reimbursement of any sum recoverable.

ECONOMICS IN MALTA.

Under date of the 12th inst., Reuter's correspondent in Malta writes:—Mr. Albert Edward Stephenson, of the Colonial Office, has been appointed to form part of the Commission recommended by the Malta Royal Commissioners to ascertain what economies it may be possible to effect in the administration of the Island of Malta. It is understood that a prolonged inquiry will be made, and that Mr. Stephenson will remain in Malta for about a year. In their report, the Royal Commissioners suggested, with the concurrence of His Excellency the Governor, that this Commission should be composed of the Lieutenant-Governor of Malta, the Postmaster-General of Malta, and an officer not connected with the Government of Malta, but familiar with home and colonial organisation. Mr. Stephenson is expected here shortly.

SUDAN EXPORTS

According to the *Sudan Times*, the total value of exports from the Sudan to Great Britain during the second quarter of the present year amounted to £E115,664. The following were the chief articles exported, the value of each being given in pounds Egyptian:—Untanned skins of sheep and goats, 1,583; ivory, 22,569; cotton seed, 6,019; dom palm nuts, 863; gum, 54,303; ginned cotton, 27,752.

The exports to Egypt were valued at £E.250,055, the details of which are as follows:—Cows and oxen, 22,139; sheep and goats, 15,597; butter and ghee, 1,782; skins, 1,367; ostrich feathers, 1,464; peas, 2,447; cotton seed, 12,362; simsim, 29,472; dates, 5,068; ground nuts, 3,498; gum, 80,030; senna, 1,428; unginned cotton, 30,130; ginned cotton, 26,052; gold, 8,670.

THE EASTERN BANK, LIMITED.

Head Office: 4, CROSBY SQUARE, LONDON, E.C.

THE WAR AND MONEY.

Feeling in the City.

As the result of inquiries yesterday in banking circles several more or less divergent opinions were expressed, but there was virtual agreement on some outstanding points of importance as affecting the influence of the war upon European money markets and finances.

For example, a general tightness of money is looked for, becoming more accentuated as hostilities in the Balkans are prolonged. The refusal of the Bank of England to discount bills on Wednesday at the official rate was not unexpected, as the discount houses have for some days been working practically on a 5 per cent. basis. Simultaneously, however, it is noticeable that call money has been quite easy, and it will be interesting to see how long these conditions prevail. As yet there is nothing approaching a panic in financial circles in London, and the slump on the Stock Exchange is not regarded as altogether a spontaneous outcome of the Continental situation. The crisis precipitated by Montenegro has been, not unnaturally, seized upon by speculators, and the inevitable tendency of many holders of European securities to realise has been exploited for bear purposes so far as was practicable.

First-hand Impressions.

One manager, who has a personal knowledge of Constantinople, and is well acquainted with Turkish affairs generally, speaking to a representative of the *Financier*, expressed the opinion—with some emphasis—that such war as occurred would not be a long-drawn-out struggle. He asserts that the Turks will have no difficulty in bringing the levies from Asia Minor across the Bosphorus, and that the large passenger steamers which navigate the Straits, and form a ferry service between Europe and Asia, will be equal to transporting thousands of troops across from Constantinople to Scutari. He thinks, therefore, that it is more than likely the Turks will be able to put an overwhelming force in the field very much quicker than the allies anticipate. Also, he has formed a favourable opinion as to the outlook for Turkish bondholders, who, he thinks, will have no more risks in the future than they have now. If the Turks succeed, the necessary taxes ear-marked for the service of the loans will be collected virtually as they are now, and if the allies succeed in driving the Turks back out of their own territory, the European Powers will have to take steps—and no doubt will take steps—for collecting the proper sum from the Governments of the States concerned.

Revenue from Asia.

Besides which, he agrees that the important sources of revenue being in Asia Minor, the fortunes of the war will not very greatly affect the aggregate revenue. Another point on which he is disposed to be hopeful is the effect of winter and the impossibility of Bulgaria and Servia being able to achieve any considerable advance before the roads over the mountains will become almost impassable and the difficulties of military operations so great as to prevent much activity on either side. This will probably lead to the European Powers intervening during the winter months, and bringing about either a settlement or effectual preparations for a settlement before next summer.

FINANCIAL NEWS IN BRIEF.

The dividends of the Société des Chemins de fer de la Basse Egypte for the year 1911-12 are now payable in Brussels, at the Banque de Bruxelles, as follows :—Preference shares, coupon No. 16, 30.50 frs.; income shares, coupon No. 8, 5.50 frs.; and dividend shares, coupon No. 16, 6.50 frs.

The increase in the amount of the receipts of the Tramways d'Alexandrie for the first nine months of 1912 amount to 61,752 frs., or 3.35 per cent. for the Alexandria lines, and to 99,231 frs., or 5.23 per cent. for the Ramleh lines.

The *Egyptian Gazette* is informed that Mr. R. C. Abdy has resigned the chairmanship and his seat on the board of the Egyptian Investment and Agency, as from September 30, 1912, and that Mr. A. F. P. Roger, of Dashwood House, 9, New Broad Street, E.C., has been appointed chairman in his place. Mr. Abdy will, however, continue to act as the adviser in Egypt of the company.

Sir Ernest Cassel and Boghos Pasha Nubar are, says a Cairo contemporary, at the head of an important group of capitalists, who are now negotiating with the Domains Administration for the purchase of its estates in the Fayoum for £E800,000.

The Egyptian Railway Administration wishes to open a railway from Kafra-el-Zayat to Menouf and on to Benha, and is conducting negotiations for the acquirement of the land required.

A semi-official statement issued at Sofia declares that the three months' moratorium voted by the Sobranje only affects private payments, and has no reference whatever to the liabilities of the Treasury, which continue to be discharged at the regular intervals.

The numbers are announced of sixty-nine Four and a-Half per Cent. Debenture bonds (Series "B") of the Land and Mortgage Company of Egypt, which have been drawn at the offices of the company, and will be paid off at par on November 11.

Mr. G. R. Brauch, formerly chief clerk in London of the Khedivial Mail and Steamship Graving Dock Company, has been appointed secretary to the company.

Mr. Arthur Nichols, late manager in London of the Bank of Egypt, has accepted a seat on the board of the Anglo-Ottoman Tobacco Company, which is being formed to take over the business of an old-established firm in London.

Mr. Pio Sciortino, formerly British Vice-Consul at Cairo, has taken up his permanent residence in London, and is, we are informed, now engaged in forming a company to deal with land mortgages in Egypt.

The directors of the Oriental Telephone and Electric Co., Limited, have declared an interim dividend of 3 per cent. on the ordinary shares, free of income-tax.

The receipts of the Egyptian Markets for the week ended October 10 amounted to £614, a decrease of £263 as compared with same period of last year. The aggregate receipts to same date were £38,371, a decrease of £4,027.

A policy was effected in London on Thursday for six months on the lives of 500 officers in the Bulgarian Army. Only the risk of the death by wounds was covered, the risk of death by sickness being specifically excluded. Each man is covered for either £150 or £200. The premium paid was £8 8s. per cent.

An insurance for six months was effected on the lives of cinematograph operators proceeding to the Balkans at ten guineas per cent. for six months, which was rather more than was quoted a week ago. Although business was actually transacted on Thursday at ten guineas, underwriters raised their rate later to fifteen guineas per cent.

THE LONDON DIRECTORY
(PUBLISHED ANNUALLY)
Enables traders throughout the World to communicate direct with
ENGLISH MANUFACTURERS AND DEALERS
in each class of goods. Besides being a complete commercial guide to London and its suburbs, the Directory contains lists of
EXPORT MERCHANTS
with the Goods they ship, and the Colonial and Foreign Markets they supply;
STEAMSHIP LINES
arranged under the Ports to which they sail, and indicating the approximate Sailings;
PROVINCIAL TRADE NOTICES
of leading Manufacturers, Merchants, etc., in the principal provincial towns and industrial centres of the United Kingdom.
A copy of the current edition will be forwarded, freight paid, on receipt of Postal Order for 20s.
Dealers seeking Agencies can advertise their trade cards for £1, or larger advertisements from £3.

COOK'S NILE STEAMERS AND DAHABEAHS.

THOS. COOK & SON have unequalled facilities for Travellers visiting Egypt, now the premier Winter Resort of the World. Their fleet of **Fourteen Large Passenger Steamers** consists of the finest ve-sels on the Nile, specially built luxuriously appointed throughout, and fitted with every modern convenience.

TOURIST SERVICE.—These large and handsomely-fitted Steel Steamers sail once a week from **Cairo** to **Assuan**, and twice a week from **Assiut** to **Assuan**, the sailings from **Cairo** beginning in November, and from **Assiut** in January.

EXPRESS SERVICE.—The Express Steamers also leave **Cairo** twice a week, the Friday departures commencing in November, and the Monday departures in December.

There is thus a Service of **Five Cook's Steamers per week** ascending the Nile to the **First Cataract** during the Season—three from **Cairo** and two from **Assiut**—calling at all points of interest on the Nile, in connection with which complete arrangements for sightseeing and excursions are made, enabling Travellers to visit, to the best advantage, all the famous

PYRAMIDS, TEMPLES, TOMBS, RUINED CITIES, etc.

SECOND CATARACT SERVICE.—In connection with the above Services there is also a Service twice weekly by First-class Steamer from the **First** to the **Second Cataract**, with through bookings to **Khartoum, the Sudan,** and **Uganda.**

PRIVATE STEAMERS AND DAHABEAHS. — Thos. Cook & Son have several small Steamers for charter at moderate rates, specially adapted to the requirements of Families, Private Parties, Sporting Parties, etc., accommodating from eight to sixteen passengers, with competent crews, and thoroughly equipped. Also a large Fleet of First-class Sailing Dahabeahs, the best on the Nile.

Illustrated Nile Pamphlet free from:

THOS. COOK & SON,

Managing Agents for THOS. COOK & SON (EGYPT), LTD.,

CHIEF OFFICE:

LUDGATE CIRCUS, LONDON.

Branches throughout the World.

SUDAN

Presents a Perfect Winter Climate. Invariably dry, Sunny and Bracing . .

KHARTOUM & OMDURMAN in 9 DAYS from ENGLAND and THE CONTINENT.

Via CAIRO and the NILE.

Also direct Steamers to Port Sudan from Marseilles and Trieste.

The Services of the Sudan Government Railways are performed by new **EXPRESS STEAMERS** and **DINING** and **SLEEPING CAR TRAINS-DE-LUXE.** The catering on board steamers and trains is of the highest order, and is under the management of the Railways. The journey is of continued interest, and the absolute comfort of travel permits the most fastidious of travellers to visit and enjoy this vast land of mystery, its native cities, its arts and crafts, its majestic records of ancient races, and last but not least its delightful climate. A few circular tours at inclusive rates from and back to London will be run during the season.

Steamers perfectly appointed make short cruises to the **SOUTH OF KHARTOUM,** others journey to **UGANDA** and present a constantly varied panorama of the native and animal life of **EQUATORIAL AFRICA.**

The **SUDAN** is the finest and most accessible ground for **BIG GAME SHOOTING.** Every facility is offered, and complete and inclusive arrangements made according to requirements.

For particulars and tickets apply to ARTHUR S. BULL, Chief European Passenger Agent, Sudan Government Railways and Steamers, 3, Crane Court, London, E.C., England, or to any of the Tourist Agencies in all countries.

P & O Passenger Services

NOTES OF THE WEEK.

War in the Balkans! For a whole generation the words have conjured up in the minds of the European Powers the worst fears. To-day they are called upon to face the spectre, and momentarily are deriving what courage they can from the reflection that they have agreed to stand by one another. The confidence that the reality will after all not prove as terrible as the anticipation seems not altogether misplaced, but the future remains dark, and the end, whatever it be, is likely to prove a matter of chance rather than of prescience.

The sands of Turkish patience ran out on October 17. On that day, the seventeenth after mobilisation had been ordered in the four allied States, the Porte informed the Bulgarian and Servian Ministers in Constantinople that the maintenance of peace between Turkey and their respective countries had been rendered impossible, and it requested the Ministers to leave Ottoman territory without delay. The following day the two Ministers, ignoring this communication, presented the Porte with a declaration of war from their Governments. A few hours afterwards a similar declaration of war was made by the Greek Government through its Minister at the Turkish capital. The Porte, in its action against the Balkan States, had been careful to turn a blind eye towards Greece, and there is no reason to discredit the report that it would have welcomed the withdrawal of the Greek army from the allied forces. But the Hellenic Government remained true to its pact, and Turkey is at war with her four neighbours. Hostilities, which had already been in progress with Montenegro since October 8, broke out on October 18 along the Bulgarian and Servian frontiers. The skirmishes, however, were mainly the affairs of Turkish irregulars, who fell back before the advance of the Allies. For six days this advance has been slowly but steadily maintained. The Turks have offered a stubborn resistance for their numbers; but no serious effort was made to hold the enemy in spite of the advantages of position offered by the terrain on the immediate frontier.

On thousands of imaginary boards the war game of the Balkans is now being played. Time was when the relative conditions of the Bulgarian and Turkish armies justified in some measure the belief entertained in Sofia that six weeks after a declaration of war would see the Bulgarian army encamped before Constantinople. Rapidity of action was their watchword, and the only method of countering the superiority of numbers that it was known Turkey could ultimately bring to bear upon the conflict. To-day the question arises whether the rapidity predicated for Bulgaria's movements has been attained, or whether some ground has been lost in relation to the unpreparedness for war that has usually been attributed to Turkey. The strategists of the boards would have required the Turks to oppose the Bulgarian advance at Mustapha Pasha. That this step was not taken is perhaps in keeping with what might have been expected from the difficulties confronting the Turkish commanders. The fact remains that Adrianople in Thrace and Uskub in Macedonia represent the Turk's first line of defence, on which the allied forces are now concentrating. Whether in this step a virtue has been made of necessity by the Turks or whether it represents a piece of original strategy designed to lure the Allies farther into Ottoman territory must for the present remain in doubt. The Balkan States had to risk all on celerity of attack; to the Turks every day's delay has proved of inestimable advantage. Their forces in Europe are presumed to be numerically inferior for the present to the armies of the four States, but reinforcements are pouring in daily from Asia. Some days may have to elapse before they are in a position to carry out an enveloping movement, but they appear to have been ready to give battle on ground of their own choosing to the Bulgarians, with what results the next few days will reveal.

At this stage a word may be addressed to the belligerent countries. As the fortunes of the war are followed in Great Britain the chances of the combatants will be weighed, their strategy and tactics criticised. In so doing no attempt to take sides will be implied as far as any responsible quarter or any responsible publication is concerned. Partisans of both Turkey and the Balkan States are to be found in the British dominions, and some of these may be so far forgetful of the duty imposed upon them as to claim national approval for their individual views. The nation as a whole, however, will regard itself as an umpire of the proceedings, and, true to its primary instincts, will hold the balance of its sympathies at the true horizontal.

The main Bulgarian advance appeared at first to be directed on Adrianople. Profiting by the failure of the Turks to destroy the railway bridge at Mustapha Pasha, the First Army Corps lost no time in pushing on towards its objective. Chermen, on the railway

Digitized by Google

line, was occupied, and on the north and western sides of Adrianople everything seemed ready for the inevitable investment of the town. Up to this stage it was supposed that the Second Army Corps, operating from Kizil Agash, in the direction of Kirk Kilisse, some fifty miles east of Adrianople, was intended to complete the investment of the latter town from the east. Reports of heavy fighting in the neighbourhood of Kirk Kilisse, and even of a repulse of the Bulgarians, render it possible that this route was in reality the main line of the Bulgarian advance in a projected dash on Constantinople. The development of the movement against Adrianople would thus have been a feint to engage as large a Turkish force as possible, and to mark the bigger operations to the east. If the main armies of the Turks and Bulgarians are now contending with one another before Kirk Kilisse, it may be inferred that the Turkish commanders had full knowledge of the Bulgarians' intentions, and had time to concentrate their forces at this spot. If the Bulgarian advance is checked, but no decisive engagement is fought, the choice between the investment of Adrianople and a further attempt in the direction of the Turkish capital must rest on the strength of the reinforcements that the Bulgarians have at their disposal. The very proper strictness of the censorship on both sides prevents any accurate estimate of the contending armies at this or any other point. As the success of a dash on Constantinople would depend largely on the ability of the force to elude the vigilance of the Turks, or at least to avoid any serious check, the prospects of the bolder strategy seem unfavourable. If, as it is reported, the plans of the Bulgarian commanders were changed at the last moment, and a delay of two days was caused by the deflection of the main advance via Kirk Kilisse, the time thus gained by the Turks would appear to have been put to good purpose. No definite conclusion, however, can be arrived at until the result of the fighting all along the Adrianople-Kirk Kilisse line becomes known. The reported successes of the Turks on their extreme right may be counterbalanced by Bulgarian successes in the centre. First telegrams, under a strict censorship, are not always an infallible guide, and it may be that at present only the advance guards of the main armies are engaged.

In the Macedonian section of this extensive conflict the Servians appear to have achieved an unbroken record of successes. Advancing in three main divisions, they have not only disposed of the irregular opposition offered to them, but have captured Prishtina, which was entered on the afternoon of October 22. Uskub is the main Servian objective. One force advancing along the railway line has taken up a position in the neighbourhood of Kumanovo. Another force, supported by Bulgarians, has seized Egri Palanka, Kratovo, and Kotchana, and is converging on Uskub from the east. The capture of Prishtina is an important success; but in this instance again the Turks had left the town to its own resources, and would appear to be awaiting the Servian advance on the ground of their original choice, before Uskub. Here the invading force is likely to find the Turks in a strong position. The possession of Prishtina was fiercely contested, but its fall was a foregone conclusion if the Servians had any merits as fighters. Montenegrins, Servians, Bulgarians, all are showing that the traditions of their race are being worthily maintained. The directness of their assaults on fortified places, however, exacts a heavy toll, that must ultimately tell on an army that has little in the way of reserves to fall back upon.

For Montenegro also the first brilliant successes are over. The victorious army has closed in on Scutari, and the real business of the campaign has begun. In the meantime the Greeks are profiting from Turkey's preoccupation elsewhere. The Turks, after being driven out of Elassona, have fallen back before the Crown Prince's troops, and the first serious stand is expected to be at Selfidje, on which the Greeks are rapidly advancing. Another Greek force is operating in Epirus with equal success. Lemnos has been occupied by the Greek forces, and the Greek flag has been hoisted at Kastro, the capital of the island, after a short engagement with the Turkish garrison. The Turkish fleet has not yet ventured out of the Bosphorus. Some vessels have appeared off the Bulgarian coast, and a mild bombardment has been attempted. Fears of mines, however, seem to keep the Turkish vessels too far out at sea to effect much damage.

The progress of the war is being watched with some anxiety in Roumania, which is credited with certain fears and intentions, if the Bulgarian army should prove victorious in Thrace. The Cabinet crisis which has long been threatened is about to come to a head. M. Majorescu, the Premier, is expected to hand in his resignation during his visit to the King at Sinaia, and it is understood that he will immediately be called upon to reconstitute his Ministry. The Chambers will then be dissolved, and a general election will follow. As a result of this appeal to the country it is hoped that endorsement for the Government's pacific policy will be forthcoming.

Amid the clash of arms in the Balkans it savours of ancient history to go back even one week to record the signing of the treaty of peace between Turkey and Italy. The Treaty of Lausanne was ratified on Friday, October 18, by the Turkish and Italian Plenipotentiaries at Ouchy. The document, which is of considerable length, is composed of eleven articles, the last briefly recording the fact that it enters into force on the day of signature. After providing for the immediate cessation of hostilities, the withdrawal of troops from Tripoli and Cyrenaica on the one side and the Ægean Islands on the other, the amnesties to be granted to the inhabitants of the countries concerned and for kindred matters, the Treaty reintroduces the former relations, both diplomatic and commercial, that existed between the two countries prior to the war. Article VI. deals in detail with commercial matters, and the two following articles refer to the questions of post offices and capitulations. Article IX. provides for the reinstatement of Italian officials in the Turkish Civil Service, and in the penultimate article Italy undertakes to pay to the Caisse of the Public Debt the amount previously apportioned to it from the revenues of the Turkish provinces in North Africa. As had already been indicated, the crucial points in the conclusion of peace had been provided for in a preliminary agreement. On the day of the signature of the Treaty of Lausanne an Imperial Firman was issued in Constantinople, addressed to the inhabitants of Tripoli and Cyrenaica. It announced that, in view of the impossibility of defending the country, the Turkish Government was anxious to terminate a war ruinous to the people and disastrous to the State. Full autonomy was accordingly granted to the provinces, which would be governed by new laws and special regulations. Shems-ed-Din Bey was appointed Naib-es-Sultan, and to his charge were confided Ottoman interests for a period of five years. A Cadi would be nominated for the application of the principles of the Sheriat, and he, in turn, would appoint Naibs chosen from the local Ulema in accordance with the Sheriat. "The emoluments of the Cadi," concluded the Firman, "will be paid by us; those of the Naib-es-Sultan and all the functionaries of the Sheriat from the revenues of your country." On the following day the Ægean Islands claimed the attention of the Porte. An Iradeh granted a general amnesty to such of the inhabitants as aided the Italians, it accorded administrative and judicial reforms which are to assure greater prosperity to the islands, and promised that henceforth officials acquainted with the language and customs of the islanders should be chosen by preference to fill posts in the local administration. The conclusion of peace and the terms of the Treaty have been accepted in Turkey with comparative indifference. In view of the situation in the Balkans, it is recognised that any other course would have been open to the gravest objections. There has not been time to learn the reception that is likely to be accorded the Treaty in Tripoli and Cyrenaica.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)

Constantinople, October 18.

First Effects of War.

To-day Turkey is at war with four Powers, and is apparently quite satisfied to have a chance of meeting her foes where she can strike them. Of coherent war news there is little here. No news has been received of the capture of Tuzi, Shiptchanik, and Dechitch by the Montenegrins, nor of the result of the first conflicts on the Servian borders and near Mustafa Pasha. The Ottoman successes at Gusinye, the repulse of a band raid in the Tumrush district are, however, the subject of Press comment; and the army, which knows better than the journalists, is content to turn its back on what may happen in the next few days on the Montenegrin and Servian borders, and to turn its whole attention to the task of defeating the Bulgars.

The streets of Constantinople are full of soldiers or ununiformed reservists hastening to the depôts to receive their arms and uniforms. Cabs are distinctly rarer than they were owing to the numerous requisitions. The men of the "hammal" class, and those sinister rascals whom they call "corner boys" in Ireland, and who appear to live in a state of perpetual idleness, tempered by occasional brawls, are becoming rare. Some of them have been enrolled. Others and the majority of the Kurd element have fled for their homes. Fifteen hundred Kurds thus departed after the mobilisation orders were issued. To tell the truth, no one seems any the worse for their departure.

"The Real Turkey."

The Anatolian troops who keep pouring into the town are men of another stamp. They represent the real Turkey—the peasants of Asia who pay the blood tax so uncomplainingly—and they mean business. There is no sort of enthusiasm about them, no flag-waving or shouting, but a quiet, dogged determination to "see the thing through." Many of them look rather old for a Balkan winter campaign, but the majority are hardy, silent, middle-aged men, who if slow are clearly sure, and believe that now at last they are going to win a crushing victory over the small States which have troubled them for so long. Whatever their fate, they will meet it with resignation; but there will be no sort of submissiveness among them when they meet the Bulgar. All our accounts from the northern side of the Balkans depict the same spirit as existing among the peasants who form the mass of the Bulgar army, and we may well believe that, with forces animated by such a spirit opposed to one another, the losses will be heavy and the fighting grim and ferocious to the last degree. Meanwhile, the Government is doing its best to prevent the war being made even more horrible than it must inevitably be by issuing orders to the civil authorities in Macedonia to hand over all persons guilty of attempting to organise massacres of peaceable non-Moslems to the court-martial, which will punish them with death. A similar proclamation will be issued to the army by the Generalissimo, who, basing his orders on the Koran and the Sheriat, will enjoin his troops to abstain from all ill-treatment of non-combatants and similar excesses under penalty of the severest punishment.

Those who know Nazim Pasha and the military chiefs who serve under him are aware that most of them can be depended upon to do their best to make the Turkish soldier realise that he will fight for the honour as well as for the existence of his nation.

Peace with Italy.

To-morrow, so it is believed, the definite treaty of peace with Italy is to be signed. The preliminaries are already settled, and the general outline of the terms of peace is known. Turkey turns a blind eye to the Italian decree of annexation, grants full autonomy to Tripoli and Cyrenaica, recognises their military occupation by the Italians, and will be represented by a Cadi of Tripoli, who will defend the spiritual prerogatives, and a "Naib-es-Sultan," who will watch over the temporal interests of Turkey in this part of Africa. Italy will carry the public debt of the provinces, will treat the Sheikh-es-Senussi with special consideration, and will evacuate the islands, of which the inhabitants who supported the Italian invaders will be amnestied. The grant of special privileges to the Senussi chief is amusing in view of the masterly inactivity displayed by that astute divine during the recent war. One imagines that a large monthly salary is one of the privileges which will be conferred on him. In any case, the recent campaign has, or should have, effectively pricked the great Senussi-Pan-Afro-Islamic bladder. Imaginative publicists have long delighted in painting thrilling pictures of the time to come when the chief of a redoubtable organisation was to rally the myriads of warriors who, as is well known, inhabit the depths of the Sahara, and to emerge at the head of gigantic armies of fanatics from these waterless wastes to overrun the European colonies in Africa and to raise the negroes of the Sudan, the Lake districts, and the Congo in a great crescentade against the white infidel. And now we are to see the redoubtable Senussi Sheikh a pensioner of Italy. It is too hard!

BALKAN COMMITTEE AND THE WAR.

Mr. Noel Buxton, M.P., writes a long letter to yesterday's *Times* explaining the attitude of the Balkan Committee with regard to the present war. The demand on our space is so great this week that we are unable to reproduce it in extenso, but we note with great satisfaction that the Committee's War Relief Fund "will be applied to sufferers on both sides." A notification of this kind will go a long way towards vindicating the general attitude of the Committee.

BRITISH MINISTERS AND NEUTRALITY.

Writing to the *Times* (October 21), Mr. George Lloyd, M.P., protests against partisan and misleading statements by members of the Government. In view of the complete neutrality that Great Britain is observing towards the Powers concerned in the Balkan struggle, it becomes necessary to enter a warm protest against such partisan and misleading statements as were made by a member of His Majesty's Government in a speech at Bethnal Green on Friday night.

Mr. Masterman, Financial Secretary to the Treasury, is reported as having said the following:—

"I am one of the few Englishmen who have been right through the district now the scene of war, and I ask you to take a sympathetic view towards those fighting in the cause of liberty and progress, and who have been suffering for years owing to the murders and pillage of the Turks."

There are others besides Mr. Masterman who have some knowledge of the countries concerned, who have perhaps spent more years than Mr. Masterman has spent days in the study of these questions, and who would yet hesitate in a few words to apportion to one side or the other the blame for Macedonia's unhappy condition.

But considerably more important than the Financial Secretary's views on Balkan politics is the fact that Mr. Masterman is a member of the Government, and that in view of that Government's neutrality the country has the absolute right to demand that Ministers, if they must make public reference to the war, should do so with the utmost restraint, and that their words should be free from any suspicion of bias towards one side or the other.

NOTES FROM SMYRNA.

(From Our Own Correspondent.)

Smyrna, October 9.

Greek Exodus.

At the moment of writing war has not been declared with Greece, but Greek subjects are enrolling as fast as they can at their Consulate for service in the Greek army, and enough steamers cannot be had to transport them to Greece. The steamer belonging to the Pantaleon Company, seized last week by the Turkish authorities, has been allowed to leave Smyrna, but was promptly chartered by the Greek Consul to carry as many as possible of the Greek reservists resident here. This morning the s.s. "Osmanieh," of the British Khedivial Company, arrived in port with over 1,500 Greeks from Constantinople en route to join the Greek army. Some 500 more in Smyrna had booked a passage by her for the Piræus, but were refused, only a few being taken. Perfect order prevails in the city, and no rough demonstrations of any kind have taken place.

Smyrna, October 10.

War Officially Announced.

The storm has now burst. The official announcement was made yesterday evening that war has been declared against Montenegro, and it is expected as a matter of course that Bulgaria and Servia will join the Black Mountaineers. Some doubt appears to exist about the attitude of Greece.

The news of war has been received with satisfaction, and signs are not wanting that the war will be a popular one. The whole country has been in an armed state for twelve months past. The frequent calling to the colours of the various classes of reserves has unsettled the life of the population, and the feeling has been general that, as a struggle in the Balkans seemed inevitable, the sooner it came the better and the greater the chances of a settlement of all existing questions and of some years of peace being secured. The outbreak of the war has not come as a surprise. Early last week a general mobilisation was in progress, and the railways were requested to suspend their ordinary services and to hold all their rolling stock at the disposal of the military authorities. The transport of troops and munitions of war has been going on day and night, and trains are leaving at frequent intervals for Constantinople. The reserves are coming forward in their thousands. Large camps have been formed in the outskirts of the town, and notices have been published warning the public about approaching these camps and the fortified positions along the shores of the Gulf. It is generally believed that the preliminaries of peace with Italy have already been signed. Little thought is given to the terms agreed upon, the anxiety being manifest that the Italians should be out of the way, thus leaving the Government free to utilise the fleet in the event of Greece being also dragged into the conflict.

The news spread this morning that the C.U.P. had joined hands with the members of the Entente and were jointly planning a huge demonstration in favour of war, one item of the programme being an attack on the Greek Consulate and the lowering of its arms and flag. Apparently wiser counsels have prevailed, and the demonstration has been put off until Sunday, when the streets of the town will be free and the risks of a collision with the Christian element materially lessened. Meanwhile, it is reported that the archives of the Greek Consulate are being removed to the Russian Consulate for safe keeping.

Essad Bey Promoted.

Essad Bey, the head of the Tithe Department, has been appointed to Gallipoli. Although his removal brings him promotion, his loss will be much felt here. He had originally served in the Ottoman Public Debt, and had proved himself a well-trained and highly efficient official. He had managed the Tithe Department here for the past five years, and his scrupulous honesty and impartiality had caused him to be held in high esteem in commercial circles, with which he was in daily contact.

NOTES FROM THE SUDAN.

Khartoum, October 5.

(From Our Own Correspondent.)

Gordon College Re-opened.

Each week adds to the intrepid band who return to the Sudan from the doubtful blessing of an English holiday, and each week more ladies are to be seen brightening the Khartoum streets. All this in despite of persistently sticky weather. Gordon College re-opens to-day, and for days preparations have been going busily forward. Mr. Currie, the Director of Education, has not yet returned from leave, but a beginning has been made on the house which is to be built for him close to the college, on the site adjoining that occupied by some of the English staff of the college.

Captain Stafford, who, as your readers will remember, was seriously injured by an elephant several weeks ago, and who has spent some time in the British Military Hospital at Khartoum, left for Cairo on the 3rd. He was attended by Captain Cummins, R.A.M.C., and Miss Pedler, one of the Military Nursing Sisters, who is returning to Cairo after doing her year's service in Khartoum. Captain Stafford is now well on the way to recovery, and may be congratulated on coming so well out of a trying experience. Captain Pearson, Director of Surveys, travelled by the same train to Cairo.

The Khartoum Football Club have made a promising start. They would have played a match on October 1, but for the unfortunate fact that the ground was under water, not, be it noted by English sufferers, from rain, but because it had been flooded by mistake! The only way we keep any grass on football grounds or tennis courts is by systematic flooding.

News comes from Atbara that the extension of the workshops necessitated by the recent development of the line is proceeding apace. It would surprise some of our English friends to see what a busy place our Sudanese Swindon is!

News reaches us from the Bahr-el-Ghazal Province that El Kaimakam Huntley Walsh Bey is exploring some of the unknown waterways of the province. If these could be opened up the gain to the district would be immense. Not only could stores for the western district of the province be more cheaply and expeditiously conveyed by river, but the empty boats could bring down cattle on their return journey, and so develop the cattle trade with that section of the Dinkas.

Khartoum, October 10.

A Big "Wash-out."

As I am forced to write early, being on my way to a region where posts are uncertain, and as my letter of October 5 has been retained some days by a "wash-out" of the line between Abu Hamed and Halfa, the two communications will probably reach you at about the same time. The exact site of this "wash-out" a few days ago was between stations No. 6 and No. 5 on the desert between Abu Hamed and Halfa. It was a fairly large one, about 1,000 metres of line being more or less affected. Not only were the mail trains in both directions held up, but the difficulties of railway work in this country were clearly shown by the fact that a large consignment of sheep and cattle destined for Egypt were stranded at No. 6 station. It sounds very unimportant, but when your imagination grasps the fact that No. 6 is in the midst of a grassless, waterless desert, you will see that the problem was a serious one. However, energetic steps were taken at once, and, we gather, the animals have suffered no great harm. We all hope that this is the last of the rains, and, indeed, the weather is on the mend, the north wind we all desire being an occasional visitor.

Talking of trains and of returning from leave, reminds me that two shelters (you cannot call them waiting rooms, as they have no sides) have been erected at Khartoum Central Station. These will be a boon and a blessing to all who have to meet trains in the afternoon, when the sun devotes more than one desires of his attention to one's particular person.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, October 16.

Lord Kitchener and the Natives.

Since Lord Kitchener's return there has been a steady stream of natives in and out of the Agency. For the most part the visitors have consisted of deputations from the provinces come to welcome the British Agent back. The majority of the Lower Egypt Mudirias have now been represented, and yesterday Beni Suef set the ball rolling for Upper Egypt, its delegates having an interview of nearly an hour with Lord Kitchener. The notables take the opportunity of these visits to voice any complaints or requests which they may have been nursing, and the British Agent always makes careful note of their remarks. They usually find by the time they have settled down again in their districts that their grievance has been redressed or that there is evidence that their suggestion has received attention. As an upshot of all these visits we shall in the course of the coming winter most probably have new popular reforms instituted or an amendment or extension of those already put into effect.

All these folk seem to be highly pleased with the way matters are progressing in the provinces and in the country in general. And well they may be; for this is the first time for many years that the lot of the fellah has received such close attention in high places. The average Egyptian is, I think, beginning to realise that the true Pro-Egyptian policy, if one may so term it, does not consist in placing natives in every available position, in giving them a free hand in the administration of the country, and in conceding every point that is clamoured for; but rather in ruling the land firmly but justly, in promoting natives only where real merit is shown, in sympathetically adjusting true grievances, and, above all, in concentrating all energy on the improvement of the lot of the fellah landowner and cultivator, who is undoubtedly the backbone of Egypt, and on the fruit of whose labours the welfare of the whole State and nation depends. Previous "Pro-Egyptian" policies have been essentially "Pro-Effendi." Lord Kitchener's interpretation of a "Pro-Egyptian" policy is "Pro-Fellah"; and there can be no doubt that it is the correct one and the only one that can be carried out with any hope of practical results

The Financial Advisership.

Lord Edward Cecil has now been definitely appointed Financial Adviser in succession to Sir Paul Harvey, who recently resigned in order to take up a high appointment at home. The decree making this change was signed on Monday at Alexandria by H.E. Mohamed Pasha Said as Regent, and appears in to-day's *Official Journal*. As yet no official announcement has been made as to the appointment of a new Under-Secretary of State for Finance or of a new Adviser to the Minister of Public Works in succession to Mr. Dupuis. The native and foreign papers are, as usual, full of statements which are for the most part nothing but the wildest speculations.

The Homestead Law.

A good deal of the discussion in the local Press centres round the Legislative Council and the Five Feddan Law. Notwithstanding what has been said to the contrary, the Government seems determined on putting the "Homestead" Law into effect, and it will shortly be referred to the General Assembly of the Mixed Court of Appeal for approval of the amendments made in it. There would appear to be little reason to expect that this measure will meet with much serious opposition in the course of its passage through the Assembly, and the experience gained in the carrying out of its clauses will alone show whether the severe criticisms levelled from certain quarters, not at the principle involved, but at the manner of its application to Egypt, are well founded or not.

Legislative Council Changes.

With regard to the Legislative Council, it is well known that some scheme for the extension of its powers and of the system of popular representation has been in contemplation for some time past. A project has been, indeed, formulated, but a discussion of its details is quite premature, since nothing definite is as yet known. Too much attention should not, therefore, be paid to the elaborate information on the subject which has appeared in the Cairo Press.

Egypt and the War.

As was anticipated in this correspondence last week, the passage of the Holy Carpet and its escort through Alexandria gave rise to no untoward incident, despite the fact that 200,000 people were computed to have watched the procession, and that considerable excitement occasioned by the outbreak of war in the Balkans existed. The interest taken in the progress of hostilities is daily growing, and the native papers are almost hourly publishing despatches from "special correspondents." So far, with but one or two exceptions, the general tone adopted in the articles dealing with the subject has been moderate, and it is to be hoped that there will be no repetition of last winter's events, when some of the vernacular journals published the most exaggerated accounts of Turkish successes in Tripoli, accompanied by inflammatory leaders, having obviously but one object—the incitement of the Moslems against the Christians. The firm manner in which the situation was handled and the offenders were dealt with will no doubt have its effect to-day. In many native circles and in several articles the conviction has been voiced that Austria has been at the back of the whole trouble, and gratitude has been expressed towards Great Britain for her attitude.

The exodus amongst the Greeks continues, and many firms are being hard put to it to fill the gaps in their staff caused by their forced, and in some instances voluntary, departures. Whether they are inconvenienced or not, the commercial establishments affected are all adopting the same generous attitude towards their Hellenic employees.

The Weather and the Cotton Crop.

We have just come through a period of the most unpleasant and trying weather. It is many many years since Cairo experienced such sultry and damp months as has fallen to its lot since mid-September. Indeed, one has to go back as far as 1887 to find any similar conditions at this period of the year. Fortunately the spell is now over, and we are living amid more seasonable circumstances. The one consolation in the midst of these trying conditions was the assertion made by the experts that it did good to the third picking of the cotton crop. It is difficult to imagine that the great humidity which accompanied the heat could be for the good of the plant; but if it was, so much the better, for the larger the crop the greater the benefit for everyone in Egypt. As it is we are assured a record for the 1912-13 campaign. Until the recent fall in prices the fellaheen were selling largely—a sure sign that they expect a large crop. Some difficulty is being experienced in certain districts in getting the fellah to come into the "halakas." For one reason, he and his fellows had already sold their crops whilst they were still unpicked. Another reason is that at places like Facous and Fayum the dealers had absolutely made a ring, and had refused to purchase any cotton from the "halakas." However, the institutions are gradually making their way, and Lord Kitchener's recent visit to the Damanhur "halaka" has done much to popularise them in the eyes of the natives.

The Seditious Circulars.

The inquiry into the question of the seditious circulars still drags along on its weary way. No fresh news has been vouchsafed us. Daily fresh interrogations are carried out, and well-nigh every Egyptian who arrives from Constantinople has to run the gauntlet of an inquiry. It appears that the plot, which was supposed to have been made against the Prime Minister's life, was a trumped-up one engineered by a secret service man, who hoped to gain kudos thereby, but who is now likely to be severely punished.

Owing to the continually increasing demand for "The Near East," difficulty is occasionally experienced in obtaining copies. The Manager will be obliged if, in such cases, readers will at once communicate with him at Devonshire Buildings, Devonshire Square, London, E.C.

NOTES FROM SERVIA.

(From Our Own Correspondent.)

Belgrade, October 19.

The Powers and the Allies.

The Servians and Bulgarians, having resolved to attack their powerful neighbour, have sunk their differences and put aside their petty jealousies. Danger has drawn them, as well as the Greeks and Montenegrins, close together, and it is possible that the *entente* between these Balkan States may lead eventually to what may prove in Europe to be a powerful union. Why not? Have not the once separate Italian States become one unified Italian kingdom? Have not the several independent German States become one great, united German Empire? The Servians are fond of quoting Gladstone's famous words, "The Balkans for the Balkan States," and are now resolved to show that union is strength, a strength which they believe will lead to the realisation of Gladstone's words.

The declaration of the Great Powers that the *status quo* must be preserved, that Old Servia, Macedonia, and Epirus must remain under the dominion of the Porte, even if the arms of the Balkan States should be successful, has not sufficed to prevent the latter making a trial of strength against their common adversary. Even the friendly assurances of the Great Powers that the reforms defined in the Berlin Treaty would be enforced were of no avail. The Porte finally signified to these small States that as they did not heed the advice of the Great Powers and were presumptuous, diplomatic relations should be considered broken off. The united Balkan States replied by declaring war.

The Allies' Ambitions.

They hope, whatever may be the issue, to secure administrative autonomy, a Christian governor, and the impartial administration of justice in order to secure the peaceful development of Macedonia, Old Servia, and Epirus. They believe in the probability of a victorious campaign, and trust in that case to acquire an increase of territory. By the acquisition of Macedonia Bulgaria would become a prominent factor in the Balkan peninsula. Servia, now geographically hemmed in on all sides, would, by the acquisition of Old Servia, have an outlet to the sea, and become a more important country than at present.

Servians consider it a question of life and death to have free access to the sea, but if that dream cannot be realised the acquisition of the Sanjak of Novi Bazar would satisfy their aspirations for the time being. Without a seaport, Servians declare, the life of their country is hampered, and rather than be strangled they would willingly sacrifice their lives in the effort to obtain freedom and prosperity. This is the common view in Servia, and one of the reasons for the great enthusiasm shown for the present war.

Hitherto Servia has been dependent on the will of Turkey and Austria-Hungary for her exports and imports. A drowning man will grasp at a straw, and whatever the Great Powers collectively may say about the ***status quo***, and whatever Austria-Hungary may declare about her intentions respecting the Sanjak of Novi Bazar, Servian statesmen consider that this is a favourable opportunity for action; and they prefer to risk all rather than continue to be geographically suffocated.

The die is cast, the force of arms will decide between the Ottoman Empire and the four Balkan States. Yesterday there was Divine service in all churches in Servia asking the blessing of God for the Servian Army now under arms on the field of battle. Some people regard this war as one between Moslems and Christians. Such persons fight for the liberation of their brothers. I heard a gentleman yesterday describe it as a religious war; he said it might be compared to the Crusades in former years. He was standing at the door of a crowded church, waiting to go in to invoke God's blessing on those gone forth to shed their blood for the liberation of their Christian brethren.

NOTES FROM BULGARIA.

(From Our Own Correspondent.)

Sofia, October 14.*

The Mobilisation.

In spite of the warlike propaganda of the Macedonian Executive Committee and the leaders of the Nationalist parties, the Bulgarian Government was firmly resolved to maintain its pacific policy and to be satisfied with a minimum of efficacious reforms under the control of the Powers rather than have resort to war. And in order to give clear proof of its peaceable intentions it curtailed the Shoumla manœuvres and issued orders for the dismissal of the reservists who had been called to the colours for three weeks' training for the manœuvres. In fact, M. Gueshoff, the Premier and Foreign Minister, was so confident that the Macedonian problem would be solved in peaceful wise that he sent his family off to Vichy, intending to join them there shortly. King Ferdinand also expected a peaceful settlement, and was waiting, somewhat impatiently, the moment when he could go abroad to continue his "cure." And just then came the news that Turkey was ordering manœuvres near the Bulgarian frontier, and actually contemplating the mobilisation of Asiatic divisions and their transport to Adrianople. Startled, the Bulgarian Government hastened to take measures for the country's security. The negotiations for an alliance *ad hoc* for joint action against Turkey on the part of Bulgaria, Servia, and Greece—on the basis of securing autonomous government, under European governors, for the districts inhabited by their kinsfolk in European Turkey, the Allied States renouncing all idea of any territorial aggrandisement—were promptly concluded.

To this self-denying alliance Montenegro readily adhered. Then, after deliberations extending over three full days and nights, the Cabinet Council resolved on radically changing its pacific policy, and (on September 30) presented to his Majesty a decree for a general mobilisation of the army and the proclamation of a state of siege throughout the kingdom. King Ferdinand, approving of these measures, signed the decree, which called to the colours all classes of reservists from 1888 to 1911, thus putting 400,000 men on a war footing. These measures were received with the greatest enthusiasm by all classes; King and Government instantly became most popular; and all political parties voluntarily accorded their full support to the Government. More than 90 per cent. of the classes called up presented themselves in under forty-eight hours. On October 1 half the shops in Sofia were closed, and on the next day the market was closed with the exception of a few shops selling the barest necessities; cafés, restaurants, private banks, and schools were closed; the issue of newspapers ceased; trains stopped running, and 90 per cent. of the cabs and horses and all the motor-cars were requisitioned by the military authorities. The export of grain, flour, forage, etc., is prohibited. The State railways have passed into the hands of the military authorities; the Minister of Ways and Communications has received the military rank of General, and all railway officials have had military rank bestowed upon them. All passenger services have been suspended, as has all goods traffic; and the trains have been given up entirely to the transport of troops and war material. Now most of the troops are on the frontier being concentrated where required. Not a grumble has been heard against the measures taken by the authorities, citizens and peasants alike have voluntarily placed their property at the disposal of the Government. And, as your readers will be aware, at an extraordinary session the Sobranje unanimously approved the Government's action, and voted all the financial measures placed before it. All the deputies, including the twelve Moslem ones, have renounced their salaries for the extraordinary session, asking the President to utilise the money for the purchase of an aeroplane.

The Macedonian Legion.

The Macedonian immigrants in this country, numbering over 300,000, have formed a legion of their own

* Delayed in transmission.

Digitized by Google

composed of over 35,000 men. They have been furnished with rifles, and will be commanded by officers of the Bulgarian Army, who are their fellow-countrymen. Some are already at the front.

Headquarters Staff.

The Headquarters Staff, composed of H.M. the King as Commander-in-Chief of the Army, General M. Savoff, his assistant, and General Fitchett, Chief of the General Staff of the War Office, have left for Stara Zagora. The commanders of the three Bulgarian armies which will operate are: General Radco Dimitrieff, commanding the 1st Army; General Nicolas Ivanoff, former Minister of War, who will command the 2nd Army, which will co-operate with the 1st against Adrianople; and General Kutintchoff, who is entrusted with the command of the 3rd Army, which will operate on Kustendil-Kumanova with the Servians. A party of Servian troops have passed through Sofia, and have been transported via Kustendil-Kumanova. The Finance Ministry has issued instructions that Servian paper money should be accepted in Bulgaria without agio.

SOFIA, October 19.

Reported Maltreatment of Turks in Bulgaria.

The "victims" mentioned in the Turkish newspapers as having been maltreated in Bulgaria of late have telegraphed to the Ministry of the Interior indignantly denying the statements of the Turkish Press. Two Turkish notables, inhabitants of Dobritch, near Varna, whom the Turkish newspapers reported as having been murdered, have sent the following telegram:—"The statements in the Turkish newspapers *Sabah* and *Tanin* that we have been murdered are not true. We are alive and enjoying good health, and up to now have not been molested in any way. It is not true that £T3,000 were taken from me, Hajji Hassan Bekiroff. We indignantly reject the aspersions cast upon the Bulgarian authorities. Signed: Turham Bey, Hajji Hassan Bekiroff." Almost all the chiefs of the Turkish communities throughout the country have sent similar telegrams, stating that they are quite satisfied with the care and protection of the Bulgarian authorities.

The Declaration of War.

Very early yesterday morning a great crowd of the inhabitants of the capital made their way towards the old cathedral church, Sveti Kral, where a service of intercession for the army was to be held. By ten o'clock the square was filled with a great multitude of people and the Macedonian Volunteers with their flags and voivodes at their head. It is estimated to have numbered more than 20,000. The Cabinet Ministers, who began to arrive at that hour, were respectfully greeted by the people. Shortly after Mr. Gueshoff had entered the church Her Majesty the Queen arrived by motor and was greeted with deafening cheers, which she graciously acknowledged. Then came the Ministers of the Allied States, Greece and Servia, M. Panas and M. Spalaicovitch, who also were most enthusiastically acclaimed. The service began at ten o'clock. The Archbishop of Sofia, assisted by all the clergy of the capital, officiated. Prayers were offered up for H.M. Tsar Ferdinand, Queen Eleanora, Crown Prince Boris, and all the Royal House, also for the Russian Royal Family, and finally for the rulers and the Royal Families of the Allied States. Similar services were held in all the churches throughout the country, in which the divine blessing was invoked for the Bulgarian Army; and thus the Holy War of the Cross against the Crescent received the benediction of the Bulgarian Church.

The King's Manifesto.

Yesterday, at eight o'clock in the morning, King Ferdinand, accompanied by his sons, the Crown Prince and Prince Cyril Preslavsky, and his assistant of the Headquarters Staff, General Savoff, arrived at the Church of the Holy Virgin of Stara Zagora. The venerable Archbishop of Stara Zagora, Methodius, with his clergy, received the King at the doors of the church. After the recitation of the Holy Gospel the Archbishop, from the steps of the altar, addressed the King thus:—

"Your Majesty, once the disunion of the Balkan States brought the Turks into the Balkan Peninsula, and enabled them to reign over the people of the present four allied States for over 500 years and to hold them in slavery. These people were civilised while Europe was in a semi-barbarous state. Now once more the alliance of these same States will drive out the Turks and inaugurate the coming of liberty and culture. This alliance is a miracle in history. Your Majesty has been destined by Providence to bring about this alliance. This alliance—this miracle—shows that the initiative of your Majesty is pleasing to God. May the All-merciful God bless the work of your Majesty for the welfare of the oppressed and for the triumph of the Cross over the Crescent. May the Almighty grant victory to your arms, and enable us to hail you as the Tsar Liberator."

At the end of this address all present joined in a heartfelt "Amin." His Majesty then mounted the archbishop's throne, and in a firm tone read the manifesto to the Bulgarian nation, which produced indescribable enthusiasm. Outside the church the crowd, strewing flowers, loudly acclaimed the King, the Royal Princes, and the officers of the Headquarters Staff.

Cabinet's Greeting to the King.

Yesterday the Cabinet Council sent the following congratulatory message to the King:—"It has been pleasing to the Almighty that your Majesty, the most peace-loving sovereign, should draw the sword for the accomplishment of the holy work of liberating our oppressed brothers beyond the mountains of Rilo and the Rhodopes. On this occasion all Bulgaria is to-day united in fervent prayers to the Almighty to grant health to your Majesty, the most worthy Commander-in-Chief of the brave Bulgarian troops, to strengthen your right arm, so that you may inflict prompt and crushing defeat upon the oppressers of our brethren. Long live the Tsar of the Bulgarians! Long live the brave Bulgarian Army! Long live the Bulgarian nation!"

NOTES FROM ROUMANIA.

(From Our Own Correspondents.)

Braila, October 19.

Roumania and the War.

When it was first seen that war in the Balkans was inevitable, some anxiety was felt here lest Roumania might find herself implicated in the struggle. It was not known whether any military convention existed with Turkey, and, if so, how far it committed Roumania. It was also thought possible that this country might receive a mandate from the European Powers to mobilise her army in order to check Bulgarian aspirations. Gradually, however, it became apparent that Roumania intended to remain neutral; the venue of the grand manœuvres was changed at the very last moment; troops were withdrawn from Dobrouja; and the Bulgarian mobilisation order was not followed by mobilisation here.

A war against Bulgaria would not have been very popular; for although there is any amount of jealousy between Roumanians and Bulgarians, there is certainly no hatred. The Roumanians hate three peoples—the Hungarians, for the way their Transylvanian brethren are treated; the Russians, for their annexation of Bessarabia; and the Greeks, for the corruption which the Phanariote rulers introduced in this country. It was also not clear what advantages Roumania could reap from the Balkanic imbroglio, as she has no aspirations south of the Danube. She would, however, view with a very unfavourable eye any Bulgarian aggrandisement, which would give her too powerful a neighbour; and if she remains neutral she is not disinterested, and, as her statesmen have distinctly stated, expects to be consulted before any change of the *status quo* takes place in the Balkans.

If war with Bulgaria is, for the present at any rate, considered improbable, the possibility of another war is, however, being quietly discussed. It is not impossible that, notwithstanding all efforts to reconcile antagonistic interests, Austria and Russia may fall out over the Balkan crisis, either during the war or at its close; and in that case Roumania would find herself on the side of Austria against Russia. She is bound to Austria by military conventions, and moreover such a war would be very popular, as Bessarabia would be the prize of victory.

The army here is in a very efficient state, and ready for all eventualities. It could be mobilised in a very few days. Particular attention has been paid lately to the efficiency of the Third and Fourth Army Corps, which have their headquarters at Galatz and Jassy respectively, near the Russian frontier. The troops are being drilled and inspected more frequently than formerly, and the men whose term of active service expired on October 1 Old Style (October 14) have not yet been released.

Bucharest, October 19.

Prince Yussuf Izzeddin.

H.R.H. Prince Yussuf Izzeddin, the Turkish Heir Apparent, passed through here incognito on Wednesday by the Orient express, coming from Vienna.

Bulgaro-Roumanian "Incident."

A regrettable incident has occurred at the port of Varna through an excess of zeal on the part of the harbour authorities. The Roumanian cargo-boat of the State service, "Principesa Maria," had been ordered to that port to embark a number of Turkish subjects who desired to leave Bulgaria before a declaration of war, but the authorities at first refused to allow the boat, though of neutral flag, to enter the port, keeping her for four hours in the roads. When the steamer finally wished to leave, the Bulgarian authorities, pretending that she had not the right to embark Turkish subjects, refused to let her sail. The Commander Michaelescu telegraphed to the direction of the State service, which in its turn informed the Government. The Roumanian Minister at Sofia, Mr. Demetre Ghica, thereupon made strong representations to the Bulgarian Government. The Varna port officials were then instructed to allow the steamer to leave immediately, and after a delay of fifteen hours she got away.

NOTES FROM ODESSA.

(From Our Own Correspondent.)

Odessa, October 20.

The Balkans Blaze.

The dogs of war are at last unleashed, and the dread cry of havoc reverberates throughout the unhappy Balkan peninsula. From various and so-called inspired sources it is stated that Russia and Austria have already arrived at a perfectly clear and mutually binding agreement as to their joint and inviolably neutral attitude in view of any possible contingencies that may arise. That assurance may be accepted for what it is worth, and no more. In the meantime the anti-Austrian campaign in the Russian Press, both metropolitan and provincial, grows daily more frenziedly virulent, and is dangerously exciting public feeling and Slav sentiment. It is well to bear in mind that it was the overwhelming intensity of this same Slav sentiment that, in 1876, morally compelled Alexander II. to declare war against Turkey for the liberation of the Balkan Slavs. Journals of such wide influence as the *Novoye Vremya*, the *Russkia Viedomosti*, the *Zemstchina*, and the *Russkoye Slovo* explicitly declare that if, under any circumstances whatever, Austrian troops enter the Sanjak of Novi Bazar, which lies across the path of the Dual Monarchy's contemplated advance upon Salonika, that transgression will, *ipso facto*, be regarded by Russia as a *casus belli*, and grave complications will become inevitable. This increasing popular hatred of Austria was evidenced the other day at Kieff, when an enormous crowd paraded the chief thoroughfares of the Ukraine capital singing the Russian and Bulgarian national hymns. The procession halted opposite the Austrian Consulate-General with vociferous cries of "Long live Great Russia! Down with Austria!" The Austrian Consulate-General is now protected by a police guard. This popular feeling against Austria is somewhat unreasonable. Austria annexed Bosnia and Herzegovina, but to that procedure Russia practically gave her consent in 1878. Count Aehrenthal treated M. Isvolski as an impatient schoolmaster would treat a dull-witted pupil; but was not Aehrenthal's duty the protection of Austrian, and not of Russian, interests? Count Berchtold has declared that it is Austria's duty to protect the Catholic Albanians; the *Novoye Vremya* asserts that that declaration means robbery! Why? One would think that Austria, who is also a Slav Power, has the same right to extend her protection to the Christian Albanians as Russia had, and has, to support the claims of her Orthodox kindred in Bulgaria and Servia. But neither the Russian Press nor the Russian people are just now in a reasoning mood. They are both alike exasperated at the sight of Russia standing by impotently passive whilst the Bulgars and Serbs, whom the Russian arms freed from Turkey's yoke thirty-four years ago at the cost of so much blood and treasure, are again at deadly grips with the traditional foe, and this exasperation is not unnaturally intensified by the suspicion or belief that Austria will take whatever advantage she can from Russia's passivity.

Despite the strength and efficiency and patriotic enthusiasm of the Bulgarian army, there obtains in this country a nervous apprehension of the result of the Balkan struggle. The Russians do not underrate the sheer fighting prowess of the Turkish soldier, and apart from his prowess as a fighter the Moslem will have a numerical advantage. The Sultan's call to arms means a *levée en masse*, and, thanks to the timely conclusion of peace with Italy, the 375,000 Turkish troops now in Europe may be rapidly augmented by further huge drafts from Asia Minor.

LETTER FROM MALTA.

(From Our Own Correspondent.)

Valletta, October 11.

A Remarkable Suggestion.

Under the above heading the *Broad Arrow* recently published some caustic comments upon a scheme some time ago propounded in an Italian review by a Mr. Enrico Mizzi, a Maltese, jointly with an Italian gentleman, for the exchange of Malta for Erythrea. Considering that one or two other English papers have also thought fit to refer to the scheme, though only to ridicule it, I think it well to say a word about the reception it was accorded locally. Since the first moment it was brought to the public notice it has been simply laughed away. The local Press, without distinction, thought it too absurd for serious comment, and when at last it was dragged into a discussion of it by the notices of the English papers referred to, it denounced it in every mood and tense. And the local Press has thereby only interpreted the feelings of the white population of the island, for a change of flag is wished for by no one here except by Mr. Mizzi, who has a perfect right to think and wish as he likes, but none whatever to voice the popular feeling and opinion.

Cardinal Bourne on Malta.

General satisfaction has been produced here by the speech delivered by the Cardinal Archbishop of Westminster, in reply to the toast of his health, at the fourth annual dinner of the Malta Association, held in London on the 26th ult., at which his Eminence was the guest of the committee. It is clear that Cardinal Bourne retains a lively and grateful remembrance of his recent visit to the island, to which he referred in most affectionate terms. As was to be expected, his Eminence referred to the forthcoming celebration of the Eucharistic Congress, at which he will officially participate, maybe as Papal Legate. About 2,000 people are expected from England to assist at the Congress, for which, by the way, preparations are proceeding apace.

The Emigration Question.

This ever-burning question—perhaps the greatest of our present economic problems—has happily again assumed a hopeful aspect, in consequence of another letter addressed to the *Daily Malta Chronicle* by Dr. Richard Arthur, M.P., Sydney, the president of the British Immigration League of Australasia. Dr. Arthur breaks another lance in favour of Maltese emigration to the Commonwealth, but condemns the haphazard emigration which has been going on for some time past, and advocates the sending of a special Commission to make inquiries on the spot, with a view to organising a workable scheme. If any practical result is arrived at, it will be to the advantage of all parties concerned; for on the one hand we are convinced that Australia is the best field for Maltese settlement, and on the other hand we are equally sure that our people need only be better known to be warmly welcomed in the Commonwealth as most desirable settlers.

Miscellaneous.

Owing to the Balkan crisis and the general unrest it has produced, the programme of movements of the Mediterranean Fleet has been modified. The Fleet is widely scattered; four ships are at Samos and Crete, and there are at present only two cruisers in Malta Harbour.

At the annual ceremony of the reopening of the University and other Government Educational Institutes, which was, as usual, held on the 1st inst., his Excellency the Officer Administering the Government (Major Clauson, C.M.G.) delivered a telling speech brimful of sound advice to the rising generation. He especially emphasised the necessity of pursuing modern educational methods, and laid stress on the study of modern languages. He also advocated the culture of Arabic, so closely akin to the Maltese tongue. It may be stated in this connection that when France shall have settled her Moroccan affairs, there is sure to be a good opening for Maltese emigrants in that large, unexploited country.

NEAR EAST BOOK NOTES.

Those who are following with attention the startling course of events in the Near East will find of use three books which have been published by Sir Isaac Pitman and Sons, Limited, and of which reviews have already appeared in these columns. "Servia of the Servians," by M. Chedo Mijatovich, formerly Servian Minister at the Court of St. James's, is an intimate account of the Servian people, both as regards their past and as regards their present history; "Turkey of the Ottomans," which is also one of the volumes in the "Countries and Peoples Series," is the work of Miss L. M. J. Garnett, a writer of note on Eastern subjects; and, for the further study of a curious aspect of Turkish life, her "Mysticism and Magic in Turkey" may be recommended.

"Carmen Sylva" has just published some further "thoughts." The following are some of them:—

Happiness is like an echo; it answers, but never comes.

Love only knows the present. Friendship says: "Do you remember it?"

Men study women like a barometer; they never understand it till the day after.

That which makes us blush in youth causes us to weep in middle age and to smile in old age.

In friendship it is better to listen than to give advice.

When one wishes to prove anything, one invokes the Almighty as witness, because He never contradicts.

Amongst books published quite recently or shortly to be published may be noted: "A Tramp's Sketches," by Stephen Graham, who tells of his wanderings on the shores of the Black Sea and on a pilgrimage to Jerusalem undertaken in the company of Russian peasants (Macmillan); "Kings and Gods of Egypt," by Prof. Alexandré Moret (Putnam); "My Life in Four Continents," by Colonel Chaillé-Long, who was Gordon's Chief of Staff in the Sudan (Hutchinson); "Christian Antiquities in the Nile Valley," by Somers Clarke (Oxford University Press); and "The Ancient History of the Near East from the Earliest Period to the Persian Invasion of Greece," by R. H. Hall, of the Department of Egyptian and Assyrian Antiquities at the British Museum (Methuen).

In his preface to "The Tribes of Northern and Central Kordofan," the author, Mr. H. A. MacMichael, writes:—"My aim has been to describe the antecedents of the tribes at present inhabiting the province in so far as any information upon the subject can be gleaned from extraneous sources or from current native tradition. At the same time, while as a general rule planning to omit minute descriptions of people and places, and avoiding discussion of current questions, whether political or commercial, I have found it advisable to make occasional exceptions where understanding of the conditions of the past and the links connecting it with the present would have been impaired by such unnecessary limitation in the scope of the work." A first glance at the volume shows that it is well planned, scientifically arranged, adequately illustrated, and provided with a good map and index and some useful appendices.

We have received from Messrs. Luzac and Co. their new special list No. 10 of publications dealing with Oriental religion and philosophy. Readers who are interested in these branches of Oriental study should write for a copy of this catalogue. The same publishers are shortly to issue a new grammar of modern Arabic by Spiro Bey, Professor of Modern Arabic in the Geneva University.

BOOKS RECEIVED.

A PERSIAN NOTABLE.

(From a Persian Correspondent.)

Who is Shuja-ed-Dowleh? The present Governor of Azerbaijan, up to five years ago, the beginning of Mashroota, was unknown. Some thirty-five to forty years ago, when he was a young man, he was a Samad Khan, Sarhang (major), and rumour has it that he used to take part in robbing caravans, sometimes personally, sometimes through a gang of men, whom he used to keep and protect for plundering purposes. His men would attack a caravan and loot it. The merchant-owners would go to Maragha and complain to the Governor. The Governor would order Samad Khan, Sarhang, to take with him a dozen or more horsemen and capture the robbers. He would do so. He would capture some of the robbers; the rest would "escape." The captured robbers would be brought to Maragha and handed over to the Governor to be punished, and the Governor, after getting his share of the plunder, would turn them over to Samad Khan to "punish" them. Samad Khan would throw them into "prison." After getting his share of the looted goods, he would let the robbers escape, one by one, at night, when the gaoler would be "sleeping," or the robbers would dig a hole through the prison wall and run away "without the gaoler knowing it." During the course of several weeks, or months, all of the robbers would be again on the hills and upon the main roads, waiting for another rich caravan to come. In the meantime, the former robbery would be forgotten, and the merchants would be under the delusion that the robbers were in chains in prison and going to be punished some day, and that they would get back, some day, their lost goods of the ill-fated caravan.

Samad Khan, for his bravery and boldness in capturing robbers, was made an "Amir-Tooman" (commander of a thousand soldiers). After that his promotion was rapid. He was successively made "Sadil-el-Mulk" by Nasir-ed-Din Shah, "Sardar-i-Mukhtadir" by Muzaffar-ed-Din Shah, and, during the Tabriz fighting, with Sattar Khan against Mashroota, Samad Khan was appointed an "Amir-Nooyan" (commander of a hundred thousand soldiers), and later on a "Shuja-ed-Dowleh" by Mohammed-Ali Shah. "Amir-Nooyan" (commander of one hundred thousand soldiers)! For the last fifty years Persia has never had 30,000 soldiers in one place and at the same time, but titles are cheap. Persia is the land of titles. They are great things, and accomplish great things. The empty title of four years ago, which was a title only on paper, has become a reality at the present moment. Shuja-ed-Dowleh is not "commander of a hundred thousand soldiers," because he has not got them, but he is the commander and ruler of over a million souls in this province.

He may have dreamed of this more than once before, but it must have seemed to him only a dream, and a distant dream too. Yet now it is a reality—a fact. When a person rides an Arabian steed, wears a golden-sheathed sword at his side, and commands a few thousand men, it is quite natural for him to dream such princely dreams. Samad Khan knows the story of Nadir Shah, and if we follow the thread of his acts for the last five years, we will at once see that he is following in the footsteps of that gentleman. Nadir Shah was the son of a poor man, who used to earn his living by patching old shoes. His son, Nadir Kuli, was a robber chief. When Shah Ismail died, and the Afghans invaded Persia as far as the capital city of Ispahan, there being no Crown Prince, the khans of Persia joined forces, fought the Afghans, and expelled them from Persia. Nadir Kuli also had joined these khans with his several score robbers, by whom he was styled as "Nadir Kuli Khan." After the expulsion of the invaders, the khans fought against each other, each one aiming to get possession of the throne. Nadir Kuli Khan supported the strongest khan, who defeated them all, captured and put them to death, and made Nadir Kuli, his friend and supporter, the chief of his army. One night Nadir Kuli Khan (the son of the old shoemaker) assassinated his superior in his tent, became the commander-in-chief of the army, and, later on, proclaimed himself as the Shah of Persia. Nadir Shah not only expelled the Afghan invaders, but he also invaded their country, and marched with his army as far as Delhi in India, from whence he brought with him the now-famous Peacock Throne of Persia.

Samad Khan now thinks, and with right, "If this son of an old cobbler could become the Shah of Persia, why could not I become a Shah of Persia myself?" He, who comes from a much superior and nobler family than Nadir Kuli Khan! The tribe, or the family of Samad Khan is called "Ahmad Khanli" by the name of Ahmad Khan, the great-grandfather of Samad Khan, who lived, it is said, some ninety years ago, and used to rule with an iron hand. He was a fierce man, with little patience, and still less mercy for wrong-doers. He preferred justice to mercy in delivering judgment and awarding punishment. In his time he built walls around the towns of Maragha and Marhamatabad (the modern Miandoab), which still stand in a fairly good condition. Those walls were made of earth, lime, sand, and stone. It is said that he used to superintend the works in person. Within twenty-four hours after a portion of the wall was made he would step on it, and if his feet left any impression upon it, the unfortunate wall-maker would be buried alive in the wall. He claimed that the clay should be prepared in such a way that after it had been upon the wall and under the sun for twenty-four hours, it should be as dry and hard as stone. Legend says that more than one mason was the victim of his unbounded wrath, and was buried alive within those walls. The wall of Marhamatabad is built without stones, because there are no stones within a radius of twenty-five to forty miles, but it is much wider than the Maragha wall; it is wide enough, it is said by those who have seen it, to permit a carriage to pass upon it with ease. Samad Khan is a true and direct offspring of his worthy ancestor, and inherits his nature and character as well. Like his prototype, he is a fierce man, severe in his punishments and terrible in anger. He is short of patience (when he has authority), and still shorter in mercy.* Justice is shown where it is possible to prove the victim's innocence, but disobedience—intentional disobedience—to command and to law is punished in such a way that men will talk of it as long as they live and have a memory. Ninety long years have rolled away into eternity, but the old men still talk of the severity of Ahmad Khan. Samad Khan hears these legends about his great ancestor, and likes them because he, too, very much resembles him in his "likes" and "dislikes," in his manner, in his impatience, his severity, his punishments, and in his "divine right" to rule and to command.

Once upon a time two robbers killed a servant of Samad Khan. Ten years later Samad Khan captured them. "How did you kill my servant, Hasan?" he enquired of them. They were silent. Samad Khan had their ears cut off and roasted, and compelled them to eat their own ears. He again asked them: "In what manner did you torture and kill Hasan, my faithful servant?" Again they were silent. He thereupon ordered that their noses should be cut off. Then their lips were cut off, and, after undergoing further mutilation, they were dragged like dead dogs through the streets, and thrown into a public square. So that he is rightly nick-named "Samad, the Revengeful." Up to the time of becoming Governor-General of Tabriz Samad Khan had never put a person to death by beheading him. His victims are numerous, but he has executed them always by whipping in the falakhga (bastinado). He has killed them by torture, not by the easy and swift method of cutting their heads off. The torture of a victim strikes terror into the hearts of the rest of the people. Decapitation and imprisonment do not coincide with his ideas of rule and power. Since he has been in Tabriz he has indulged in some head-cutting and more hanging (over forty men have been hanged by his orders), but this has been done at the instance of other advice than his own. To drill a prisoner's nose; to sew another's lips, so that he can neither talk nor eat nor drink; to cut off another's ears, or drill a hole through

* One of his captains told me Shuja-ed-Dowleh is sometimes so big that Tabriz will not hold him, and sometimes he is so small that he can pass through the hole of a needle (referring to his unwilling submission to Mashroota, after Mohammed-Ali was dethroned).—M.F.K.

Digitized by Google

them and drag the prisoner through the bazaar by a coarse string, are some of his special and particular methods of punishment.

Since 1907, when Mashroota was granted for the first time by the late Muzaffar-ed-Din Shah, this entire province has been in a state of storm and disturbance, with the exception of one spot—Maragha, where Samad Khan was Governor. Ardebil, Khoi, Salmas, Sojbulak, Urmi, and Miana have been "Shooloogh,"* the villages plundered and looted by the Kurds, the Shahsevans, the Karadaghlis, and by robbers; but Maragha has been secure and quiet, like Gibraltar, all the time, because Samad Khan was there.

MIRZA FIROOZ KHAN.

LETTERS TO THE EDITOR.

ANGLO-TURKISH RELATIONS.

To the Editor of THE NEAR EAST.

Sir,—Halil Halid Bey has done good service to the cause of truth and fairplay in placing before your readers a temperate statement of the case for the Turkish reforomoers, a mere handful of men, who have never received in their own country or elsewhere that support to which they are entitled. These men have done their utmost to persuade the governing Turk to seriously address himself to the question of reforms in the provincial administration, and so cut away the ground from under the feet of hostile critics. It is not—and never has been—a question of increasing the number of non-Moslem governors, but of selecting *competent men* (irrespective of nationality), who would persevere in the work of reform with a single mind. Let us, then, in fairness to all parties, remember that the Concert of Europe does not exist for *effective* action, and that the Powers, which have consistently barred the way by duplicity and fostered disorders, are the real cause of the war, caring not a brass farthing for the ruined homes and desolation and bloodshed inseparable from war, and looking on selfishly at their infernal handiwork.—Yours truly,

6, Adelphi Terrace, W.C., EDWARD ATKIN.

THE BALKAN COMMITTEE'S MANIFESTO.

To the Editor of THE NEAR EAST.

Sir,—The secretary of the All-India Moslem League does us an injustice. We have constantly striven to avert war, and have urged Turkey to institute reforms, which would undoubtedly have prevented war. In our last annual report, presented to the members as late as June last, the following passage occurs:—

> The attitude of the Balkan Committee towards Turkey is too well known to need restatement here. In all friendliness they would impress upon its governors, especially at the present crisis, that the safety and welfare of their country and people lie, not in their military strength, but in the loyalty and contentment of the inhabitants of all races and creeds. The adoption of the formulæ of constitutional government, combined with the practice of the worst methods of despotism, will effectually alienate British sympathy from the Turks, and enlist it on the side of the oppressed subject races. But for a great, free Empire, based on the principles of justice and equality, such as, it was hoped, the Young Turks were going to build up on the ruins of Hamidian misrule, strong support would be forthcoming from the nations which themselves enjoy the blessings of constitutional rule.

The warning and appeal went unheeded, and the subsequent conduct of the Turkish Government, the iniquity and corruption at the elections, and the unpunished massacres at Kotchana and Berane, destroyed alike the sympathies and hopes of all who, like the Balkan Committee, had pleaded that the Young Turks should have a fair trial.

Nor is it true that we have incited England "to take a hand in the dismemberment of Turkey." The policy we have consistently advocated is that of the grant of self-government or the administration of the subject provinces under the direct control of the Great Powers. So far from any "dismemberment" being suggested in that policy, there is implicit recognition of the retention of the provinces under the suzerainty of the Porte. Whether the severance of Macedonia and Albania and the Ægean Islands may eventually be necessary for what the late Lord Salisbury called "the consolidation of Turkey" is not now the question. At all events, the Balkan Committee have not advocated it. But amputation is sometimes the only possible remedy for festering sores.—Yours faithfully,

ARTHUR G. SYMONDS,
Secretary of the Balkan Committee.

Queen Anne's Chambers, Westminster, S.W.,

* Shooloogh means 'in disorder.'

THE LATE REGIME IN EGYPT.

To the Editor of THE NEAR EAST.

Sir,—THE NEAR EAST has been one of the first to draw attention to the marked improvement in the state of affairs in Egypt, due to the revival of the old policy of the firm hand. To no body of men has this change appealed more than to the large body of non-official Englishmen, and, as one of them who has seen much happily hidden from official eyes, my experiences of what the late policy really meant in practice may be of some interest. On the occasion of Napoleon's coronation, solemnised by all the rites of the Church and attended by all the pomp and circumstance peculiar to kings, it was remarked by some cynic that all that was wanting was the presence of the thousands of Frenchmen who had died to stop such ceremonies. On observing the recrudescence of bribery and corruption in Egypt, the natural consequence of the policy of "masterly inactivity," it might with equal truth have been remarked that all that was wanting was the spectre of the thousands of lives and millions of pounds spent to put an end to such a state of affairs.

It is an axiom in the East that the accession to power of the Radicals in England is marked by a loosening of the bonds of authority and a diminution of our prestige. In no part of our Eastern Empire was this more marked than in Egypt, where our prestige fell to a very low ebb. The salvation and practical re-creation of Egypt at the hands of Lord Cromer have always been a source of pride to Englishmen, and will go down to posterity as one of the finest achievements of the age. Egypt has been called the "Gift of the Nile"; modern Egypt might well be called the "Gift of Lord Cromer." The fatal policy of the Radicals nearly brought down the whole of the fabric on our ears. When the reins of power fell from the hands of Lord Cromer into those of his successor, who was not allowed to govern according to knowledge, but according to Radical ideas, it was felt by all who knew the country that the seven lean years were on us. These fears were justified. The Radicals endeavoured to enforce democratic and representative ideas in a country which, like all Oriental countries, can only be governed by the strong hand. Democratic ideas, a mere blunder in England, become a crime in the East, and, as Gambetta found of anti-clericalism, do not make good "objets d'exportation."

No one could wish to deny that our policy here should be directed to training the Egyptians to take some part in the governance of their country; no one who knew the country would have asserted that they were fit to do so. The inherited vices of centuries cannot be eradicated in thirty years, and although we have had a measure of success in our efforts to turn out officials, we have not yet succeeded in turning out men. The most striking proof of the present unfitness of the Egyptians to govern themselves is to be found in the view they take of corruption in public life. They regard it as a venial offence, if an offence at all. A perfect wave of bribery and corruption, the twin curses of Egypt, spread over the land when the effects of the late policy began to be felt. Native officials, finding that hard work and the honest execution of their duties counted for little as compared with the favour of their native chiefs, naturally endeavoured to gain such favour after the manner sacred to the East. As a business man, whose daily work brought him into close contact with the natives, the writer used to hear the natives discussing quite openly the means they were employing to gain promotion.

It is impossible to allege that the substitution of native for English officials was for the greatest good of the greatest number. The Radicals hoped to throw a sop to the Cerberus of the Nationalists by appointing, for example, a native inspector of irrigation. This, no doubt, pleases the Nationalists, but do they ever consider the aspect this appointment bears to thousands of natives whose livelihood depends on the manner in which the duties of the inspector are carried out, and who suffer daily by the substitution of an incapable and sometimes dishonest native official for an upright and honest Englishman? Natives, who were compelled to bribe to obtain that first necessity of life to an agriculturist, water; who were compelled to ransom their stolen animals from the brigands in the absence of any adequate protection from the authorities, and who were no longer certain of obtaining justice against the rich and powerful, naturally did not appreciate the blessings of the theory of "Egypt for the Egyptians," dear to the hearts of Radicals at home. The better class of natives were as disgusted with the policy of drift as were the Europeans. They remarked, with perfect truth, that it would have been much better to have left them alone to carry on their affairs in the good old style of "Bukra" tempered by "Bakshish" than to have forced honesty and justice on them at the point of the bayonet and then to have allowed matters to revert to their old conditions. As to the effect of the late policy on the feather-brained schoolboys, yclept "students," the events of the last few years

Digitized by Google

speak eloquently. Were it not that the grotesque puerility of their theories were counterbalanced by the extraordinary ineptitude of their performances, events might have taken place which would have demanded the severest retribution. What would have been the condition of the country had the full tale, seven lean years, been completed it is impossible to surmise. Fortunately, the indiscreet wisdom of a strong man opened the eyes of England to what was going on, and the country was saved from absolute disaster.—Yours, etc.,

MADGE HOOLE.

Zeitoun, Cairo.

"IT HAPPENED IN SMYRNA."

To the Editor of THE NEAR EAST.

Sir,—I have read the two letters from Smyrna correspondents, published in your issue of the 18th instant, with regard to the above book and my review of it, which appeared in THE NEAR EAST of September 27. With reference to the letter of Mr. La Fontaine, I would wish to point out that the review in no way, either implicitly or explicitly, accepts the sayings and doings of Paynter as "the personal experiences of the author founded on fact." I know nothing whatever of the author, and there is nothing in the book to lead one to infer that he is relating his own personal experiences.

With regard to Mr. R. J. Whitall's letter, I wish to say that the word "Levantine" was employed by me as a geographical, not as an ethnological term. I am therefore sorry to have inadvertently wounded the susceptibilities of any British resident of Smyrna.

That the English colony "in these odd 100 years has built and endowed three churches and started horse-racing and established the Races Club" is surely sufficient evidence of the fidelity to tradition and race which characterises the Smyrna colony.

Finally, I would like to add that, the circumstances alleged by your correspondent being entirely unknown to me, I read the book as a piece of fiction pure and simple, and reviewed it as such. Should the facts prove to be as depicted they are certainly to be regretted, but would it be the duty of a reviewer to allow personal prejudice to affect his estimate of a work of fiction? Had I known of the facts—accepting them for the present as facts—I would have asked to be excused from reviewing the book.—I am, etc.,

YOUR REVIEWER.

To the Editor of THE NEAR EAST.

Sir,—My attention having been called to a review of a novel entitled "It Happened in Smyrna" in your issue of September 27, I bought a copy of the book, which I have since read.

Of its literary merits I say nothing—*Chacun à son gout*—but when you write of it as being full of "truthful tableaux of local minds, manners, and morals," I crave your permission to make a brief reply.

That the author has been in Smyrna, and was hospitably received, is evident from his book. As to what manner of man he must be who, having accepted hospitality, publishes a work in which under a very thin disguise he holds up his hosts to ridicule and contempt, I leave your readers to judge. My concern is with the facts. My knowledge of the Near East is doubtless greater than that of the author of "It Happened in Smyrna," extending as it does over a period of thirty-nine years.

I have lived among and visited many times the people whom he reviles. Some of the "English Levantines" are among my oldest and best friends. Many of them have been to English public schools; some to the Universities of Oxford and Cambridge. I have ever found them kind, hospitable, and courteous, good sportsmen, brave high-principled, and in the matter of kindness to the terribly poor population round about them, shaming the average stay-at-home Englishman. More than this, their patriotism and concern for all that affects the honour of the Old Country is more intense than is felt, or even understood, by the "man in the street" here at home.

That a small foreign community living in Asia Minor should develop little peculiarities of pronunciation, or expression, is certainly not extraordinary. The same may be said of the countless English colonies spread over the world. But that their characters should be traduced by one who was kindly received and assisted by them appears to me a matter only to be characterised by language I would prefer not to use, and I cannot but express my surprise that pictures "of local minds, manners, and morals," which at the best are grotesque travesties of fact and at the worst absolutely false, should be described by you as "truthful."—I am, sir, your obedient servant,

W. W. STORR.

The White House, Coatham, Redcar,
October 23, 1912.

NEAR EAST IN PARLIAMENT.

Rumoured Turkish Loan.

In the House of Commons on Thursday of last week, in reply to Mr. Hugh Law, Mr. Acland stated that there was no truth in the report that the British Government were assisting Turkey at the present moment to obtain a loan in the City of London. The Government had not been approached, nor had they had any communication with financiers on the subject of a loan to Turkey.

Mohammerah-Khorremabad Railway.

Colonel Yate asked whether the committee that was said to have been sitting at the Persian Foreign Office in Teheran to consider the British application for a concession to construct the proposed Mohammerah-Khorremabad Railway had yet reported, and what prospects there were of an early start being made on this railway. Sir E. Grey replied: "Negotiations on the subject of a British application for a concession for the Mohammerah-Khorremabad railway project are still in progress. I am unaware whether the report indicated by the honourable and gallant member has been yet made, nor can I at present predict the date when construction is likely to begin."

Persia's Gendarmerie.

Replying to questions also put by Colonel Yate, Sir E. Grey said that he had received no official information whatever to the effect that the Swedish-officered Gendarmerie was being disbanded. He hoped that the attempt to establish efficient gendarmerie under Swedish officers would not break down. Should it do so other expedients would have to be considered, but at present he could not take that matter into consideration.

Persian Affairs.

On Tuesday Persia's troubles came in for considerable discussion. First, Mr. Morrell asked the Foreign Secretary whether any proposal had been made for the appointment of a new financial adviser in Persia; and whether any negotiations were still proceeding to enable the Persian Government to obtain an adequate loan. Sir Edward Grey replied that during the recent visit of the Russian Minister for Foreign Affairs to this country the needs of the Persian Government for securing an adequate loan were fully recognised. The matter was still under careful consideration. The question of a new financial adviser was not specifically raised. It was recognised that if the financiers lending the money made it a stipulation that there should be Treasury control, the Persian Government would have to take that into consideration.

Then Mr. O'Grady asked whether the Foreign Secretary had any official information showing that the hanging and butchery of Persians in Tabriz were perpetrated by order of Shuja-ed-Dowleh, one of the ex-Shah's generals, because the victims took part in the revolution that led to the dethronement of the ex-Shah; whether he was aware that Shuja-ed-Dowleh was still nominally Assistant Governor of Tabriz, and was kept in that position by pressure from the Russian Government; and would representations be made in the proper quarter that Shuja-ed-Dowleh should be brought to trial before a Persian tribunal. Sir E. Grey replied that the answers to the first and third questions were in the negative. "The answer to the second question," he continued, "is that Shuja-ed-Dowleh is nominally Governor of Maragha, a place many miles from Tabriz, and although he has been temporarily acting as deputy to the Sipahdar, who arrived at Tabriz on September 1, there is, so far as I am aware, no foundation for assuming that he is kept in that position by pressure from the Russian Government. If we undertook to do what the hon. member asks in the last part of his question it would be an extension of our responsibilities that would be very undesirable. As I am informed that some charge has been made that I am responsible for Shuja's proceedings, I should like to take the opportunity of stating that it is entirely untrue that I have taken any action in support of him or his appointment. An inquiry was made early in the year of the British Minister at Teheran respecting Shuja's disposition towards the Persian Government, but it was not followed by any action on our part."

Mr. O'Grady wanted to know if it was not a fact that "requests were repeatedly made by the Russian Government to the Persian Government actually to appoint this creature Governor of Tabriz, and that they refused to do so." Sir E. Grey, however, "could not tell what might have passed between the Russian and Persian Governments." He would ask for notice of further questions the hon. member might wish to put. In reply to a further question from Mr. Morrell, the Foreign Secretary said: "There were 12,400 Russian troops in Persia in July last. Since then I have heard from His Majesty's Consul at Tabriz, who has reported that Russian troops had begun to withdraw, and that about 2,300 had left Tabriz in the last two days. I have also heard that a Russian force is at present proceeding to the neighbourhood of the Turco-Persian frontier, but it is not quite clear whether the 2,300 who had left Tabriz were the force referred to."

Question of Contraband.

Mr. Acland informed Mr. Leslie Scott, who asked whether Turkey, Greece, or either of them, had bound themselves by adopting the list of contraband and free goods contained in the Declaration of London, that neither was signatory to the Declaration. A telegraphic summary from his Majesty's Minister at Athens of the articles declared by Greece to be contraband would appear in the *London Gazette*. The Government had not yet received any information as to what articles Turkey would declare contraband, but had telegraphed to inquire whether the notices issued at the commencement of the Turco-Italian War still hold good.

CURRENT COMMENTS.

Happy is the nation which has no history; and the converse applies to one whose annals reveal a series of disasters Such is the plight of Turkey. Time was when her dominion extended from the confines of Persia to the outskirts of Vienna, embracing Hungary, Roumania, Servia, Bulgaria, and Greece. A good deal of its shrinkage has taken place within the memory of men who are still in their prime. When Abdul Hamid girded on the sword of Osman, the Balkan kingdoms now leagued against his successor were part and parcel of his empire. They have achieved independence not by their own exertions, but through the relentless pressure placed on Turkey by the Great Powers. Austria-Hungary has appropriated Bosnia and Herzegovina; Thessaly has been handed over to Greece; Egypt, Tunis, Cyprus, Crete, and Tripoli no longer own the Sultan's sway, which is hardly more than nominal in Arabia.

***

His subjects have now resolved that this whittling down process shall cease. An ominous silence broods over Constantinople, which is no symptom of despair, but indicates that the nation's strength will be expended in a transcendent effort to hurl back the tide of invasion. Troops leaving the capital for the front are not greeted by rousing cheers, for your Ottoman Turk is undemonstrative. There is plenty of suppressed enthusiasm, and it is shared by non-Moslems. Five or six thousand Albanians are engaged in retail trade at Constantinople; to a man, or rather to a boy, they have petitioned the Minister of War to send them to the front. As for the regular troops, we know on the authority of a brilliant war correspondent of the last generation that their *moral* is unsurpassed. "Let no man assert, after Shipka," wrote Archibald Forbes to the *Daily News*, "that Turkish soldiers are only good behind earthworks. I respect a fine soldier wherever I find him, be he Greek or Jew, Gentile or barbarian; and the irrepressible dash, the obstinate, indomitable courage of the Turkish troops in assaulting day after day the Russian position at Shipka may claim to rank with any evidence of soldierhood with which I am acquainted."

***

Marriage is proverbially the beginning of troubles, and even if the campaign which is opening should sound the deathknell of Turkey as a European Power it will shatter the coalition which has plunged into war with a light heart. Each of the allied kingdoms cherishes a secret ambition to be the Sick Man's sole heir. Ferdinand of Bulgaria is officially styled "Tsar," a title which proves that he is a would-be empire-builder. Patriotic Servians believe themselves destined to do for the widely scattered Serbs all that the Piedmontese effected for Italians; Greece, on the other hand, dreams of resuscitating the glories of ancient Byzantium.

***

These petty States are reckoning without their powerful neighbours, who are quite content to see Turkey weakened by a preliminary struggle, in order that she may be easier of digestion by themselves when the psychological moment arrives. Salonika is the objective of Austria-Hungary, and she casts longing eyes on the excellent harbours which fringe the Albanian coastline. Italy is bent on thwarting her aspirations. Russia seeks free access to the sea by way of the Bosphorus and the Dardanelles. In fact, Mr. *Punch* summed up the situation in the Near East a fortnight ago with his usual acumen. A cartoon represented the Balkans as a cockpit, in which Turkey is confronted by her puny foes, while a bear and a two-headed eagle are deeply interested spectators, waiting for an opportune moment to take a hand in the game.

***

Meantime, the inland sea which witnessed the birth of European civilisation has become a parade ground for rival fleets. This month our third Battle Squadron, consisting of eight battleships of the "King Edward" type, will begin its cruise in Mediterranean waters. There, too, France will soon concentrate her entire naval strength. Lest he should be outmanœuvred by the Anglo-French *entente*, Kaiser Wilhelm has announced that the squadrons of the Triple Alliance will rendezvous at Corfu during his usual visit to that island. All the elements of a gigantic struggle for naval supremacy will soon be in close juxtaposition.

***

The Patriotic Union of Servia is a secret society modelled on the Carbonari, whose plottings paved the way for Italian independence. *Piedmont* is the title of its official organ, which lards its articles with quotations from Mazzini's works. There is reason to believe that Anarchism of the type generated in Latin communities has permeated the Patriotic Union. It certainly has many adherents in Servia. The Premier, M. Pasitch, was a disciple of Bakunin in his youth, and took a leading part in the controversy between Anarchists and Marxian Socialists which shattered the "International" movement in 1872.

***

Bulgaria owes its overgrown army to King Ferdinand, who shares the love of playing at soldiers displayed by the Royal caste. His soldiers are excellent food for powder: five-sixths of them being very small farmers inured to hardship and incapable of combining to resist despotism. In theory the feudal conception prevails that land is the property of the sovereign; in practice Bulgarian landholders enjoy perpetual leases, descending to their heirs, but conditional on a tax of 10 per cent. of the produce, which is usually paid in kind. Under such circumstances there can be no accumulated wealth, and in the absence of foreign loans or subsidies a protracted struggle would involve Bulgaria in ruin.

***

It is a commonplace in the science of economics that great wars tend to throw the complicated mechanism of commerce out of gear. Many of us are old enough to remember the intense misery that prevailed in Lancashire owing to the cessation of supplies of raw cotton during the American War of Secession (1861-64). By a curious coincidence, 1912 is the tercentenary of rose cultivation in Bulgaria, whence most European markets are supplied with *itr*, commonly called "otto of roses." That precious extract has advanced in price by 500 per cent. since 1904, and now sells at £3 10s. per oz., as compared with £2 10s. in October, 1911.

***

While perfumers are at their wits' end owing to the exorbitant cost of otto of roses, the manufacturers of morphine, codeine, and allied drugs complain bitterly of the rise in the price of opium since hostilities commenced. The Turkish product serves their purpose admirably, but it comes mainly from Smyrna and other districts of Asia Minor, which are being swept of their able-bodied male population. Wholesale druggists cannot fall back on Indian opium, which contains a very small proportion of morphine.

***

It is proverbially an ill wind that blows no one any good. While Europe is trembling in anticipation of an Armageddon, the ubiquitous cinema artist finds magnificent scope for his energy. Operators are hurrying to the seat of warfare in battalions, and within a fortnight or so we shall be able to gloat over the horrors of war from a comfortable armchair in our favourite music hall. Untravelled thanes can hardly realise the danger and expense entailed by the production of moving pictures. The apparatus, weighing nearly 100 lbs., must be carried through disturbed areas in the teeth of suspicious Customs' officers and a cordon of vigilant sentries. Unlike his colleague, the newspaper correspondent, a cinema artist cannot use a telescopic lens in comparative safety; he must push forward into the firing-line, where his machine is often mistaken for a Maxim gun by the enemy. Nor do his troubles end with recording the incidents of battle on a hyper-sensitive film. The records are too bulky for concealment on his person, nor can they be sent off by an ordinary messenger. They are packed in bulky tin boxes for despatch to the nearest port, running imminent risk of confiscation en route, or, worse still, of obliteration by the admission of a ray of light. Insurance adds largely to the cost of production; it is said that 50 per cent. is demanded by Lloyds' underwriters as a premium on cinema apparatus and films used at the seat of war.

***

The *Times* special correspondent in Persia tells a story of many perils by land encountered in journeying from Teheran to Isfahan. Until last spring there was a regular carriage service between the two capitals, but it is symptomatic of the blight which has fallen on luckless Iran that this convenience has been discontinued. The mails are now carried on donkeys, which take seventeen days to accomplish 160 miles.

***

After leaving the holy city of Kum "our own" plunged straightway into the middle ages—robber-knights, castles, inns, roads, and means of locomotion were at the stage which has been made familiar to us by Walter Scott's novels. For several years past an aged brigand, steeped in crime, named Nayeb Hussein, had terrorised the country between Kum and Kashan, from his castle near the latter city, and defied all attempts to bring him to book. At last a happy thought occurred to the Teheran authorities; why not set a thief to catch others? So an informal compact was made with Nayeb Hussein, under which he had a free hand to oppress the unfortunate country folk, provided that he kept the highway clear of robbers.

***

The *Times'* representative lit upon a band of his merry men during a night march, and had great difficulty in evading their pressing requests to sell his horse to their master. Had he been a native Persian the transfer would have been made under compulsion, without any cash equivalent passing to the animal's owner; but *farangis* are stubborn folk, and it is still dangerous to meddle with them. When the brigand guards saw that their game was up they fraternised with the traveller, and wiled away an hour or two in trying to teach Persian words to his Indian cook. One of them admitted that patrolling the road was poor sport compared with plundering, and even opined that most of Nayeb Hussein's myrmidons would shortly leave him to set up as robbers on their own account. On the whole "our own correspondent" may be congratulated on reaching Kashan in safety.

***

He has been a staunch friend to Persia throughout the misfortunes which have befallen her since the revolution; and as much may be said of Reuter's agent at

Teheran. If the sons of Iran number many sympathisers in this country they may thank the disinterested efforts made on their behalf by these journalists, both of whom are Irishmen.

***

"The Fourth Generation" is a book embodying the reminiscences of Mrs. Ross, who, as Miss Janet Duff-Gordon, had been the centre of a galaxy of mid-Victorian giants. To the lasting grief of George Meredith, Tennyson, and Kinglake, she married a Mr. Ross, who was twenty-three years her senior. Her husband, being a partner in the long-defunct bank of Briggs and Co., carried her off to Alexandria; and she spent several years of the early "sixties" in Upper Egypt.

***

Mrs. Ross retails several gruesome stories of life in Egyptian harems, which read like episodes in the "Arabian Nights," and are probably not more veracious. Orientals are apt to gratify a European's curiosity by telling him, not what really happened, but what they think he would like to hear. Dismissed servants are even less to be trusted; and they are the main source of the domestic tittle-tattle reproduced in many books dealing with the Near East.

***

More interesting is the light cast by Mrs. Ross on the origin of the Suez Canal. She appears to have bewitched M. de Lesseps, who took her on a tour of inspection through the works then in progress, and told her how nearly his darling scheme was wrecked in its inception. The indefatigable Count had served as Consul at Cairo in his younger days, and became the fast friend of Said Pasha. When his project was mature he secretly obtained a firman from the Khedive, authorising the use of forced labour on the canal, and started without a moment's delay for Paris.

***

Next day Said Pasha informed his Ministers of de Lesseps' stroke of business, thereby evoking a chorus of disapproval. The canal was impossible, they pleaded: Egypt would be drained of her population, dragged from their homes to die in a sandy ditch. The Khedive took alarm, and despatched one of his steamers with orders to overtake the Messageries boat, in which de Lesseps was speeding to Marseilles; the obnoxious firman must be brought back *coûte que coûte*. But the concessionaire had too long a start. He reached Paris several days before the Khedive's emissaries. Thanks to his relationship with the Empress Eugénie, he was able to push matters through with Napoleon III. and his financial backers. The concession became a *fait accompli* which the Egyptian Government were compelled to respect.

***

So in 1862 Mrs. Ross found 20,000 fellaheen at work, delving in the sand between El Gisr and Lake Timsah. They toiled up the sloping banks of the canal, each carrying three or four spadesful of sand in a rush basket, and were speeded up now and then by the overseer's courbash. Wheelbarrows had been provided, but the fellaheen could never be taught to use them legitimately. They were simply turned upside down to serve as a refuge from the keen night air.

***

Enormous was the sacrifice of life entailed by de Lesseps's enterprise. The labourers died like flies from overwork and hunger; nor did the evil end with their disappearance. Every man was ordered to muster on the canal with a large ration of bread, which had to be supplied by his household. Mrs. Ross's mother, who knew Arabic well, overheard a wretched fellah praying thus before the tomb of Sheikh Gibril, at Luxor:—"O Sheikh, ask Allah to pity and feed them while I am away. Thou knowest that my wife worked all night to bake bread for me, and that there is none left for her and the children!" Nationalists should lay Mrs. Ross's plain, unvarnished tale to heart!

***

The Cairo police authorities are to be congratulated on having succeeded in laying their hands on the celebrated Hafez Neguib. He is one of the most consummate and ingenious swindlers that one could well expect to meet, even in fiction. If one wanted to arouse the indignation of a Cairo police officer one had only to mention his name, for on two occasions he contrived to effect his escape after he had been arrested. No "revue" at the local music-halls was complete without a sarcastic reference to Hafez Neguib and his hoodwinking of the entire police force.

***

His criminal career, really, reads more like a fairy-tale. Three times condemned for fraud, on each occasion to three years' imprisonment, two of his convictions have become prescribed, and the third one was within two months of prescription, when he was recently arrested. He escaped from prison in 1907 and again three years later. His last evasion was a wonderful one. After sentence had been passed on him, Hafez persuaded the policeman who guarded him to allow him to fetch certain papers from his house. The policeman waited outside, whilst his prisoner went in and collected the documents. After waiting some time the obliging "shawish" entered the house, but Hafez had disappeared, having succeeded in getting rid of his manacles, prison clothes, etc. To this day no one has found out how he managed to do this single-handed.

***

His first exploit after his escape was to obtain admission to the Coptic convent of Abshawai. Here he won the good graces of the superior, and persuaded him to lend him £600. He next entered the political arena, wrote several articles on the Copt-Moslem controversy under a *nom-de-plume* in the *Watan* and the *Misr*, and gave a big banquet at one of the principal Cairo hotels with the object of reconciling the two communities. After that he returned to monastic life. Dressed as a Jesuit, he was admitted as a teacher at the Coptic seminary at Deir-el-Meharik. So successful was he, that the superior made him his secretary, but as this aroused the ire of the monks, he was given an indemnity and bidden to leave.

***

Having grown a beard, whilst at Deir-el-Meharik, Hafez thought he would change religions, so he became a Moslem once more, and settled down in old Cairo, where, as the Sheikh Abdullah, he became much respected by reason of his austere mode of life. After a while, it was suggested that he should marry the daughter of a local notable. This he did, his wife bringing him a dowry of £300. He subsequently wrote two novels under his wife's name, and earned quite a little sum therefrom. But he could not throw off his old tendency, and so he took up sorcery. His exploits attracted the attention of his old friends, the local police, and it was not long before his disguise was pierced, and he was arrested. This time Harvey Pasha will no doubt take extra precautions to ensure that his myrmidons do not again have the slip given them by this swindler, whose genius and versatility were certainly worthy of a better cause.

PERSONAL & SOCIAL.

The Khedive, who left Vienna last Friday, passed through Sinaia on Sunday and took luncheon with the Roumanian Royal Family. His Highness subsequently proceeded to Bucharest, where he visited the local military establishments and other important institutions. He is returning to Egypt viâ Constantza and Constantinople.

Prince Carol of Roumania, who celebrated his nineteenth birthday on the 16th inst., will, says our Bucharest correspondent, shortly proceed to Berlin to complete his military studies. He will be attached to a guards' regiment, probably the 2nd Dragoon Guards, of which his great-uncle, King Carol, is honorary colonel.

H.R.H. Princess Marie of Roumania, with her daughters and Prince Nicholas (who has lately been visiting in England), arrived at Sinaia from Tergensee on the 17th inst. Our Roumanian correspondent writes that "an interesting event is expected shortly in the Princely household.

Sir William Conynghame Greene, K.C.B., who has just been appointed Ambassador at Tokio, was at one time Acting Third Secretary at Athens. In 1893 he was appointed Secretary of Legation at Teheran, and in 1905 he was appointed Minister at Bucharest, where he remained five years, during which time he gained great popularity in the Court and official world.

General Sir Archibald Hunter, the Governor and Commander-in-Chief, arrived at Gibraltar on Tuesday on board the "Mantua," and resumed his duties.

It is reported that the ex-Sultan of Turkey, Abdul Hamid, has been removed from Salonika to Constantinople.

Prince Omar Pasha Toussoun, cousin of the Khedive, has been made a Mushir by the Sultan. The Mushirat is the highest grade of honour in Turkey, and very few are possessed of it. In Egypt only Prince Mohamed Ali Pasha, brother of the Khedive, holds the grade, which carries with it the title of Pasha and the address of *Dawlattu*, which is equivalent to His Highness.

Prince Omar Pasha Toussoun is the chairman of the Ottoman War Funds Committee in Egypt, which collected a large amount of money during the Italian war, and is still accepting subscriptions. Prince Toussoun himself subscribed £E5,000 to these war funds, and rendered very valuable services to the Ottoman Government.

Lady Lowther, wife of the British Ambassador at Constantinople, has taken the initiative in organising a relief fund in aid of the wives and children of wounded soldiers. She invites contributions of all kinds.

In connection with the war, the War Office has sent the following officers to represent Great Britain as Military Attachés on the service Headquarters Staffs:—Turkey, Lieut.-General G. E. Tyrrell, R.A.; Bulgaria, Lieut.-Colonel F. Lyon, D.S.O., R.A.; Servia, Major C. B. Thomson, R.E.

Our Khartoum correspondent informs us that the Acting Governor-General of the Sudan, Colonel J. Asser, left Khartoum on September 29 for Sinkat, returning to Khartoum a week later.

MILAN.—Bertolini's Hôtel Europe. Entirely renovated. Quiet.

Digitized by Google

Writing on the 10th inst., the same correspondent says:—With the return of H.E. the Governor-General to Cairo, most of the heads of department in the Sudan Government are beginning to muster there for the necessary work which has to be done in Cairo before they come up to Khartoum at the end of the month. Colonel P. R. Phipps, the Civil Secretary, was due to arrive in Cairo on October 9. Judge Fleming and Mrs. Fleming and Mrs. Burnett reached Khartoum this week.

Rear-Admiral Sir R. Massie Blomfield, K.C.M.G., and Lady Blomfield are detained indefinitely at Lausanne through illness, and are obliged to cancel all their engagements.

Sir Edgar and Lady Helen Vincent have returned to Esher Place.

Mrs. and Miss Eckstein left London last Saturday for Egypt.

Vehby Bey, First Secretary to the Turkish Embassy in London, has been transferred to the Embassy in Berlin.

Orkhan Bey, the new First Secretary to the Turkish Embassy, has entered on his duties.

The Bishop of Gibraltar, whose diocese includes Roumania, arrived at Bucharest on Saturday night on his annual tour, and stayed there until Tuesday.

The Bishop of Khartoum left London for Egypt en route for the Sudan on Wednesday.

The engagement is announced of Reginald Whish Brigstocke, Egyptian Civil Service, Cairo, younger son of Dr. R. Whish Brigstocke and Mrs. Brigstocke, Scole, Norfolk, and Dorothy Langdon, third daughter of the late Mr. W. G. Holland and Mrs. Holland, Gell-y-Vorwyn, Tal-y-Cafn, North Wales.

Mr. James Baxter, lately lecturer in economics at Sheffield University, has arrived in Cairo to take up a similar post at the Khedivial School of Law.

Miralai Herbert Bey, Commandant of the Cairo district, has arrived in Cairo on coming from England viâ Port Said.

Mr. Graham, Director-General of the Public Health Department in Egypt, returned from leave and resumed his duties yesterday.

Mr. William Bevan, of the Department of Agriculture, Cyprus, left London on Wednesday on his return to the island, off leave.

Mr. Kennedy, the *Times* correspondent, son of Sir John Kennedy, a former Minister to the Roumanian Court, has arrived in Bucharest.

Mr. Harold Hall, commercial agent to the Steamers Department, Sudan Government, left London on Wednesday morning on his return to Khartoum.

Lieutenant-Colonel H. Schofield will give up command of the 1st Battalion of the Welsh Regiment, now in Egypt, at the end of the year. The next regimental officer for promotion is Major T. O. Marden, of the same battalion.

The death is announced of Judge Alexander W. Terrell, of Texas, who was U.S. Minister to Turkey from 1893 to 1897.

Sir Frederick William Stopford, K.C.M.G., K.C.V.O., C.B., who has just been appointed to the office of Lieutenant of the Tower of London, served with distinction in the Egyptian Campaign of 1882, and also in the Suakin Expedition of 1895.

John Price Bey, head of the Sanitary Department, Cairo, who has been spending part of his summer holidays at his home in Leamington, left last Friday by the P. and O. steamer from Tilbury for Port Said.

In the recent American tennis tournament at the Sudan Club the winners were Messrs. Bowman and Morris. They received a very substantial handicap, and waltzed home very easy victors.

Mr. Leo Weinthal, chief editor of the *African World*, returned to London last week after an absence of nearly six months in South Africa.

Mr. J. J. Knox, recently appointed H.B.M.'s Vice-Consul in Cairo, has taken up his duties.

Dr. Alfred Eid and family are leaving Paris on November 5 on their return to Cairo.

The Rev. James Gillon, who was expected to arrive in Cairo on the 23rd inst. to take the services at St. Andrew's (Church of Scotland) for the season, has cabled that his arrival will be delayed owing to the illness of his daughter.

Through the efforts of the Rev. Waldo Bennett, winter chaplain at Heluan, assisted by the generous contributions of many of the friends of the late Mr. Page May, a handsome tablet in his memory is to be placed on the walls of St. Paul's Church, Heluan, towards the end of November. The central portion of the tablet is of alabaster with red lettering, while the decorative frame consists of pearl and blue mosaic bordered with handsome green marble.

Major G. D. Symonds, Royal Artillery Reserve of Officers, will this evening give a lecture on "The Armies of the Balkan States" to the Inns of Court Officers' Training Corps, in the Old Hall, Lincoln's Inn.

Mr. Bouboulis, of Cairo, director of Nestor Gianaclis, Limited, Rustowitz Bey, and Mr. Hug, who had been staying for a few days at the Savoy Hotel, left London on Tuesday for Paris on their return to Egypt.

Mr. C. P. Rodocanachi, of Alexandria, leaves London to-day on his way to Athens.

The R.M.S.P. "Arlanza" arrived at Southampton on the 19th inst., having on board a large number of passengers, among whom were the following:—Sir Sam Fay, his Excellency the Marquis of Villalobor, Vicomte de Gualis de Mazourbran, Mr. W. F. Hamilton, K.C., and Mr. H. C. Lawson Johnson.

Among the passengers who sailed for Alexandria from Marseilles per Messageries Maritimes ss. "Equateur," October 17, were M. Chakour Pasha, Mr. and Mrs. Swallow, Mrs. Percival and children, Comtesse Zizina, M. and Mme. Colrat, M. Degiardé.

Mr. W. E. Kingsford, who spent the summer in England, has returned to Cairo.

Professor Ernest Gardner delivered a lecture on "Athens in the Time of Pericles" at a meeting of the London Branch of the Historical Association in University College last Friday night.

The death was announced last Friday of Major-General Richard Oldfield, late of the Royal Artillery, who was formerly in command of the R.A. at Malta.

Mr. Noel Buxton, M.P., contradicts a statement published from Vienna that the London Balkan Committee has intimated to the authorities in Sofia that a considerable number of English volunteers were going out to offer their services in the Bulgarian Army.

The Rev. Dr. Pentreath, Senior Chaplain to the Forces, Church of England, Malta, writes that £390 more is required to complete the sum of £1,000 required for the building of the proposed military church. He will gladly acknowledge any contributions, however small, addressed to him at Pembroke Camp, Malta.

Captain Clarke, D.A.A.G. to the Army of Occupation, finishes his time in Egypt at the end of the present year.

We understand that two members of the Army Council will pay an official visit to Malta in January next.

Sir Joseph Saba Pasha, ex-Minister of Finance, arrived in Alexandria on October 12 coming from Europe viâ Constantinople.

Colonel Richard Spencer Hall, who saw service in Egypt and the Sudan, and who died in August last, left estate of the gross value of £101,936, of which £98,993 is net personalty.

Among the passengers who left Marseilles on October 23 for Alexandria by the Norddeutscher Lloyd s.s. "Prinz-Regent Luitpold" were H.H. Princess Nazalie Hanem, H.E. Rifky Pasha, H.E. Abdallah Pasha Sfer, Mme. Abdallah Pasha Sfer, Mohamed Bey Cherif, Mme. Mohamed Bey Cherif, Mr. and Mrs. J. D. Craig, Dr. and Mrs. Overton Hobson, M. and Mme. Georges Karam, Mrs. C. R. Lias, Mr. and Mrs. MacLellan, Mr. and Mrs. H. Manley, Mrs. Hugh Molesworth, Mrs. Tuck, Miss Tuck.

DOMESTIC ANNOUNCEMENTS.

The charge for Announcements under this Heading is 3s. for three lines and 1s. per line afterwards. Minimum charge, 3s. All announcements must be authenticated with the name and address of sender.

BIRTHS.

ORANMORE AND BROWNE.—On October 16, at St. Mary's, Wimbledon, the Lady Oranmore and Browne, of a son.

YOUNG.—On October 17, at the British Legation, Teheran, Mrs. Alban Young, of a daughter.

MARRIAGES.

NICOLL—LYON.—On October 15, 1912, at Christ Church, St. Leonards-on-Sea, by the father of the bridegroom, assisted by the Rev. G. W. Douglas, Rector of Christ Church, Michael John Nicoll, Assistant Director Government Zoological Gardens, Giza, Egypt, third son of the Rev. C. A. S. and Mrs. Nicoll, of 10, Charles Road, St. Leonards-on-Sea, to Norris Elizabeth Pryor Lyon, eldest daughter of Henry Lyon.

WHITLEY—ROBERTS.—On September 28, at the British Residency, Baghdad, by the Rev. P. V. Boyes, Arthur Noel Whitley, son of John R. Whitley, of Hardelot, France, to Mildred Ethel, younger daughter of the late Hugh Roberts, of Llanrwst, North Wales, and of Mrs. Hugh Roberts, of Rhos, Colwyn Bay.

FRIDAY, OCTOBER 25, 1912.

AT GRIPS.

The fierce struggle is set. Along a front extending nearly fifty miles from Adrianople to Kirk Kilisse the Turks and Bulgarians have at last met in grim earnest. A silence, eloquent of the gravity of the issues at stake, has veiled the movements of the contending forces, and the outside world has no certain information even of the numbers engaged. Until the issue is acknowledged by both belligerents we have no means of judging whether we are witnessing in this the first real battle in the chief theatre of the war the beginning of a series of sanguinary encounters or the decisive fight in a brief campaign. We know that the armies are in touch with one another, and the delay in the announcement of any definite result points to the severity of the struggle. Neither side has any advantage to gain from an indecisive engagement; both have a very definite purpose in view, and are eager to achieve it in the shortest possible time. Unless every reading of the strategy now being employed in the Balkans is at fault, the fight that is being waged in the neighbourhood of Kirk Kilisse has a direct bearing on the Bulgarians' plan of campaign. The advance on Adrianople may well have been intended to mask their real intentions. It was their obvious objective. But in a campaign requiring the maximum rapidity of movement the investment of that town would hardly call for such a wide flanking movement as that undertaken by the left wing of the Bulgarian line. Until the surmise is proved incorrect, we may suppose that Kirk Kilisse represented the true direction of the Bulgarian advance in a bold attempt to reach the Turkish capital. The Turks, no less able to keep their counsel and to develop their strategy in secret, appear to have anticipated the Bulgarian intentions and to have concentrated their forces on the right spot. In the interests of the nations concerned we may well wish that one fierce encounter, at which both the combatants have been able to marshal the flower of their strength, will decide this regrettable conflict. It has been proved impossible to prevent the appeal to arms, but perhaps the murderous logic of the sword may convince where other arguments have failed. In the hope that this will be the case, we can bring ourselves to plead the cause of peace even while the guns are booming in the first battle.

The feelings that impelled the Balkan States into war did credit to their humanity and patriotism. If they find that they have attempted a task beyond their powers, their failure may still not be inglorious. Victory, swift and certain, is essential to the success of their cause. If it be delayed, or if it has to be bought at the sacrifice of too many lives, the Allies must confess to having overreached themselves. All the first encounters seemed to justify their expectations, but only now are they really at grips with the Turkish forces when challenging them on their first line of defence. A prolonged struggle before Scutari, Uskub, Adrianople, and Kirk Kilisse might in any other war be regarded as so many incidents in the general development of the conflict; in the present war severe checks at these points must invalidate the Allies' whole plan of campaign. For the moment the course of events is unknown; but if there be any truth in the Turkish reports of Bulgarian reverses a crucial point in the war may already have been reached. The fortunes of the Servians before Uskub will also have been tested, and if their victorious advance is stayed they will have little to regret in the part they have played, should a truce be called at once. Greece has kept faith with her Allies, and if she had little to fight for she has also had little to fight against. The goal of her immediate ambitions—Crete—is in the hands of the Powers rather than of Turkey, and it is possible to pay too heavy a price for that which must one day be hers for nothing. Before the sword was actually drawn, or too far out of the scabbard to be sheathed again unblooded, there had been no time for a clear appreciation of the significance of the Powers' warning that no disturbance of the *status quo* would be allowed to result from the war. There has now been opportunity for the respective Governments to convince themselves of the reality of this undertaking; the various peoples have had their desire for war gratified, and as the nominal objects for which the gauntlet was thrown down had already been promised before war was declared, there should be no difficulty in arriving at peace with honour for all concerned. As soon, therefore, as it is realised that the logic of the sword has had time to speak—and, as we have shown, a check to the Balkan arms may be as convincing as a defeat—we shall hope to see a definite effort on the part of the Great Powers to enjoin a truce and restore peace to the Balkans.

In our desire for peace we do not make the mistake of supposing that either the physical hardships of the war or loss of life would of themselves cause the Balkan peoples to swerve from their determination. An appeal to be successful must be based on higher ground than this. But patriotism looks within as well as without. If there is the least reason to suppose that the Turks' powers of resistance have been underestimated in the Balkan capitals, then at best the Allies are confronted with the possibility of a protracted campaign. Not one of them, however, is in a position to face such a prospect with equanimity. If national bankruptcy did not ensue, the material progress of each country would be arrested to a disastrous extent. The interests of all demand that the clock of the Near East should not be thus set back at this moment. As soon, therefore, as the rifles have had their say, let peace follow—in the interests of the four Allies, in the interests of the unhappy population for whom they are fighting, who between the two contending forces are in danger of being exterminated. If we have not touched upon the possible attitude of Turkey it is because we can see nothing in the conditions of the struggle or in the original demeanour of the Porte that does not encourage the belief that the Turks will welcome a just peace. For them there could have been no illusions about the war. The struggle was thrust upon them, but no measure of victory was likely to bring them any more substantial benefit than the momentary silence of their Balkan critics. Turkey's resources are in no condition to stand the drain of a long campaign, and however unfair it may be to the new régime in Constantinople, it must realise that in regard to the future government of Macedonia it must pay the penalty for the misrule of its predecessors. Whatever be the issue on the field of battle of the present struggle in the Balkans, Macedonia stands to benefit. But its benefits must be tangible, immediate; they cannot be made dependent on the future development among Turkish officials of a capacity for governing non-Moslem populations. And for Macedonia to enjoy those benefits the war must cease quickly before the country is depopulated.

The Editor of "The Near East" cordially welcomes letters or short contributions from readers on matters relating to countries coming within the scope of the journal.

The Editor does not hold himself responsible for the return of contributions which he is unable to accept, but, where stamps are enclosed, every endeavour will be made to return rejected contributions without delay.

ANTICIPATIONS.

By "Rahnuma."

With so many unknown factors already in the field, and others lurking round the corners, it seems idle to attempt to anticipate events—to guess the probable course of events or to prophesy who will and will not win this war. And yet the advantages of guessing right as compared with the disadvantages of guessing wrong are very great—so great that in the general staffs of Europe this guessing is nowadays reduced to quite an art. Without being so bold as to make the actual guess, let us briefly enumerate some of the more important factors which would require consideration.

The temptation is to start by counting heads, to point to Turkey's eighteen million Moslems pitted against ten million Bulgars, Greeks, and Serbs. Numerical superiority, however, depends not upon the numbers actually possessed, but upon the numbers which can actually be employed. Again, "superior numbers," say the British Army Regulations, "are an undoubted advantage, but skill, better organisation and training, and, above all, a firmer determination in all ranks to conquer at any cost, are the chief factors of success." Bear that in mind and open a map. What features in the area of operations at once strike the military mind?

First, its vastness—an area roughly as great as the whole of France. Operations round Uskub, for instance, as far removed from those around Adrianople as Paris from Lucerne, or Vienna from Berlin.

Next its poverty. Those who have travelled in European Turkey know that one may ride for many miles without meeting a living soul—and where there are no cultivators there are obviously no crops. The rural population in any case sow little more than their minimum requirements, because where there is no security there can be no trade or profit.

Next, its lack of roads and railways. Roads in Turkey rarely undergo repair—quite a number of them date from the Roman Empire, and remain as the Romans left them fifteen hundred years ago. What roads there are are, therefore, very rough—so rough that those who value their vehicles drive when they can alongside the actual roadway rather than upon it. Bridges are looked upon as obstacles; when your *arabaji* says, "there are many bridges on that road" you know that he will avoid it altogether if he can.

Railways. There are only two main lines—one to Constantinople and one to Salonika—with a branch to connect them, 250 miles in length. All single lines—easily destroyed because they pass through a disloyal population and are exposed to raiding parties from the mountains—are not easily repaired, because workshops and skilled workmen are few.

A mountainous country, and in winter a very cold one; vast numbers of fighting men—we know that about a million men are already in the field—vast distances to be covered; an impoverished country, no local supplies; bad roads; few railways. What do all these mean?

They mean, in the first place, that operations are likely to develop slowly—as slowly, perhaps, as they did in Manchuria, where conditions were in many ways the same. For supplies must all be carried and replenished from the rear. These lines of supply become of vital importance, and as they advance commanders become more and more loath to leave them, because if they leave or lose one line they may never find another. Straightforward, solid fighting rather than manœuvre will, then, be one feature of this campaign. No sudden and dramatic developments, such as might be seen were the armies of France and Germany to go to war to-morrow, with a network of railways and almost unlimited resources all around them. It is a pity, because we all want to see what really up-to-date warfare means, and we shall not see that in this campaign.

A war which develops slowly means a long war, means a strain upon resources, a drain upon finance—a moral strain as well as a physical strain—a strain, for instance, upon tempers and upon ties which bind together allies.

If the total resources of Turkey in men and food and wealth are greater than the total resources of the Allies, then time must be on the side of the Turks. And yet the initial situation is in favour of the Allies, for they so far have piped the tune and the Turk has had to dance to it. Perhaps the most striking feature for the moment is the unsatisfactory situation of the Turkish army in the west. For of all the forces in the field this is the only army whose communications and lines of supply are directly threatened; threatened on land by the advance of hostile columns from the north, north-east, and south, and threatened on the sea by the Greek occupation of Lemnos and activity in the Ægean, while the Turkish fleet bombards the Bulgarian coast. And if the lines of supply are as vital to these armies as the writer believes them to be, the first great event may, perhaps, take place in Macedonia, and not in Thrace.

GREEK CHARGE AGAINST TURKEY.

Indignant Denial.

Reuter's Agency has received the following communication from the Imperial Ottoman Embassy:—The report communicated to the London Press by the Greek Legation in London to the effect that Turkish military doctors had left Constantinople for Janina with typhus and cholera microbes with the object of infecting Greek war supplies is an absolute lie, infamous as well as ridiculous. If the Ottoman Embassy takes the trouble of contradicting such a repugnant invention, it is merely in order to warn, once for all, English public opinion against the lying assertions which will be daily circulated during the war by the enemy.

A GOOD WAR MAP.

We have received from Messrs. George Philip and Son, the well-known map and geographical publishers, a copy of the *Daily Mail* War Map of the Balkan Peninsula. This map will prove of the greatest assistance in following events in the war and in helping to a clear conception of the territorial positions and aspirations of some of the combatants. Every daily newspaper, in almost every issue, prints maps of the theatre of war, but, being printed wholly in black, they do not clearly distinguish the frontier. The *Daily Mail* War Map, on the contrary, is printed in colours, and thus enables one to seize at a glance the significance of move and counter-move in the operations.

The map is furnished with a fairly full index, and may be had in several styles of mounting. The price on folding paper in paper cover is one shilling.

BRITISH RED CROSS FUND.

The following telegram has been received from Queen Alexandra by Sir Frederick Treves, the chairman of the Relief Committee of the British Red Cross Society:—

"Sir Frederick Treves, Thatched House Lodge, Richmond Park,
"Kingston-on-Thames.

"As President of the British Red Cross Society, I desire to express to you my most sincere and sympathetic approval of the movement which is being made to despatch Red Cross expeditions to Turkey, to the North Balkan States, and to Greece. The great and noble objects which the society has in view to mitigate human suffering entailed by such a terrible war must be evident to us all, and I earnestly hope that the appeal for funds which has been made by Lord Rothschild, chairman of my Council, will receive the generous support of the British people.

"ALEXANDRA."

The first list of contributions to the Balkan Fund of the society was issued on Tuesday. In addition to a gift of £1,000 from Messrs. Rothschild, £300 has been received from Major and Mrs. Doughty-Wylie, £200 from Lady Wantage, £105 from Mr. A. Wertheimer, £50 each from Colonel Sir Malcolm Fox, Mr. R. A. Yerburgh, and Mr. A. Lloyd, K.C., and £20 from Mrs. Osler. There are other contributions amounting to nearly £5,000, including two gifts of £1,200 each for the equipment of two units, which will be despatched on Saturday for service with the Greek Army. The first of these units is provided by Sir Lucas and Lady Ralli, Mr. Pandeli Ralli, and the second by Sir Lucas and Lady Ralli, Mr. Pandeli Ralli, Mr. L. Lambrinudi, and Mr. L. G. Michalinos. The three units for Turkey, which will leave on Friday, have been provided and equipped by Sir Ernest Cassel at a cost approximately of £1,500 each.

From other funds received the committee have also fitted out a unit—which is now on its way to Cettinje—for service in Montenegro under Surgeon-General Bourke as director. The committee hope that funds will be available to send further medical and surgical aid to the North Balkan States.

MALTESE NATIONALISTS.

Under date of the 18th instant the *Morning Post's* correspondent writes:—At the General Election yesterday all the candidates of the Nationalist Party were returned by an overwhelming majority. They have resigned en masse, however, as a protest against the actual Constitution, which they consider to be a slur on British Colonial administration.

THE PRESS ON THE NEAR EAST

M. Poincare as Peacemaker.

Die Information (October 18) of Vienna gives evidence of some confidence in attributing to M. Poincaré an ambitious and difficult *rôle*:

La seule chose que M. Poincaré pourrait et devrait faire en ce moment pour sauver la situation si compliquée et si difficile, pour entreprendre une œuvre qui lui attirera la reconnaissance et la sympathie du monde entier, ce serait d'amener par ses bons offices une entente honnête et sincère entre la Russie et l'Autriche-Hongrie, mais de façon à ce que les chanceliers de ces deux puissances puissent causer seuls sans témoins et surtout sans le lourd poids de leurs alliances. Il faudrait leur offrir le moyen de liquider une fois pour toutes les malentendus politiques d'Iswolsky-Aehrenthal sans quoi il n'y aura plus aucune possibilité d'avoir une Europe tranquille et pacifique.

The Advance of Islam.

Evidence of the power of adaptation that is rapidly developing in Islam is shown in an article which appears in the *Moslem World* (October), under the title "Tiflis as a Moslem Centre." We quote a few lines from this interesting article:—

For some years a reform movement has been on foot among Moslems in the Caucasus and Persia. It is interesting to see how Moslem men and women are trying to free themselves from old traditions and are seeking to adopt modern manners and teachings. For this reason many Moslem families have moved from the Asiatic part of Tiflis, and are now living in the European part of the city. There is much demand for education. A weekly paper, "Mollah Nessereddin," edited and printed in Turkish by Tiflis Moslems, is striving to remove old prejudices. The editor is an educated Moslem with liberal views, and the paper may succeed in accomplishing its purpose.

Turkish Preoccupations.

Le Journal (October 22) of Paris, comments on rumours of Russian military activities in Transcaucasia:—

La nouvelle la plus importante du jour, si elle était exacte, serait les préparatifs militaires russes en Transcaucasie, autour de Kars. Plusieurs dépêches signalent avec insistance que la Turquie est préoccupée d'une intervention possible de la Russie. Certaines vont même jusqu'à prétendre que Kiamil pacha aurait fait appel au concours de l'Angleterre contre ce péril éventuel.

Les inquiétudes ottomanes ne sont pas pour surprendre, puisque partout, en Europe, on se demande si le désir général de localisation de la guerre pourrait résister à certains entraînements de passion ou d'intérêt. Tout ce qu'on peut dire à l'heure actuelle c'est qu'elles sont prématurées. Aucune action des grandes puissances n'est à prévoir avant que les opérations militaires aient pris une orientation décisive.

After Reflection.

Italians are commencing to feel some of the after-effects of their war intoxication. The *Saturday Review* (October 19) notices signs of disillusionment in Italy with regard to Tripoli:—

Thoughtful people, even in Italy, have begun to realise that peace with Turkey by no means implies the end of the war. Sporadic fighting with the Arabs in Tripoli will continue for a long time to come, and then taxation will have to be increased to "develop" the new colony. There is also an uncomfortable feeling about that Italy has not behaved with much chivalry to the Ægean islanders, who were certainly given to understand that they would not be put back under Turkish rule. If the Italian peasantry find themselves disillusioned as well about the new Eldorado, it may go hard with the governing class.

Modern Crusaders.

With great pleasure we read an article in the *Academy* (October 19) from the pen of Mr. Cecil Cowper stigmatising, as it deserves, that criminal cant which would drag religion into the Balkan dispute:—

Is it impossible to enter a plea for tolerance? Are the fires of Smithfield again to burn, but, if it can be so arranged, to burn Mohammedans instead of Christians, who not infrequently loathe each other in a superior degree? Is not the Mohammedan a man and a brother? Is he not far more devout than many who in a religious census would be classed as Christians? His methods of Government may, as is the case in many other parts of the world, leave much to be desired. But surely he has progressed, and by so doing has proved that he is not outside the pale.

Why at this stage—the Cross against the Crescent? Those who are acquainted with Gibbon's bitter satire in his chapters on the Crusades, will not have much sympathy with the modern Crusaders, who suffer no privations, who are not animated by enthusiasm, but who, as a Stock Exchange gamble, try to rig the market in their own interest. It is a horrible and sickening reflection that such deeds are done under the cloak of religion combined with a Pecksniffian desire that the local methods of Camberwell should reign supreme in the historic remains of the Byzantine Empire.

These views, we know, will be abhorrent in the lobby of the House of Commons and in Whitefields Tabernacle, which has a monopoly of righteousness.

Christian Warfare.

The *Manchester Courier* (October 19) has a noteworthy leading article on the Bulgarian proclamation of a "holy" war:—

A holy war is a species of conflict which knows no mercy, and is devoid of any element of forbearance. It is a matter for comment that such an interpretation of the war should have been assumed by the Christian Powers engaged. The Turks, be it said to their credit, have begun the war with a strict denunciation of unnecessary rigours and the condemnation of barbarities. On the other hand, the Bulgarians are already reported to have been guilty of extreme atrocities, which, if the report be true, cannot stand them in anything but bad stead with the Great Powers of Europe, whenever the final settlement may come. Turkey's forbearance towards Greece may have been prompted by the interested motive of detaching that State from her adherence to the Balkans League. But at least, when the day of reckoning arrives, it will be necessary for the Great Powers to remember that the Balkan States were the aggressors in the war, that their concerted action was taken against the will of the rest of Europe, and despite the assurances of Turkey that she would institute reforms in Macedonia.

Germany and the Mediterranean.

"Vanoc," in the *Referee* (October 20), writes despondently with regard to our shipping in the Mediterranean:—

Germans, not English, dominate the Mediterranean passenger traffic. The price of your ticket is determined in Berlin, not in London. If you wish to travel from Marseilles to Alexandria quickly and comfortably you must travel under the German flag. And when you settle down on board you find yourself one of a little knot of Englishmen in a crowd of Germans, French, Italians, Argentinos, Brazilians, Greeks, Egyptians, and Americans. Almost every liner you see is a foreign liner, and you may look in vain for a British man-of-war—even at Alexandria. The evacuation of the Mediterranean meant little except to those who know the consequences of shirking responsibility for a chief bread route—but when you see with your own eyes the glee that illuminates the Teutonic countenance when Mr. Churchill's antepenultimate policy in the Mediterranean is under discussion you feel the sting and shame of it all.

The Sanjak—A Suggestion.

A telegram from Vienna to the *Frankfurter Zeitung* dealing with the question of Austria's interests in the Sanjak of Novi Bazar states:—

It is accepted here as a dogma, contested only by the Social Democratic party, that Austria-Hungary would be compelled to intervene in the event of Montenegro or Servia seizing the Sanjak of Novi Bazar. But should this happen it might be possible to find a solution without disturbing the world's peace. Should Austria really not aspire to territorial expansion, but desire only to keep open her commercial outlets, such a justifiable object could be attained by the conclusion of a permanent Customs union between her and Servia and Montenegro in the event of either of the latter States annexing the Sanjak. The commercial road to the Ægean would then remain open, and a south-easterly encirclement of the Monarchy by a hostile power would be prevented. We would emphasise the fact that this proposal does not originate in official inspirations, but arises solely out of our own reflections, and we offer it for discussion before it is too late.

Official Neutrality.

In a leading article dealing with the strategic position in the theatre of war, the *Times* (October 24) concludes with a well-merited rebuke to Mr. Masterman regarding his recent speech at Bethnal Green:—

Everywhere events are moving more swiftly, everywhere the episodes of the war grow more critical; but victory or defeat still lies in Thrace, and in Thrace alone. We can express no views upon the possible outcome, for, as the Prime Minister said yesterday in the House of Commons, the attitude of Great Britain is one of strict neutrality, and it is the duty of all "to use no language which is inconsistent with that attitude." We are glad Mr. Asquith said emphatically that the duty was incumbent upon Ministers as well as upon humbler folk. Mr. Masterman's reply to the challenge addressed to the Government regarding his speech on the war at a Radical club in Bethnal Green was halting and unsatisfactory. He talked of "distorted fragments purporting to be a report," and tried to blame the Press. Only under pressure did he reluctantly admit that "it was possible" he expressed sympathy for a particular side. His offence was grievous, and the question will only become "obsolete" when Ministers lay to heart Mr. Asquith's admonition, and cease to make "sympathetic" speeches about the Balkan war in Radical clubs or anywhere else.

Articles to Note.

"The Road to Ispahan," "On the Road to Ispahan," and "British Interests at Ispahan," by a special correspondent, in the *Times* (October 18, 21, and 22).

"The Modern Greek," in the *Spectator* (October 19).

"The Power of the Powers," in the *Westminster Gazette* (October 19).

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

A moratorium law has now been passed in Greece, but, as yet, only the Bank of Athens has taken advantage of its provisions. This bank states that it has taken the step as a provisional and precautionary measure, on account of the large number of branches which it has in Turkey.

***

The Ottoman Government, on the other hand, does not at present contemplate the proclamation of a moratorium. It is stated that the Minister of Finance was approached with a view to the issue of such a decree, but upon representations from the banks as to the lack of necessity for this step, the proposal was abandoned.

***

Apropos of war and finances, there is no doubt that Turkey is in an infinitely better position than her opponents. Under the provisions of the treaty of peace with Italy, Turkey is to receive a considerable sum of money, which will be useful in meeting extraordinary current expenditure, while rumour is again busy with regard to negotiations between Messrs. J. P. Morgan and Co. and the Turkish Government for a large loan. It is believed that these rumours have some solid foundation in fact.

***

The war is having an unsettling effect upon shipments to the Near East. Shippers are unwilling at present to do business unless on a cash basis. The general declaration of moratorium by the Balkan Allies and the stopping of credits by the financial institutions must necessarily have this unfavourable effect. On the other hand, British steamers in the Black Sea are said to be reaping huge profits from the enhanced freight charges justified by the immobilisation of Greek and other local shipping.

***

The Greek Government has been commandeering Greek vessels at Cardiff and has caused considerable annoyance to charterers and perhaps owners. What the Greek Government chooses to do with regard to vessels flying the blue and white stripes is, of course, no concern of ours, but a certain amount of irritation has been manifested in City circles at the news that the Greeks have seized a British steamer at Zea. It would perhaps be well if the Greek fleet could manage to devote more attention to her armed antagonist and less to unarmed neutrals.

***

Business houses having relations with Turkey are experiencing great inconvenience owing to interruptions in postal and telegraphic communications. One important banking institution which normally receives hundreds of letters and telegrams each day from Turkey was yesterday, for the first time in many years, without a single communication of any sort from that country. We are ourselves suffering considerable interruption in our services from the Near East, but this is inevitable under the unhappy circumstances.

***

The *Mercantile Guardian* waxes sarcastic over consular recommendations with regard to methods of conducting business with foreign countries. I notice in a recent issue of our esteemed contemporary a protest against the complaint that only British firms are arrogant in the matter of language. A letter of a German firm to a northern commercial house is quoted as stating "In reply to your valued favour we beg to say that we are Germans and carry on our correspondence only in German. If you cannot understand German we are quite willing to abandon all idea of doing business with you." The *Guardian* then proceeds in its withering irony:—"If the German consular corps will rise to the great occasion and represent this isolated instance as typical, the general enjoyment will be complete. As for the German journalists, there is a good column and a-half of solid minion for them in this instance of how the German Empire loses trade and dives into irreparable ruin. I will leave it to them to show how supple and adroit is the Englishman when asked not to write a language his customer cannot read." May I be permitted to point out to the *Mercantile Guardian* that the delight of satirising has lured it into the very fallacy which it castigates, namely, that of attempting to generalise from an isolated case?

***

In a recent issue of the Cairo *Journal Officiel* I notice that the invitation for tenders for a very large quantity of rolling stock for the Egyptian State Railways is in French. This is a contract in which English manufacturers are likely to have a lively interest, and it seems to me that they have a legitimate grievance in the fact that the notice inviting tenders appears in French only. Some of the Government Departments have adopted the rule of publishing such notices in both French and English, and I think that English manufacturers and contractors have a right to demand that their language shall have privileges in Egypt not inferior to those enjoyed by French.

***

I learn from a Cairo correspondent that the new law regulating the disposal of antiquities unearthed by excavators is working splendidly and showing good results. Egypt is to be congratulated on thus successfully checking illicit dealings in those objects which, collectively, elucidate the history of her greatness.

***

I congratulate the Anglo-Egyptian Bank on the figures shown in the report just published. While the dividend is maintained at 15 per cent. and the reserve appropriation at £20,000, the amount written off premises is increased from £5,000 to £8,400, and the carry-forward from £50,000 to £52,000. The reserve fund now amounts to £660,000, and thus exceeds the paid-up capital.

***

Apropos of my remarks last week with reference to the proposed branch railway from Elfouleh, on the Haifa-Damascus Railway, to Jerusalem, I notice, in an American Consular report, the following observations:—"In considering the feasibility of a port at Jaffa, the fact that a large share of the tourist and pilgrim travel in Palestine, as well as freight bound for Jerusalem, might be diverted to Haifa or Port Said, must not be overlooked. During the past year a partial preliminary survey of a railway connecting Jerusalem with the Hedjaz Railway at Elfouleh, about twenty-three miles inland from Haifa, was made. The project is as yet uncertain, but it would have many commercial advantages. This line would be about eighty miles in length."

***

Commenting on trade in Southern Persia and on the state of insecurity existing on the roads, a contemporary observes that although "there is a point blank disclaimer of all idea of partition, it is perhaps as well to get the geography of the British sphere of Persia into one's head." I thoroughly agree with this recommendation, although perhaps not from the same motives. I would, however, go further and advocate a close study of the geography of a sphere extending considerably to the north of the boundary of the *existing* British sphere. A sphere of influence which excludes the shores of the Persian Gulf cannot be regarded as a correct or adequate British sphere.

***

It is announced that the Consortium Constantinople (a German-French-Belgian financial group) has obtained from the Turkish Government a concession for the Taxim-Badajiz underground railway. The only competing combination was, I believe, a French group. It was, of course, almost a foregone conclusion that the German group—for it is essentially German, although international in appearance—would obtain the concession, owing to the pre-eminence obtained in Turkey by the great German electrical engineering firms and to the energetic and powerful assistance rendered by the Deutsche Bank. We may be sure, too, that the German Embassy was not backward in urging the claims of its *protégés*.

***

This is another example of the skill in co-operation which is to be observed in its highest efficiency in the combination of German industrial, financial, and diplomatic interests. These factors work together in perfect unison, in a way that it would be well that our representatives should endeavour to emulate.

***

Floods in Roumania have had an unfavourable effect on local markets, and this, combined with the unstable conditions inevitable while her neighbours are engaged in a desperate war, has caused some uneasiness. The finances of the country are, however, in a very flourishing condition, and I doubt whether the Roumanian Government would be willing to imperil the country's prosperity in a war where much is to be lost and nothing gained. Roumania will act only in the improbable event of grave changes threatening the balance of power in the Balkans.

***

A correspondent of the *Manchester Guardian* recently touched on a question arising out of the Balkan war and its possible consequences. He points out that Turkey in Europe under the government of the Turks has been an open market for Lancashire, and a valuable one; whereas under the Balkan States, or under Russia or Austria, it would be closed to our manufactures. This is an aspect of the struggle now being fought out in Turkey which is worth bearing in mind.

COMMENTATOR.

Constantinople Business Letter

(From Our Special Trade Correspondent.)

Constantinople, October 19.

Great Britain's Trade with Turkey

The total exchanges of the enumerated articles between the two countries, according to the Board of Trade returns for the month of September, 1912, show an increase of £230,000 compared with the same month in 1911, and are exactly a quarter of a million greater than during the month of September, 1910.

The enumerated exports to Turkey during the month of September, 1912, were £80,000 more than during the same month in 1911, but were £40,000 less than during the corresponding month in 1910. As compared with 1911, the increases were in the exports of coal, cotton yarns, cotton piece goods, and bags and sacks; all the other enumerated exports showed decreases. The shipments of cotton yarns, while slightly less than during the month of August, 1912, amounted to £54,998 during September, 1912, as compared with £33,249 during the corresponding month in 1911 and £28,539 in 1910. The shipments of cotton piece goods during the month under consideration, while a little above the average, were £80,000 less than during August, 1912, and amounted to £476,440, as compared with £396,760 during September, 1911, and £513,152 during the same month in 1910. The increase in the shipments of coal were insignificant, the totals being £34,727 during September, 1912, as compared with £31,000 odd during the same months in 1911 and 1910. The decreases occur in copper, which amounted to £5,836, as compared with £13,000 and £15,000 odd during the month of September in 1911 and 1910; in tin, which amounted to £1,578, as compared with £7,000 and £3,000 in 1911 and 1910; in woollen tissues, which amounted to £48,653, as compared with £60,000 and £67,000 in 1911 and 1910; and in worsted tissues, which amounted to £20,281, as compared with £21,000 and £23,000 in 1911 and 1910 respectively.

The total enumerated exports to Turkey during the month of September, 1912, which represented a fair monthly average, amounted to £644,863, as compared with £565,280 during the corresponding month in 1911 and £683,538 during 1910.

Great Britain's enumerated imports from Turkey during the month of September, 1912, were considerably above the average, and amounted to £562,931, being £150,000 greater than during the same month of the previous year, and exactly double the total during the corresponding month in 1910. The principal increases in this instance were in the shipments of raisins, which amounted to £209,104, as compared with £86,781 in 1911 and £78,513 in 1910. The shipments of barley were larger than during the month of August, and amounted to £222,154, as compared with £208,670 in 1911 and £25,827 in 1910. Mohair amounted to £78,615, as compared with £40,000 and £82,000 in 1911 and 1910. Wool amounted to £26,523, as compared with £37,026 in 1911 and £70,422 in 1910

During the nine months ended September, 1912, the total enumerated exports from Great Britain to Turkey amount to £4,994,366, as compared with £5,467,270 during the corresponding period in 1911 and £4,826,325 in 1910. Surveying the nine months' trade, we find decreases in all the enumerated exports with the exception of cotton yarns, which amount to £494,898, as compared with £307,831 in 1911 and £287,422 in 1910, and bags and sacks, which amount to £28,716, as compared with £19,711 in 1911 and £25,988 in 1910. The shipments of cotton piece goods amount to £3,702,627, which, while £300,000 greater than during the same period in 1910, are exactly half a million less than during 1911. There is also a considerable decrease in the exports to date of woollen and worsted tissues, the shipments of the former goods amounting to £289,024, as against £345,346 and £466,609 in 1911 and 1910 respectively, and the latter to £141,399, as compared with £166,146 and £237,274 during 1911 and 1910 respectively. The shipments of copper to date amount to £84,749, and are £30,000 less than during the two preceding years, and coal, amounting to £222,804, is also £30,000 less than during the same periods of 1911 and 1910.

The enumerated imports from Turkey into Great Britain during the nine months ended September, 1912, are £2,064,642, as compared with £1,412,547 in 1911, and £1,219,723 in 1910. The principal increases are in the shipments of barley, which amount to £991,574, as compared with £549,950 in 1911, and £167,310 in 1910; raisins, which amount to £247,936, as compared with £153,888 in 1911, and £192,458 in 1910; and wheat £117,510, as compared with £89,658 in 1911, and £9,404 in 1910. The shipments of mohair amount to £526,827, which are £213,000 more than during the corresponding period of 1911, but still £46,000 less than during 1910. Decreases occur in the shipments of oats, beans, and wool, the latter being £80,000 less than during the same period of 1911.

For the first time during the present year, the total exchanges of enumerated articles between the two countries are greater than during the preceding year by £180,000, and are over a million in advance of 1910, both of which were record years. I wish to emphasise this fact as a very satisfactory showing, considering the state of war with Italy, but whether we can maintain this position to the end of the year with war now at closer range is an open question. Already some importers have telegraphed holding back their shipments of cotton goods, which account for more than 50 per cent. of Great Britain's exports to Turkey, and even although this country's imports represent, to a very great extent, the bare necessaries of life, I fear that trade is bound to suffer while the war in the Balkans lasts.

In conclusion of this subject, while it would be absurd for anyone to claim the copyright of trade statistics, and their publication in any shape may be a thing to be desired, it would be only an act of common courtesy if the local correspondent who regularly translates verbatim my monthly trade figures without so much as altering the place of a comma, and communicates them under a *nom-de-plume* to a local daily, were to give credit to The Near East as the source of his information.

Treasury Returns.

The Treasury receipts during the month of July just published are in excess of those for the corresponding period of the preceding year by £T372,883, and for the first five months of the current fiscal year ended July are £T890,779 in advance of last year at the same period. The Customs receipts during the month of July were £T32,354 greater than during the corresponding month of the preceding year. The same receipts for the five months ended July are £T132,798 less than during the same period of the preceding year; of this decrease, £T131,000 is on import duties, and represents a shrinkage in the total values of imports of a little over a million Turkish pounds.

Soma-Panderma Railway.

On the 14th of this month a further section of this railway to Soussurlu, completing about two-thirds of the line which is to connect the Soma branch of the Smyrna-Cassaba prolongation with the Sea of Mamora, was taken over. Trains are already running between Soma and Soussurlu, and there remains now only about 50 kilometres between this point and Panderma.

Prohibition of Export.

I mentioned in my last letter that the export of grain, rice, fodder, and straw had been prohibited. To the above-mentioned articles have now also been added sheep and cattle (bovine), and this not only from the ports of the Marmora, Archipelago, and the Roumelian Provinces, but also from the Black Sea and the Mediterranean. Is exempted from this prohibition, grain which can be proved to have been put on shipboard prior to the 7th inst., and which may not yet have left a Turkish port.

Detained Greek Ships.

A circular of the Ottoman Ministry of Foreign Affairs notifies that Greek ships in Turkish waters carrying cargoes destined for other than Greek ports will be allowed to sail, but those ships which are not loaded come under the embargo. Vessels flying the Greek flag and actually in the Black Sea will, under the same conditions, be authorised to pass through the Straits within a delay of four days from October 17. The circular adds that the Imperial Ottoman Government is prepared to make acquisition of the grain shipped on these steamers by arrangement with the owners of the cargo, their agents, or other authorised persons.

TURKISH TOBACCO.

To the Editor of The Near East.

Dear Sir,—With reference to the article on Smyrna tobacco in your issue of the 4th inst., permit me to correct one or two statements therein made.

In the first place the American Tobacco Company's business has been divided into only two parts, viz., W. H. Alston, agent for the American Tobacco Company and the P. Lorrillard Company, and the Export Leaf Tobacco Company.

As to the inability of the other merchants to pay the high prices given by the "American Combine," permit me to say, from an actual knowledge of the fact, that the other merchants opened up the buying, after which the W. H. Alston and Export Leaf Company's representatives came into the market and bought at one or two piastres per oke less, whilst, in many instances, after a planter had refused the price they offered another merchant's representative would immediately offer a higher price.

Furthermore, instead of buying "almost the whole crop" the American companies have so far bought little more than a third of it, whilst about a quarter still remains unsold in the hands of planters.

Trusting you will give publicity to these facts,—I remain, Sir, etc.,

"Fairplay."

Cercle de Smyrne,
October 11, 1912.

[We gladly publish "Fairplay's" letter. At the same time we think he has himself fallen into error on at least one point. He appears to think that our original correspondent implied that the American Tobacco Company's business had been divided into *more* than two parts; but this is not the case, as a careful perusal of the article will show. Our correspondent wrote: ". . . and this year a new feature has been introduced in the form of the British American Tobacco Company." And later on, in referring to the American Tobacco Company: "This, of course, has been split up, and there are the Export Leaf Company, the W. H. Alston Tobacco Company, and now the British American Tobacco Company has sent out representatives." The former sentence, we think, makes it tolerably clear that the B.A.T. is not referred to as a third division of the A.T.C. With reference to the other points mentioned by "Fairplay," we are not, of course, in a position to check them.—Ed. N.E.]

YARNS FOR SMYRNA.

U.S. Consul-General Horton, Smyrna, reports that the increasing importance of the carpet industry in Smyrna since the establishment of the Oriental Carpet Manufacturers, Limited, makes it appear that in the not distant future it will be impossible for native mill owners and spinners to meet all the local demands, and that manufacturers will have to call upon foreign factories for supplies of woollen yarn.

Smyrna now imports yearly 220,000 to 330,000 pounds of woollen yarn exclusively for manufacturing flannels, waistcoats, children's clothing, etc. However, this represents only an insignificant fraction of the quantity of woollen thread used. It is estimated that about 3,300,000 pounds are annually utilised by the carpet industry in Smyrna, all of which is of native origin.

It is worth while to note that vast quantities of wool produced in Turkey, which in former years were exported to the United States, are now entirely utilised for home industry. The annual production of wool in Turkey is estimated at 8¾ million pounds. This large expansion of the local industry in the last four years is due to the establishment of the Oriental Carpet Manufacturers.

Trade and the War.

EFFECTS AT SMYRNA.

(From Our Own Correspondent.)

Smyrna, October 19.

The commencement of hostilities with Montenegro and the apprehension of their spreading to Greece and the Balkan States have had a very baneful influence on the market, and the exchange has already dropped from 110 normal to 107. Banks are drawing in their credits, and merchants are not looking forward to the future with any confidence. It is stated that Turkey will follow the example of her adversaries and declare a moratorium. Under other conditions the market would have been firm and business plentiful in view of the approaching peace with Italy, but a war with the Balkans affects the country more than the Italian war did, and even the declaration of peace with Italy will not help matters much.

Exporters have received a great setback owing to the prohibition by the Government of the export of all grains and most foodstuffs. Figs and sultanas have, fortunately, been exempted; their export is continuing in full swing, and it is not expected that it will be stopped. Exporters of barley and beans especially suffer from this stringent order. One important merchant was on the point of shipping a full cargo of barley when the Government placed their embargo on the goods. Several ships in port are obliged to wait for the removal of the prohibition, which, in view of the political situation, may not take place for some time.

Telegraphic Communications.

The petition sent to the Minister of Posts and Telegraphs in Constantinople by the British Chamber of Commerce of Smyrna did not meet with the success it deserved; but, in view of the actual situation, it is perhaps not to be wondered at, as the Cabinet is too fully occupied with more important affairs nearer Constantinople. The Minister replied that as three of the four land wires from Smyrna to Constantinople were reserved for telegrams in Turkish, it was not possible to place any at the disposal of the Eastern Telegraph Company's officials; but in view of the amount of work it had been decided to revise the working of the existing lines, and to introduce more modern instruments. Further, a new wire 3 m.m in diameter was to be established, the Constantinople-Dardanelles section of which was stated to have already been finished. These improvements ought to accelerate messages, but the declaration of peace between Turkey and Italy should amend matters, as the Eastern Telegraph Company's cables would then be repaired. Should war break out with Greece it is scarcely probable that the Greeks would cut British cables or prevent the staff of the British company from repairing them on conclusion of peace with Italy.

CONTRABAND OF WAR.

His Majesty's Minister at Athens has forwarded to the Foreign Office the following message respecting articles considered contraband by the Greek Government during the present war :—

Have received from Greek Government notification of articles considered contraband of war. All arms, munitions, and apparatus for their manufacture or repair, all combustibles, airships, aeroplanes and accessories, saddle and draught animals, vessels whose construction, fittings, and other evidence proves them intended for war purposes, and for enemy's use.

The following are considered contraband only if destined for enemy's forces or the administrations :—Foodstuffs and forage, clothing, material, and shoes suitable for military purposes, gold and silver coins or bullion and their proper equivalents, apparatus and materials for telegraphs, telephones, "wireless," and railways, horseshoes and accessories, telescopes, chronometers and nautical instruments; vessels and boats and their parts.

EFFECTS IN ROUMANIA.

(From Our Own Correspondent.)

Braila, October 19.

The war in the Balkans is having a very unfavourable effect upon Roumanian trade. The banks, which are nearly all controlled from abroad, have practically stopped all credit, and as business here is worked with very little capital, commerce is almost stagnant. The export trade is the one most affected. Several members of the Bucharest Chamber of Commerce have asked the Government to consider the advisability of a moratorium, but the Government does not think it would be justified in having recourse to such an extreme measure. Public finances are certainly in a very healthy state, and a surplus of 200,000 frs. is anticipated this year.

There were two panics on the Bucharest Stock Exchange, and all funds depreciated considerably. The Stock Exchange is now open for half an hour each day only, so that operations may be restricted.

SHIPPING INTERESTS.

Following the withdrawal of the Johnston Line steamers from the regular trade between the Mersey and the Danube ports, there comes the intimation from other lines in the trade to Greek and Turkish ports that their sailings are likewise suspended, as cargo prospects do not warrant a continuance of the service at present. The following is a copy of the intimation received by shippers :—

"Liverpol to Corfu, Patras, Syra, Smyrna, Constantinople, and Black Sea Ports.

"Owing to the withholding of shipments caused by the prevailing uncertainty of the consequences that may arise from the war, and also owing to the dangers and delays that may occur to the ships proceeding to belligerent waters, we regret to inform you that we have reluctantly decided to cancel for the present our sailing fixtures to the above-named ports. We sincerely hope that circumstances will very shortly allow us to resume our sailings, and as soon as this is the case we shall immediately advise you.

"Cunard S.S. Co., Ltd.
"Ellerman Lines, Ltd.
"Papayanni & Co.
"James Moss & Co."

Effect on Liverpool.

As a precautionary measure, in view of the possible continuance of the war in the Near East, the Liverpool shipowners most interested in that quarter have issued an announcement cancelling sailing fixtures.

In conversation with the principal firms concerned, however, a "Courier" reporter was informed that at present no Liverpool vessels have so far been detained. But cargoes could not be accepted under present conditions unless the consignments were contraband and the consigners undertook the war risk.

Liverpool merchants and shipowners do not fear a long continuance of the war. "There are far too many political and commercial interests involved," said one merchant.

There has been no diminution of shipments from Liverpool to the affected area, but there has been a reluctance on the part of exporters to ship future goods.

"The effect upon Liverpool markets is not great," said a stockbroker, "but when you find business unsettled by political disputes in which neither you nor your country has any concern, it makes you fear for the future."

Mr. C. A. Osborne, who was for several years agent in the Red Sea ports for Messrs. Gellatly, Hankey and Company, of Billiter Street, and formerly Vice-Consul for Italy at Jeddah, has been obliged to resign his position as manager in London of the Eastern branch of that firm, on account of failing health.

NEWS FROM ALL SOURCES.

A strain of bees harmless to handle has been successfully hived by Mr. Burrows, of Loughton, Essex. The bees, which have been obtained by mating a Cyprian drone with an Italian queen, are very active workers, and Mr. Burrows claims that they are less liable to disease than the ordinary English bees. The new bees are not stingless, but the sting is innocuous. One hive this year yielded over 200 lbs. of honey.

On November 1 a new journal, the *Echo Tou Londinou*," will make its appearance in London. It will be printed in Greek and published by the Athenian Press, Limited, circulating in Europe and the Near East. The management has been entrusted to Mr. D. Th. Stavrinides, LL.D., who has been for many years the editor of several Greek newspapers.

According to a Moscow paper the services of Dutch officers have been applied for by the Teheran Government to reorganise the Persian Army.

The International Conference for the Suppression of the White Slave Traffic was opened on Monday in Brussels, under the honorary presidency of M. Carton de Wiart, Minister of Justice.

The annual matinée in aid of survivors of the charge of the Light Brigade at Balaclava will be held at the Tivoli Theatre to-day and the annual dinner will take place at the Holborn Restaurant in the evening, the Marquess of Aylesbury in the chair.

Sheikh Shawish was released unconditionally on Thursday of last week.

In an estimate of the world's crops received by the Board of Agriculture and Fisheries from the International Agricultural Institute, and issued on Monday, the estimated figures of production for maize are: Roumania, 44,290,000 cwts.; Canada, 7,109,000 cwts.; and Egypt, 34,902,000 cwts.

King Carol of Roumania has presented the town of Ajuga with a hospital, containing thirty beds, and fitted with all the latest appliances.

Emil Nevalainen, a Greek, when charged in Cincinnati with shooting his neighbour, John Steifel, pleaded that he had been dreaming that he was already in battle, and that he had fired the shot in his sleep.

The work of the Red Crescent Society of Constantinople is handicapped by lack of funds, and the Ottoman Consul-General in London appeals to English people for financial support.

THE WAR AND COAL FREIGHTS.

The war in the Balkans is likely to have a marked effect on outward coal freights. There was evidence of this this week on the Cardiff freight market. There were several pressing orders for ports in the war area, and high rates were offered. It was, in fact, reported that as much as 30s. was offering in one case for a boat for Salonika. It is, of course, early yet to determine what the full effect will be on the freight market, but in view of the likelihood of the demand appreciably expanding on Turkish and Grecian account, owners were inclined to hold to their tonnage in the expectation that rates would eventually be influenced for directions outside of the Black Sea ports. The news that one British steamer had been captured by the Greeks will undoubtedly cause owners to be very chary of sending their boats to the Black Sea, unless, of course, it be at rates that would justify their taking some of the risks of war. Already a dozen steamers have been fixed for Piræus at from 18s. to 20s., and the next few days promise to witness important developments in outward freights, as there are already indications of a fair number of vessels being required by the Greeks and Turks.

Openings for Business.

TRADE ENQUIRIES FOR CYPRUS.

The Chief Collector of Customs at Larnaca writes to the *Board of Trade Journal*, calling attention to the fact that enquiries on commercial matters are often addressed by British firms to "His Brittanic Majesty's Consul in Cyprus," in spite of the fact that there are no British Consular Officers in that island, which is administered by a British High Commissioner. British firms are therefore notified that, in order that they may not miscarry, communications relating to trade matters should be addressed to the Chief Collector of Customs and Excise, Larnaca, Cyprus, who is the Board of Trade Correspondent in the island.

STOCKINGS AND SOCKS IN SALONIKA

Apropos of a paragraph in our issue of October 11, we notice that the *Oesterreichische-ungarische Konsular Korrespondenz* states that, although Salonika produces stockings and socks, the importations continue to increase. The present value is estimated at between 700,000 frs. to 1,000,000 frs. per annum. Assortments of these articles just now are somewhat meagre, but as matters must soon resume their normal course it is expected that important orders will be issued.

Salonika imports socks and stockings in cotton, wool, Vicuna, in silk, and in Scotch thread, socks principally in the numbers 3 to 11, stockings in numbers 8 to 9½. The market is supplied by Germany, England, France, Japan, Austria, and Spain. Germany delivers stockings and socks of all qualities and of all patterns, England only the woollen article, Austria those in cotton, Japan and Spain cotton stockings and socks at a very low price, and France the ordinary article in cotton, in wool, and Scotch thread.

The price per dozen (deduction made of 5 per cent. discount for cash payments, goods rendered c.i.f. Salonika):—

	Socks.		Ladies' Stockings	
Cotton	1 mark	40 to 20 marks	.. 2 to 20 marks	
Vicuna	2 ,,	to 5 ,,	.. 4 to 6 ,,	
Wool	6 ,,	to 15 ,,	.. 8 to 25 ,,	
Silk	10 ,,	to 15 ,,	.. 10 to 20 ,,	
Scotch Thread ..	5 ,,	to 12 ,,	.. 6 to 18 ,,	

For retail sales some of the best kinds are also imported in large quantities. Packing is made in boxes, the best qualities in half-dozens and the inferior kinds in dozens.

DEMAND FOR PAINT IN EGYPT.

The increase in the importation of paint and varnish into Egypt has corresponded with the development of the building industry, according to the *Bulletin Commercial*, Brussels.

Paint in cakes, or in tubes, and mixed with turpentine, nearly all comes from France. English green, the price of which has greatly diminished, is imported mostly from Belgium and Germany. Blue and green colours are much in vogue, France supplying the best qualities. This also applies to extra ultramarine blue, which is sold at from 45 to 70 frs. per 90 kilogs. free Alexandria. British red ochre, known as "venetian red," is much appreciated, owing to its richness in iron, its beautiful red tint, and its degree of pulverisation. The French extra yellow chromium sold at 2.50 frs. per kilog.

Pure red lead is obtained from France and England. Red lead, mixed with red ochre and sulphate of baryta, is imported in barrels of 50 kilogs., at prices varying from 18 to 23 frs. per kilogs. free Alexandria. Smoke black of good quality is imported chiefly from France, in packets of 50, 100 and 250 grammes, and quoted at 85 to 125 frs. per 100 kilogs. free. As to heavy black for stone colour, it pricipally comes from Germany, and is quoted at 18 to 25 frs. per 100 kilogs. free.

Paint, mixed and diluted with linseed oil, ready for use, is mainly imported from England, and is supplied in tins of 1 to 2 lbs. This article is sold at 29 frs. per cwt. free Alexandria.

Owing to the war the Cunard, Ellerman, Papayanni, and Moss Lines have cancelled their sailings to Corfu, Patras, Smyrna, Constantinople, and Black Sea ports.

TENDERS INVITED.

EGYPT.

Red Roofing Tiles.—Tenders are invited for the supply of red roofing tiles required by the Coast Guard Administration. The conditions of tender and specification can be seen at, or may be had from the headquarters, Coast Guard Administration, Bab el Luk, Cairo, or from the offices of the Director, Coast Guard Eastern Directorate, Port Said, and of the Director, Coast Guard Stores, Arsenal, Alexandria. Tenders must be made on stamped paper of 30 mills. and submitted with the conditions of tender and specification in sealed and registered envelopes marked "Tender for the supply of tiles," to the Director, Coast Guard Stores, Arsenal, Alexandria. Date, November 16 (noon).

Office Requirements.—Tenders are invited by the Ministry of Finance for the supply of various office requirements (including foolscap paper, block-notes, pencils, note-books, letter books, ink, pins, fine string, gum, pens, rulers, etc.) required during 1913. Sealed tenders, made out on stamped paper of 30 millièmes (obtainable from Mr. A. L. Webb, C.M.G., Queen Anne's Chambers, Broadway, Westminster, S.W.), will be received at the Economat Central du Ministère des Finances, Cairo. A deposit of 2 per cent. of the value of the offer is required to qualify any tender. Date, November 27 (noon).

Cocoanut Oil.—The Financial Secretary of the War Office invites tenders for the supply of 90 tons of cocoanut oil, into Stores, Tura Mills. Persons wishing to tender can see the conditions of contract at the office of the Financial Secretary, Cairo, any day, from 9 a.m. to 1 p.m., except Fridays and general holidays. Date, November 26.

Electric Lighting of Zagazig.—The Department of Municipalities and Local Commissions in the Ministry of the Interior invites tenders for the supply of the following machinery required for the extension of the electric lighting station at Zagazig:—(a) An internal combustion engine (Diesel system) of at least 250 effective horse power, with all its accessories; (b) a three-phase alternator, 50 period, 3,000 volts, of about 250 k.v.a., with exciter. Specifications and plans may be seen any day, except Fridays and holidays, in the Department of Municipalities and Local Commissions, or may be obtained by payment of £E2. Offers must be made for the whole installation, and on stamped paper of thirty millièmes, addressed to the Director of the Department of Municipalities, Ministry of the Interior, Cairo, under sealed envelopes marked "Offre pour les travaux d'extension de l'usine électrique à Zagazig." Date, November 11.

Khaki Serge and Drill; Twill Sheeting.—Tenders will be received by the Inspector-General of Prisons, Cairo, for the supply of: (1) 1,500 metres of khaki serge for great coats, (2) 15,000 metres of twill sheeting, (3) 9,000 metres of khaki drill, and (4) 3,000 metres of khaki serge, and 250 metres of black serge, for warders' uniforms. Tenders should be made out on stamped paper (obtainable from Mr. A. L. Webb, C.M.G., Queen Anne's Chambers, Broadway, Westminster). A deposit of 2 per cent. of the value of the offer is required to qualify any tender. Local representation is necessary. Date, November 16 (noon).

CYPRUS.

Sponges.—The Commercial Intelligence Branch of the Board of Trade is notified by the Colonial Office that tenders are invited by the Government of Cyprus for the purchase of about 850 okes (oke=2.8 lbs.) of machine-fished sponges from Cyprus waters. Tenders will be received by the Inspector of Fisheries, Nicosia, from whom also full particulars may be obtained. The sponges may be seen on application to the Collector of Customs, Limassol. Date, December 21 (noon).

SERVIA.

Supply of jute and cleaning cloths.—Tenders are invited at the offices of the Direction of Servian State Railways, Belgrade, for the supply of 30,000 kil. of jute and for cleaning cloths and various materials for cleaning wagons, engines, etc. Date, November 11.

Supply of Cotton Waste.—Tenders invited at the offices of the Direction of Serviar State Railways for the supply of 10,000 kil. of white cotton waste and 20,000 kil. of ditto, mixed. Date, November 11.

TRADE OF BAGHDAD.

In his report on the trade of Baghdad for the year 1911, Mr. Consul-General J. G. Lorimer writes:—"The trade of Baghdad being largely a transit trade between Persia and the rest of the world, the clue to its fluctuations must be sought, to a great extent, in the condition of the markets and commercial communications in Persia. During the last year or two the virtual closing of the southern trade routes into Persia by political disturbances has benefited Baghdad by obliging goods which formerly entered by other lines to adopt that via Baghdad and Kermanshah instead. In the course of 1911 the insecurity prevailing in Persia was extended to the Persian section of the Baghdad-Kermanshah road in its turn, and the result was an incipient check to the late phenomenal growth of trade at Baghdad. In the early months of 1911 Baghdad caravans had already begun to suffer from tribal exactions on the Persian side of the border. In summer trade was reported handicapped, but not as yet seriously affected. Finally, in November and December the route became practically closed for traffic, and goods destined for Persia accumulated at Baghdad to the value of more than £250,000. These unfavourable conditions in the Persian trade were partly counteracted by increased prosperity in Mesopotamia itself, where the spring harvest of 1911 was above the average. The commencement of large irrigation works at Hindiyah and Habbaniyah by the British firm of Sir John Jackson, Ltd., on behalf of the Turkish Government, brought money into the country and increased the purchasing power of a part of the population.

"Defective arrangements in the custom-house resulted, in January, 1911, in damage to the extent of many thousands of pounds to uncleared goods. His Britannic Majesty's Consul-General, Baghdad, intimated that he was prepared to receive claims for compensation on behalf of British merchants and insurers, but none were submitted. There is a prospect of the construction of a new custom-house being undertaken before the end of 1912.

Imports.

"There was a decrease on the whole of £75,013 in the value of imports in 1911 as compared with 1910. The falling-off was chiefly in woollens, drugs and medicines, sugar, leather, copper, indigo, hardware and tin, under which heads it aggregated about £460,000; but there was a countervailing increase of about £210,000 in cotton piece-goods and thread, machinery and coffee.

Piece-goods.

"There was a general increase of £149,218 in piece-goods, and the value of those from the United Kingdom rose by £131,448, but imports from India—the other principal country of supply—decreased by £24,777. The year was a trying one for importers of Manchester goods. Credits were generally extended by private arrangements, and goods warehoused in the hope of high prices when the Persian market should reopen. It is said that not a single important bankruptcy due to the dislocation of this trade occurred. The coarser Indian cottons are said to find a sale chiefly in the less civilised tracts of Persia, and were consequently the first to suffer by the extension of political unrest in that country. Difficulties in Persia continued and were even intensified after the end of the year, and it is anticipated that their adverse effects on Baghdad trade will be more markedly apparent in 1912 than they have yet become."

STORES FOR BAGHDAD.

Our Baghdad correspondent informs us that there is an opening in that city for a "general stores" conducted on European lines, and that the profits should be very great.

Engineering Notes.

Alexandria's Breakwater.

Work on the long-talked-of breakwater at Alexandria is about to commence, says the *Egyptian Gazette*. Messrs. M. M. Schneider and Company, of Alexandria, who are the contractors for the breakwater, have established their bases of operations at Mex and the old fortress of Kait Bay. The stone, sand, and ballast, for making the blocks, which are to be used for the construction of the breakwater, will be imported from Mex by a Decauville as far as the French Harbour (Mex), and from thence embarked on barges and conveyed to Kait Bey, at which latter place the construction of the blocks will be carried out. The foundation of the breakwater commences from Kait Bey, projecting in a straight line about 300 metres into the sea. The blocks that are to be used for the building of the breakwater will be about 21 cubic metres each in size, and each will weigh about 40 tons. With such enormous blocks the construction will no doubt stand the heavy sea which from time to time sweeps into the eastern harbour. The work in this connection is now about to commence.

Port Said Drainage.

The *Egyptian Gazette* of the 12th inst. says :—It is officially announced that the Port Said drainage scheme is now complete. Copies will be sent to the President of the Port Said Municipality in the course of the next few days, and details of contracts will shortly be advertised in the *Official Journal* and in certain European papers. Plans and specifications are being sent to the representatives of the Egyptian Government in London and Paris, and will be available for all information for contractors when the advertisements are published. Copies will also be sent to the Commercial Intelligence Bureaus at Berlin, Vienna, Rome, and Brussels.

Drainage in the Nile Delta.

Preliminary arrangements are now being made by Messrs. C. J. Wills and Sons to start work on their contract in connection with the drainage of a portion of the Nile Delta, says the *Times*. This contract involves the enlargement of a small canal from a point near El Hamul to the south-east of Lake Borollos, into which the water will be lifted by a large pumping station to be erected near Baltim. The canal will be 16 kilometres long, and 20 metres wide at the bottom, 38 metres wide at the top, and 6 metres deep, and its object will be to lower the water level by 2 metres over an area of about 500 square kilometres. The Egyptian Government are about to build a light railway from Biala to the neighbourhood of Baltim in order to enable the contractors to transport their plant to the site, and it is expected that this will be finished by the end of the year. Actual operations on the canal will then be started, and it is anticipated that about 4,000,000 cubic metres of material will be shifted from the canal and deposited on the banks in about two years. Two new dredgers for use on the work are now being built for the contractors by Messrs. William Simons and Co., Limited, of Renfrew.

Rolling Stock for Egypt.

The Egyptian Railways Administration will receive tenders for the supply of the following descriptions of railway carriages and wagons, in accordance with specifications which have been sent to a certain number of firms chosen from among those appearing in the official list approved by the Administration. The firms having received specifications are alone invited to tender. Bogie carriages of first and second class, mixed, 5; bogie carriages, second class, 10; bogie carriages, third class (five of these to be furnished with brake compartments), 20; bogie carriages, saloon, 2; bogie post and baggage wagons, with brake compartments, 2; bogie carriages, first class, for the Luxor-Assouan line, 5; bogie carriages, second class, for the Luxor-Assouan line, 4; closed wagons, ten tons, four wheels, 120; closed wagons, thirty tons, bogie, 50; cylinder wagons, for petroleum, 40. Tenders must be made on the forms annexed to the specifications.

Suction Gas Plant.

The use of suction gas plants in the Near East has been continuously increasing during the last three or four years, and travellers are often surprised at hearing in some out-of-the-way places the thumping noise of these apparatus pumping water for irrigation, driving flour mills or olive crushers, etc., with little or no attention while in motion. The question of fuel, however, is still a drawback in some places, and a new suction gas plant which has been recently exhibited will undoubtedly be very suitable for such places. It is claimed that this apparatus is able to give "power for next to nothing" by converting all kinds of refuse, such as sawdust, chips, tannery refuse, acorns, etc., into combustible gas for supplying gas engines. The feature of the plant is the method of washing the gas before it leaves the generator, and this is done by means of small sprays of water coming into intimate contact with the gas as it passes from the generator into an annular chamber at the top of the generator, by which means the dust and heavy tar drawn over by the suction of the engine are prevented from depositing in the generator outlets and piping, which has been a source of trouble in other systems. This dust, etc., is not wasted, but collected and returned to the generator and consumed. The tar is removed by means of a specially designed rotary extractor, as much as 80 gallons per week being obtained in some instances, and is readily sold. The whole plant is constructed on very simple lines, and can easily be transported on hilly districts.

Machinery in Bosnia-Herzegovina.

The following information is quoted by the *Board of Trade Journal* from the report by H.M. Consul at Sarajevo (Mr. F. G. Freeman) on the trade of Bosnia-Herzegovina in 1911, which will be shortly issued :—

Reference was made in the last report to the likelihood of a continuous increase in the demand for agricultural machinery, and to the suggestion offered by a travelling agent of experience that samples of British machines should be entrusted to local representatives in order to demonstrate their merits. In May, 1911, the Landesbank opened a special department for the sale of agricultural machinery and implements, and now has showrooms at 11 out of its 20 branches and agencies in the country. The venture appears to have been very successful. A large number of ploughs, harrows, reapers and binders, drilling machines, mowers, wine presses, etc., mostly of Austrian and Hungarian make, have been sold. The Landesbank has also disposed of several tractors obtained from the Vienna agents of a Swedish firm, and of a few made in Vienna.

Several other banks are willing to undertake business of the same description.

It is suggested that there is some opening for British-made steam tractors, and oil and benzine motors, for driving threshing machines and flour mills.

Russian Railways in the East.

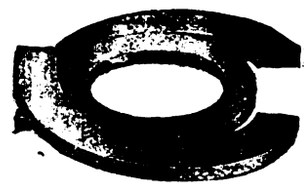
The *Commercial and Industrial Gazette* (St. Petersburg) of October 9 states that the Committee for New Railways have under consideration plans for the construction of a railway from Bokhara in the direction of Karchi, Kerki, and Termez, with a branch from Karchi to Kitaba.

Turkey's Dreadnoughts.

The *Evening Standard* understands that there is no foundation for the statement that Turkey is offering for sale the two uncompleted Dreadnoughts which are being built in this country to the order of the Ottoman Admiralty. Of these vessels, the "Reshad-i-Hamiss" and the "Reshad V.," the former is under construction at Barrow by Messrs. Vickers, the latter at Elswick by Armstrong, Whitworth, and Company. There is little prospect that either of them will be completed before the spring of 1914. They are very formidable vessels of the super-Dreadnought type, having a displacement of 23,000 tons and a speed of 21 knots. Each is armed with ten 13.5in. guns, sixteen 6in. guns, smaller ordnance, and three torpedo tubes. They are therefore slightly superior to our Orion type.

AFTER THE WAR.

(From a Correspondent.)



The present situation in the Near East is not only serious from a political point of view, but also from that of international commerce and finance. The war, in whatever light it may be considered, is a catastrophe; it is not prosperity and wealth. For if a consequence of war is the supply of work to the manufacturers of war materials and builders of warships, and if during the war millions of money are set in circulation, it is nevertheless very evident that the losses are much greater than the profits, that the damages which occur from an agricultural, industrial, and commercial point of view to the combatant States have an effect on all the markets of the world and cause a general financial uneasiness and depression. For who knows what perplexities may appear? and who can foresee what will happen in Europe before the end of this war? When the morrow is problematical money remains in the bank coffers, and when a fire continues to burn the fear of a spark starting another conflagration is naturally in the minds of many. Upon such meditations, and for humanity's sake, one cannot but wish for the earliest possible end of this war. We said above that the war is a catastrophe, yet such a "catastrophe" will ultimately bring peace, happiness, and prosperity to the peoples of the Near East, if unholy desires and greediness of other and more powerful nations do not interfere with the prospective good results of this war. For it is evident that whether the Turks or the Allies come out victorious, the reforms desired by the Christians in European Turkey will take place.

After the war there will be great openings for all kinds of safe investments and enterprises at the very door of moneyed Europe, and we hope that British interests in the Near East may be based more on such economic grounds than on doubtful political advantages. There will follow a war of trade and commerce, and in it England must conquer. At present perfect neutrality is essential, for it is a common characteristic of the peoples in the Near East to be very grateful to those who have done them any good, and not to forget those who opposed their struggle for freedom. There is more *commercial* interest for the success of the Allies shown by enterprising Continental countries than in their *apparent* diplomatic efforts for peace.

Near East Markets.

SPECIAL REPORTS.

(From Our Own Correspondents.)

Khartoum. October 5.

The report on the crops of Kassala Province shows that all the crops under irrigation should do well this year, unless the cultivators carelessly neglect them or some unforeseen pest arrives. Owing to the scarcity of rain during the latter end of August a certain amount of the rain-watered crops in the immediate vicinity of Kassala itself have suffered.

The following information is compiled from the weekly bulletins received at the London offices of the Imperial Ottoman Bank from its correspondents in the Near East :—

Busreh. October 27.

Imports.—Stocks of cotton goods and provisions are normal, and the profoundest calm pervades the market in the absence of buyers, everybody being occupied with the date crop. There are, however, some transactions in coffee for early shipment.

Exports.—Local stocks of cereals have been completely exhausted by exporters. These lots, 80 per cent. of which were barley, serve to complete the loads of the ships chartered for transport of dates. Prices are tending higher; barley is quoted £T7 per togare of 1½ tons.

Since the 14th inst. about 2,000 tons of cereals have been shipped for Jeddah by s.s. "Moshtari."

The date market is feverishly active. Local prices are as follows :—

£T17 for Hallawi.
£T16 for Khadrawi.
£T14 for Sayer.

This fortnight about 60,000 cases of dates have been despatched by the mail steamer for transhipment at Bombay, 20,000 cases being for San Francisco and the balance for London.

Beyrout. October 8.

Market.—At the beginning of the week the market improved slightly, but towards the end there was a reaction in consequence of the news of the imminence of war between Turkey and the Balkan States.

Imports and Exports.—Transactions revived this week and the receipts of the Customs showed a marked increase.

Cereals.—The large dealers continue to store wheat and barley for export to Europe in order to profit by the higher prices ruling there. However, in consequence of the threat of war between Turkey and the Balkan States, the Customs Administration in Constantinople has telegraphed to the director here prohibiting the export of cereals.

Dry Cocoons and Silk.—Export continues slowly owing to the persistent calm on European silk markets. Quotations are : For dry Syrian cocoons PB 48-53 per oke, compared with PB 58-64 per oke last year.

Mitylene. October 12.

The political situation has completely paralsed business. Small quantities of olive oil have been despatched to Turkish ports and to Marseilles.

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna, report as follows for the week ending October 11:—Our market has been quiet this week, with sales amounting to only 3 cases at 21s. for Continental account. Sellers, however, firmly maintain the position, owing to the absence of rain, which is now much needed for the autumn sowings; and should this very necessary adjunct towards the conduciveness of abundant and good results in next year's opium harvest delay much longer we may expect very high prices before the end of the present month. The arrivals amount to 1,665 cases, against 791 at the same date last year.

PRODUCE REPORT.

London, October 24.

The produce markets have shown little animation this past week, but values are fairly well maintained. Sugar is steadier, but rather irregular. Coffee is firmer. Currants dearer. Sultanas in demand and advancing in price. Figs firm. Seeds steady. Oils quiet and easier. Corn steady.

Sugar.

The market has remained steady during the week, the fluctuations being small. The sale of Hungarian crystals to India had affected the values in some instances. Continental weather has been again good, and the progress of the beet crop all that could be desired. The general expectation is that it will show a total of about 8,700,000 tons, an increase of about 2,500,000 tons on last year's deficient yield.

Beet, closing prices, October, 9s. 3½d.; November-December, 9s. 2¾d. to 9s. 3¼d.; January-March, 9s. 5¾d. to 9s. 6d.; May, 9s. 8½d. to 9s. 8¾d. Refined, English Tate's cubes No. 1, 20s. 6d., prompt; November-December, 18s. 3d. Foreign, cubes, German, October, 13s. 10½d. to 14s., f.o.b.; Dutch, 15s. 10½d. to 16s.; French, 15s. 4d. to 15s 6d., f.o.b.

Coffee.

The demand was fairly good, and prices remained steady and quite up to those previously ruling. Colombian, low mid., sold at 79s. to 80s., and bold 81s. to 82s. Costa Rica, low mid. to mid., 80s. 6d. to 83s., and bold 85s. to 86s. Santos, December, 64s. 9d. to 65s. 3d.; March, 64s. to 64s. 7½d.; May, 63s. 10½d. to 64s. 6d.

Currants.

The market is strong and active, and all qualities except the finest have experienced a further advance. Finest fruit is in good demand and some exceptional parcels have realised very high prices. Amalias are so scarce as to be nearly non-existent. Patras of excellent quality, packed in bags for the sake of cheapness, are in great favour. Provincial is quoted 26s. to 28s. 6d.; Amalias, 27s. to 29s.; Patras, 29s. to 33s.; Gulph, 30s. to 32s.; Vostizza, 30s. to 48s.; Zante, 29s. to 30s.; smalls, 29s. to 33s.

Sultanas.

All grades are in good demand, but ordinary to good meet with most attention. Some parcels of finest made extreme prices. After the s.s. "Hubbuck" with about 800 tons for London, due this week, no other shipment is yet afloat, and future departures from Smyrna are problematical on account of the war. Greek sultanas are of exceptional quality both in size and colour and, being very reasonable in price, sell very quickly. Smyrna, new, 36s. to 72s.; old, 30s. to 58s.; Greek, 50s. to 75s.

Figs.

There is now a good supply of naturals, but layers are entirely inadequate for the demand. Locoums are somewhat slow.

Seeds.

A fair trade is passing in seeds, and prices generally tend higher. Linseed is steady, but quiet. London-Calcutta, September, sold 56s. 6d.; November, 57s. 6d.; December, 56s. 6d. Rapeseed is unchanged. Cottonseed is dull. London-Egyptian, on passage, quoted £8 10s.; October, £8 8s. 9d.; November-January, £8 7s. 6d. per ton. Canary seed, 45s. to 80s. per quarter.

Oils.

Linseed Oil.—The market has experienced a sharp decline; spot pipes, landed, 30s. 9d.; barrels, 31s. 3d. Rapeseed oil, ordinary, brown, naked, 30s. 9d.; refined, casks, 33s. 3d. Cottonseed oil is quiet and easier, except for sweet refined. Crude spot, old, 25s. 3d.; new, 25s. 6d.; sweet refined, 30s.; ordinary pale, 26s. 9d.

Corn.

Wheat.—The cargo market is firm at an occasional slight advance, but demand continues very quiet. Choice white, Karachi, loading, 40s. 6d., October-November; and 40s. 3d, November-December. South Russian, on sample, October-November, 37s. 9d. to 40s. 6d. Maize is firmer with a good demand. Barley is firm, but quiet; Azoff-Black Sea, afloat, sellers, 27s. 3d.; October, old style, also October-November, 27s.; April-May, 26s. 3d.; Karachi, November-December, 29s. 6d. Steamer, 18,000 quarters, Azoff-Black Sea, October, old style, sold 26s. 9d.; another 18,000 quarters, ditto, by November 7, at 26s. 9d.

Various.

Gums.—Mastic, Turkey, 2s. 1d. to 2s. 3d. lb. Myrrh, good to fine, cwt., 96s. to 100s.; Sandrac, 38s. to 65s.; Tragacanth, first, 315s. to 340s.; low to good sorts, 90s. to 130s. Beeswax, yellow, £5 15s. to £7 cwt.; white £7 10s. to £8 5s. cwt. Almonds, Jordan, £7 to £12 cwt.; Sicily, etc., £5 12s. 6d. to £5 15s. Cream of Tartar, 89s. cwt.

TRADE OF PORT SUDAN.

(From Our Own Correspondent.)

Port Sudan, October 5.

The statistical records for the months of May, June, and July show the following figures for commercial movements in Port Sudan :—

Imports.

	Tons.	Value.	Ships.	Rgstr. T
May	6,548	.. £E83,566	.. 25	.. 49,314
June	15,479	.. £E89,291	.. 21	.. 44,827
July	4,851	.. £E82,604	.. 18	.. 43,195

Exports.

	Tons.	Value.
May	4,944	..... £E141,387
June	6,009	..... £E179,160
July	2,822	..... £E93,524

In comparison with import records of the corresponding period in 1911, the present figures show a decrease of about £E200,000, owing to strike troubles in England, from which country most of the goods are imported. In fact, orders from England have been arriving in small portions, and merchants here have been continually advised by manufacturers that no order could possibly be executed owing to want of sufficient steamers that would accept cargo for the Red Sea ports. August and September, however, are expected to give a sufficient increase in imports to enable us to show the same encouraging results at the end of the year as we had to chronicle at the end of 1911.

Exports have not shown any effective increase or decrease, as the bad crop of durra this year has prevented exports of this product, which last year were valued at not less than £E90,000, though the crop was then considered as not having been an average one.

Italian cotton goods have been imported in larger quantities than during the corresponding period in 1911 (May, June, and July), and also Americans are taking a good advance in the Red Sea generally, while the import of these in Abyssinia has been considerably progressing.

Since the beginning of the war and the blockade of Hodeidah by the Italian warships Suakim has been doing a fairly good trade, especially in cottons. It appears that most orders from the Arabian coast ports have not been executed by manufacturers, and merchants have been compelled to buy cottons in Suakim, which has always had a considerable stock in reserve for the Tokar and other inland districts.

WINES AND MINERAL WATERS IN ROUMANIA.

According to the *Handelsmuseum*, Vienna, the high Roumanian Customs dues do not permit of large imports of good brands of French, Italian, and Greek wines. Outside well-known French brands of champagne, Germany has a share of the trade, but Roumania herself supplies a quantity of her own make. In the region of Jassy there are fairly important brandy distilleries, but French Cognac is in constant demand.

In spite of the import duties and increasing excise dues, specialities in liqueurs find a fairly easy sale in this market. Advertising in the best journals is recommended. France occupies the leading position in this trade.

The consumption of mineral waters is fairly extensive, and in addition to native waters large quantities are obtained from France and Austria-Hungary, whose share in the imports is estimated to be worth about 1,000,000 frs. each annually.

Cotton and Cotton Goods.

EGYPTIAN COTTON MARKET

(From Our Own Correspondent.)

Alexandria October 18.

Prices are hardening in spite of the grave news from the Balkans and the lack of firmness which predominates in foreign markets.

Egyptian growers are selling their crops freely, so that exporters are doing a good business. Spinners should seize the opportunity of buying at present prices, which are very favourable. On the other hand, the finer qualities will be exhausted in six weeks, and we will then receive the second and third pickings, which will in no way rival the cotton of the first picking.

The weather continues to be favourable. The recent high temperatures have accelerated the maturing of the plant and the capsules of the second picking are already opening.

Speculation is very active. Bear operators have been, until now, in the majority, but they will stop their tactics as soon as the American market commences to show a more favourable disposition.

Prices of cotton seed are falling.

SIR C. MACARA'S DEPARTURE.

Sir Charles Macara, chairman of the International Cotton Employers' Federation, left England on Monday for Egypt, in connection with the visit of the members of the Master Cotton Spinners' Federation, already referred to in these columns. Interviewed before his departure, he said :—"This visit has been carried out at the request of the Khedive, the Prime Minister of Egypt, and Lord Kitchener. Everything is in their hands so far as our arrangements go at the other end. Our principal business is to encourage the growth of cotton, and kill the fallacy that dear cotton is good for any country responsible for the raw material. Our visit to the United States cotton fields accomplished a great deal in this direction; I am sanguine that similar results will follow the present Egyptian expedition. Even Lord Kitchener commenced his work in encouraging cotton growing by the belief that it was necessary to raise the price. You can only fight trusts slowly. Rapid reforms are impossible and, when attempted impetuously, injurious. Since our American visit the American Government have purchased certain cotton farms producing one-third of an acre for the purpose of carrying on experimental work and encouraging scientific cultivation. We are going to try and persuade the Egyptian Government to do the same."

LANCASHIRE TRADE AND THE WAR.

The immediate economic effects of the outbreak of war in the Balkans (says the *Manchester Guardian*) are certain to be serious. England will be one of the chief secondary sufferers from the Balkan war, because she is one of the countries chiefly interested in trade with the belligerent States, and particularly with Turkey. No part of England will suffer more than Lancashire, because the greater part of our trade with Turkey is in cotton manufactures, the Ottoman Empire being, in fact, after India and China, the largest market in the world for Lancashire's staple exports. Already Manchester's trade with the Near Eastern markets has been severely checked, and fears are expressed that, so far as the Balkans are concerned, it may be brought to an absolute standstill by the war, not so much on account of the difficulty of conveying goods to the affected markets as because of the temporary cessation of demand, the dislocation of the machinery of distribution, and the disturbance of commercial credit, that will be entailed by the war in Turkey itself and in the neighbouring states.

COTTON GROWING IN TURKESTAN.

According to the *Journal* of the Russo-British Chamber of Commerce in St. Petersburg the Russian Government has for some time past recognised the possibilities which a proper irrigation of the cotton-growing areas of Turkestan might realise, and experimental stations have been established in various districts. Lately the Russian Minister of Agriculture, M. Krivoshein, went to Turkestan for a further study of the question, as a result of which visit it has been recognised that there are three duties incumbent on the Government in order that the country, with its almost untouched natural resources, may be developed. These three duties are :—To increase the area of irrigated land; to encourage cotton cultivation; and to people the country with Russian colonists. The area of irrigated land at the present moment is roughly 5,278,000 acres, and is distributed amongst the different districts as follows :—

	Acres.
Syr-Daria	1,525,000
Amu-Daria	169,000
Samarkand	1,296,000
Ferghana	2,268,000
Total	5,278,000

According to the finding of a mission which in 1907 investigated the conditions of cotton cultivation in Turkestan, a further 5,940,000 acres in the basins of the Sir-Daria, Amu-Daria, and the Murgaba Rivers might be brought under irrigation. To carry out this work much time would be required. Government irrigation works which are now being carried on in the Hunger Steppes should be completed in 1915, when a further 121,000 to 162,000 acres will be irrigated. Further surveying has shown that in this region up to 540,000 acres can be reclaimed for cultivation, and there is a proposal emanating from a group of Moscow capitalists to irrigate about 540,000 acres in the centre of the Ferghana territory from the Rivers Narin and Kara-Daria. The conditions under which private enterprise might be attracted to this work of irrigation were considered during the recent visit of M. Krivoshein to Turkestan, and it has been decided that preference should be given to Russians, on the conditions that a part of the Crown lands irrigated should be transferred to the Government, and that Russian colonists should settle on certain parts of the remaining irrigated lands. There are three serious drawbacks to the cultivation of cotton in Turkestan, viz., the insufficiency and high price of grain, the shortage and high price of labour, and the lack of proper credit facilities. In view of the high price of wheat, 25 million poods of which are brought to Turkestan every year by the Tashkent railway and by road, the inhabitants are obliged to grow corn instead of the more valuable cotton. Whilst in the Ferghana territory, which is the centre of cotton cultivation in Turkestan, the area of irrigated land under cotton is 80 per cent. of the whole, in Samarkand the proportion is but 4 per cent. of the total. The area under cotton in Turkestan is 1,080,000 acres, and under wheat 3,510,000 acres. In order, therefore, that there should be as much land under cotton as at present is devoted to wheat it is necessary that means should be found to lower the price of wheat. The second difficulty, the scarcity and high price of labour, it is thought by the latest investigators, might be righted by the allotment of irrigated land only to Russian colonists and by further giving them the surplus lands of the nomad tribes adjacent to the cotton-growing districts. The cultivation of cotton might further be developed by the establishment of experimental stations and stores for the purpose of acquainting the inhabitants with the best methods of irrigation, the preparation of the soil, the use of machinery, and modern methods of cultivation in general.

Apropos of the above, we notice that the *Board of Trade Journal* quotes the following from the *Commercial Gazette*, St. Petersburg, regarding the prospects of the cotton crops in Turkestan and Trans-Caucasia :—The hot weather which set in about the end of June has had a most beneficial effect on the cotton crops in Turkestan and Trans-Caucasia, but has caused a shortage of water; this has been further aggravated by inefficient control of the irrigation supply. The actual harvesting of the crops in Turkestan was not expected to take place until about the middle of September owing to Moslem fasts and festivals, although the bulk of the crop was ready before then. No serious scarcity of labour is expected.

In Ferghana the principal cotton-growing region of Turkestan, the "enormous" yield of eight to nine millions poods (130,000 to 145,000 tons) of ginned cotton is expected, thereby exceeding last year's yield of about 120,000 tons in spite of a reduction of nearly 10 per cent. in the area under cultivation. The quality also promises to be better than it was last year.

The prospects in Trans-Caucasia and in the provinces of Samarkand and Trans-Caspia are equally good, except that in the two latter districts the fibre will be shorter than it was last year owing to the scarcity of water which has prevailed. An improved harvest is expected in the province of Syr-Daria, excepting in one district in which hot winds have done some damage. A very good crop is anticipated in Bokhara, although the area under cotton is much less than in 1911 (in some cases 40 per cent.).

Grasshoppers have done comparatively little damage this year in Turkestan and Trans-Caspia, and, generally speaking, the crop has not suffered from pests, but complaints have been made of blight and similar diseases. Fortunately, these diseases have not assumed dangerous proportions, but there is no doubt that more practical measures against disease are most desirable in the future.

Shipping Intelligence.

BRAILA NOTES.

(From Our Own Correspondent.)

Braila, October 19.

The freight market opened very strong this week, and, following the trend of the London market, rates jumped up with unprecedented rapidity. As much as 26s. Sulina-Antwerp was paid here on Monday and Tuesday; but, since Wednesday, when the news of the conclusion of peace between Italy and Turkey reached here, merchants have felt less inclined to pay, and have been holding in anticipation of a fall. The grain markets being also weaker, there is less actual demand, so that only a hand-to-mouth business is being done. Those brokers who have open tonnage to cover have had to lower their rate to 23s. Sulina-Antwerp, but there is little disposition to do business even at this figure. It seems difficult to predict which way things will go; the regular Greek traders being now out of the market, we depend entirely upon London.

The seven Italian steamers that were laid up at Sulina since the beginning of the war were all fixed on Wednesday at rates averaging 22.50 frs. to 23 frs. from Sulina to one port in Italy or Marseilles. Two were chartered direct by merchants, and the others were applied to covering previous engagements, so that there is still no open tonnage here for the Mediterranean.

The depth of water in the Danube fell 6 ins. last week, river draft to-day being 22 ft. 6 ins. The depth of water on Sulina has remained unchanged, vessels being able to cross drawing 23 ft.

BLACK SEA SHIPPING.

(From Our Own Correspondent.)

Odessa, October 20.

Varna and Burgas Blockaded.

The Bulgarian Consul-General here to-day formally notifies the local authorities that the ports of Varna and Burgas are blockaded by a Turkish squadron. Steamship communications between Odessa and those places are suspended.

A telegram from Constantinople of to-day's date says that the hours during which neutral merchantmen will be admitted through the Dardanelles are to be further limited. If this be correct, the Turks will be in a position to paralyse Black Sea shipping absolutely, whilst still ostensibly conforming to the request of England, France, and Russia not to close the Straits.

Nearly a thousand Bulgarian, Servian, and Greek reservists who should have left here to-day by steamer, and had already taken their tickets, are compelled to proceed overland via Roumania. Six hundred and forty Turkish reservists, from the Crimea and Caucasus, left here to-day by Russian steamer for the Bosphorus.

Freight Rates.

Messrs. Sydney Reid and Company's weekly freight report states that there was a very firm business spell during the early part of the week. From Odessa, Nicolaieff, and Kherson rates ruled as high as 25s. for Rotterdam and 26s. for Hamburg. The market has now quietened down as a result of the weakness of the foreign grain marts. The sharp drop in grain prices abroad made it impossible to combine further business at the high rates quoted; they have fallen abruptly during the last few days. Kherson and Nicolaieff still show a better demand than Odessa, and a further and active business will be done in those ports so soon as rates have steadied down to a stable standard on a workable basis. In the meantime, however, shippers are holding back, and but little is doing at nominally 20s. Rotterdam and 20s. 6d. Hamburg. Business has also been done for London at 20s. prompt shipment. In Odessa the market is very quiet; there is a very limited demand for Hamburg at 20s. to 21s. Tonnage is sparingly offered, but in view of the weakened demand all round, is not so firmly held, owners being disposed to discount recent fixtures in order to secure business. There are for the moment only two British steamers in Odessa.

STEAMSHIP MOVEMENTS.

Hall Line.

"Adalia."—At London. "City of Agra." At Glasgow October 18. "City of Birmingham."—Liverpool for Bombay. Passed Gibraltar October 21. "City of Colombo."—Left Mauritius for Bombay October 21. NATIONAL BANK OF TURKEY

ESTABLISHED 1909 BY IMPERIAL FIRMAN.

CAPITAL - - £1,000,000 Sterling.

BOARD OF DIRECTORS.

CONSTANTINOPLE.

SIR HENRY BABINGTON SMITH, K.C.B., C.S.I., Chairman.
SIR ADAM BLOCK, K.C.M.G.
F. EDWIN WHITTALL.
H.E. AHMED DJEMAL BEY.
HUSSEIN DJAHID BEY.
RECHID SADI BEY.

LONDON.

HON. SIDNEY PEEL, Chairman of London Committee.
HON. HUGO BARING.
HENRY BIRCHENOUGH, C.M.G.
C. S. GULBENKIAN.
R. H. MACAULAY.
E. N. MEYER.

Head Office: CONSTANTINOPLE (KENADJIAN HAN, STAMBOUL).
MANAGER - - H. P. KINGHAM.

London Agency: 50, CORNHILL, E.C.
MANAGER - - - R. HECHT.

The National Bank of Turkey undertakes every description of Banking business. It opens current accounts according to the custom of Bankers. Customers have the facility of discounting approved bills and of obtaining advances upon negotiable securities. The Bank will undertake the purchase and sale of bonds, shares, etc., on the London Stock Exchange, on the local and on all Continental Bourses, the safe custody of customers' securities and valuables, and the collection of drawn bonds and coupons when due. The Bank issues drafts and telegraphic transfers payable in all principal towns in the world. Letters of credit for the use of travellers are also issued. Advances made on merchandise. The purchase and sale of coupons, foreign bank notes, coin and bullion are undertaken. Bills negotiated or sent for collection. Mercantile credits opened.

Deposits received for fixed periods at rates of interest which can be ascertained on application.

BANK OF ROUMANIA, Ltd.

Head Office: 7, GREAT WINCHESTER STREET, LONDON, E.C.
Branch: 94, STRADA LIPSCANI, BUCHAREST.

CAPITAL (fully paid), £300,000. RESERVE FUNDS, £169,688.

DIRECTORS:

THE EARL OF BESSBOROUGH, C.V.O., C.B.
SIR R. HAMILTON LANG, K.C.M.G.
THE VISCOUNT GOSCHEN
E. W. H. BARRY, ESQ.
P. NAVILLE, ESQ.

The Bank was originally incorporated in 1869 under Roumanian law, but in 1903 was transformed into an English Company under the Companies Acts. It is the oldest bank in Roumania, and the only one with a London office.

A general banking business is carried on. Correspondence is invited from those doing business with Roumania, and should be addressed to THE MANAGER in LONDON or BUCHAREST.

ANGLO-EGYPTIAN BANK, LIMITED,

Tues., Nov. 12.	Wed., Nov. 13.	Thurs., Nov. 14

LONDON, October 24.

Business has died down, as everyone is anxious to make their position straight in order to be prepared for any coming complications. No trouble need be expected in London, but there is no doubt that Paris, Berlin, and St. Petersburg have suffered heavily. The Paris losses are estimated at 15,000,000 frs. The Russian Government, through the Creditnaya Kancelaria, flung millions into the market in order to stop the fall, with the result that St. Petersburg losses are not so heavy as those of Paris. It is most unlikely, therefore, that we shall see any improvement in the markets until the liquidation has ended. The big bankers who have helped in the slump do not like their position at all.

Internationals Steady.

In the Foreign market prices on the whole are steadier than one would have expected, Bulgarian Four and a-Half per Cents. being quoted at 78, which, however, has a drop of four points since the make-up. Egyptian Unified stand at par, French Rentes are weaker at 88½. German Threes are also a shade off at 76½ to 77. Greek Fours cannot be sold for more than 49, but the price is nominally harder. Hungarian Rentes are unchanged at 88½, and Italians are also quoted at the same price as that at which they made up on October 9. Perus are almost back at the old price again. The gamble here seems to have died down. Tintos have fluctuated wildly. The latest price is 72½, but the movements are rapid, and they might well be 80 within another month. Russians have been supported; Turkish Unified, which made up at 86 at the last settlement, are now quoted 77. Throughout the whole Foreign market the dealers make very wide prices indeed. They are very unwilling purchasers.

Rails and Yankees.

Home Rails remain dull without any business. Great Westerns look cheap at 115½, North Easterns are 120½. Metropolitans are the gamble in this market, and they show wide variations in price. Whenever there is a slump buyers come in. Underground Electric are weaker, and the Underground Electric shares are now down to 4. Yankees were quite unable to stand up against the continuous selling. The banks stopped buying, and as speculators were determined to have nothing open, and dealers have steadily marked down prices, it will be interesting to see what the big Wall Stret firms do with this market during the next few months. They have enormous blocks of shares to market.

Rubber and Oil.

Rubbers are not fashionable. Brieh report was satisfactory, and the price of raw rubber looks like hardening up. In the oil market the Baku report was not liked, and the shares were weaker. British Maikops have improved to 1s. 9d., as it has plots close to the new strike of oil.

Mines Neglected.

Mines are neglected. The gamblers are waiting for a lead, and the big houses do not show any signs of moving.

Miscellaneous.

In the Miscellaneous market interest in Marconis has died down, and nearly all quotations throughout the list are lower on the week.

Egyptians Weak.

Egyptians have naturally suffered with all the other markets. Aboukir show no change, but Agricultural Banks have hardened a little, and cannot now be bought under 6. Beheras are 15½. Delta Lands have been weak, and touched 15s. 9d. Delta Light Railways are also a shade off at 8⅜. Abdys are 9s., and show a small loss. Salt and Sodas look cheap at 16s. Gharbieh Lands are 2¾, and remain unchanged. There is no fresh alteration to report in either Khedivial Mail ordinary or the prefs. But Land Banks have been offered from Paris, where they are principally held, and cannot now be sold for more than 6⅜. It looks as though some of the shares that had been taken from the Zervudachi liquidation were now being unloaded. Nationals were very weak at one time, but they have improved a little from the worst, and are now 17.

New Egyptian Land Company.

However, there are some people who continue to have great faith in Egypt, for we hear that the Investment Registry has just concluded an arrangement to bring out a £600,000 company to develop land near Alexandria. Five per cent. debentures will be issued round about 90, the Registry having bid 87 for them. Further particulars will no doubt be given later on when the prospectus is issued.

LOANS FOR TURKEY.

The *Cologne Gazette* is informed from Constantinople that the Ottoman Bank has consented to place an additional advance of £T2,000,000 at the disposal of the Turkish Finance Minister. The terms are the same as before, viz., 7 per cent. interest, ½ per cent. commission, and repayment out of the funds available from the next loan to be concluded. The Ottoman Government has furthermore, contracted a provisional agreement with an American banking group with regard to a loan of £T7,000,000, bearing interest at the rate of 4¾ per cent., to be issued at 88 per cent. What security the Porte has offered for this loan is, as yet, not made known.

A MILLION FOR TURKEY.

It may be noted, says the *Financial Times*, that, according to the terms of the Peace of Lausanne, all that Italy is liable to be called on to pay to Turkey in the way of ready cash is £2,000,000, or the capitalisation at 4 per cent. of the 2,000,000 lire (£80,000) per annum which represents Tripoli's contribution to the Ottoman State Debt. This is, of course, if Turkey and the Council of Administration of the Debt agree to call in the capitalised sum, as it seems reasonable to suppose they will in view of Turkey's needs. From inquiries made at a good source it seems that the Tripolitan revenue, in virtue of the existing debt arrangements, comes to be shared out pretty evenly between the Debt Administration and the Turkish Government. If Italy consequently is called upon to pay up the capitalised sum, the Turkish Government would at once receive about £1,000,000 to aid it in the war.

ANGLO-EGYPTIAN BANK.

The directors of the Anglo-Egyptian Bank, Limited, recommend a dividend of 10s. per share, free of income-tax, for the half-year ended August 31, making, with the interim dividend of 5s. per share, 15 per cent. for the year. After appropriating £8,422 in reduction of premises account, they add £20,000 to the reserve fund, raising it to £660,000, and carry forward £52,000.

ALEXANDRIA NOTES.

(FROM OUR OWN CORRESPONDENT.)

ALEXANDRIA, October 18.

The Share Market.

News of the war in the Balkans paralysed our market and prices fell heavily. News of the conclusion of peace with Italy, on the other hand, had a reassuring effect. The market revived a little and prices recovered, while demands have been continuous, in spite of the financial depression which will result most certainly from the war in Macedonia.

The monetary crisis is less noticeable in its effects, as we have received this week £1,750,000 in gold. Further arrivals of gold are expected soon, but the abundance of currency will not dispense us from requiring fresh supplies, as the fellah will not accept payment otherwise than in gold.

Failures.

The firm Salem and Co. have deposited their balance-sheet, which shows liabilities of £E6,562 and assets of £E6,785. The bankrupt, Hanna Bey Abdel Sayed, has liabilities of £E67,562, and the receiver now proposes to antedate the cessation of payment in view of the fact that the bankrupt has transferred 174 feddans to his father-in-law, which is considered suspicious and as having been carried out with the object of defrauding the creditors.

A large corn dealer, Abdel Chedid Gouzman, has failed, with liabilities amounting to £E8,093.

A silk merchant, Mohammed El Akkad, has become bankrupt, with liabilities of £E5,788 and assets of £E8,928, and an arrangement has been arrived at with the creditors, who will receive 55 per cent.

The firm of B. Tilche and Sons has, according to the receivers, assets amounting to £E362,805 and liabilities of £E597,710, but owing to certain debts being unrealisable the creditors will only receive about 40 per cent. of the amount due to them. This failure is due to excessive drawings by the partners, to the crisis of 1907, and to the defalcations of the manager.

Abdel Malak Morkos, cotton merchant, has failed, with liabilities of £E5,358 and assets nil.

The receiver has terminated his report on the bankruptcy of George Goulimis, and it appears that the liabilities amount to £E12,075 and assets to £E18,080, thus showing a surplus of £E6,005.

Abdel Kader El Naggar, who conducted a hardware business, has failed, with liabilities £E1,484 and assets £E1,158. His paint store was burnt down, and the insurance company refused to pay the claim of 15,000 frs.

THE BANK OF EGYPT FAILURE.

Mr. MacCallum Scott has given notice in the House of Commons that he will ask the Attorney-General whether his attention has been called to the statements contained in the report of the Senior Official Receiver on the affairs of the Bank of Egypt, and if, in view of the facts thereby disclosed, he will consider the advisability in the public interest, of ordering a prosecution of all or some of the directors responsible for the failure of the bank.

BIG CIGARETTE DEAL.

The *Egyptian Gazette* reports the sale of the well-known cigarette manufacturing business belonging to Messrs. Melachrino and Company to an American syndicate, which has purchased the firm's factories in Egypt and the United States for the sum of £E500,000, the purchase price including the stocks of tobacco held at Kavalla, valued at £E150,000. It is intended to form a larger company, under the management of Mr. Melachrino, who, it is said, will receive a salary of £E5,000 per annum.

Oil Topics.

Anglo-Persian Oil.

The report of the Anglo-Persian Oil Co., Limited, for the year ended March 31 last, to be presented to the meeting on the 28th inst., states that the total expenditure to date amounted to £751,716, leaving a balance in hand represented by investments, loans and cash of £129,397. In addition to this expenditure further outlay has been incurred on behalf of the Bakhtiari Oil Co., Limited, and the First Exploitation Co., Limited, in respect of which and of previous similar advances fully paid shares to the amount of £106,080 in the said companies have been allotted to this company. During the year a further issue of £300,000 of Preference shares was made, in respect of which the sum of £209,329 10s. was paid up before the close of the financial year, and the balance has since been called up. The balance in hand at the close of the year, together with the uncalled capital, amounted to £220,068. Arrangements have been made for the advance of any further funds that may be required to carry out the work at present contemplated, and it is therefore not anticipated that any further issue of capital will be made for this purpose. The pipe line and pumping stations were duly completed and brought into operation towards the end of last year. A considerable quantity of crude has since been pumped through the pipe line to the refinery, and it is working in a completely satisfactory manner. Owing to serious delay in delivery and shipment of a portion of the plant consequent upon the recent unfortunate strikes and to alterations which have been found advisable in the methods of treating the crude, the completion of the refinery has occupied a longer time than was anticipated at the date of the last report. The first portion of it was, however, started in August last, and it is expected to be in full operation during the present month. Arrangements for the marketing of the company's products are well in hand. The first deliveries of refined products to local markets will be made during the current month, and the first shipments to foreign markets shortly thereafter. The development work on the field, which is being carried on by the Bakhtiari Oil Co., Limited, and the First Exploitation Co., Limited, is progressing satisfactorily, and is well ahead of the requirements of the refinery. Since the date of the last report the vacant seat on the board, due to the death of H.S.H. Prince Francis of Teck, has been filled by the appointment of Sir Campbell K. Finlay, who for many years has administered the affairs of the Burmah Oil Co., Limited, in Rangoon.

Strike of Oil at Neftinaya.

We are still anxiously waiting for news of the new strike of oil at Neftinaya. No. 4 well appears to have closed up, and at the moment cannot be baled. These delays are very aggravating. They may mean nothing or they mean a great deal. All the other Maikop companies are watching the result of the boring that is going on here, for it means a great deal to Maikop.

Russian Oil.

Russian oil is not, of course, in such a good position. It has had very bad luck with its deep well. It will be remembered that it struck oil on a horizon that had never been tapped before—at any rate, by this company; but it was found that the clay roof was extremely tender. It was, therefore, impossible to allow the well to spout, and it had to be baled with the greatest care in order to prevent the roof from caving in, consequently, instead of Russian oil getting a big production, as was expected, it hardly pays to bale the well.

Maikop Areas.

With regard to the amalgamation of the Maikop Areas, the Maikop Apsheron, the Maikop and General Petroleum Trust, and the Maikop Hadijensky, these amalgamations did not go through quite as smoothly as was expected. There seems to have been some friction, and certain people made an offer which, however, fell to the ground. We have before expressed the opinion that the new company is hopelessly over-capitalised, and has a very poor chance of success, although Mr. Winda thinks that some of the land is valuable.

Baku Company.

In a few days the report of the Baku Company will be out. We believe that it will contain an agreeable surprise. The company has settled all its debts on very satisfactory terms. It will show large funds in hand, and, owing to the high price of oil, it has sold this year's product at a very satisfactory figure. Indeed, it is quite probable that it will soon be in a position to pay a small dividend. It is turning out now from 135 to 145 thousand poods of oil a week, and as the price of crude oil is now 35½ copecks, there is a magnificent profit on the operations.

Proposed Galician Oil Combination.

A *Times* correspondent is authoritatively informed that, following on the formation of the new German oil company to combat the Standard Oil Company, a combination working in association with German firms will be brought about in Galicia. The announcement will shortly be made of the appointment of a leading director of the Premier Company to the board of the Galicia Oil Trust, and this week German interests which have a connection with the Premier Company have put out feelers to the leading Galician companies with a view to the consideration of combination proposals.

New Roumanian Company.

A company has been formed under the title of the Russo-Roumanian Oil Company (Société Russo-Roumano de Petrole), with a capital of £75,000, divided into 70,000 £1 preferred and 100,000 1s. deferred ordinary shares, to undertake the business of refiners of and dealers in petroleum and other mineral oils, natural gas, asphalte and ozokerite or similar substances and the products thereof, mine owners, carriers, etc., and to acquire any petroleum or oil-bearing lands in any part of the world. The signatories are :—General Sir Bindon Blood, G.C.B., 183, St. James's Court, S.W.; Count Louis de Clercq, Avenue du Bois de Boulogne 60, Paris, Ingenieur Expert pres les Conseils d'etat et de prefecture (100 preferred shares each). The company is a "private" one. The directors are to number not less than two nor more than seven. The first directors are: General Sir Bindon Blood, G.C.B., and Count Louis de Clercq. Their remuneration will be £150 each per annum (chairman £200) and 10 per cent. of the profits available for dividend after 10 per cent. dividend is paid, divisible. The offices are at 23, Willoughby Road, Acton, London, W.

GREEK FINANCIAL POSITION.

Under date of the 21st inst., Reuter's Athens correspondent telegraphs: — The Moratorium Law passed yesterday permits banks, after making due announcement, to suspend the paying out of deposits during the war. The National Bank and other establishments have already announced that they do not intend to exercise this privilege, but to-day the Bank of Athens announces that it will take advantage of the Act, as it has a large number of branches in Turkey. It states, however, that this is merely a precautionary and provisional step, and that arrangements will be completed at an early date for the resumption of payments of deposits.

THE EASTERN BANK, LIMITED.

Head Office: 4, CROSBY SQUARE, LONDON, E.C.

Subscribed Capital, £1,000,000. Paid up, £400,000. Reserved Liability of Shareholders, £600,000.

Branches:

ECONOMICS OF THE BALKANS.

(From a Correspondent.)

In the forefront of the Balkan States stands, of course, Bulgaria, which has flourished under the rule of a Coburg prince who, in the earlier years of his reign, was the jest of European monarchs. But Ferdinand's natural abilities, his tact, perseverance, and no mean diplomatic gifts, have raised Bulgaria to the premier position among the Balkan peoples. The natural increase of the Bulgars is only second to that of the Russians, and they are a stay-at-home people. Comparatively very few Bulgarians emigrate to other lands; they now number 4,500,000 souls. The army of 300,000 men, exclusive of the Reserve, is a well-organised force. Bulgaria's financial position has much improved during the last decade, and her credit has become so good that her State loans, contracted at six and a-half per cent., have been converted into four and a-half per cent. obligations. Bulgaria's debt aggregated, in January, 1910, 650,000,000 francs, and of that amount of borrowed money 400,000,000 francs have been devoted to railway construction. The State Debt is doubly covered.

Servia has also made remarkable progress during the last decade, and her economic position has improved with the expansion of her foreign trade. In the year 1908-09 Servia's exports, mostly agricultural, were valued at 20 million dinar; last year (1911) they reached the sum of 100 million dinar, and that, too, in spite of the Austro-Hungarian tariff system. Servia's exports, like those of Bulgaria, have hitherto been chiefly agricultural, but latterly she has become a considerable exporter of copper ore. Servian finance has not so good a reputation as that of Bulgaria, but it has latterly improved. Although the population is 1.5 less than that of Bulgaria, her State debt is larger; reckoned per capita of the population, it amounts to 217 francs.

Greece also has improved her economical status. Last year Greek imports had increased in value by 17 million francs as compared with those of 1910, and the exports by 8 million francs. The value of the whole of Greece's foreign trade last year was 320 million francs. Her exports consist chiefly of agricultural products, currants, raisins, wine, ore, tobacco, etc., and her trade generally has latterly expanded owing to her acquisition of a fine mercantile fleet. Unfortunately, the war is likely to prove financially disastrous to Greece, whatever its result may be.

Roumania is not, properly speaking, a Balkan State. Her economic position leaves little or nothing to be desired. The Budget for 1912-1913 shows a surplus of 40 million lei. Roumania's credit stands very high. The Minister of Finance is now considering a project for converting the greater part of the State debt into consols by a special method of amortisation. Roumania's exports are also chiefly agricultural.

Montenegro is, of course, the smallest of the Balkan States. There is much cry and little wool, so to say, in the Black Mountain. The State has for a generation been largely supported by the generosity of the King's foreign relations.

For each and all of the confederated Balkan States the war must prove financially disastrous. Wars are sometimes waged with a view to profitable indemnities in case of victory. Whatever the issue of the present struggle the Balkan States can expect no monetary compensation.

THE FUTURE OF CRETE.

The Island of Crete, a fertile piece of land, 160 miles long and 35 miles wide in the broadest part, situated in the centre of the Mediterranean Sea, with an excellent climate, and in the direct course of many steamers sailing to all parts of the world (says a New York contemporary), has today so little commerce and so few connections with the world round about that no more account is taken of the island by visitors to the Mediterranean, coming either on business or pleasure, than if it were a great barren rock.

It cannot be said that it is altogether isolated, because three or four steamers call at one or all of the three ports on the northern shore every week, but little freight is left by them, and still less is carried away. A few commercial travellers visit the island during the year, and perhaps from 200 to 300 tourists come ashore for a few hours to visit the ruins of the Palace of King Minos just outside Candia, but no one remains for any length of time, and in winter, when the weather is bad, steamers do not stop, as none of the cities has a harbour, so that for periods of weeks at a time in winter the inhabitants have no mail or any news of the outside world.

The island, however, is very rich, and has a population of a little over 309,000. The rolling country back of the coast line, although dry in summer, is nevertheless watered sufficiently by the streams of water that flow down from the snow-capped mountains to produce olives, raisins, oranges, and various other fruits in abundance. Sulphur, from which sulphur oil is manufactured, is found in large quantities, and the other mineral resources of the country have only been exploited enough to give proof of their existence in large deposits.

Anything could be grown on this land, and the farming that is now being done could be carried on in a much larger scale if conditions were more favourable.

On account of the accessibility to the large ports surrounding the island on every side, which might prove good markets, and where transhipments of freight could be made for more distant countries, a large amount of exporting could be done once a beginning were made, and the money received in return, if deposited in the Cretan banks and used judiciously by them, would do much towards improving conditions.

With the political situation on the island settled, many changes would immediately take place. It seems quite certain that a railroad would be built uniting the coast towns of Canea, Retimo, and Candia, the capital, with perhaps a line extending across the island to some port on the south and with this communication the commerce of these towns would increase, necessitating the building of larger ports with new breakwaters to accommodate the vessels that would come to carry away the exports and unload the imports. Foreign capital, and much Cretan money as well, which is now held by rich landowners, would be invested in the development of agriculture and industry if the ownership of the island were definitely fixed, as they are anxious to put their money to work in this way. These rich Cretans bought the lands of the Turks when the latter left in haste at the time of the general expulsion, and now that land values have risen they have become wealthy. Such improvements would raise the standard of living and increase the imports, so that the Government would realise more revenue, and have more funds available for making much-needed public improvements.

FINANCIAL NEWS IN BRIEF.

The Council of Administration of the Ottoman Railway from Smyrna to Aidin will be prepared to pay on and after November 1 next preference share coupon No. 14 due on that date. Coupons must be deposited at the offices of the company between the hours of eleven and two (Saturdays excepted) and left at least seven clear days for examination.

The Bank of England is prepared to receive the coupons due on the 1st proximo on Egyptian Unified bonds. The necessary lists can be procured on application at the Dividend Pay Office.

Legationsgeheimrat Karl Buoz, German delegate on the Council of Administration of the Ottoman Public Debt, has retired from that position, and is succeeded by Herr Rudolf Pritsch, German Consul-General in Constantinople.

The Bulgarian Finance Minister has given orders for the free circulation of Servian coinage in Kostendil, on the frontier west of Philippopolis, in Burgas and in Southern Bulgaria.

Coupon No. 16 of frs. 6 for preferred shares and frs. 5 for ordinary shares of the Cigarettes le Khédive, Ed. Laurens, is payable in Alexandria at the head office, and in Brussels at 11, rue Camille Lemonnier.

The receipts of the Egyptian Delta Light Railway for the ten days ended September 30 amounted to £8,153, against £E6,738 during the same period of 1911. The total receipts since April 1 showed an increase of £E3,738 over the corresponding figures of 1911.

The annual figures just published by the Ministry of Finance show that Roumania has a Budget surplus of £4,408,000. Not for a long period has Roumania had such a succession of splendid harvests as during the last three years.

An interim dividend of 2 drachmæ per share is payable on and after October 28 on the shares of the Compagnie Hellénique d'Electricité Système Thomson-Houston, in Athens, at the head office, and in Paris, at the Crédit Mobilier Français.

The half-yearly coupon of the Ottoman 3½ per cent. Loan of 1894, secured on the Egyptian tribute, is now payable.

The receipts of the Egyptian Markets for the week ended October 17 amounted to £627, being £259 less than the corresponding week of last year. The total receipts since the commencement of the year show a decrease of £4,286 on the corresponding period of last year.

On and after November 2 Coupon No. 17 of the preferred shares of the Compagnie des Tramways du Caire is payable at 25 frs., and Coupon No. 17 of the founders' shares is payable at 27 frs., in Brussels, at the Banque de Bruxelles, the Banque de Paris et des Pays Bas, and at the Bank of M. E. L. J. Empain.

COOK'S NILE STEAMERS AND DAHABEAHS.

THOS. COOK & SON have unequalled facilities for Travellers visiting Egypt, now the premier Winter Resort of the World. Their fleet of **Fourteen Large Passenger Steamers** consists of the finest vessels on the Nile, specially built, luxuriously appointed throughout, and fitted with every modern convenience.

TOURIST SERVICE.—These large and handsomely-fitted Steel Steamers sail once a week from **Cairo** to **Assuan**, and twice a week from **Assiut** to **Assuan**, the sailings from **Cairo** beginning in November, and from **Assiut** in January.

EXPRESS SERVICE.—The Express Steamers also leave **Cairo** twice a week, the Friday departures commencing in November, and the Monday departures in December.

There is thus a Service of **Five Cook's Steamers per week** ascending the Nile to the **First Cataract** during the Season—three from **Cairo** and two from **Assiut**—calling at all points of interest on the Nile, in connection with which complete arrangements for sightseeing and excursions are made, enabling Travellers to visit, to the best advantage, all the famous

PYRAMIDS, TEMPLES, TOMBS, RUINED CITIES, etc.

SECOND CATARACT SERVICE.—In connection with the above Services there is also a Service twice weekly by First-class Steamer from the **First** to the **Second Cataract**, with through bookings to **Khartoum, the Sudan,** and **Uganda.**

PRIVATE STEAMERS AND DAHABEAHS. — **Thos. Cook & Son** have several small Steamers for charter at moderate rates, specially adapted to the requirements of Families, Private Parties, Sporting Parties, etc., accommodating from eight to sixteen passengers, with competent crews, and thoroughly equipped. Also a large Fleet of First-class Sailing Dahabeahs, the best on the Nile.

Illustrated Nile Pamphlet free from:

SUDAN

Presents a Perfect Winter Climate. Invariably dry, Sunny and Bracing.

KHARTOUM and OMDURMAN
—— in NINE DAYS from ——
ENGLAND and THE CONTINENT,
via CAIRO and the NILE.

Also direct Steamers to Port Sudan from Marseilles and Trieste.

A most interesting and comfortable journey of a few days conveys one to the real . .

LAND OF SUNSHINE.

By the marvellous rapidity of its social and economic development, by the vast extent of its territory, by the historic associations of **Khartoum,** by **Omdurman**—instinct with all that is most characteristic of native life—THE SUDAN arrests the imagination and compels the interest of the traveller.

In the winter months the climate is delightful, the **sunshine constant** and **tempered by invigorating breezes,** rendered still more bracing at Khartoum by the **altitude** of about **1,200 feet** at which the town stands above sea-level.

The **air, warm and dry,** acts as a rapidly effective **tonic** on those in search of **health** and **pleasure,** and the country is free from mosquitoes and other insect pests so prevalent in most winter resorts.

For particulars and tickets apply to ARTHUR S. BULL, Chief European Passenger Agent, Sudan Government Railways and Steamers, 3, Crane Court, London, E.C., England, or to any of the Tourist Agencies in all countries.

NOTES OF THE WEEK.

History, military and probably political, is being made in the Balkans. The outlook for the Turks is of the gloomiest, for the early promise of the decisive engagement now being fought stands corrected by the latest advices. In their preparations for war, as had always been foreseen, they were bound to be outpaced by the Bulgarians. The allied forces entering Macedonia and Thrace found the bulk of the Turkish Army still in Constantinople. The troops that opposed them were everywhere inferior in numbers; but the fight that they put up showed at least that the Turkish soldier had lost none of his fighting qualities. He was clearly surpassed in generalship and in armament, and against these defects no manner of pluck and fanaticism can make headway in a contest with an enemy who in these respects is the Turk's equal. Before the war can be considered at an end, however, it is necessary that the main Ottoman army should be routed, and that will entail a general retreat to the Tchataldja lines. It is more difficult to challenge the contention that by failing to defend Macedonia the Turks have forfeited their claim to retain possession of it, inasmuch as to win back what they have already lost would entail a struggle that the Powers might well refuse to tolerate. But the loss of Macedonia does not necessarily write *Finis* over the history of Turkey in Europe. The issue of the war still lies in the lap of the future; it may confirm or it may refute the deductions drawn from the earlier stages, and until that issue is clear the fate of Turkey should not be prejudged.

Many are the unspoken apologies that will have been tendered during the week to the Balkan States. No reservations that still have to be made on behalf of the Turks can detract from what has already been accomplished by the Allies. Within ten days of the declaration of war the Bulgarians had covered more than half the distance to Constantinople; a desperate engagement, lasting three days, had been fought; Kirk Kilisse has fallen; Adrianople is invested; and even the line of communications of the main Turkish army has been cut. These are achievements of which any nation may well be proud, for they reflect no less credit on the fighting capacity of the Bulgarians than on the generalship of their commanders and the intelligence which prepared for the campaign. In the west of Macedonia the advance of the Servians has been equally successful. If the feat of arms that led to the capture of Kumanovo falls short of the Bulgarian exploits before Kirk Kilisse, the Servians have achieved the greater moral effect in gaining possession of Uskub, the ancient capital of Old Servia. The reverse of the shield—and this consideration should have restrained some of the hasty conclusions formed—is that the Allies have displayed no striking strategical genius; there has been no sensational massing of forces to overwhelm the Turks at a given spot; each nation has fought for its own hand and on its own lines. Servian and Bulgarian forces have united on the railway below Kuprulu, but they fought their way there independently of one another. In the far west the Montenegrins have set themselves their own task; and neither their failure nor their success will exercise much influence on the course of the real struggle between Turkey and her enemies. Greece, from the south, had no other alternative than to work her way up to the theatre of decisive operations. This she has done in a manner that goes far towards obliterating the memories of fourteen years ago. The opposition which the Greek forces have encountered does not compare with the fierce engagements that the northern allies have had to win through; but the army has pursued its course victoriously, and has proved itself well equipped and well handled. In its last trial of strength with the Turks it was the antithesis of this. Even if more serious fighting be in store for it, it is impossible that the humiliating experiences of 1898 should be repeated.

Until the struggle on the Ergene River the capture of Kirk Kilisse stood out as the major achievement of the war. On October 22 the Bulgarian and Turkish forces joined battle before the town, and desperate fighting ensued for three days. The second day General Dimitrieff is said to have received peremptory orders from the Bulgarian Commander-in-Chief that the fortress had to be taken. That night, in brilliant moonlight, a series of attacks was made on the positions north and north-west of the town. A sortie from the garrison was met by a feigned retreat of the storming parties, which drew the Turks within range of the Bulgarian machine guns. These opened fire with deadly effect, and such of the Turks as escaped fell back in disorder upon the town. By one of those fatal misunderstandings to which the best-handled armies are liable, the troops in the entrenchments, who do not seem to have been well informed of

Digitized by Google

the sortie, thought that they were Bulgarians attacking, and opened fire upon them. In the confusion that followed the positions fell to the Bulgarians at the point of the bayonet. At daybreak the Bulgarian artillery was placed on these heights, and the bombardment of the town began. Although the bulk of the Turkish forces had withdrawn after the failure of the sortie, the remainder of the garrison stubbornly held their ground, and fierce fighting ensued in the vineyards and streets before the Bulgarians were masters of the town. The flight of the Turkish general, Mahmud Mukhtar Pasha, had been so precipitate that most of his personal effects had been left behind in the Military Club. An enormous quantity of foodstuffs and forage fell into the hands of the Bulgarians, who are also said to have gained possession of practically the whole of the Turkish artillery, together with two aeroplanes and 1,200 prisoners. The Bulgarian losses are said to have amounted to five thousand killed and wounded.

While the Bulgarians were engaging the Turkish forces before Kirk Kilisse the Servians had closed in on Kumanovo. The following day the struggle began with an attack by the Turkish troops. Fighting continued until dusk; the Turkish onslaught was stayed, but there were heavy losses on both sides. A night attack on the part of the Servians followed, and at daybreak they began to advance along the whole line. In spite of the artillery fire to which the Servian troops were exposed they held on, and the Turkish positions were eventually stormed at the bayonet's point. Clearing operations had then to be undertaken on the neighbouring heights, and it was early in the afternoon before the Servian Crown Prince, with his victorious army, entered the town. The full effect of this success was not appreciated until it was learned that after a brief stand the following day between Kumanovo and Uskub the Turks had retreated beyond the latter town. By their abandonment of Uskub, which had been regarded as the key of Macedonia, they indicated how thorough had been their rout at Kumanovo, and the total inability of Zeki Pasha to cope with either of the forces rapidly converging on him—the Servians from the north and the Bulgarians from the east.

Adrianople still holds out, but the main army of the Bulgarians has at last met Turkey's real fighting strength. The decisive engagement has been in progress since Tuesday at the neck of the peninsula that ends at the Bosphorus, along a line little more than fifty miles from Constantinople. After a silence of three days the Bulgarians announce the defeat of Nazim Pasha's force, but at the moment of writing it is not known whether it is the advance guard that has fallen back or whether the whole army has been routed. The news is ominous for the Turks, as the dispositions of Nazim Pasha indicated that he would stake all on the issue of this fight. Beside this report, other details of this rapid war fade into insignificance. Tarabosh and Scutari still hold out against the Montenegrins; but in Macedonia Zeki Pasha with his main force, which has not yet come into action, is wandering between Uskub and Monastir, while Greeks, Servians, and Bulgarians are hurrying towards Salonika. If Zeki Pasha could be relied upon to take the offensive, the position of one or other of the allied forces converging on Salonika might be rendered precarious. His strength, however, is probably inadequate to the task, and the fate of the threatened towns must depend on the extent of their provisions and the measure of success that may yet crown the efforts of the Turkish Commander-in-Chief.

While the Greeks are installing civil officials in the conquered territory, with Kozhani as headquarters, the national aspirations in regard to Crete are also being put into effect. M. Dragoumis has been appointed Governor-General of Crete and its dependencies, and landed at Canea on October 25. In a proclamation to the islanders he announces that he has assumed the government of Crete in the name of the King of the Hellenes, not only in order to prepare for the election of Cretan Deputies to the Greek Chamber, but especially to ensure the strict application of the laws existing in the island for the maintenance of order and the equality of Christians and Mohammedans. Crete, though nominally Turkish territory, has been for so many years in the hands of the four Protecting Powers that at this juncture events in the island can almost be regarded as foreign to the issues that are being fought out in the Balkans.

The significance of the course of events in Thrace and Macedonia has not been lost sight of in Roumania, where the phenomenal success of the Bulgarians is viewed with some anxiety. To the necessity of being prepared for all emergencies the Roumanian Government has long been alive, and with this end in view it has been held advisable to remove as far as possible all causes for domestic friction by strengthening its personnel. As was anticipated last week, the Prime Minister, M. Maioresco, placed the resignation of the Cabinet in the King's hands, and was immediately called upon to reconstitute the Ministry on lines that had already been agreed upon. In the new Cabinet the two sections of the Conservative Party are represented. The first meeting was held under the presidency of King Charles on Monday, and a statement was subsequently issued to the effect that for the moment there was no need for Roumania to mobilise. In a speech to his Ministers the King was not at pains to disguise the critical nature of the situation from Roumania's point of view. It may be true that mobilisation has not yet been proclaimed, but certain steps that have been taken in connection with reservists, transport, and orders for ammunition are necessary preliminaries in that direction, and the new Ministry has already decided to set aside large credits for army purposes in case a mobilisation should be necessary. Public opinion, moreover, is by no means in a pacific attitude.

Prince Fouad Pasha made a strong point in a speech at the Authors' Club of the necessity of education in Egypt keeping pace with the economic development of the country. He did not believe in the imaginary dangers of increased knowledge; his only fear—and facts had but too often in Egypt pointed this way—was of the perils of inadequate or superficial notions. Unfortunately, however, we may point out, the period of these "inadequate or superficial notions" is generally coterminous with the process of intellectual development, and the fears which the President-Rector of the Egyptian University derides are not wholly imaginary. Nevertheless, it will not be contended that education has for this reason to be denied to the fellaheen. Rather should we respect the fears and concentrate attention on the best method of obviating, if possible, or in any case of shortening, this period of undigested education. Prince Fouad Pasha rightly urged the importance of training the teachers, and it is by reason of the shortage of a suitable supply that any attempt to introduce a rapid extension of rural schools must be made circumspectly and with due consideration of the available supply of teachers.

The absorbing interest of the Balkan struggle forces the affairs of Persia into the background; but it should not be forgotten that so far little or nothing has been revealed in concrete form of the constructive policy that was supposed to be the outcome of the Balmoral conversations. Persian finances can hardly be in any more satisfactory condition than they were a few months ago, and there is still no indication that practical assistance and guidance in the administration of the country are to be afforded by the two interested Powers. Events have moved rapidly in the Near East since Sir Edward Grey and M. Sazonoff came to an agreement upon the line of action to be pursued in Persia, and regarding the relative importance of the Balkans and the Middle East there can be no question. We should prefer to believe, however, that both Great Britain and Russia have sufficient experience of Empire to preclude any one aspect of foreign affairs from occupying the attention of the respective Governments to the exclusion of all others.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)
Constantinople, October 25.

Kirk Kilisse.

Unfortunately, last night a communiqué from the War Office made it very plain that the Turkish Army of three army corps (nine divisions, ninety battalions) deployed between Kirk Kilisse and the Tundja River had been obliged to retire after "making a number of glorious attacks, which succeeded in their object of delaying the enemy." This morning further news has been received concerning the progress of the campaign in the Thracian theatre of war. From this it appears that the Turks took the offensive at the same time as the Bulgars, and an "encounter battle" followed between the Tundja and Kirk Kilisse, the Turkish centre being at Kavakli. The Turks on the whole held firm on the first day, but on Monday or Tuesday night Mahmud Mukhtar Pasha launched a night attack on the Bulgarian centre, using for this purpose two regiments of newly embodied Anatolian Redifs. What followed is not quite clear. We only know that the attack failed, as night attacks usually do—witness Magersfontein—the Redif were severely punished, and broke, leaving a gap in the line, into which the Bulgars poured at dawn. Abdullah Pasha then drew back on the original Turkish line, Uzun Keupru to Baba Eski. Meanwhile, the bands or a Bulgar raiding party slipped round to the west of Adrianople, and cut the line somewhere near Uzun Keupru, where two empty trains returning are now "piled up." The losses on the Adrianople theatre of war are said to mount thus far to about 6,000 men all told.

The Servian and Greek Operations.

Further west the cutting of all communications with Salonika, which is reported this morning, is likely to keep us in the dark respecting the operations round Kumanovo. As far as we know here, the Servian advance from Vranya was checked at the battle of Kumanovo, but a Bulgarian force was moving on the flank of the successful Turkish army, and had reached Stratchan, on the Egri Palanka road. Further north the Serbs had taken Ghilan, Novi Bazar, and Prishtina, and were trying to strike at Uskub by way of the Katchanik Pass. From the Greek and Montenegrin frontiers comes no news of importance. Lemnos was taken on the 21st instant, and the Turkish fleet is now preparing to match itself with the Hellenic fleet, which is weaker as far as capital ships go, though the "Averoff" is a better vessel than anything the Turks possess, but has a distinct advantage in torpedo craft.

Mistrust of Russia.

A sort of official panic recently set in with regard to Russian military preparations in the Caucasus. The rumours thereanent seem to have had no substantial basis whatever, and the writer is not inclined to pay much attention to them, similar reports having been put about, usually by local Jewish papers, every six months during the past five years. Russia may have dark designs, but she will scarcely show her hand for the next few weeks till something decisive happens in European Turkey. As for the war, the campaign has so far proved that the Bulgarian army is mobile and brave, and there is reason to believe that the Bulgar strength on mobilisation much exceeded Turkish estimates. We may therefore expect a fierce and prolonged campaign and a postponement, for some time, of a really decisive encounter. The Turks have an advantage in numbers, though this is less than is usually supposed, the railways in Thrace and Macedonia requiring one man per ten yards to assure efficient protection against band attacks, and the Bulgar and Serb bands, with the Catholic Malissors and the Greek antartis forming an annoyingly large number of partisans, who, if inefficient in the open field, can tie a very large number of Turkish troops to the protection of railways, bridges, and defiles which possess strategic importance. For Europe an indecisive conflict is the best "sortie de l'impasse." A Turkish victory is an Austrian success; a victory for the League is a victory for Russia. What do France and England stand to gain from either?

WAR IMPRESSIONS.

(From Our Special Correspondent.)
Constanza, October 27.

The check sustained by the Ottoman arms at Kirk Kilisse, the important strategic point thirty kilometres to the north-east of Adrianople, on Wednesday, was largely owing to the defection of the non-Moslem element of the forces, 12,000 strong, commanded by Prince Aziz Hassan, of the Imperial Cavalry. This force, composed of 10,000 Kaisserieh Redifs (or Reserves) and 2,000 Ottoman, Greek, and Macedonian levies, was to operate in conjunction with an army of 7,000 to 8,000 men under Hilmi Bey, who, coming up from the Uzun Keupru headquarters, was to perform a turning movement to oust the Bulgars, who, numbering 100,000, have been massed there since the opening of the campaign. The evident plan of the Turkish commanders was to join to northward of Kirk Kilisse, Aziz coming from the north and Hilmi sweeping round the town in its south-east corner. The movement began on Wednesday noon, and Hilmi's corps, true to the plan, advanced boldly on the Bulgarian entrenchments, which, at a range of five kilometres, opened a murderous fire on the masses of cavalry. Unhappily, the attackers were at a signal disadvantage in not having ammunition for their artillery, and so were unable to cover their advance. This deficiency was due to the lack of transport more rapid than bullock arabas. The junction was timed for sunset, but towards four o'clock the whole 2,000 of Aziz's force mutinied, and, despite the efforts of their commander, made off towards the Bulgarian lines.

As they were retreating, pressed by the loyalist Moslems, the mutineers encountered Hilmi Bey's troops, and a hand-to-hand encounter ensued, in which bayonets and clubbed rifles were used, many of the deserters being slain. It is even rumoured that Aziz very nearly lost his life at the hands of the enraged troops. Owing to this defection the Bulgarians were able to throw off their assailants, who retired in disorder to Lulei Burgas, sixty-four kilometres to southward, along the new branch line that was opened two months ago, and there they are now re-formed.

In the Kirk Kilisse affair the Bulgarian losses are set down at 8,000. The Turkish losses are said to be greater.

There has been heavy fighting outside Adrianople, where a similar force of 100,000 Bulgarians is deployed with considerable siege artillery. Five of the thirty forts are reported to have fallen, but this is not confirmed. The butchery has been fearful, the River Arda being full of corpses. Adrianople is a second Port Arthur, and is defended by the mass of the 2nd Army Corps. Fire has broken out in the inner town, which is largely wood built; but, of course, this does not affect the fortifications, which, in the opinion of military authorities, are impregnable.

If the Turks can score a decisive victory before the winter season they will have crippled the Bulgarian army permanently, as the Allies are not able to hold out for more than three months at the utmost, owing to their lack of men and means, whereas, of course, Turkey can dispose of immense reinforcements from Asia Minor and Arabia.

The attack on Varna was evidently made in order to prepare the way for landing Turkish troops at Basilika, on the Black Sea, below Burgas, with the view of the contemplated combined attack on the Bulgarian stand at Kirk Kilisse from Adrianople, Lulei Burgas, and this side.

The writer does not share the pessimism prevalent everywhere as to the fate of the Turks; they certainly were over-confident at first, and were obliged to retire from Harmanli, but I am of the opinion that this initial advantage of the enemy will not bear permanently on the ultimate issue of the campaign.

NOTES FROM SMYRNA.

(From Our Own Correspondent.)

Preparations for War. Smyrna, October 15.

To-day nothing is spoken of but the coming war with the Balkan States. The Greeks are the people most seriously affected if Greece joins in the fray, and the measures being taken by the Turkish police make it look as if there will be a similar expulsion order to that issued in the case of the Italians. Police agents are making a thorough record of all Hellenic subjects. They took similar steps when the war with Italy broke out. It will not be such a simple matter, however, to expel the Greek subjects, as there are said to be about 50,000 in Smyrna, and such a measure will result in the almost complete dislocation of business. In the meantime hundreds of young Greeks are leaving by every available steamer for the Piræus to join the Greek forces. It is strange that the Turks do not hinder them, beyond their insisting on the production of receipts showing that the temettu tax has been paid. The Greek Consulate in some cases is paying the steamship fares.

The two railway companies are busy carrying troops, the British line from Aidin bringing down troops from the interior, while the French line from Smyrna to Cassaba and Afion-Kara-Hissar has every available carriage and truck full of troops going to Constantinople viâ the German-owned line passing through Eski-Shehir and Ismidt and on to Haidar Pasha. The latter's local train service has suffered considerably, and only a few trains are running to the suburbs. The new branch of the French company's line from Soma to Panderma has the rails in position all the way, and the military authorities tried to reap the advantage of this quick new route by sending a train of troops, but on reaching a point about forty kilometres distant from Panderma the engine-driver declined to go further, refusing to take the responsibility of risking the safety of the train on the as yet insecurely-fastened rails. It is expected, however, to have the Soma-to-Panderma branch actually ready for traffic in a few weeks' time. This will be of great advantage to the military authorities, as it is easily possible to reach Constantinople by the route under twenty-four hours. The Turks seem to be fully determined to put up a big fight against their enemies, and, having brought down most of their young troops, they are now calling up their reserves of men, ranging in age up to forty-five years. To-day about 500 reservists marched through the town, and many of them had a goodly sprinkling of white in their hair.

A Black Outlook.

This war, unfortunately, is coming on at a time when the first ploughing of the land is due. It is not at all likely that the troops will return in time for the second ploughing, in about six weeks' time, and, as there are very few labourers left, the prospects for next year's crops are very poor indeed. In fact, the labour question will now become an acute one, as, in addition to the Turks and Turkish subjects being called up for service, large numbers of Greeks are leaving as fast as they can. In Nazli and Eudemish Christians of thirty to forty years of age are being called up, notwithstanding the promises of the Grand Vizier.

The enthusiasm of the Turks for war still continues, and the Smyrna branch of the Union and Progress Party organised a second great meeting on Sunday in favour of war. As usual, fiery speeches were delivered, but perfect order was maintained throughout the proceedings. Foreign subjects are beginning to become anxious about their horses and carriages, as the Turks claim the right to make use of them.

A Scare.

This morning the little steamer of the Hamidié Steamship Company, which goes daily to Vourla, returned at about midday with the news that five Italian warships were cruising about just outside the entrance to the gulf. The Austrian steamer that arrived here on Sunday reported having sighted a squadron of British warships, and the Khedivial steamer arriving the previous day reported the presence of a part of the Greek Fleet. The Italian ships increased in number as the day wore on, and from the hills above Smyrna some twelve or fourteen ships could be easily discerned. The guns placed by the authorities to repel any attack were all ready to respond to the ships' fire, but, fortunately, nothing happened, and the French Messageries and the Russian steamers in port were successfully piloted through the zone of mines.

On Sunday the British, French, and Russian Consuls of Smyrna left by rail for Scala Nuova, where the French cruiser "Bruix" was waiting to conduct them to Samos. The Consuls will take part in the conferences to be held to decide several important questions dealing with the future of the island.

Smyrna, October 16.

Threatened Closing of Smyrna Gulf.

This afternoon Smyrna business men had the biggest scare they have yet experienced since the beginning of the Italo-Turkish War. The Italian ships, of which I wrote in my letter of yesterday, appear to have been joined by several others, making a total of from twenty to thirty vessels of different classes. Their proximity to the fort commanding the entrance to the gulf gave the Turks the idea that an attack on Smyrna was being prepared, and arrangements were made to sink a ship in the narrow channel still left open. The captain of the port, Loutfi Bey, presumably acting under instructions from the commodore, sent notice to the leading shipowners and agents to advise all their ships in the harbour to be prepared for immediate departure, as it might be necessary to block up the navigable channel. These orders were interpreted to the letter by several of the agents, and a few steamships left the harbour immediately. The necessity for their departure, however, was fortunately soon obviated by the disappearance of the Italian ships, which steamed off in the direction of Samos. As the local newspapers of this morning published the declaration of peace with Italy as being certain, it is difficult to explain the appearance so near Smyrna of such an imposing Italian naval force.

Terrible Railway Disaster. Smyrna, October 21.

A shocking calamity occurred yesterday morning on the British-owned Smyrna-to-Aidin line, resulting in the death of a large number of soldiers. During the last few days this line has been bringing thousands of troops, mostly Reserves, destined for the seat of war, and every available carriage has been brought into use, it being necessary often to employ goods wagons for the transport of the soldiers. On leaving Azizieh, the special train conveying the Tchina Battalion became divided, the engine with one carriage going on ahead, followed by the rest of the train. There is a steep incline at this part of the line, and both parts, coming down at a terrific pace, crashed into a goods train near Ayassoulouk Station. Eighteen wagons are said to have been smashed, and their occupants killed or wounded. The railway officials, most of whom are British, took prompt steps to despatch special trains to the scene of the accident, and the wounded were brought down as soon as possible to Smyrna and attended to in the Turkish military hospital.

Smyrna, October 22.

The number of victims of the railway disaster has, fortunately, turned out to be much less than first reported. The rescue parties worked all day and night to bury the dead and transport the wounded to Smyrna; and, so far as is known, about 100 soldiers have been killed and another 100 injured, instead of twice this number mentioned in the first reports. About a dozen officers were hurt; but the senior officers, including the commandant, who were in the last carriage, were saved. Most of the Reserves killed and injured were married, and the district of Tchina is plunged into mourning.

Suppression of Greek Newspapers.

The authorities have already commenced the suppression of the local Greek newspapers. The *Estia*, an evening paper edited by the well-known Greek lawyer, Stamatiades, has already ceased publication, and the Chief of Police has applied to the Governor-General for authority to close the offices of the two leading morning papers, *Armonia* and *Nea Smyrni*.

Red Cross Society.

The local branch of the Red Cross Society is inviting subscriptions, and foremost amongst those to subscribe are, as usual, the leading British families.

SALONIKA LETTER.

(From Our Own Correspondent.)

Salonika, October 16.

Business and War.

During the last fortnight this town has been a purely military camp, almost the sole noises in the streets, except the clanging of the tram gongs, being the tramp of soldiers day and night, the coming and going of carts laden with military stores, tents, baggage, etc. Commerce is at a complete standstill, all passenger trains are entirely suppressed, even to Constantinople; telegrams from within and without take anything from twenty-four hours to a week on the way, and the mails are completely disorganised.

Such irregularity in the arrival and despatch of our mails is, however, but a small thing, except from a business point of view, compared with what looms grimly before us. To begin with, the military authorities have commandeered all the workable horses, carriage, cab, cart, and sundry. Villagers coming in to the market with their produce, or with their wives and children to make purchases, have all been stopped after entering the town, their horses or oxen taken from them, and themselves left to get their belongings home as best they can, comparatively happy if they also were not taken as soldiers. The commercial cartage of this town is mostly in the hands of the Jews, but from them also the horses have been taken, so that practically the whole of the traffic is now military. Of course, these animals, etc., are being bought from their owners, but as payment for them is deferred until the war is over, the present loss and future distress to those quite unable to afford it, with the winter fast coming on and the means of gaining a living taken away from them, cannot in any way be estimated. To add to this is the general call to arms of all who are liable to serve—Christian, Mohammedan, and Jew. Many who can raise the money pay to get off, and some £30,000 have been collected within the last few days; but those who have thus paid do not know that they will not again become liable in the course of another few weeks. There are not a few cases of from £40 to £50 having been given a short time ago to liberate from service young men who are now again called upon either to join the ranks or to pay once more. One way of getting in the conscripts is to send soldiers off at night to different villages, which they surround, and then and there march off all the men liable to serve, it being found that unless this is done many disappear and are not forthcoming when wanted.

A Gloomy Prospect.

This year we had poor crops, and now is the time to plough the land and sow for the next; but who are to do it? The young men are being taken off or are running away, while the necessary animals for working and transport are also gone. As it is, the price of everything is rising both here and in the interior, as no produce is coming in by rail owing to the services being suppressed, while the small Greek steamers and sailing vessels usually trading to this port have ceased to come. Of real trade there is now none; the export of grain is prohibited, our shops are practically without customers, our banks are giving no credit whatever, while there is talk of a moratorium and of an issue of paper money. In fact, everything is in a state of utter stagnation. Such is the situation to-day, and what it will be when the great stress of war really weighs upon us passes all imagination. And yet the war fever is apparently great with the people, and much more so with the military. So much so that it seems very doubtful that the latter would now consent to peace even were the Balkan States willing to demobilise. The Continental Powers have played fast and loose with the situation too long, and they alone are responsible for the present chaos and for all the bloodshed and horrors to come.

Lack of Information.

The escutcheon and flagpole at the Servian Consulate were taken down two days ago, so it is supposed we are now at war with that country as well as with Montenegro, but, being without European papers, we have no fairly reliable information as to what is happening anywhere, the telegrams published here being strictly censored and only giving the Turkish view of things. From these we learn that the Ottoman troops are invariably victorious over the Montenegrins, although the fighting seems to be taking place in Turkish territory, the last engagement having cost the latter some thousand men. At the time of writing these notes the escutcheons and flagpoles at the Bulgarian and Greek Consulates are still up, but are expected to come down at any moment.

NOTES FROM SYRIA.

(From Our Own Correspondent.)

Beyrout, October 18.

Local Feeling on the War.

The tremor that ran through Islam when Italy declared war on Turkey was mild compared with that caused by the present storm in the Balkans. It is felt that the consequences for Turkey and for Islam must be immeasurably greater, that the destiny of Turkey as a partly European Power and as the stronghold of Islam is in the balance. It is unfortunate that the challenge of the four Balkan States has sounded so much like an echo of the Crusaders' cry of mediæval times. It is realised by all here, even the most ignorant, that the permanence of Islam as a world power is being seriously challenged for the first time in history. Political and racial differences among the Moslems of Turkey are now forgotten. In the monster demonstrations that are being daily made, Liberal Ententistes and Unionists, as well as Bedouins and Metwalis, and even the opportunist Druse, are partaking. Islam as the exponent of Eastern power is now the common platform. In every demonstration the Green Standard is being unfurled; and, as though to impress Europe with the mighty danger, crowds of Bedouins and Metwali and all the heterogeneous Moslem elements that predominate in the interior have been made to join in the protest and the counter-challenge. The passions of a whole empire may at any moment be let loose.

Call to the Colours.

All the classes of Reservists and Redifs have been called out, and the Christians, unaccustomed to military service, are contributing most to the expense of the great mobilisation. Military law is being applied with the utmost rigour. Hardly have persons paid the exemption tax of their own class than they are declared on the next class, and many are the cases where, after paying £T50, and while the person is still in the second week of his three months' training as a conscript, he is called upon to enlist in the class of reservists, or, in default, pay the ransom tax, which has lately been raised from £T30 to £T40, just as the Askerie exemption tax has been raised from £T40 to £T50. It is estimated that about £T80,000 has been collected from Beyrout alone. Men have been leaving the country clandestinely in appallingly large numbers, and the country is being depopulated to such an extent that it is feared that ordinary manual labour will soon be difficult to get. The total number of emigrants in 1911 reached the high figure of over 20,000, but lately the emigration fever has swept over the country like wildfire. Since the end of December last about 18,000 emigrants have left this country, and the height of the movement has been reached in the last fortnight, when by one steamer alone about 1,000 sailed.

Commerce Paralysed.

Horses and mules have been requisitioned wholesale. Commerce is at a standstill. Transport from the interior is completely stopped, and the consequences may be realised when it is remembered that this is a purely agricultural country. The railways tonnage are being requisitioned for the transport of troops and horses and munitions of war. Fortunately, the order prohibiting the export of grain has been withdrawn. It seems that it was communicated indiscriminately to all the vilayets by mistake, and when representations were made at this end the reply came that the prohibition is confined only to the Roumelian provinces, the Marmora, and the Turkish Archipelago.

LETTRE D'ATHENES.

(De Notre Correspondant Particulier.)

Athènes, le 24 octobre.

Le voyageur qui arriverait en ce moment à Athènes auraient eu bien de la peine à croire qu'il se trouve dans la capitale d'un pays en état de guerre. En effet, la ville d'Athènes a conservé son aspect ordinaire absolument comme si rien n'avait eu lieu. Les banques et les autres bureaux d'affaires, les établissements industriels ainsi que les magasins, ont remplacé, tant bien que mal, le personnel qui leur a été enlevé par la mobilisation et continuent leurs opérations aussi tranquillement qu'avant la guerre. Le mouvement de la vie sociale n'a rien perdu non plus de son activité habituelle. Les théâtres et autres centres mondains ou d'attractions sont tous les soirs remplis de monde comme auparavant et dans les cafés, nulle part aussi nombreux et aussi fréquentés qu'à Athènes, les conversations sont toujours aussi animées, avec cette différence, qu'au lieu de se livrer à des discussions politiques, on ne parle plus maintenant que de la guerre en commentant les moindres des opérations militaires qu'on s'évertue à expliquer à grand renfort de dessins au crayon, plus ou moins réussis, sur les tables de marbre du café.

Il ne faudrait cependant pas croire que tout ce calme soit un signe d'apathie ou d'indifférence. Sous cette tranquillité apparente se cache la plus vive anxiété et la plus mortelle inquiétude en ce qui concerne l'issue de la lutte gigantesque que les petits peuples des Balkans ont entreprise contre leur puissante voisine pour affranchir leurs frères opprimés.

Le peuple grec se rend parfaitement compte de tous les dangers auxquels il s'expose et des graves sacrifices de sang et d'argent que cette lutte va lui coûter, et pourtant il n'a pas un instant hésité à l'accepter dès le premier jour, non seulement sans la moindre récrimination mais avec le plus vif empressement et une joie toute patriotique. A l'appel aux armes les jeunes réservistes ont accouru se ranger sous les drapeaux et ceux qui étaient à l'étranger sont partis des contrées même les plus lointaines pour venir, au sacrifice de leurs intérêts, offrir à la patrie le concours de leur dévouement.

Loin de s'abandonner à la tristesse et aux cruels regrets de la séparation, la dernière peut-être, les parents accompagnent leurs fils avec un sangfroid et un courage admirables, ne leur souhaitant que d'être victorieux. J'ai été frappé de la mâle résignation d'une paysanne des environs d'Athènes qui, en disant adieu à la gare du chemin de fer à ses quatres fils que partaient pour la guerre, leur recommandait de bien remplir leur devoir envers la patrie "pour que *Athènes* puisse devenir un grand royaume," comme elle disait dans la simplicité de son langage. Puis, s'adressant à l'un d'eux qui était marié elle lui dit: "Tu peut être sûr que si tu ne reviens pas, j'aimerai et je soignerai tes enfants comme toi-même." Ces fières paroles rappellaient le "Τὰν ἢ σὺ τὰγ" de la femme spartiate à son enfant qui s'en allait à la guerre.

Dans ce noble empressement les classes ouvrières ne sont point restées en arrière. La Fédération des syndicats ouvriers helléniques a même adressé un appel aux corporations ouvrières ainsi qu'aux partis et à la presse socialiste d'Europe et d'Amérique, les sollicitant de s'intéresser à la sainte cause des états balkaniques.

Des Crétois continuent d'arriver en masse. En dehors de la milice, qui est venue presque toute entière, de nombreux corps de volontaires, dont l'un est commandé par le député grec M. Const. Manos, viennent tous les jours bien armés et équipés. La plupart portent l'uniforme grec. Leur nombre s'élève à environ 5.000 hommes. Inutile de dire quelle joie et quelle émotion provoque l'aspect de ces braves combattants de l'île sœur; cependant leur arrivée ne donne lieu à aucune de ces manifestations théâtrales d'autrefois.

Ce calme empressement est évidemment dû en premier lieu à ce que le pays se sent mieux rassuré, eu égard aux conditions exceptionnelles dans lesquelles se fait cette guerre, c'est-à-dire avec de forts alliés et une armée bien organisée et disciplinée. Au surplus c'est qu'on a pleine confiance dans l'éminent homme d'état à qui, comme M. Gueschoff l'a déclaré dans le télégramme qu'il lui a adressé l'autre jour, est due la première initiative de l'alliance balkanique. Le pays a trouvé en lui le chef d'état qui lui avait toujours manqué et dont l'absence le faisait tomber d'errements en errements et d'aberration en aberration. Sous l'influence de cet homme s'est opéré en deux ans un changement incroyable. On dirait que ce n'est plus le même peuple frivole, inconstant d'autrefois: il est devenu sage, sérieux, pondéré. En effet, quand je me souviens de l'affolement qui régnait lors de la guerre de 1897, je crois me trouver dans un autre pays. On n'avait pas même 50.000 hommes capables d'entrer en campagne; les soldats en grande partie portaient des costumes civils les plus variés et n'avaient de l'uniforme que la casquette militaire. On n'avait pas même la moitié de la flotte actuelle, et, de plus, elle manquait de munitions et surtout de tout instruction pratique; et c'est avec de telles forces qu'on voulait faire la guerre à la Turquie et tout seul! Les orateurs chauvinistes prononçaient des discours enflammés sur les places publiques du matin au soir et si leurs foudres oratoires avaient pu atteindre l'ennemi, certes il ne serait pas resté un seul Turc vivant.

Maintenant, la mentalité étant tout autre, les victoires successives des armées grecques en Macédoine et sa marche rapide et victorieuse jusqu'à Servia ont été reçues avec joie mais sans bruyantes manifestations. On admire avec raison la bravoure du prince royal qui, au péril de sa vie, a dirigé personnellement tous les combats, ce qui a grandement contribué à relever son prestige militaire. L'empressement des autres princes, ses frères, et de son fils, l'héritier présomptif, à prendre part aux combats, ainsi que les efforts de toutes les princesses pour organiser des hôpitaux, des trains d'ambulance, des bâtiments hospitaliers, etc., ont été très appréciés dans le pays et leur ont valu de nombreuses sympathies.

Crete.

L'attitude des puissances et surtout de l'Angleterre, qui n'ont pas mis de sérieux obstacles au départ des Crétois pour le Pirée, a produit une agréable impression. D'ailleurs, en agissant de la sorte dans l'espèce, les puissances n'ont fait que se montrer conséquentes avec leurs déclarations écrites, par lesquelles elles ont reconnu les liens naturels qui existent entre la Grèce et la Crète.

Tant ici qu'en Crète on croit que, si la guerre a une heureuse issue, l'union ne fera plus l'ombre d'un doute. Souhaitons que ces prévisions optimistes se réalisent; en attendant, le gouvernement grec, conformément aux déclarations faites par M. Vénizélos à la chambre, a envoyé hier soir en Crète M. Etienne Dragoumis, ancien président du conseil, en qualité de gouverneur-général.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, October 23.

Local Feeling and the War.

It is a remarkable fact that, although community of religion, national ties, and business relations naturally prompt the population of Egypt to follow the progress of hostilities in the Balkans with close and eager attention, so far there have been no outward signs of excitement. Indeed, all sections are evincing most exemplary calmness and coolness, which is a marked difference from the condition of public feeling that existed about a year ago, when the trouble in Tripoli first started. Perhaps the novelty of war has worn off; perhaps the fact that the scene of action is no longer at Egypt's door, so to speak, has conduced to this moderation; perhaps the cause is the knowledge that the people have to do with a strong Government, which will not for one instant tolerate words or deeds calculated to excite or agitate the general public. All three factors have most probably combined to produce this result, but it is highly possible that the third one has had most to do with this restraint. Undoubtedly the Press was mainly responsible for the excitement which reigned on all sides this time last year. Its supplementary editions, hawked round by the newsvendors with catchpenny cries, mostly contained false telegrams. To-day the publication of false news is forbidden—and rigorously punished—whilst the police have been instructed to stop the cries of the newsboys and to intervene whenever they see any dispute between natives and Europeans.

The statement that calmness pervades everywhere must not be interpreted to mean that the general interest in the war is lukewarm. The Moslems look upon it as a struggle between Cross and Crescent, a sort of a crusade. The victories that are reported to have been gained by the Balkan allies have come as a great shock to them, but they have the firm conviction that Turkey will triumph in the end. The native Christians and the Syrian element hope and pray that the Allies will continue their successes right up to the very end, for in the defeat of the Turk they see the prospect of the emancipation of their co-religionists and compatriots from the Ottoman yoke. In the meantime they express a certain nervousness with regard to the fate of the Christians in Syria; for advices from Beyrout do not give an encouraging account of the attitude of the Moslem community. Finally, the Greeks look upon this war as an opportunity for re-asserting their position and obtaining revenge for the defeats which they suffered in 1897. This would account for the extraordinary alacrity and enthusiasm with which the reservists domiciled in Egypt (where the Hellenic colony numbers 63,000 souls) responded, and are still responding, to the call to the colours. Meanwhile subscriptions continue to flow in to the Greek Consulates, and daily offers of ambulances and medical stores are being received. The Egyptian Red Crescent Society has held a meeting at which it decided to send a fully-equipped mission to the front and to open a subscription list for the purpose. In addition, the committee which organised a fund for the assistance of Turkey in the Tripoli war decided at its last sitting, under the presidency of Prince Omar Pasha Toussoun, to start a similar fund for the Balkan war.

The course of events in the Balkans has somewhat overshadowed the conclusion of peace with Italy, and it is difficult to arrive at a correct appreciation of feeling locally with regard to the Ouchy pact. To the pro-Turkish element the treaty is somewhat of a blow, but it is not altogether an unexpected one. As soon as war started in the Balkans it was realised that Turkey could not possibly continue the unequal fight, and it is felt that if by relinquishing Tripoli the Sultan is able to concentrate his energies and drive out of his dominions the enemies who have taken advantage of his internal and external difficulties, the cession of what is practically Turkey's last possession in Africa will have been amply justified. At the same time some consolation is derived from the knowledge that the mere cession of Tripoli does not mean immediate possession for Italy, but that the Arabs will in all probability make her task of occupation and pacification just as difficult as heretofore.

Unfounded Rumours.

There are still persistent rumours flying round of an impending Ministerial crisis and of the approaching creation of a separate Ministry of War. I understand, however, that these are but rumours, although they are retailed in all seriousness by the leading papers; and that, whilst the detachment of the War Office from the Ministry of Public Works, with which it is joined under Sirri Pasha, is not even under consideration, there is at present no reason to expect what is popularly known as a Ministerial crisis.

The Release of Sheikh Shawish.

The sensation of the week has been the filing of the case against Sheikh Shawish and the two Egyptians who were still in custody with him. As your readers will recollect, the Sheikh was arrested at Constantinople and brought amid much fuss to Alexandria in connection with the seditious circulars inquiry, which was started on August 23, when the circulars in question were found in the baggage of a certain Ahmed Mukhtar. The latter had declared that they had been given to him by Shawish, who was duly arrested at the beginning of September. Since then the inquiry has been conducted in the greatest secrecy, and the prisoner's applications to the Courts for liberation from custody have been most energetically resisted by the Parquet. In view of the Porte's special communiqué, explaining the motives which prompted it to allow the Sheikh's arrest, and of the Parquet's attitude, the general public really thought that some conclusive evidence had been obtained of the Sheikh's complicity. But to everyone's astonishment, on Saturday the Procureur-General issued an "ordonnance de non-lieu," the Sheikh and his two fellow-prisoners having been set at liberty on the previous Thursday. It would appear that the evidence was wholly insufficient to incriminate the Sheikh; and as the supplementary evidence, which has been asked for from Constantinople, will not be available for a very long time, it was considered advisable to file the case provisionally as regards Shawish and two of the prisoners, but Mukhtar will have to stand his trial for having brought the seditious circulars with him. The inquiry established the fact that Sheikh Shawish and Farid Bey were not on the same terms with the Egyptian students at Constantinople; the former's relations with them were very strained, whereas the Bey was on very cordial terms with them; from which it is permissible to infer that the two leaders are not as friendly inclined to one another as they were. Public opinion is not best pleased at this result. It is admitted that the task of Sarwat Pasha, the Procureur-General, was a very difficult one; but it is pointed out that it is scarcely right to keep a man in custody for six weeks when apparently there is no definite proof or evidence against him. The reluctance of the authorities to give any information during the inquiry is now explained, and it is wondered on what evidence the Courts, so late as a week before, rejected the application for release.

The Cotton Spinners' Visit.

All is in readiness for the visit of the deputation from the International Federation of Master Cotton Spinners' and Manufacturers' Associations, which is due to arrive at Alexandria next week. Mr. Arno Schmidt, the secretary, is at present here, and is making the final arrangements for excursions, lectures, and inspections. The reception committee appointed by the Government consists of Ismail Pasha Sidki, Under-Secretary of State for the Interior; Mr. G. C. Dudgeon, Director-General of the Department of Agriculture; Mr. C. Choremi, President of the Alexandria General Produce Association, and Abdul Hamid Bey Abaza, secretary-general of the Khedivial Agricultural Society.

THE SUDAN SEASON.

Writing from Um Nabardi on October 17, our Sudan correspondent says:—"The 'wash-out' on the railway between No. 5 and No. 6 watering stations has been successfully repaired, and the mails are now running regularly again. But the weather has been very fickle. At the Um Nabardi Goldfield rain fell on October 14, which is very late for this district. However, the north wind is now gradually settling down, and cooler weather is making its welcome appearance."

NOTES FROM BULGARIA.

(From Our Own Correspondent.)

Sofia, October 25.

Bulgarian Successes.

The Bulgarian forces operating against the Turks consist of three army corps. The first, under General Kutintcheff, is operating from Yamboli towards Adrianople; a detachment, sent through Dubnitza, Kotcharinovo, Baracovo, has already succeeded in capturing Jumaya-Bala, the Razlog district, with Mihomia, Bansco, etc. The second, under General Radco Dimitrieff, is operating from Kazil Agatch on Kirk Kilisse and Adrianople; and a detachment under General Kovatcheff has already captured Tomrush, Kirjali, and Malo Tirnovo. The third army, under General Ivanoff, has captured Mustafa Pasha and Kadikeui, the advance forts of Adrianople, and is now actually before that city.

Capture of Tomrush.

After long and obstinate engagements General Kovatcheff succeeded in driving the Turks from the important strategical points of Tomrush and Kirjali, and occupying those districts. The Bulgarians captured about 2,000 Turkish prisoners at the former point; and when a Bulgarian cavalry squadron was convoying them the inhabitants of Tomrush—who are called Pomaks, are Bulgarians by origin, Moslems by religion, and fanatical Moslems to boot—attacked the convoy in the rear, killed the greater part of the guard, wounded the rest, and thus enabled the majority of the prisoners to escape. Out of 2,000 only about 150 prisoners remained. General Kovatcheff was so much exasperated by this perfidious act of the Pomaks that, to give an example to others, he inflicted condign punishment upon them.

Capture of the Kresna Pass.

When Jumaya-Bala was attacked by the Bulgarian troops a Turkish detachment from Nevrokop was despatched to its assistance. Near the village of Kresna the Turkish advance guard crossed the bridge over the Struma. But at a spot called Kresna Pass a large Bulgarian revolutionary band, under the leadership of Voivode Dontcho (called "The King of Pirin") was concealed; and at the appearance of the Turkish troops this band, armed with bombs and rifles, dashed out and blew up the bridge with their bombs. A great many of the Turkish soldiers were drowned in the river, and the unexpected attack threw the survivors into a state of great confusion. Voivode Dontcho succeeded in making 1,200 of them prisoners, and captured three mountain guns and five mitrailleuses. The Bulgarian troops then came up from Jumaya-Bala and occupied the pass.

Alleged Turkish Atrocities.

It is reported that on the 21st inst. a detachment of Turkish troops from Kotchana entered the village of Gurnino and massacred all the inhabitants they could find. According to the report of two old men who succeeded in making good their escape, they killed 147 persons, mostly women and children. It is also reported that on their retreat the Turkish troops have massacred all the male inhabitants and burned the villages of Gornia, Dolnya, Suchitza, Serbinovo, Metchkul, Vananovo, Kresna, and others in the district.

Arrival of Turkish Prisoners.

Several hundred Turkish prisoners have already arrived here. They are in a most miserable state, dressed in rags, and bare-footed. Here they are receiving kind treatment from the Bulgarian authorities, and the worst off among them are supplied with clothes and shoes. They are lodged in the empty military barracks, and the regular rations of the Bulgarian soldier are served out to them. The Turkish officers are lodged at the hotels and in private houses.

Turkish Attack on Varna.

Last Saturday a Turkish squadron appeared off Varna and commenced to bombard it. No great damage was done, because the Turkish shells could not reach the town. The monastery of St. Demetrius, standing in the grounds of the Royal Castle of Euxinograd, was half destroyed; and the barracks of the Royal Guards were hit, but no damage was done to them. The Turks attempted a landing, but were vigorously repulsed by the territorial guards. The squadron then withdrew, and appeared before the small and unfortified port Kavarna, where it bombarded the Customs warehouse and some private buildings, doing considerable damage. The Bulgarian Government has protested against this bombarding of an unfortified town. In order to guard the Black Sea coast against a Turkish invasion, the War Minister has sent thither a force of territorial guards, about 50,000 strong, under the command of General Hisaptchieff.

The Fall of Kirk Kilisse.

At the beginning of this week the attention of all Bulgaria was centred upon the great engagements fought before the modern Turkish fortress, Kirk Kilisse. After two days' storming (23rd and 24th inst.) the place fell into the hands of the 2nd Bulgarian Army, under General Radco Dimitrieff, called "the Little Napoleon." On Wednesday, 23rd inst., a confidential report to the War Minister announced that the generalissimo of the Bulgarian Army, General Savoff, had issued peremptory orders to General Dimitrieff that Lozengrad (Kirk Kilisse) must be taken on Thursday, the 24th inst.; and on that day everyone was anxiously awaiting the bulletin from the theatre of war. At five o'clock in the afternoon the official communication of the good news was received here. It ran thus: "After long and obstinate fighting Kirk Kilisse was captured by the Bulgarian troops, together with a great quantity of important military trophies and prisoners." At once all the squares and streets of Sofia swarmed with enthusiastic crowds; the bells of every church broke into peals, and all the buildings were beflagged. Through the night services were held, first of thanksgiving for the victory and then in honour of the fallen. All the churches were packed with worshippers, and at the close of each prayer was heard their murmured "Glory to the heroes! Lasting honour to the dead!"

The students and the Macedonian volunteers, carrying torches and the flags of the four allied nations, formed a long procession, which traversed the main streets of the city singing patriotic songs. The procession halted before the building in which the Cabinet Council was assembled, and the ministers were most enthusiastically acclaimed. Mr. Gueshoff, the Prime Minister, and General Nikiforoff, the War Minister, appeared upon the balcony, and expressed their thanks to the people and the brave Bulgarian army. The procession then went on to the Servian Legation and the Greek Legation, before each of which they demonstrated their enthusiasm. At the former building M. Nenadich, the secretary, after thanking the demonstrators, added: "We have just received the news that the Servian troops have entered Kumanovo. Long live the Serbo-Bulgarian brotherhood!" Loud "hurrahs" and "zivos" greeted this declaration. At the Greek Legation Mr. Panas, the Greek Minister, acknowledged the compliment, and declared that the Bulgarian victory was a victory of the allied armies. "Long live the Balkan Confederation!" he concluded. And frantic cries of "zilo" and "hurrah" were heard.

Before the Russian Legation the demonstrators chanted the Russian and Bulgarian national anthems; and the Russian Minister, M. Nekludoff, expressed the hope that "brotherly Bulgaria" might ever flourish, and wished long life to Tsar Ferdinand, Prince Boris, and Queen Eleanora and the brave Bulgarian army.

In the course of their march the demonstrators met M. Panas, the Greek Minister, walking with Mr. Bourchier, the Balkan correspondent of the *Times*, who is very popular here, and raising both gentlemen shoulder high they cheered them most enthusiastically. Mr. Bourchier is commonly regarded here as the real promoter of the Balkan Alliance, and he has won the esteem of the whole nation.

Owing to the continually increasing demand for "The Near East," difficulty is occasionally experienced in obtaining copies. The Manager will be obliged if, in such case readers will at once communicate with him at Devonshire Buildings, Devonshire Square, London, E.C.

NOTES FROM SERVIA.

(From Our Own Correspondent.)

Belgrade, October 26.

Battle of Kossovo.

Five centuries ago on the plains of Kossovo the Servian Army succumbed to the invading Turkish forces, the great Servian Empire fell, and the Serbs lost their freedom. Then, after a long period of vassalage, brave men led by Milosh and by Kara George fought for the liberation of their native country, and success crowned their efforts.

No longer an Empire, but a small kingdom with a population of about three million souls, is the Servia which emerged from a state of chaos, and which to-day, jointly with other States of this peninsula, bade defiance to those to whom they were once subject. Five hundred years ago the Turks vanquished the Servians. To-day the scene is changed: it is now the Servians who are chasing the Turks out of the country that the latter formerly conquered.

It was the battle of Kossovo which decided the fate of ancient Servia, and to-day the banners of victorious modern Servia wave on the plains of Kossovo. On October 22, after a sanguinary battle in the defiles of Tenech, and after storming and carrying the strategic positions near Prishtina, the commander of the Servian Army triumphantly entered that town, enthusiastically welcomed by the inhabitants.

In this district the greater part of the population belong to the Slav Orthodox Church, and when greeting the commander of the Servian troops the Archbishop proclaimed him as the deliverer of the country. On all sides one heard cries of "Servia for ever!" "Long live the King of Servia!"

Near Prishtina are the plains of Kossovo. One of the first acts of the commander of the victorious Servian Army was to visit the Turkish monument erected on these plains in memory of the Sultan Murad and to order divine service to be held on that spot. Sultan Murad was killed by the Servian hero, Milosh Obilitch, on the eve of the great battle.

The movement of the armies of the allied Balkan States is one continued victorious march. The Turkish troops retreat from point to point. One position after another is won by the Servians. They storm the heights of Rujan, near Bujanovatz, and drive the Turkish forces back across the Morava river. The forts overlooking Kumanovo are carried at the point of the bayonet. The Servian artillery works havoc, the Turkish ranks are raked, three squadrons of Turkish cavalry coming out into the open are annihilated. The Servian infantry drive the Turks out of their entrenchments; they fight hand to hand. It is a sanguinary battle ending in the capture of Kumanovo. War material and abundance of provisions left by the retreating enemy fall into the hands of the Servian Army. The valour and endurance of the Servian soldiers merit unlimited praise.

Kirk Kilisse.

The Bulgarian forces, with the co-operation of three Servian army corps, are also successful. The battle of Kirk Kilisse is claimed as a brilliant victory for the allied arms.

All these victories have been dearly bought, but still each successive one brings the Balkan allies nearer to their goal.

NOTES FROM ROUMANIA.

(From Our Own Correspondents.)

Constantza, October 29.

Roumania's New Attitude.

Will Roumania go to war? So far, for the sake of her own interests, she has striven to keep out of the Balkan conflict, and has remained a pacific spectator of the stirring events beyond her borders. Things, however, have reached a stage where there is every evidence to show that in the immediate future she may be compelled, if not actually to take action, at least to take precautions. All sorts of rumours are in the air; there is talk of mobilisation and of Russian concentration on the Danube above Silistria, and bellicose symptoms are noticeable. Of course, these rumours must be taken *cum grano salis*. What, however, is significant is the fact of King Carol leaving Sonaia for the capital so suddenly and the formation of a new Cabinet under Take Ionesco, who is decidedly Anglophile. This *volte face* points to inspired intervention in the Balkans against the coalition, or it may be a counter-move to Russian meddling in behalf of Slav interests in the Near East.

Roumania, it is estimated, can put into the field an active army of 200,000 men, with a reserve of the same number. Her financial position is good, and geography has placed her in the right place to play the right game in the cause of peace in the event of Bulgarian success in Thrace.

Bucharest, October 26.

Political Parties.

Negotiations for a coalition of the two Conservative parties are now proceeding, and seem almost certain to terminate successfully. It is said to be in connection with this subject that the King arrived in the capital this evening for a few days, and it is reported that the leaders of the two parties are to have audience of his Majesty together. In view of the political situation both here and abroad, it is certainly very desirable that a solution of the difficulties should be found speedily.

The Bioscope and the War.

During the Roumanian manœuvres some excellent biograph films were secured by a company which occupies itself with this kind of work, and copies of them were sold in Buda-Pesth and Vienna. A telegram from the former town states that these are being shown in both cities with the title "How Roumania is Preparing for War." A simple error like this at the present moment could easily do much harm. It would be interesting to know how many times during the last three months Roumania has been stated in the Press abroad to be mobilising!

Greco-Roumanian "Incident."

A grave incident occurred a few days ago at the port of Piræus. On arriving there the Roumanian State Line passenger steamer "Dacia," bound from Alexandria for Constantinople, was searched by the Greek authorities in a most impudent manner, and six of the passengers—who, it was pretended, were Turkish officers in disguise—were arrested, taken ashore, and detained, in spite of strong protests on the part of the commander of the steamer and the Roumanian Legation authorities. On this account the Roumanian State steamers will again no longer touch at Greek ports; and it is stated that the Roumanian Government will demand reparation.

Bulgarian Diplomat's Experience.

On Monday M. Sarafoff, Mme. Sarafoff, and their daughter, and the entire staff of the Bulgarian Legation at Constantinople, left Bucharest en route for Sofia, as also did M. and Mme. Hamandjief, the late Bulgarian Consul at Constantinople. The party had left Constantinople by the Austrian passenger steamer "Bruenn," intending to disembark at Varna, but, arriving off that port, they found it blockaded by Turkish warships, which signalled them to keep away. As they passed they were witnesses of a small action between the cruisers and two Bulgarian torpedo boats, when one of the latter was disabled by the fire of the Turkish boats and forced to run aground in order to save its crew.

WAR NOTES.

British Red Cross.

Three units of the British Red Cross Society, which are going to Constantinople, under the command of Major Doughty Wylie, left London on Tuesday, and are due in Constantinople on Tuesday, November 5. The party comprises fifty-six men, the doctors being Drs. Page, Mann, and Bourdillon, in charge of unit No. 1; Drs. Anderson, Thornton, and R. O. Ward, in charge of No. 2; and Drs. Appleyard, Steele, and Gardner, in charge of No. 3.

It is officially stated that the British Red Cross Society are just now actively engaged in organising an expedition for Bulgaria, to leave almost immediately. The *personnel* of the party has already been chosen. The Society are making great efforts to raise funds.

The first unit, which left for Montenegro on October 20, has arrived at Cettinje. Under the charge of Surgeon-General Bourke, a part of the unit is stationed at Antivari, where a base hospital has been erected.

Her Majesty Queen Alexandra, through Sir Frederick Treves, sent the following message to the second detachment which the British Red Cross Society dispatched on Sunday for service with the Greek force :—"Please express to Colonel Delmé Radcliffe and the members of the Red Cross expedition my earnest hopes for their welfare in the noble and humanitarian work upon which they are engaged.—ALEXANDRA."

The expedition was bound for Piræus. It consisted of two units, each of eighteen men, in charge of Colonel Delmé Radcliffe. Colonel Radcliffe goes out as director of the work of the British Red Cross Society in the southern area of the war, and each of the two units consists of three medical officers, three dressers, five male nursing orderlies, five general duty orderlies, one cook, and one orderly. The medical officers of the first unit are Major J. W. Houghton, Dr. A. Manuel, and Dr. C. H. Treherne; and those of the second unit Dr. Guy Matthews, Dr. Welch, and Dr. Herbert Walker. They carry with them ten tons of equipment, consisting of surgical panniers, dressings, instruments, medical stores, and other appliances. The expedition also takes out 500 blankets for distribution among the Montenegrin field force. The cost of the expedition for equipment and travelling expenses is £1,200, and it is estimated that £4,000 will be required for the maintenance of these two units for six months.

Reuter's Cape Town correspondent says that funds have been opened in various centres in South Africa on behalf of the Red Crescent and the Greek Red Cross, and £1,250 has already been raised for the Greek Red Cross in Rhodesia.

Egyptian Red Crescent.

The Egyptian Red Crescent movement is assuming considerable importance, and all classes and sects are subscribing to its funds, says the *Times* correspondent in a message dated October 30. At Prince Mohammed Ali's garden-party yesterday £E12,000 were collected. Lord Kitchener contributed £E100, signing his name on the list of subscribers as "Kitchener Pasha." His action has much pleased and impressed the native community. The first medical mission equipped by the Egyptian Red Crescent is about to start.

Russian Red Cross.

Under date of October 27, our Odessa correspondent writes :—"During the past week four different Russian Red Cross corps, all excellently equipped, have left here for the Balkans, viâ Roumania. The Panslavist societies are generous contributors to this succour for their kindred in the peninsula."

Appeal for Bulgarian Wounded.

The Queen of Bulgaria, in a telegram addressed to Miss Bax-Ironside, sister of the British Minister at Sofia, makes an urgent appeal for help for the Bulgarian sick and wounded soldiers. Her Majesty especially asks for "warm clothing of every description, stockings, blankets, and chocolate, or money." Miss Bax-Ironside and Mrs. Cuthbert Heath will be very glad if those who are kind enough to respond would send gifts in money or in kind to them at 47, Portman Square.

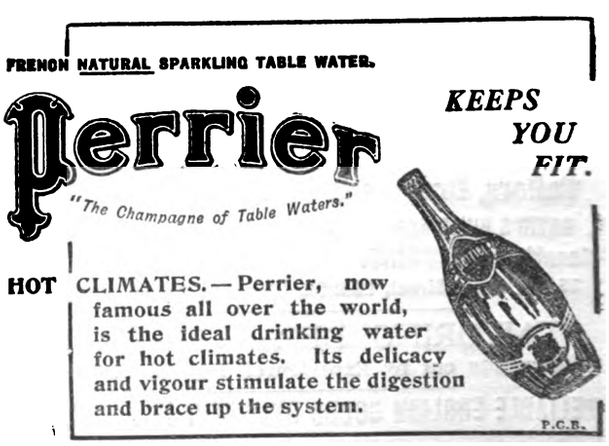
On behalf of the Bulgarian Relief Fund, the Bishops of Winchester and Southwark, Mr. James Berry, F.R.C.S., Mrs. Dickinson Berry, Sir Alfred Pearce Gould, Canon Scott-Holland, the Rev. J. Scott Lidgett, the Rev. G. Campbell Morgan, Mr. Charles Parker, F.R.C.S., Dr. Jane Walker, and Mrs. Edmund Garrett issue an appeal. Gifts should be sent to the Bulgarian Relief Fund, 3, Queensbury Place, South Kensington, S.W. Note will be taken if contributions are specially marked for Bulgaria, Servia, or Montenegro.

The Committee of the Balkan War Relief Fund, which is non-political in character, earnestly appeal for immediate donations to the fund. It is being applied in the following ways :—(1) The dispatch of medical men and staff with full hospital equipment, clothing, and stores for the help of the wounded of both sides on the field of battle. (2) The relief of the crowds of refugees (many of them women and children) who are flying from danger in Turkey and arriving destitute in Bulgarian and Servian towns. (3) The relief of prisoners, whose captors are already short of food, amongst whom great hunger and misery exist. A Ladies' Sub-Committee, under the chairmanship of Lady Mond, has been formed to arrange for the sending out of clothes and food. A special appeal is made (1) for blankets, sheets, shirts, and bandages; (2) bales of flannel and linen; (3) concentrated foods. All such gifts should be sent to Lady Mond, care of Messrs. Pryor and Part, 28, Sloane Street.

The special fund which has been opened by Our Dumb Friends' League for the formation of a Veterinary Corps for the Balkan War has been headed by a donation of £100. Promises of further subscriptions have been received from the Ranee of Sarawak, the Duchess of Portland, the Marchioness of Ely, Field-Marshal Viscount and Lady Wolseley, and Lady Malcolm of Poltalloch.

The "Nonconformist Conscience."

In a letter to the *Morning Post*, Woods Pasha laments "the insidious attempts that are being made to prejudice the public at home against the Turks in this terrible war now in progress." He continues : "There can be no question as to who are the aggressors in this war, and although it is always done it is rather sickening to find the interposition of the Divine Providence invoked and expected in favour of those who, in face of the counsels of the Great Powers, have forced the Ottoman nation into this most sanguinary war. The great object is patent enough to those who like myself are conversant with the march of events in respect to the eternal 'Eastern question.' It is to raise the so-called 'Nonconformist Conscience' in favour of the combatant Eastern Christians. I have no fault whatever to find with the 'Nonconformist Conscience' except that from lack of proper knowledge in respect to the political intrigues ever at work and ignorance as to the real tenets of Islam it is very apt to be carried away by religious enthusiasm. . . . This is not a war in which religious feelings should be invoked on either side, and the Turkish Government has set a noble example in the proclamation of Nazim Pasha, the Minister of War, and the orders sent to the military commanders and civil authorities. What a contrast to the proclamation on the other side! The Greek and Armenian journals of Constantinople are equally strong in their condemnation of King Ferdinand's address to his army and people."



Effect in India.

A Reuter's message from Calcutta, dated October 28, says :—"While sober Mohammedans, including the native officers in the Army, are inclined to accept the Turkish defeat as inevitable, saying that they trace in them the finger of God punishing irreligion, others, who have been joined by Hindu agitators, continue to hold meetings at which violent speeches are delivered."

THE BALKAN ALLIES' AIMS.

Reuter's Agency states that the following may be regarded as generally expressing the opinions obtaining in Balkan quarters on the probable procedure of the Allies in the event of victory :—

The whole purpose of the allied action is to stop the atrocities against the Christian population of Macedonia, and it is hardly to be supposed that, if that action succeeds, the Balkan Governments will agree to the views of the Powers about the maintenance of the *status quo*. It is thus certain that if successful the Balkan States will not be content to remain in an ante-chamber during the sittings of any proposed conference. They consider themselves entitled to be heard, and their minimum will undoubtedly be the demands included in the recent Note to Turkey. The view that the Balkan States hold and will maintain, not only against Turkey but against the world, is that Turkey shall have nothing more to say in Macedonia. The Balkan Entente is stronger than is generally supposed, and is not a mere temporary expedient. Its object is the Balkans for the Balkan people. As to the future, it cannot be considered possible after a war of these dimensions and the enormous sacrifices involved that the Balkan Allies will rest satisfied with another more or less provisional or temporary patching up of the question. A return to the *status quo ante* is an impossibility. It is to the interests of the Great Powers to remove this open sore of the Near East and thus eliminate the greatest danger to the peace of Europe. If it has proved difficult for the Powers to induce Turkey to execute one article of the Berlin Treaty, it will prove far more difficult to make the Balkan States give up what they acquire at the expenditure of so much blood and treasure.

EDUCATION IN EGYPT.

Speech by Prince Fouad.

His Highness Prince Fouad Pasha was the guest of the evening at the dinner of the Authors' Club on Monday night, when the subject for after-dinner discussion was "Education in Egypt." Mr. Percy White, Professor of Literature at the University, Cairo, occupied the chair, and Mr. Edward Morton the vice-chair.

Proposing the health of Prince Fouad Pasha, the Chairman said that no one in Egypt had the cause of education at heart more deeply than had his Highness, who was president-rector of the Egyptian University. That university was the youngest in the world, and it was not the least in need of encouragement. Founded in 1908, the institution was now facing the future with courage and hope, but inadequate funds. Now the Egyptian Government was profoundly conscious of its great duties. Under happy auspices, and generously encouraged, the Egyptian University might in due time become a great centre of Oriental learning. It had commenced in the right way.

Encouraging Signs.

His Highness, who responded in French, spoke in terms of appreciation of the opportunity which had been given him of expressing some of his ideas on a subject which was of special importance to Egypt—the subject of teaching. Fortunately, in Egypt, chiefly of later years, great interest had been taken in questions relating to teaching and to intellectual culture generally. In two recent speeches the Khedive insisted upon the necessity and importance of superior teaching in Egypt, which was no doubt the most advanced of all Eastern countries, and the one where economic and intellectual development was in fullest swing. This encouraging movement, and these strivings in favour of public instruction were the best guarantees of his country's rapid progress. And this was why, by the side of banks and credit establishments, of the agricultural co-operative societies and savings banks recently started to improve the fellah's material conditions, he (the Prince) would like to see the rural schools opened to afford the fellah the means of bettering his mind. He did not believe in the imaginary dangers of increased knowledge. His only fear—and facts had but too often in Egypt pointed this way—was of the perils of inadequate or superficial notions. The prosperity of a country depended upon its intellectual development no less than upon its economic progress. Without touching upon the want of making primary instruction compulsory and of spreading as widely as possible sanitary principles, the main duty of his country's leaders should be, above all, to bring radical and practical reforms into the curricula, and also to reorganise the recruiting of the secondary schoolmasters and assistant masters, so as to prepare in an efficient manner the young people to benefit by the teaching offered them at superior colleges or universities. Only such a teaching, perfected and accomplished—a teaching which should never, however, in Egypt, lose sight of its special character, in accordance with the people's religious and intellectual traditions—would restore to the young men's minds a proper appreciation of their own value, and of their duties, and so foster in an efficient manner the formation of their character and the intellectual and moral uplifting of the country.

A considerable failing in secondary Egyptian colleges was, *inter alia*, the deficiency of historical studies. Besides, it might be acknowledged that, as a body, the masters were not quite up to the mark, and that amongst teachers and professors more than one could be found lacking either in will or proficiency, or in the gift of meeting students' requirements. Professional ability, the "avocation," was perhaps more required in his country than elsewhere, on account of the special conditions that governed family-making. In Egypt the question was not one of introducing reforms into a community already united by origin and uninterrupted political traditions—a community wherein the gradual development of public instruction was an essential law of the national organism. In Egypt for centuries past, from the Pharaohs to the Ptolemai, Romans, and Arabs various civilisations formed layers upon layers, but they never could mix, never interpenetrate, never combine. Centuries of silence, of stagnancy, worse still, of oblivion, caused to fade away the splendour which the last conquerors—the Arabs of Syria—had arrived at in fighting, in sciences, and in arts, in the course of those dark Middle Ages during which Europe had seen its creeds crumble down and a new world arise. And for Egypt, too, those were centuries during which it seemed as if heavy darkness obliterated the rays of Oriental genius.

They had been lacking that peculiar teaching quality which enabled the West to produce an intellectual re-birth. The schools founded by his great ancestor Mohamed Ali, from the day he ceased to inspire them, had scarcely felt the vivifying spirit of progressive reform. Very praiseworthy efforts were made afterwards in view of improving the school system, if any school system could be said to exist in Egypt. But it must be frankly admitted that the teaching in Egyptian schools was inadequate up to now to afford the young men any proper general culture and to cause instruction to be valued for itself.

Retarding Causes.

The causes retarding their advance might be found in two facts: First, schools established in Egypt in accordance with Western methods and principles presented, between the apathy that prevailed up to the eve of their foundation and the present needs, a contrast too great and violent to allow of really efficient results. Secondly, they had in Egypt, owing to the composite character of the country, State, State-subventioned, free Egyptian, and private Egyptian and foreign schools, which, on account of the great lack of uniformity of their curricula and utter discrepancy of methods, did not, of a certainty, foster that unity necessary to all serious public instruction.

Moreover, the Arab language, the national idiom, the soul of any race, was being learned in Egypt almost as a foreign or dead language; while foreign languages were used as the official media in the secondary and upper schools. He did not wish to disparage the undoubted benefits of a knowledge of modern languages, for Egyptians, especially of English and French. The best proof that his remarks were well founded, however, was afforded by a recent ordinance of the Egyptian Government itself, providing that all subjects appertaining to primary and secondary schools should henceforth be taught in Arabic. And this renewal of the national language in the schools was a proof of the renewal of the Egyptian school system itself. And yet, in spite of this fact, some people doubted, when the Egyptian University was founded, whether the time was ripe for a Faculty of Oriental Arts, the first and only one created in their times in the Moslem world in which all teaching was given in Arabic.

The chief object of the university of which he was honoured with the presidency was to prepare, in Egypt, Egyptian masters for Egyptian secondary schools—men who would, in their turn, prepare primary school teachers. Their aim was to form a studious élite who, comparing ancestral tradition with the needs of modern civilisation, would be able in the near future to find the best means by which their youth might receive, in their native land, the elements of science and the germs of modern intellectual life on the basis of a knowledge of their own ancestral language and civilisation. But the admirable progressive spirit which brought the Egyptian University into existence could not yield the full benefit unless they received larger State support, unless they were helped and associated with by Government and country. They awaited with confidence this transformation which, in the course of years, would utterly renovate their nation and make its citizens worthy of modern civilisation. Egypt, the cradle of Eastern thought and culture, could not remain inactive any more in the new atmosphere under which mankind was being carried on and on to the immortal conquests of science and learning.

At Bayonet-Point.

The discussion which followed was opened by Mr. P. A. Barnett (of the Education Office). One of the first things that struck him in connection with Egyptian education, he said, was the story told him by the Egyptian Education Minister, who stated that so suspicious were the people, in the days of their guest's illustrious grandfather, of anything for their benefit, that they could only be backed into the schools at the point of the bayonet. Since those days a great deal had been achieved, and he personally had had some hand in the training of the teachers. One of the things that endeared them to him was the extraordinary way in which they assimilated English notions and made themselves intimate and friendly with their English comrades. In connection with the university he hoped that, whatever course events might take, the great traditions and great literature of the Arabs would be properly conserved and respected.

LETTERS TO THE EDITOR.

LADY LOWTHER'S WAR RELIEF FUND.

To the Editor of THE NEAR EAST.

Sir,—It is only my conviction of the generosity and pity that lies in English hearts which gives me courage to appeal in England for help for the sufferers in the war now upon us.

Every nerve is strained, every resource taxed to its uttermost, to serve the soldier at the front and in hospital. But who is to care for those left behind—the thousands of women and children, their breadwinner gone, the fields unploughed and unsown for next year's crops, every horse, mule, and donkey taken for military purposes, the barest necessaries of life at war prices, shortage of coal and bread already—and pinching and cruel winter knocking at their door? Hundreds of refugees, homeless and helpless, come in their turn to swell this sum of misery.

The British community in Constantinople, alive to their dire needs, has nobly responded to my appeal, and has formed a War Relief Committee for the distribution of charcoal, bread, and clothing to the most destitute.

We who know the rigours of our winters and the sufferings of the thousands left to face famine and anguish alone are doing our best; but we need help, urgently and immediately, in our overwhelming task, and turn to those at home who have a thought of sympathy for this heavily stricken people.

Pray heed our call. We so greatly need all the help you can give us, you who are safe in England—safe from recent earthquake, pestilence, and the horrors of a present war.

Subscriptions may be sent to me or to the National Bank of Turkey, 50, Cornhill, London, E.C. Cheques and money orders should be made payable to "Lady Lowther's War Relief Fund."

ALICE LOWTHER.

"IT HAPPENED IN SMYRNA."

To the Editor of THE NEAR EAST.

Dear Sir,—Two letters appeared in the columns of your last week's issue on the question of this book from residents in Smyrna. Perhaps you will publish a few lines from me as representing the point of view of one who, though born, bred, and resident in England, has made several fairly considerable stays in Smyrna.

Even Thos. Edgelow appears at moments to have experienced prickings in what we will call his conscience when writing his book, and in one of these moments he seeks to excuse himself by asserting, through the mouth of his hero (?) that Smyrna people give hospitality not for its own sake, but that in so doing they eventually get a return of some sort. That, sir, is simply untrue.

In my own case I cannot see in what way I could ever make any return of any sort, yet everywhere among the English community I was received with the utmost kindness, and I fancy that it would be difficult to find others whose experiences were different from mine.

Smyrna people doubtless have their faults—who of us has not?—but you could search the British community through and through and not find a single member of it whose sense of honour had sunk so low that he would betray the trust reposed in him as a stranger and an Englishman in the way that Thos. Edgelow has done.—Yours truly,

Brough, October 24, 1912. G. W. A.

[This correspondence is now closed.—ED. N. E.]

THE CHARGES AGAINST THE TURKS.

To the Editor of THE NEAR EAST.

Sir,—The accusation made by the Greeks against the Turks of employing specialists to contaminate Greek army supplies by the introduction of typhus and cholera germs is so preposterous that one is inclined to think that it is beneath the dignity of the Turkish Embassy to deny it. And so it would be under ordinary circumstances. In England, however, the circumstances are extraordinary, it having become fashionable here to believe any enormity against the Turk—a fashion set by Gladstone when he recommended the dismissal of the Turks from Europe, "bag and baggage."

The reiteration of this particular slander by a member of the Greek Legation is much to be regretted. He repeats assertions that, in cooler moments, he will himself admit cannot be substantiated. He bases his "proof" upon "facts" to be found in "Blue Books, Yellow Books, Green and Red Books" bearing upon "the history of the Turks since they first appeared in Europe," but does not attempt to give one tittle of evidence upon the point at issue. He would have appeared in a better light had he treated his enemy with some degree of chivalry.

Why should a Turk, because he is a Mohammedan, be worse than a Greek, a Serb, or a Bulgar, because the latter are Christians? The Greek method of answering (*vide* the letter from the Greek Legation) is: "Because he is a Turk." From the humanitarian point of view this is unsatisfactory, although it may and does satisfy the religious bigots, amongst whom I must include the well-meaning "Balkan Committee," who in their latest manifesto call upon England, as "champion of the weak and oppressed," to succour the Christian "populations of Turkey," since "her honour as a civilised Christian nation" is at stake. What a fandango of topsy-turveydom is here, to be sure! And how foolish, in view of our millions of Mohammedan subjects. In the light of the disclosures to be read in our Blue Books, where it may be learnt that the question in Macedonia is no longer one of Turk *versus* Christian, but of Christians of certain churches against Christians of other churches, one can only regret the criminal ignorance of the Balkan Committee.

I could, if space permitted, quote from our Blue Books to prove that the Macedonian horrors are more, much more, a case of Bulgar, Serb, and Greek, each one against the other, than of Turk against either. In view of the Greek Legation having come into the arena, it will suffice if I ignore at present Bulgar and Serb, and confine myself to Sir Edward Grey's statement as to the methods pursued by the Greeks in Macedonia. Sir Edward stated: "The atrocities committed by these (Greek) bands would, if published in the English Press, arouse such a feeling of resentment in this country that serious measures would have to be taken."

In the same newspaper which publishes the manifesto of the Balkan Committee occurs the following report, by Reuter, explaining the cause of the Turkish reverse at Kirk Kilisse: "The Christians in the Turkish ranks surrendered in troops, but the Moslems fought to the last." What a commentary this is upon the insistence of the Christians in Turkey on being placed on an equality with the Mohammedans as regards the right to become soldiers and citizens!

—I am, etc., L. LOEWENTHAL.

"TWO BLACK CROWS."—ON THE ROAD TO ISPAHAN.

To the Editor of THE NEAR EAST.

Sir,—The writer of "Current Comments" in your issue of the 25th inst. must be possessed of a sweet simplicity to accept as unvarnished gospel the racy but highly coloured articles from the *Times* special correspondent in Persia, as also of a humorous imagination to be able to impart to those cynical and flippant stories a yet greater zest by an added fringe of sensationalism and questionable "boost," till they remind one of the old-time "Barons of the Rhine."

"Many perils by land." What perils, pray? What happened to him has happened to "Jones" times out of count, "oft in the stilly night"—approaching horsemen, looming large and gaunt through the "twilight" gloom of a Persian summer's night, *do sometimes* assume these phantasmographic shapes—seldom in the daytime.

"Carriage services." Those who have been through the churning process in the old pre-Victorian coaches, till each projecting bone was benumbed and the flesh pounded (almost) to a jelly, will congratulate "Our Own" as being favoured of the gods in that he was able to throw his leg over the saddle and to travel in the orthodox Persian fashion. Be it noted that the absence of horses for conveying the post vehicles is mainly due to the "commandeering" proclivities of the Bakhtiaris and other Imperial commanders!—functions exercised by them when proceeding against Nayeb Hussein!—*or* on other business intent. Further, be it noted that the distance from Teheran to Ispahan viâ the post road is 312 miles, and viâ Kohrud 272 miles—not 160, as inaccurately stated by "Current Comments."

"Robber-knights, castles"—"two black crows." "Robber-knight" fits the object of our story better than "old barbarian, steeped in crime," does. The "aged brigand" is still some four or five years short of his allotted span of threescore years and ten—and the castles are "in the air."

Crime is but a question of degree! The "steeped in crime" idea is much overwrought, and imparts a wrong colour to the actualities, but it *reads* very prettily—and damn the rights and wrongs of the case. Perpend, O reader, and tell us what "Current Comments" or "Our Own" would have said and done had they been treacherously surrounded in their homes by a band of heavily armed swashbucklers, the followers of their arch enemies (let us piously hope that they have none—arch or otherwise), in the grey dawn of the morning—to have had those they held dear shot around them—to have had their homes pillaged and burnt to the ground—to have had their women-folk hunted from the refuge of neighbouring houses and dishonoured—to have been refused *even Persian justice* by a régime of "freedom, fraternity, and equality"—the while their enemies were being protected by the so-called Government. Yet all this, the outcome of a long private rivalry, happened to Nayeb Hussein so recently ago as the spring of 1907—but five short years. That he was able, given scope, to protect himself against all that his private and official opponents could arraign against him till the Government (?) had to outdo Macbeth in being damned, shows the *quality* of the man who has been condemned by default by "Our own" and executed by "Current Comments" unheard; we must hope that the Court of Appeal will rectify the miscarriage of justice. Previous to the raiding of his house it had been his life's work to "catch others," having been custodian of the Kum-Yazd roads for some thirty-five years. It cannot be truthfully said that he oppresses the *unfortunate* country folk; he certainly does take toll of the *fortunate*—i.e., those who grow fat on squeezing the cultivators, and who had a hand in forcing him, in self-protection, into paths that were devious and undesired by him. But who will throw the first stone?

The *Times* representative has a vivid and flippant imagination, which appears to run riot at times and produces "moonshine" for his readers. His sensational articles send the requisite creepy chill through one's blood, but those who know simply smile. He may certainly be congratulated on having reached Ispahan in safety, but he had to fear molestation more at the hands of *real* brigands than at the hands of Nayeb Hussein or his men. The little touch telling of the latter "trying to teach Persian words to his Indian cook" is most exquisitely droll and piquant—a real case of "teaching your grandmother to suck eggs."

The question of his having been a staunch friend to Persia is a moot one, and one on which opinions differ, and "as much may be said of Reuter's agent at Teheran." Had these and other Irishmen held aloof from matters which some people deemed to be no concern of theirs, and had related more of the actual conditions and trend of affairs in Persia, it is possible to conceive that she would not now be in such throes of misery; this, too, is a matter of opinion.

While accepting the "Middle Ages" romance, let us have

FAIR PLAY.

NEAR EAST BOOKSHELF.

THE MEDITERRANEAN RACE.*

The present century has witnessed a complete revolution in our estimate of prehistoric civilisations. A couple of decades back ethnologists were still hypnotised by Max Muller's brilliant generalisations. That German of genius was a philologer rather than a man of science. Finding that nearly all European languages were based on Sanskrit, he asserted that the Aryans, who spoke it, were ancestors of the progressive elements in our population. It was, therefore, generally believed that, some three or four thousand years ago, a superior race, hailing from the steppes of Central Asia, had invaded Europe, enslaving the aboriginal savages who peopled our continent, or driving them into inaccessible mountains. It was soon perceived that language is an unsafe guide in problems of ethnology. Under the universal law of Struggle a well-equipped and practical form of speech will oust others which are less adapted to human intercourse, and may even become the mother-tongue of races which had no hand in fashioning it. A common language is no proof of common descent.

Just as linguistic tests had fallen into disrepute, traces of buried civilisation were unearthed in the island of Crete, which proved prehistoric Europe to have been occupied by races neither savage nor barbarous. Their culture, indeed, has an "uncanny" resemblance to that of the twentieth century. This Ægean population had evidently founded an empire of the modern type on commerce and sea-power, which fell to pieces when these were lost. They dwelt in "skyscrapers," provided with sanitation of a very modern type. They were keen traders, obsessed by the thirst for wealth which foreign commerce brings in its train. Their women-folk followed fashions strangely resembling those of the Rue de la Paix. The social instinct was strongly developed, rendering them mutually helpful, kindly, and unwarlike. Their religion was impregnated with magical observances; a vivid imagination made them artists and poets, but it was subject to no restraint. These prehistoric communities must have been far advanced in material civilisation, but their love of luxury unfitted them to resist the impact of more virile enemies.

Whence did the pre-Aryans come? A comparison of skulls disinterred from ancient burial grounds in the Mediterranean and elsewhere reveals the ubiquity of a long-headed or dolichocephalous race. Mr. R. N. Bradley, who has been studying remains recently unearthed in Malta, believes that Europe was originally peopled from Northern Africa, and that the Berbers and Kabyles are remnants of a "Mediterranean race" which overspread Europe long before the Aryan invasion. It appears in Greek history as Pelasgian; figures in the annals of Rome as Ligurian, off-shoots being represented by the ancient Egyptians, and the Iberian stock, which still exists in the west of our continent. A dark colouring, black hair, and brown eyes characterised this race, which is very strong on the Mediterranean littoral, Ireland, and Brittany. Indeed, indications are not wanting that its descendants, forming the population of Europe—Scandinavia excepted—are becoming increasingly prepotent.

The Aryans were fair-haired, blue-eyed, and round-headed, or brachycephalous. They probably hailed from regions in Central Asia, watered by the Rivers Oxus and Jaxartes; but a desiccation of their pasture-grounds, caused by some vast upheaval of the globe's surface, compelled them to invade Europe. Inured to hardship by prolonged struggles with a hostile environment, they found it a comparatively easy task to subdue the luxurious and peace-loving aborigines. From an intellectual standpoint the Aryans were less advanced than their predecessors. Imagination was not their strong point; they imported pride of colour, caste distinctions, a passion for war and the chase, contempt for remunerative labour. It is a noteworthy fact that all aristocracies of birth are endowed with these characteristics. But the newcomers also possessed great organising power, enabling them to co-ordinate efforts for the achievement of a practical aim. We find the Aryan element especially marked in ancient Greece and Rome. It provided factors in which the aborigines were lacking—a certain grace and self-restraint, without which the imagination is apt to run riot. The inter-action of Aryan and pre-Aryan qualities produced every marvel of Grecian art; and 1,500 years after the age of Pericles it gave Europe her cathedrals. There is reason to believe that the dark-haired "longheads" are gradually ousting the blonde "roundheads," and the latter's disappearance accounts for the growing lawlessness of modern times.

Mr. Bradley has furnished a mass of rather ill-digested data regarding the prehistoric population of Malta. It has long been known that this group of islands contains many dolmans and menhirs resembling those of Brittany. Recent excavations have revealed immense structures of Cyclopean masonry, and human skulls in abundance of the long-headed type, intermingled with bones of extinct deer, proving that Malta was once part of Africa, and probably connected with Sicily. Full justice to such discoveries could be done only by a trained scientist, who had given years of research to this branch of knowledge. It is clear from internal evidence that Mr. Bradley is, so to speak, an amateur, and that his work has been done in the short intervals of leisure permitted by official functions. Experts, however, will find abundant raw material in his photographs, although they may not endorse all his deductions. At p. 260, for instance, there is a plate representing "prehistoric cart-ruts," which are deep parallel fissures in the rock leading to the edge of a precipice and traversing the tiny island of Filfola. It is very unlikely that such indentations were cut by cart-wheels, and they were more probably irrigation channels. In his philosophical speculations Mr. Bradley wanders very far from prehistoric Malta; but they may well inspire and stimulate the phalanx of thinkers who are bent on solving problems relating to the origin of our race.

CURRENT COMMENTS.

Mr. Bennet Burleigh, a war correspondent who has inherited the great traditions of William Howard Russell and Archibald Forbes, declares that the Bulgarian battle-cry wears a strong resemblance to the British "Hurrah!" Our grandfathers shouted "Huzzah!" as they advanced on an enemy; but modern mobs prefer "Hurray!" The Bulgarian cheer is always "Oorah-ah-ah!" with prolonged stress on the final syllable. This is the form used by most Slavonic commanders; in Russian military parlance to "take at an oorah" means to storm a foe's position. But the Servians, true to their Latin affinities, shout "Zhivio!" which is an attempt to render the French *vive!* and the Latin *viva!* The corresponding cry in Hungary is "Eljen!" and in Japan "Banzai!" It is deeply interesting to compare the collective yells evoked by stress and storm; they electrify a multitude of armed men, and supply the place of music, which is necessarily disused when a forward movement commences.

***

In such a time the credulous are apt to disinter ancient prophecies bearing on the course of events. It is very pleasant and very human to say, "I told you so," but in every case of the kind which has undergone scientific analysis the forecast has been proved to be long posterior to the occurrence predicted. Madame Blavatsky's "Isis Unveiled" quotes one which runs thus:—"In twice 200 years the Bear the Crescent will assail; but if the Cock and Bull unite the Bear will not prevail. In thrice ten years again let Islam know and fear, the Cross shall stand, the Crescent wane, dissolve, and disappear." Her authority is "an old book of astrological forecastings published in 1453." History has, in a measure, endorsed this "cock-and-bull" story, for John Bull joined the Gallic Chanticleer against the Russian Bear in 1854; and the latter mauled Turkey terribly twenty-four years later.

***

An author who does not give his authority *in extenso* is aways open to suspicion; and Madame Blavatsky leaves us in entire ignorance as to the source of this remarkable prophecy. It is a curious coincidence that Constantinople was stormed by Mohammed the Conqueror in that very year; but the Turks were not the terror to Christendom that they became a century later. Moreover, the nicknames for European Powers given in this doggerel were quite unknown in 1453. The art of printing was then in its very infancy, and no books except a few bearing on theology and classical learning had been "published."

***

Helena Petrovna Blavatsky's career was one which should preclude any serious person from giving credence to her dicta. In 1875 she attracted public notice in America as the founder of theosophy, a creed which embodies the mysticism current in Asia for more than two thousand years. It is essentially an esoteric cult, and adepts claimed the power of suspending Nature's laws by dint of spiritual perfection. Madame Blavatsky asserted that she had undergone the process of initiation at the hands of a Yogi in Tibet, which is, of all countries in the world, the least likely to have bred mysticism. She subsequently visited India, winning many converts; but the inevitable catastrophe supervened which awaits all charlatans.

***

Settling at Adyar, a suburb of Madras, she announced her willingness to answer any question regarding the past, present, or future. Inquirers had only to write the subject on which they desired enlightenment on a slip of paper, which the prophetess shut up in the drawer of a bureau in her sitting-room. On opening it a few minutes later another slip was found which solved the conundrum given. Unfortunately for Madame Blavatsky's reputation the editor of a missionary monthly, called the *Christian College Magazine*, instituted private inquiries, which revealed the fact that the cabinet had a movable back, which could be opened from an adjoining room! After the *coup de théâtre* Madame Blavatsky shook Indian dust from her feet and came to London. Here she published "Isis Unveiled," a farrago of deep learning and literary rubbish; and passed into the spirit-world in 1890.

***

Evidently the special war correspondents are not exactly happy in the present campaign, and the doleful accounts of their treatment at the hands of the Censor, whether at Constantinople, Sofia, Belgrade, or Podgoritza, almost seem to indicate that their occupation, if not actually "gone," is certainly "going, going." Instead of descriptions of the fighting, we find the columns of the papers filled with wails about the strictness of the censorship. And though the luckless correspondents appear to be taking their disappointment in fairly good part, it is not surprising to find them indulging in a good many sly digs at their "watchdogs." The latter, by the way, exhibit no small complacency in letting the "grumbles" through—presumably, uncensored! It is to be supposed that the greater the grumbling the more satisfied the Censor is, since it affords excellent testimony to his watchfulness.

***

It was, of course, the Japanese who, in the Russo-Japanese War, first taught the world what the Censor could do when he really tried, and how powerless the Torpenhows and Nilghais and Keneus were to get the better of him. And both the Allies and Turkey seem to have profited by the lesson. Thus we find a *Morning Post* "special" declaring plaintively that Pertev Bey, Chief of the Turkish General Staff—who, by the way, was attached to the Japanese Army during the war just mentioned—has established a "perfect" censorship, and adding pathetically: "No wireless messages may be sent from vessels within one hour of Constantinople." It was, perhaps, rather enterprising of the "special" to experiment! And he proves himself not lacking in resource when he contrives to let us know that no Turkish troops began to mobilise till the brink of war; that "Mahmud Shevket Pasha has refused to accept the divisional command offered him on the left wing owing to hostile currents in the Army"; and that "Talaat Bey is said to be pursuing a Young Turk propaganda at the front." For the second and third of these items would, surely, hardly be passed by the Censor!

***

Then we have a *Westminster Gazette* special correspondent at Sofia forced to employ his talents in detailing the activities of the Censor and their crippling effect upon the unhappy Pressmen—and very well he does it, too. After giving a long and singularly comprehensive list of matters that may not be mentioned, this writer concludes:—"There is no prohibition, it will be noticed, of any mention of the weather and the crops (unless they may be taken to afford some indication as to the probable movement of troops and the reserve of supplies), or of bimetallism, Tariff Reform, or mythology (except, perhaps, the Greek variety); but there are few other omissions. Obviously, the task of the correspondent in Bulgaria or with the forces will not be an easy one; and the history of this war will not be told until long after peace has been proclaimed and the Censor has left his bureau." Having read his article, one readily agrees with his conclusions, and can only admire his capacity for turning his disappointment into excellent "copy."

***

Yet another of the disappointed ones—and their name is legion—is the *Express* special, Mr. Courlander, who from Podgoritza sends a truly humorous description of M. Kapitanovitch, "the symbol of Montenegro's advance from the rough guerilla warfare of ancient days to the twentieth century." This amiable gentleman's manners "are polished and perfect; he bows, he salutes, he greets you with soft words, he is your servant to command; his only desire (as he says) is to make you happy, and to gratify your every wish." But for all that he appears to make a most efficient Censor, and to be backed by a telegraphic operator who is quite a genius in his way—which is not a way that the correspondents appreciate.

***

The following extract is from a private letter from Constantinople, dated October 25:—"The local Press publishes a world of rubbish daily, but we get some of the truth from the War Office, and recently the news has not been favourable, on the whole, to Turkey. Here we carry on much the same as usual. The town is quite quiet, and everyone goes about their business calmly. I hear from San Stefano, where the newly arrived troops from Anatolia first concentrate before being sent on, that the arrangements for feeding the troops are very bad indeed. The soldiers are given money all right enough, but that is no use if there is no bread to buy, and that is precisely the trouble at San Stefano. The officers are full of the wonders they are going to do, but the soldier is not half so keen as one would think. Of course, they will fight bravely as ever, but there is no enthusiasm whatever. Armenians have joined the colours in good numbers, and they get along quite happily with the Turks, and say they are fairly treated. That is good anyway."

***

The dinner given in honour of Prince Fouad at the Authors' Club on Monday night was most successful. The word "education" is a dry one, and it says much for the entertaining qualities of the after-dinner speakers on the occasion that the proceedings were not punctuated by a single dull moment. Mr. Percy White, who was in the chair, introduced his guest and his subject in a brief, telling speech, in which we happily looked in vain for any touch of that satirical emphasis which has made him world famous as a novelist. As a lecturer at the Egyptian University there is no Englishman better qualified to deal with the question of education in Egypt than he. He has evidently approached his students with an insight into their characteristics that is unfortunately not common among Englishmen. And he is also in keen sympathy with the line of education insisted upon by Prince Fouad.

***

Mr. Barrett, in an amusing speech, told of the time when Egyptian students were thrust into school backwards at the point of the bayonet. At least they turned their faces to the foe until the last, while we know of boys of our own country who enter their schools precipitately with only the lurking danger of a simple cane behind them. Thus, for all our vaunted pride of race, the Egyptian schoolboy scores heavily. But, seriously, the speeches of those "men who know" point to a very bright future for the young Egyptian.

PERSONAL & SOCIAL.

Under date of October 26, our Bucharest correspondent writes:—His Highness the Khedive Abbas Hilmi arrived last Sunday by motor at Sinaia, accompanied by Yussuf Pasha, his private secretary, and Bakri-Bey and Assem Bey, officers of his yacht. His Royal Highness was invited on Monday to lunch with King Carol at Pelesh Castle, together with Yussuf Pasha. Later in the afternoon the party left by motor-car for Bucharest, and the next day, accompanied by Mr. Nenitzesco, the Minister of Commerce, and Mr. Mitilineo, the Prefect of Bucharest, visited the salt mines at Slavic Prahova. His Highness left on Wednesday evening from Constantza by the steamer "Imperatul Trajan" for Constantinople, where he will spend some days at his residence at Tchiboukli, on the Asiatic shore.

In connection with the above paragraph the following message, of Wednesday's date, forwarded by Reuter's Bucharest correspondent, is of interest:—The Khedive, travelling incognito, arrived at Bucharest at mid-day to-day, and is continuing his journey to Vienna by the Orient express. It is stated that he is charged with a mission from the Sultan to the European Courts.

Lady Goold Adams, wife of the High Commissioner in Cyprus, passed through Port Said on October 20 on her way to England. Sir Hamilton Goold Adams hopes to follow her shortly.

Maître and Mme. Carton de Wiart have left Oxshott, Surrey, on their return to Cairo.

Slatin Pasha, Phipps Pasha, Civil Secretary to the Sudan Government, Mr. Bonham Carter, the Judicial Secretary to the Sudan Government, and Miralai Owen Bey, Mudir of Mongalla Province, left Cairo for Khartoum on October 23.

Sir Charles Tyser, Chief Justice, Cyprus, and Lady Tyser have returned to the island.

Major F. D. Finlay, 2nd Wiltshire Regiment, who was recently appointed Assistant Military Secretary to H.E. the Commander-in-Chief, Malta, has arrived in the island.

Judge and Mrs. Marshall have returned to Cairo and taken up their residence at Zamalek, Gezireh.

Colonel L. Porter, M.B., Deputy Director of Medical Services, Malta, has been granted an extension of leave of absence from the 1st to the 17th inst.

Lieutenant-Colonel T. E. Carte, commanding R.G.A. Eastern District, Malta, has been selected for appointment as Assistant Director of Artillery at the War Office, to fill a vacancy which is due to occur on December 6 next. Colonel Carte will come to England to take up his new appointment about the 21st inst.

The *Egyptian Mail* states that Mr. Hooks has been appointed Inspector-General of State Accounts, in place of Mr. Middleton, resigned.

The engagement is announced of the Marquess of Tweeddale and Miss Marguerite Ralli; the marriage will take place before Christmas.

MILAN.—Bertolini's Hôtel Europe. Entirely renovated. Quiet.

The engagement is announced of Mr. T. Basil Etherington Smith, Ministry of Finance, Cairo, son of Mr. J. H. Etherington Smith, of East Ella, Putney, and Butharlyp How, Grasmere, and Henriette, younger daughter of Herr Hector de Pitner, of Sulnhof, Leibnitz, Austria, and Alexandria.

A marriage is arranged between Cyril James Daubeny, captain, Essex Regiment (attached Egyptian Army), second son of the late General Daubeny, C.B., of Clifton, Somerset, and Margery, third daughter of Mr. and Mrs. Lauderdale Duncan, of Knossington Grange, Oakham, and 8, Rutland Gate.

A marriage has been arranged between Mr. Andrew Ryan, Second Dragoman of H.B.M.'s Embassy, Constantinople, son of Mr. E. Ryan, of Ronayn's Court, Douglas, Cork, and Ruth Marguerite, eldest daughter of Mr. J. R. van Millingen, of Leewood, Dunblane, Perthshire.

The marriage took place on Tuesday at the Guards' Chapel, Wellington Barracks, of Captain the Hon. Ernest Brabazon, Coldstream Guards, fourth son of the Earl and Countess of Meath, and Miss Dorothy Ricardo, youngest daughter of Colonel and Mrs. Horace Ricardo, of Bramley Park, Guildford, and 50, Eaton Place. The ceremony was performed by the Sub-Dean of the Chapels Royal, who was assisted by the Rev. David Green and the Rev. A. Dallas Ennis. Colonel Horace Ricardo gave away his daughter, and Mr. Neil Mackinnon, Coldstream Guards, acted as best man. At the conclusion of the ceremony Mrs. Horace Ricardo held a reception at 50, Eaton Place, and later in the day Capt. the Hon. Ernest and Mrs. Brabazon left for their honeymoon, which is to be spent in motoring in France.

On Monday Major the Hon. W. P. Hore-Ruthven, D.S.O., Scots Guards, resumed duty as Brigade Major of the Brigade of Guards on return from leave of absence.

The four Vice-Consuls at Uskub who met the Servian army when it marched in were:—Mr. Walter Divie Peckham (British), M. Carlier (French), M. Heimroth (Austrian), and M. Kalmikhof (Russian).

Mr. Noel Buxton, M.P., has left for Bulgaria to start the work of the Balkan War Relief Fund.

This afternoon, at five o'clock, under the auspices of the Persia Society, a lecture, entitled "Persia: Its People and the Language of the Persians," will be delivered by Colonel Waters, at 22, Albemarle Street.

Mr. Sydney A. Morley, late of the *Daily Express*, has been appointed assistant editor of the Cairo *Sphinx*.

At a joint meeting of the Manchester Egyptian Association and the Manchester Oriental Society, with Professor R. M. Burrows in the chair, it was decided to amalgamate the two societies under the title of the Manchester Egyptian and Oriental Association, and the president of the Oriental Society (Professor Rhys Davids) was elected president.

On Wednesday an extension of the Manchester Museum in connection with Manchester University was opened by Mr. Jesse Haworth, who has contributed very generously to the fund for defraying the cost. The Vice-Chancellor of the University (Sir Alfred Hopkinson) presided at the opening ceremony; and Professor Flinders Petrie afterwards delivered an address, emphasising the importance of the study of Egyptology.

One of Roumania's best known painters, Mr. Nicolas Vermont, opened an exhibition of a number of his paintings at the Bucharest Athenæum last week. London itself is not unknown to Mr. Vermont, and among his exhibits are some clever studies of Thames scenery, etc. In the same exhibition are a number of canvases by Mr. Valsan, one of the group of Roumanian artists who occupy themselves exclusively with the peasant life of Roumania.

Major-General Sir George Barker, K.C.B., who has been granted a Distinguished Service Reward, first saw active service in Egypt in 1882, when he was present at Kassassin and Tel-el-Kebir. He retired from the Army last year.

Major-General J. T. Cummins, C.B., D.S.O., who died at Ealing from heart failure last week, served through the Egyptian War of 1882, and received the Khedive's Star, and also the medal and clasp for his services in the Sudan Expedition of 1885.

Earl Howe has appointed the Rev. E. Goodchild, B.A., to the Rectory of Congerstone (South Leicestershire). The new incumbent was formerly acting-chaplain to the British Embassy, Constantinople.

Lady Nean is appealing for help for the Turkish Red Crescent Society, and gifts of money or clothing may be sent to her at Dagnam Park, Romford, Essex.

M. A. Anninos, the new Consul for Greece at Larnaka, has taken up his duties.

Our Cyprus correspondent writes:—On the staff of the English school at Nikosia, founded and directed by Canon Newham, which is year by year taking a more important position in the Levant, two new masters, Mr. W. H. Jeffreys, M.A., and Mr. E. Howard, M.A., from England, have taken up appointments.

Among the passengers who left Marseilles for Alexandria by the Messageries Maritimes s.s. "Dumbea," on October 24, were the following:—M. Maspero, M. and Mme. Vayssié, M. Simon, M. de Rangabe, M. Grandmoulin, M. and Mme. Gorra Bey.

WHERE TO STAY.

FRIDAY, NOVEMBER 1, 1912.

AWAITING THE ISSUE.

Dramatic rapidity continues to mark the progress of the war between Turkey and the Allies. No encomium that may be passed upon the Balkan States will be excessive; they have greatly dared, and they have achieved much. They have set an example of painstaking organisation, and they have pressed forward to their goal with grim, silent resolution. But the end of the conflict, though apparently drawing rapidly near, has not yet been reached. The world has been hypnotised by the mechanical precision of the Allies' earliest movements. It has watched the brief but stubborn defence with which each fresh advance was challenged, and with each successive victory it has been inclined to lose sight of the striking disparity in the numbers of the forces actually opposed to one another in the fighting line. Both sides in this matter have wisely kept their own counsel, and in the flush of success it was natural that the enemy's forces should have appeared more formidable than they really were. But it is now realised that, stubborn as has been the fighting of the Turkish troops, they have been contending against odds more serious than the valour and strategy of the Bulgarians. Shortage of food and vacillation on the part of their commanders have to be added to numerical inferiority. These factors help to explain the Allies' successes, although they cannot detract from them, for by superiority of organisation, no less than by generalship on the field is achieved success in war. Now that the time has come when, pressed back to a point near the capital of the empire, the Turkish army is free from the defects that mismanagement caused further afield its merits or demerits as a fighting force will stand revealed. Whether the previous reverses have cut too deep into Turkish *moral* and Ottoman military prowess has been sapped by recent events remains to be seen; but in justice to the history of Turkey judgment ought to be suspended until the issue of the battle now being fought in the neighbourhood of the River Ergene, between Tchorlu and Istrandja, has been declared.

If in this fight, when the strength of the contending forces is equal or the balance may be in favour of the Turks, the latter are defeated and driven back to their last line of defence at Tchataldja, then their degeneration will have been established. If, on the other hand, they can defeat the Bulgarians, or so check them that the war has to be prolonged indefinitely, the end of Turkey in Europe will not be in sight. For their shortcomings in the field the Turks will have to pay dearly. Nominally the war was undertaken to liberate the Christian population of Macedonia from Turkish misgovernment. The preliminary successes of the Allies revealed the fact that underlying any humanitarian instincts was the more primitive impulse of territorial aggrandisement. If the Turkish army can be annihilated or driven within the walls of Constantinople the question of the satisfactory administration of Macedonia will be lost sight of amid the more insistent demands for the partition of the Turks' heritage in Europe. This goal was a far more impelling motive than the one adduced for the resort to arms. The fact is not necessarily derogatory to the Allies, but it should cause many to modify their previous conception of the struggle as one between the Cross and the Crescent. The long years of misrule from which Macedonia has suffered are attributable in part to the administration that was inspired from Yildiz Kiosk, but also in part to the territorial ambitions of the various units of the population. It is by no means certain that these can be satisfied peaceably, even when the Turkish factor has been eliminated. Whatever the result of the battle of Tchorlu, the liberation of Macedonia will have been secured. It is the penalty which the Turks will pay for their failure to make good at the outset of the war their claim to hold by the sword what they won by the sword. For the peace of the Near East we could wish that no larger question than this problem of Macedonia should be thrown into the melting pot at this period. Much may seem simple in the hour of victory that becomes complicated when the discussion has to be many-sided, and the greater the hopes that are raised now the greater may be the disappointments when the last word has been spoken.

An indication of the trouble that lies ahead has been given by the resolute attitude adopted by Roumania in preparing herself for emergencies. Until events prove the confidence misplaced, we may believe in the pacific intentions of all the Powers; but that belief does not shut out the possibility of undesirable alternatives. They need be referred to only to show that the Balkan problem might still remain, even if the Allied States were to be in possession of Uskub, Salonika, and Adrianople. For the second time within forty years that problem has been submitted to the arbitrament of war. What is needed now is the certainty that by no manner of means shall the same aspect of the question have to be solved in the same way again. It might well be that the very course of the war, if victory were yet to incline to the Turks at bay, would further the solution that all are anxious to see carried into peaceful effect. The failure of the Allies to make good their appeal to the sword must have aroused the same feelings amongst their kinsfolk in Russia that were an immediate cause of the war of 1877. This time the Balkan States have shown that they can dispense with outside sympathy and assistance in redressing their primary grievances. If in the pursuit of ulterior ends they encounter greater resistance than they anticipated, they can acquiesce with an easy grace in the attainment of the lesser ambition. But if the Turks fail to substantiate their hold on Thrace as well as on Macedonia, Europe stands confronted with a problem that extends beyond the limits of the Allied States. The Balkan League has made good its purpose in the military arena. Whether it has also provided for common action in the no less trying times of peace is not yet apparent. The plan of campaign, which must not necessarily be taken as an indication of the measure of cohesion between the Allies, has shown each State striving for itself, though common action has been essential to the success of all. Peace exigencies, if the League is to remain effective, will call not only for common action, but also for some sacrifice for the common good.

THE NEAR EAST.

THE NEAR EAST is on sale at all Bookstalls and Newsagents in Great Britain. Should any difficulty be experienced in obtaining the paper, readers will oblige by notifying the Manager. Abroad THE NEAR EAST may be obtained in:

PARIS. Librairie Hachette, 79, Boulevard Saint-Germain; Librairie Galignani, 224, Rue de Rivoli, and at Railway Bookstalls.

THE TURKISH ARMY.

SOME CHARACTERISTICS.

By "Rahnuma."

A fortnight ago, and before the commencement of actual operations, the writer ventured to suggest that, given the "will to conquer"—and that, above all things, is essential—good organisation, training, and command, rather than mere numerical superiority, lead to success in war. That numerical superiority is measured, in any case, not by the numbers available, but by the numbers actually employed—and it is organisation which places and maintains those numbers in the field, and it is training which enables them to be advantageously manœuvred and efficiently led. The writer also ventured to foretell, and has been doing so for many years, that a war between Turkey and her Balkan neighbours would be likely to illustrate this precept well; for the Turks possess the superior numbers and the Balkan States the better organisation and training; whilst all possess the "will to conquer," because the stakes at issue are and always have been vital.

Events seem to be proving the truth of this doctrine; and nations who, for instance, rely upon spare time military forces and nucleus naval crews, or who reckon upon safety by merely adding up the numbers of their Dreadnoughts, should bear these points in mind.

But upon what does organisation and training—or, in other words, efficiency—depend? And why does efficiency seem to be so lacking in the armies of the Turks?

Zeal, sense of discipline, patriotism, loyalty, grit, even energy up to a certain point—many of the qualities which go to make good soldiery are there; the Government is lavish with equipment; manœuvre grounds know no restrictions, and neither officers nor men have calls upon their time nor temptations to turn their thoughts to pleasure or to vice. And yet organisation exists only upon paper, and training is a farce. Why? There are many, many reasons, but the writer will attempt to give a few.

Broadly speaking, military efficiency cannot be divorced from national efficiency as a whole, and that the Turks are inefficient as a nation their best friends will not deny. What public department, for instance, retained in their own control, has ever managed regularly and rightfully to fulfil its proper functions? Honesty of purpose can often be admitted, and though in official circles corruption is rife, the Turk—the real Turk—is not by nature dishonest. Indeed, in this respect, he is to the Near East not unlike what the Chinaman is to the Far East. The ethics of both are certainly hard to define, but neither delights in a swindle. The foreigner, for instance, who dines in a Turkish *han*, or purchases some Turkish wares, will get sixpenny worth for his sixpence—at a non-Turkish establishment in Turkey he will not. Corruption, then, stamps the upper and official circles, and honesty those below; and it is the upper and official circles who organise and train, whilst the peasant but obeys. To Departmental corruption, then, may be traced the roots of many imperfections in the Turkish army, extending back for generations. The revolution of four years ago no doubt decreased the evils of corruption, but brought others in its train, for politics—a form of party politics—then appeared upon the scene. Positions of responsibility and power continued to be bought and sold, but political intrigue took the place of cash, so that in reality corruption merely assumed another name. Young Turks displaced Old Turks, and then periodically the latter turned the tables—the "Young" and the "Old," by the way, marking their political ideals and not their relative ages. These political influences spread from the highest to the lowest ranks, and undermined the discipline of the corps of officers as a whole.

Corruption, then, financial or political, is one reason why the Turkish army has failed to keep pace with the times.

Lack of imagination is another source of weakness, and common to all grades; inability to appreciate cause and effect, and so failure to distinguish the essential from the non-essential. To take but one example to illustrate this point.

Hours will be spent upon a barrack square, plodding away at semi-ceremonial exercises and German drill—real smartness, certainly, is never attained, but honest efforts are made to achieve something of the sort. But there the training often, if not always, ends. To practical musketry, to field exercises, and manœuvre no time will be devoted at all, and the writer, for instance, has found soldiers—men, perhaps, who had worn uniform for many months—unable even to manipulate their rifles, to insert cartridges into their Mauser magazines.

Another great obstacle to all efficiency is, no doubt, the inborn pride of the Turk, his contempt for races other than his own, his natural inclination to presume superiority and to despise his foe. "The Turk is a soldier born, and does not require to be organised or trained," as the writer once quoted before.

Last, but not least, is that easy-going inertia, that tendency to leave all things to look after themselves—or to Allah.

Corruption, political intrigue, ignorance, pride, and laziness, these are some of the worst characteristics of the Turk and the Turkish army. And though his good characteristics are very many, we shall shortly see whether the evils are too deep-rooted to prevent disaster.

ROUMANIA AND THE WAR.

Monday's *Morning Post* contained a letter, dated October 22, from a special correspondent at Constantinople. He had just arrived in Turkey from Bucharest, and he reports that the dominant impression he received in Roumania was that of the rooted hostility of the public in general, and particularly of the army officers, to Bulgaria's move.

The fact that the moment when the sincere Turkish efforts to improve the Government had temporarily broken down was chosen to manufacture a hostile public opinion in Macedonia, plus the traditional Roumanian suspicion of Bulgaria, is the real cause of this feeling. Everyone in Roumania believes that a secret treaty was concluded with Turkey in 1911, but no one knows what are the obligations incurred thereby by Roumania. It is certain that if the Turks were severely defeated Roumanian opinion would become difficult to control. Of the many Roumanian officers with whom I conversed not one considered a permanent Turkish defeat likely. The reported Turkish project for a landing on the coast at Burgas is considered sound strategy, and the news of a disembarkation is expected. I am told that there are only blockhouses and temporary works on the coast. Two or three brigades of infantry and one of cavalry are mentioned as the force which will probably be deputed to carry out the operation. It would repair the line as it proceeded westwards towards Jamboli. Such a force could seriously threaten the communications of the Bulgarians and worry their left flank.

"The Comrade."

The leading weekly journal of India, conducted generally on the lines of the London **Spectator, Nation,** and **Saturday Review,** dealing with politics, education, literature and social questions of India, and the affairs of Eastern countries and Moslem governments, with great ability and independence. An excellent medium of advertisement on account of its large circulation among a select circle of readers in all provinces of India.

SUBSCRIPTION, FOREIGN, £1 PER ANNUM.

OFFICES: KUCHA-I-CHELAN, DELHI.

"THE UNITED INDIA & NATIVE STATES."

"A high-class weekly orga devoted to social, moral, political, educational and economic problems of the day, including that of the Native States. It is edited with great ability, and the fairness and moderation o its view are most conspicuous."—*Epiphany*, Nov. 5, 1910.

"*The United India and Native States*, of Madras, is perhaps the only Hindu journal in the country that has steadfastly refused to be swayed by party feelings, and has been conspicuous for its sober views on p blic questions, particularly those bearing on the relations between Hindu and Mussalman."—*Muslim Review* for Feb., 1912.

Foreign Subscription, **12s.** per annum.

"UNITED INDIA AND NATIVE STATES" OFFICE, Madras, India.

THE PRESS ON THE NEAR EAST

A Persian Notable.

Apropos of the article from a Persian correspondent which appeared in our issue of last week under the above title, we notice in the *Contemporary Review* (November) an article by Professor E. G. Browne corroborating most fully the statements of our correspondent concerning Shuja-ed-Dowleh.

He imprisoned, tortured, hanged, strangled, and stabbed; he cut men in two like sheep (as is shown in one of the photographs) and hung their bodies up in the bazaar; he sewed up the mouths of those suspected of a love for the Constitution; he nailed horse-shoes on to their feet and drove them through the streets; he cut out their tongues and plucked out their eyes. One of his favourite punishments is to throw the victim into a large tank round which are stationed men armed with sticks, who strike at the sufferer's head whenever it shows itself above water, until he dies either from drowning or from loss of blood.

This is the monster who, in spite of the protests of the Persian Government, was placed last January in absolute control of the unhappy city of Tabriz by Russia, actively aided by Great Britain. That Great Britain, too, is directly responsible for his deeds is clearly demonstrated by the last White Book (Cd. 6,264).

A Permanent Balkan Union?

Die Information (October 25), of Vienna, contains the following from a diplomatic correspondent:—

Although fighting is still proceeding in the Balkans, people are already beginning to speak of all kinds of political combinations, especially of a more or less permanent Balkan confederation—something after the model of the old German Bund or of that Italian confederation dreamed of at one time by Napoleon III. It is therefore the moment to point out that of the four Balkan States only two, Servia and Bulgaria, are contiguous, so that a Customs union, for instance, is not practicable. A true confederation of the Balkan States would be possible only in the event of Turkey becoming a party thereto—a suggestion at one time put forward by the Young Turks. It may, however, be assumed with some confidence that all such projects are quite irrealisable for the present.

The Turkish Army and Politics.

The almost continuous tale of disaster, which represents the chronicle of events in the war, from the Turkish point of view, has naturally aroused speculative reflection as to ultimate causes of the collapse. The *Times* (October 29) contains the following observations in a leading article on "The Troubles of the Turks":—

The real secret of their present plight is partly found in the blighting influence of the rule of the ex-Sultan Abdul Hamid, when the policy of encouraging inefficiency in the army was deliberately pursued. If Turkish officers and men are, as it seems, no longer the equals of the troops which kept the Russians rooted to the ground for months in 1877, Hamidian folly is largely to blame. The Revolution was the work of the army, and appeared to promise a restoration of military efficiency. The Committee took all the money they could secure for military purposes, and enormous sums were spent, not always with wisdom. The attempt failed, for the reason that all such attempts must fail. No army will ever inscribe victories on its banners when its officers become politicians first and soldiers afterwards. Politics wrought the final undoing of the Turks as warriors. The rank and file were no doubt largely untouched by these deleterious influences, but there, too, unfortunate effects were visible. The Turkish soldier will fight for his Padishah, but the dictates of committees and assemblies do not revive the martial ardour in his blood. For him the issue has been confused, and he knows not the strange gods for which he is bidden to sell his life as dearly as of old. Once he realises that in the last resort he is fighting for the foothold of his race in Europe, he may still become again a scourge in battle. But he lacks leaders.

Austria the Arbiter.

Le Journal (October 29), of Paris, finds that the centre of influence at the present moment lies in Vienna, and accordingly awaits a lead from that city:—

Aussi peut-on dire qu'à l'heure actuelle le nœud de la situation est à Vienne. L'Autriche est arbitre. Toutes les autres puissances sont prêtes à s'incliner devant la logique des faits. La Russie s'enthousiasme pour les victoires slaves. L'Angleterre libérale ne peut, malgré ses préoccupations islamiques, que s'incliner devant un progrès de la civilisation. La France est dans une situation analogue. L'Italie, occupée à digérer la Tripolitaine, ne désire rien moins que l'ouverture d'une nouvelle curée. L'Allemagne, très sensible à la poussée du slavisme, est trop intelligente pour songer à réagir immédiatement contre un mouvement à l'apogée de sa force. Reste l'Autriche. On a dit et répété qu'elle interviendrait même par les armes pour maintenir ouverte la route de Salonique. C'est un côté de la question. Il y en a un autre. La monarchie austro-hongroise compte une quinzaine de millions de Slaves dont il serait peut-être temps de cesser de méconnaître l'influence.

Christians in Turkey.

The *Evening Standard* (October 29) publishes an interview with a well-known Syrian Christian, Suleiman Bey Nassif, regarding the position of the Christian population in Turkey:—

"I would appeal to Englishmen," he said, "to stop this declaration that the war is being fought for the Christians. It must do a lot of harm, and cannot possibly do any good. It will certainly help to destroy the good feeling which has been created under the new régime between the Moslems and Christians living under Turkish rule.

"Having had opportunities during the last few years to acquaint myself with the exact state of affairs in Syria and other parts of the Turkish dominions, I have every reason, on behalf of my fellow Christians, to express a feeling of gratitude to the new Government. It is very unjust to charge that Government with ill-treatment of Christians, and such an accusation is only brought to prejudice public opinion against Turkey."

Changing Views.

The dogmatic assertion, everywhere repeated at the beginning of the war, that Europe would not tolerate any disturbance of the *status quo*, is no longer heard. Bulgarian victories are sadly upsetting European dogmas. The *Pall Mall Gazette* (October 28) writes:—

If the success of the Allies continues, and if the Bulgarian Army emerges victorious from the clash of the main armies, nothing short of a general mobilisation of Europe will check the victorious advance of the Allies, flushed with triumph and burning for the redress of ancient wrongs. Let us ask ourselves the question, Is it for a moment conceivable that the nations before whose onset Turkish power in Europe is apparently collapsing like a house of cards will consent to see Macedonia handed back to Turkish rule under any shape or form? If not, who is to bell the cat? It is inconceivable that the warlike preparations of Roumania can mean that King Charles is to be commissioned by Europe to stab Bulgaria in the back. . . . . And, the main armies of Turkey defeated, the power of Roumania would assuredly prove quite unequal to the task. Europe must make up its mind to the fact that restoration of the *status quo* is no longer a possibility. The most fatal of all mistakes would be for the Concert of the Powers to treat Bulgaria as *une quantité négligeable*.

The *Daily Chronicle* (October 26) joins in the general harmony:—

Whenever the war ends, be it soon or late, and whatever its issue, the Great Powers will be confronted with a problem of the utmost gravity. We agree with the Vienna Press that to preserve the *status quo* in the Balkans is no longer possible. Maintaining the *status quo* will be simply ensuring a continuance of the state of things which has produced the present war. We do not impute blame only to one side. Turkey has had grave difficulties to face since the revolution which led to the deposition of Abdul Hamid. The Great Powers, notably Austria-Hungary and Italy, did not make smooth the path of the Young Turks. And some of the Christian bands in Macedonia had become as ferocious as their Moslem tyrants. Violence always breeds violence. But it is simply unthinkable that Macedonia and Albania should be allowed to remain in the state of anarchy and confusion and horror that has prevailed in that unhappy land for a whole generation.

The *Westminster Gazette* (October 25), in common with the great majority of journals, has had to modify preconceptions with regard to possible results of the Balkan War:—

The theory with which diplomacy encouraged itself a fortnight ago that the belligerents would come to deadlock after a brief campaign and then invite the intervention of the Powers does not become more probable as the days go on. So far as we can see, events are not moving in an orderly fashion to this polite conclusion. There is little likelihood that the Powers in concert will command any force capable of dealing with a victorious army which did not invite intervention. It would be prudent, therefore, to abandon the deadlock theory and pursue the negotiations on the assumption that one or other of the combatants will obtain a decisive victory. The rivalries and jealousies which are feared will not, in our opinion, be more dangerous on that assumption than on the other, and safety may be found if only the Powers can be induced to accept the formula endorsed yesterday by the Prime Minister as compatible with neutrality—the formula, namely, that whatever happens the boundaries of freedom and good government must be extended.

Articles to Note.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

The Greeks seem to be causing very general annoyance by their action with regard to neutral shipping. I read in a Roumanian contemporary that great irritation has been occasioned by the high-handed and discourteous manner in which the captain of the port of Piræus conducted a recent perquisition on board the Roumanian steamer "Dacia." The Bucharest authorities have decided to suspend the service of the official steamship line to the Piræus.

***

It seems very poor policy for the Greeks to wantonly irritate shipping and commercial interests, for the prosperity of their own country is dependent, to a great extent, on the goodwill of shippers and traders in neighbouring countries. On the other hand, it is the acme of presumptuous officiousness to suppose that these puny interferences can have the slightest effect on the course of the war.

***

The Greek Government would be well advised to restrain the heroics of their naval officials—unless these officials are prepared to give their feelings expression in a legitimate direction; that is to say, in operations against their armed enemy.

***

Our Special Trade Correspondent in Constantinople sends us this week some interesting figures with regard to the trade between Great Britain and the Balkan States and between the latter and Turkey. It will be observed that the volume of trade passing between this country and the Balkan States is of comparatively small importance. In this direction, therefore, the war is not likely to adversely affect British trade. A further point to notice is the manner in which Servian trade with Turkey has increased during the last five years. This is of special interest as showing the force of economic expansion, for it will be remembered that Austria, during the period in question, endeavoured to coerce Servia by means of a Customs war. Servian trade, previously passing mainly through Austria, took a new direction, to the great advantage of Turkey. This is reflected in the figures quoted by our Special Trade Correspondent.

***

There appears to be some difficulty in obtaining quotations from underwriters for insurance of surgical appliances and chemists' stores consigned from London to private firms in Constantinople. Underwriters are said to regard the risk of capture as serious.

***

The *Times* states in this connection that Article 29 of the Declaration of London, to which neither Turkey nor the Balkan States are signatories, provides that "articles serving exclusively to aid the sick and wounded" are not to be deemed contraband of war. The same clause provides, though, that in the case of urgent military necessity, and subject to the payment of compensation, such supplies may be requisitioned if their destination is as specified in Article 30, *i.e.*, consigned to "territory belonging to or occupied by the enemy or to the armed forces of the country."

***

In our issue of October 4 our Special Trade Correspondent in Constantinople mentioned an instance of initiative and enterprise on the part of British wax vesta manufacturers and the reward which accrued to them. The paragraph in question having been brought to the notice of a prominent firm engaged in the match industry, I have received a letter from them in which the following passage occurs: "We have been aware of the demand for vestas. . . . for some considerable time. . . . In the state of our order books, we have not felt inclined to equip ourselves specially for this trade, which, so far as British manufacturers are concerned, is likely to be of a very temporary description, and which necessarily leaves a very narrow margin of profit. We have accordingly been obliged to turn down several serious inquiries which, under other circumstances, we should have been glad to take up."

***

Of course, my correspondents, to whom I am indebted for their courteous letter, know their own business better than outsiders can; but I am not at all convinced that the demand for wax vestas in Turkey is likely to be "of a very temporary description as far as British manufacturers are concerned." On the contrary, I believe that, properly looked after, the trade will prove a permanent and profitable business to the competing British firm who have taken it up. My view, moreover, is evidently shared by the latter firm.

***

Does not the true explanation of my correspondents' apparent apathy lie in the fact that they see themselves forestalled; that they are "too late"? If this be so, I would urge that in spite of the clouds now obscuring her destiny, Turkey is a market worthy of the closest attention, as one which will develop to an extent perhaps at present unsuspected. Such a market goes to those who *in the early days* obtain recognition and familiar use for their goods. In view of the future, if not of the immediate present, I would like to see English products being pushed to a greater extent and with more energy in Turkey.

***

With reference to the importance of establishing an early position in a growing market, I would ask manufacturers and others to remember that in many of the world's markets England is to-day literally living on a sound reputation founded in the early days, before competition rendered business difficult.

***

In 1910 the Persian Government decided to prohibit the export of carpets dyed by means of aniline dyes. This prohibition was to take effect from June of this year, but unfortunately it has never been enforced. It is now notified that an export duty of 3 per cent. *ad valorem* is to be imposed on such carpets during the next six months, and a similar duty of 6 per cent. *ad valorem* during the following six months.

This measure in its original form was excellent and one reflecting more wisdom than is usually credited to the Persian Government. That no effect has followed until now, and that such effect as does result is a mere shadow of the original intention, is symptomatic of the influences only too often impeding Persia's attempts at self-government. I would be interested to learn the inner history of these seemingly unimportant incidents, and do not doubt that it would prove politically instructive.

***

Manufacturers of explosives are likely to benefit more largely by the present war than are most other traders. Meanwhile manufacturers of acetone and glycerine, both employed in the preparation of explosives, are profiting by existing conditions to make heavy advances in prices.

***

The glass factory which was established by Omeri Zade Mehmed Muslim Effendi in Damascus some three years ago, and which turned out the most beautiful work, has, I learn, been obliged to close. The factory was the only glass factory in the East, if we except very rude glass-making works at the ancient city of Hebron. It is said that a small sum is required to set the place once more going, and I hope that someone will be found with the necessary capital and organising capabilities to revive and further develop this industry.

***

The concession for the establishment of this factory was one of the first industrial concessions granted after the accession of the present Sultan. The concessionaire was bound under the provisions of this temporary and local manufacturing monopoly to expend a sum of at least £T15,000 on the factory.

***

In a recent issue of the Cairo *Journal Officiel* I read a Ministerial Decree deciding that portable engine No. 45, by Ruston and Proctor, bearing the date 1863, being in a state of imminent danger, shall be restrained from working. The mudir of the province is therefore ordered to immediately stop the engine, by administrative means. I presume that the owner, Morkos Effendi Barsoum, refuses to recognise the decrepitude of his engine, for it is perhaps scarcely reasonable to suppose that the fifty-year-old Ruston and Proctor refuses to stop working unless under the compulsion of an officially executed decree. In either case the builders of this faithful old machine have every reason to be satisfied with the advertisement thus given to them.

***

An abstract of the accounts of the Sudan Government has recently been published in the Sudan Government *Gazette*, which shows that during the period covered (January 1 to May 31) the receipts are well above the estimates, while the expenditure is considerably below the budgetary provision. Should revenue and expenditure continue to be realised for the remaining seven months in the same proportions, we may look forward to a very substantial surplus at the close of the year.

COMMENTATOR.

Constantinople Business Letter

(From Our Special Trade Correspondent.)

Constantinople, October 26.

Britain's Trade with the Balkans.

The readers of these columns are sufficiently familiar with Great Britain's trade with Turkey not to require more than a mere mention of the totals. Our exports to Turkey of manufactures of the United Kingdom and foreign and colonial re-exports during the year ended 1911 amounted to £9,729,690. Our imports from Turkey during the same period amounted to £5,541,125, of which imports £4,876,070 were retained in the country. Of Turkey's four opponents, our largest trade is with Greece, to which country we exported £1,752,706, including foreign and colonial re-exports during 1911. The principal articles of home manufacture amongst these exports were :—Cotton goods, £438,339; coal, £404,924; and woollen goods, £157,970. Our imports from Greece attained the figure of £2,273,756, consisting principally of currants, £1,716,106; iron ore, £205,462; sponges, £106,914; and raisins, £70,423. Our exports to Bulgaria during 1911 amounted to £1,004,492, and included cotton yarns, £257,530; cotton goods, £300,020; and machinery, £91,235. Our imports from Bulgaria amounted to only £317,086, of which the principal item was maize, £220,394. Our exports to Servia during the same period amounted to £320,028, of which total cotton yarns and piece goods accounted for £210,705 between them, and our imports from this country amounted to £39,369, of which, strange to say, the largest item is bacon, £26,640. Our exports to Montenegro, which country's total foreign trade only reaches the sum of £359,038, amounted to £1,607, and our imports were nil.

Quite apart from any other considerations, there can be no doubt with which country our commercial interests lie. Our exports to Turkey of cotton goods and yarns during last year amounted to just a little more than double our entire export trade to the other four countries.

Trade of Balkan States with Turkey

According to the Ottoman Customs statistics for the year ended March 13, 1911, Bulgaria's exports to Turkey amounted to £917,331, but as the totals of a few of her principal exports to Turkey, according to the same returns, exceeded this amount, I turn to more accurate sources, which place her total exports to this country at £1,750,000 during the year 1910, which is exactly double the figure of five years previous. This total represents a little more than one-third of her total export trade. Her principal exports to Turkey consisted of wheat, £300,000; flour, £300,000; woollens (Abas and Shayak), £80,000; maize, £70,000; barley, £50,000; sheep and oxen, £45,000; timber, £40,000; cocoons, £30,000; valonia, £15,000; rye £15,000, and cheese, £14,000. Bulgaria's imports from Turkey during the same period amounted to £833,600, which represented exactly 12 per cent. of her total imports, and showed an increase of 25 per cent. over a period of five years. The principal items were :—Olive oil, £100,000; raw cotton, £90,000; salted fish, £85,000; soap, £70,000; olives, £45,000; fresh fruit, £36,000; sesame seed, £27,000; coal, £20,000; dried fruit, £18,000; wool, £17,000; wax, locoum, wood, and oranges and citrons, £15,000 each.

Servia's exports to Turkey during 1909, which had increased more than tenfold in five years, amounted to £871,000, and represented almost 24 per cent. of her total export trade. They consisted principally of wheat and other cereals, flour, beans, and sheep and oxen. Her imports from Turkey during the same period, which exactly doubled in five years, amounted to £192,500, and represented a little more than 6 per cent. of her total imports. Fresh fruit accounted for almost one-third of her purchases from Turkey.

Greece's exports to Turkey have remained stationary over a period of ten years, and amounted to £253,100 in 1909, representing a trifle more than 6 per cent. of her total export trade. Her imports from Turkey, which are on the decline, amounted to £461,900 during the same period, and represented about 8 per cent. of her total import trade. Her principal articles of export to Turkey were, cognac, flour, wine, oranges, and citrons, and olives, and her imports from Turkey, goats and lambs, salted fish, coal, eggs, and oxen.

Montenegro's trade with Turkey is quite insignificant, although her subjects have hitherto been fairly conspicuous in the capital, where they earned a livelihood as guards or janitors, wearing their picturesque national costume and quite an arsenal of obsolete firearms, and whose peculiar code of honour required that they protect their employers' property from others even at the sacrifice of their lives, but did not nevertheless prevent them from helping themselves when opportunity offered.

To carry these trade comparisons a little further, while the percentages of the commerce of these several countries with Turkey vary from almost one-quarter of their entire trade, as in the case of Bulgaria, to 7 per cent., as in the case of Greece, the total exchanges of these four countries with Turkey, represent less than 8 per cent. of her entire import and export trade, and it is at once evident that the interruption of trade between them is a much more serious matter to the allies than it is to Turkey. From the above details it will be seen that the dislocation of the trade exchanges between the countries now engaged in war is in articles which are of very little interest to British manufacturers.

Prohibition to Export.

During the war the export of horses from the Empire is prohibited.

Prohibitive Duties and Certificates of Origin.

The 100 per cent. duty on Italian goods has been removed by a Customs notice, dated the 24th inst. Under date of October 23, the Customs notifies the imposition of a duty of 100 per cent. ad valorem on all goods shipped from Bulgaria, Servia, Greece, and Montenegro, since the declaration of war with each of these countries. The notice further advises that goods from all neutral countries and their colonies or possessions in the Mediterranean, Morocco, or Egypt, must still be accompanied by a certificate of origin under the same conditions of the Customs notice of October 19 concerning the war with Italy.

Increased Customs Duty.

It is stated that the Government has decided to increase the Customs duty from 11 per cent. to 15 per cent. during the war. While it is announced that this increase will come into effect at once, it would seem that some consideration will have to be taken of existing contracts for goods to be delivered duty paid.

Adjudications.

The General Direction of the Hejaz Railway invites tenders for 19,200 kilogrammes of 4 mm. galvanised telegraph wire, 3,200 insulators, and 50 kilogrammes of 1½ mm. wire for fixing (fils d'attaches). The adjudication will take place on November 23, at 2 p.m.

The same Department notifies that it offers to the highest bidder a quantity of old rails, old iron, metal sleepers, etc., in its depots at Haifa. Offers will be received until November 17, at 4 p.m. Details are to be obtained at the Direction Générale every day from 11 a.m. to 4 p.m.

GREEK SUGAR IMPORTS.

With regard to the packing of sugar imported into Greece, the Board of Trade are now in receipt, through the Foreign Office, of a translation of a Greek Royal Decree, promulgated on September 19/October 2, providing that sugar in crystallised powder, light brown in colour, must be packed in wooden boxes of 50, 25, or 10 kilogrammes. This provision comes into force thirty days from the date of promulgation of the present Decree.

BRITISH EXPORTS TO TURKEY

To the Editor of The Near East.

Sir,—An Americanism says "there are statisticians, statisticians, and d——d liars." Inaccurate figures prove nothing, and there can be no question that one of the first obligations of anyone who takes it upon himself to quote statistics is to be accurate. While there may be degrees of fallibility, when no less an authority than the Board of Trade, in its "Accounts relating to Trade and Navigation of the United Kingdom for the month of July, 1912," managed to get its figures relating to Great Britain's trade with Turkey "twisted," and had to publish a leaflet correcting the values of foreign and Colonial merchandise exported during the years 1910 and 1911, which it had interchanged, there is surely no excuse for an organ like the *Journal* of the Smyrna British Chamber of Commerce to congratulate itself that the trade between Great Britain and Asiatic Turkey during the six months ended June, 1912, had increased, compared with the two preceding years, and to lament that this was not the case with the trade between the United Kingdom and European Turkey, and then to solemnly quote figures which refer to the export of "foreign and Colonial merchandise" only.

As a stickler for accuracy, I would ask you to permit me, through the columns of your widely read paper, to state, for the information of those interested in trade in Asiatic and European Turkey, that the exports to European Turkey of produce of the United Kingdom were £1,724,506 for the six months ended June, 1912, they were £23,000 less than during 1911, and were £20,000 more than during 1910. The exports of Asiatic Turkey during the same period were £2,126,268, or over *three-quarters of a million pounds less* than during the same period of 1911, and *a hundred and ten thousand less* than during 1910.

The absurdity of this journal's figures is that it would make the six months' trade between the two countries amount to a paltry £100,000, whereas the declared values of the produce of the United Kingdom exported to Turkey amounted to a round *four million* pounds in six months.

Truly a little knowledge is a dangerous thing. *Ride si sapis.*—Yours, etc.,

Statistician.

Constantinople, October 26, 1912.

DEPARTMENT STORES IN TURKEY.

U.S. Consul-General Ravndal, of Constantinople, gives some interesting particulars regarding Turkish department store methods in a recent report:—"Constantinople's principal department stores cater to both the native and the foreign trade, advertise extensively, and do a great deal of work in the way of window dressing and interior decorating. The help is all native. The majority of the clerks are Greeks and the remainder either Armenians or Spanish Jews. As Constantinople is such a cosmopolitan centre and as so many different languages are spoken, it is necessary that the saleswomen and other employees know French, Turkish, and Greek. Many of them also speak German, Armenian, English, and Spanish. A knowledge of French, Turkish, and Greek is, however, compulsory. Experienced male clerks are paid 22 dols. to 45 dols. and saleswomen 15 dols. to 30 dols. per month.

"These firms have special bargain days, and at stated intervals run advertisements in the leading French, Turkish, Greek, and Armenian newspapers. Interior and exterior signs and price cards are often written in these four languages. Very little signboard or other exterior advertising is done in Constantinople except by one store, though another firm recently placed benches for the use of the public in convenient places on either side of the Bosphorus, and on these its name and address appeared in several languages.

"Department stores here carry certain lines of American goods, such as shoes, rubbers, garters, and suspenders, but to my knowledge there are no women's ready-to-wear garments of American make sold in this market."

Trade and the War.

SITUATION IN ATHENS.

(From Our Own Correspondent.)

Athens, October 19.

Financial Position.

At a general meeting of the board of directors of the National Bank of Greece on the 17th, the governor stated that they had taken measures to avert the possibility of any rise in the rate of exchange, and that, notwithstanding the exceptional circumstances, the bank is in a position to meet all calls and every emergency, and, moreover, to assist banking and commercial circles, so as to avoid any serious dislocation of business during the war. The board voted subscriptions amounting to 46,000 frs. in favour of the Red Cross and various relief committees.

Requisitioning of Horses.

Trade is to a great extent paralysed, not only owing to the absence of all the young men, but also owing to the scarcity of horses, carts, etc., all those which were considered suitable having been requisitioned for military service. The owner of each horse or cart is paid a daily indemnity, and receives a credit note entitling him to receive the estimated value if the horse or cart is not returned to him. At the Piræus, owing to the scarcity of horses, carts and lorries are being hauled by men.

Coal Trade.

The coal trade, too, is almost at a standstill, owing to the war, the increase in freights, and friction between coal heavers and employers.

Naxos Emery.

At the Ministry of Finances it is announced that 1,800 tons of emery will be sold by auction at the Syra Customs House on November 4-17.

"Critical Situation" at Athens.

The French Chamber of Commerce at Athens has written the *Moniteur Officiel du Commerce* as follows :—

"We have to inform you of the critical situation existing in Hellenic business circles owing to the mobilisation of the army and navy. The majority of the merchants and employees of Athens and the provinces have been called up to bear arms. The state of mobilisation has stopped business and payments. All judicial actions in commercial matters are now stopped. Merchants whose bills remain for the most part unpaid can lodge a protest and proceed to effect seizure, but these purely conservatory measures cannot be put into execution and remain without sanction."

Money Scarce in Roumania.

Reports from the German Consul at Bucharest have pointed to the money scarcity in Roumania, contending that this factor in connection with the uncertain political outlook would make it advisable for foreign merchants to limit their relations with that country for the time being. From another interested source, however, it is pointed out that thus far no difficulties involving important business houses have been revealed, though smaller firms are making every effort to obtain a Moratorium, with, however, little likelihood of success. On the other hand, the export of grain, which means a very substantial sum to Roumania, will begin as soon as the exporters are assured that the Dardanelles will not be closed for international traffic.

A Greek Privateer.

According to a Lloyd's telegram from Larnaca, the Greek steamer "Arcadia" arrived at the port on Wednesday armed and fitted as a privateer, and was to leave again yesterday. She is a vessel of 1,008 tons, built in 1892, and owned by the Navigation Orientale, the central office of which is at Smyrna. Though she does not steam more than 14 knots there appear to be only three faster vessels in the Greek mercantile marine.

THE SERVIAN MORATORIUM.

The secretary of the Birmingham Chamber of Commerce has received the following letter, signed by the President and Secretary of the Chambers of Commerce of the Kingdom of Servia at Belgrade :—

"The Servian National Skupschtina has voted a Moratorium, and his Majesty the King has sanctioned it. This is a law that suspends all payments arising from civil contracts, and will remain in force as long as to-day's extreme circumstances continue in this country. It has not been provoked by the insolvency of our citizens, but is the direct consequence of the present political situation, especially of the attitude of the Turkish Empire towards our brethren in Turkey as well as towards the Kingdom of Servia. Consequently it is only a temporary measure of emergency. Our country having answered to the mobilisation of the Turkish Army by mobilisation of its own, our citizens have been called to the colours, and are physically unable to respond to their engagements or credit. A nearly complete cessation of the economical life in our country being the consequence of the mobilisation, our Government proclaimed a Moratorium—a measure employed by all countries in similar circumstances. Considering, however, that citizens of this country entertain business relations with the country which you represent in regard to commerce and industry, we have the honour to beg you to inform, in the way you judge to be the best, all the firms that are in business relations with our country that all our citizens will claim to fulfil their engagements, and will fulfil them to the end, as soon as the political situation again becomes normal in our country.

"But considering that the economical and commercial life of the country will not be able to revive and develop itself with the same rapidity as under normal circumstances, it is natural that our countrymen shall not be able at first to fulfil their engagements, as far as it concerns the payments of the terms, in strict compliance with the rules that the commercial world generally observe, and you would oblige us very much if, when informing your business world that a Moratorium has been proclaimed in Servia, you would have the kindness to remark that the Servian merchants, knowing that they have always exactly fulfilled all their engagements, firmly hope that their foreign business friends will not place unnecessary obstacles in their way, so that they may be able to execute their engagements with as little commotion as possible; for if the foreign business friends of our countrymen prove obliging to the latter in these critical times, we are persuaded that they will in this way safeguard not only the interests of the Servian merchants, but especially their own interests. On the other side, we are equally convinced that the Servian merchants will know how to prove their gratitude to their foreign business friends by continuing to entertain and develop their reciprocal business relations, as well as by fulfilling their engagements in future as scrupulously as in the past.

"Persuaded that you will grant a favourable consideration to our demands, we remain, with the expression of our heartiest anticipated thanks," etc.

Britain and Servian Finance.

In the course of an interview accorded to a representative of the *Financier* (October 31), M. Slavko Y. Grouitch, the Servian Chargé d'Affaires, deprecated the idea that anything decisive had as yet happened. In the event of no reverses of importance checking the progress of the Allies, the reorganisation of Turkish finances would naturally have to be considered, but Mr. Grouitch declined to express any opinion as to the nature of the reorganisation that might be necessary. He remarked that one of the very hopeful symptoms of early pacification which has been noticeable has been the way in which the Moslem population in the country occupied have returned to their homes and resumed their usual occupations. With regard to British interests in Servia, M. Grouitch observed that at present there is exceedingly little British capital invested in Servian enterprises. Most of the foreign capital in Servia is French, some is Austrian, and a little is German and British. Looking at the recent financial history of Servia, this has a somewhat curious result. British capital goes all over the world, and British financiers do not hesitate to embark large sums in commercial undertakings where the condition of affairs is less stable than in Servia. For example, an immense amount of British capital has gone to Mexico, where there are fresh revolutions coming on every week or so, and yet here, forty eight hours from our own doors, there are splendid opportunities for the investment of money to great advantage. One reason is that British financiers know so very little about Servia. "I have more than once," continued M. Grouitch, "heard Englishmen speaking of Servian enterprises and securities with contempt, who evidently did not know in the least what they were talking about. There appears to be in England a dislike to placing money in any kind of commercial venture in the Balkans, and especially outside Turkish territory. Whatever else may happen with respect to the war, you may accept it as quite certain that Macedonia will never again be under the Turks, and in that country there is an immense deal to be done, commercially and economically."

Cargoes Seized.

Telegraphing from Corfu, Lloyd's agent reports that the Austrian steamers "Urano" and "Karlsbad," with merchandise for Santiquaranta, were seized, but after the discharge of this portion of the cargo were allowed to proceed. The "Urano" had 114 packages so consigned and the "Karlsbad" 50 packages. A Reuter message from Constantinople states that the Khedivial liner "Ismailieh," which has arrived there, reports having been detained by the Greek authorities at the Piræus who confiscated 900 sacks of rice intended for Constantinople.

The Dardanelles.

In the House of Commons Sir E. H. Carlile asked whether the Foreign Secretary had received any assurances from the Turkish Government on the continued opening of the Dardanelles to trade.

Sir E. Grey replied : We are aware of the great injury that would be done to British shipping and commerce by the closing of the Straits, and we shall, as we have already done on a previous occasion this year, do all we can to secure that no impediments are placed in the way of the passage of innocent neutral trade. But before I could say definitely that there was no danger of the Straits being closed, it would be necessary to have an understanding with both belligerents.

Sir E. H. Carlile : Is the right hon. gentleman now in communication with the Turkish Government on the subject?

Sir E. Grey : It is not enough in the case of war on an occasion of this kind to communicate with only one of the belligerents. You must communicate with both. We have been in communication with both belligerents, but the House will know from what passed earlier in the year that it is very difficult to know what will take place.

Brevities.

A telegram has been received by the Foreign Office from His Majesty's Minister at Athens to the effect that lubricants for machinery have been added to the list of articles declared by the Greek Government to be contraband of war.

The Foreign Office has issued a telegram from his Majesty's Minister at Sofia reporting that the port of Burgas, Bulgaria, has been mined, and is consequently closed to shipping for the present.

Lloyd's agent at Constantinople telegraphed on Tuesday that the following are the principal articles declared to be contraband of war by the Ottoman Government :—All arms, ammunition, articles of warfare, military clothing, camp equipments, animals and carts for warfare, etc.

In the House of Commons yesterday Mr. King asked whether steps were being taken by the Foreign Office, either singly or in conjunction with other Powers, to prevent the supply of funds by financiers to the combatants in the Balkan war. Sir Edward Grey said the answer was in the negative. He believed it was usual in such cases for financiers to take their own courses.

PORT SUDAN NOTES.

Lack of British Enterprise.

A Port Sudan correspondent writes:—

I have noticed that on several occasions "Commentator" has drawn attention to the manner in which trade in Egypt and the Sudan has either passed or is passing into the hands of foreign capitalists. Especial mention should, however, be made of Port Sudan in this regard, as the need for an energetic move here on the part of British traders is a very pressing one. In the days of its extreme infancy a British company was responsible for practically all the trade in the port, but this company has been either unable or unwilling to meet the growing demands of commercial houses. We find in the present day foreign capital, principally Greek, predominant in every direction. Even the shipping companies, with the exception of two, rely upon Greek agencies for the transaction of their business; it is not too much to say that already British capital has ceased to be of any importance in the port. The responsibility for this unsatisfactory state of affairs lies at the door of British merchants alone. There is no favouritism of any kind shown by the Government to members of one community rather than another; the most energetic and capable business houses capture the trade, and these are, unfortunately, not British.

The Cotton Industry.

It was hoped at first that when the cotton-growing possibilities of the Tokar district became apparent a British firm would seize the opportunity of establishing its interest in the Sudan. But here again the apathy of British merchants has been very apparent, and practically the whole of the cotton industry in this district is in the hands of Greeks. It is obvious that the passing of each month makes it more difficult for an outsider to step in, and it is more than probable that already our opportunity has been lost as far as cotton in the Tokar district is concerned. For the Greek trader, endowed with those commercial instincts which were once supposed to be characteristic of the English race, has not waited for the full development of land, and thus run the risk of others stepping in before him before purchasing; he has secured most of the valuable land within the area of possible cultivation already.

As is generally known, the extension of the Sudan Government railways from Suakim to Tokar has already begun, and when this is completed all the cotton-growing centres of this district will be placed into direct communication with Port Sudan. Thus the revenue accruing to any firm which has been enterprising enough to secure a hand in this new enterprise will be enormous, and it is a matter of keen regret that all this money should be diverted from the British into a channel which runs straight to Athens. No one has anything to complain of in the manner in which the Greeks conduct their business. They are keen, courteous, and hard working, and thoroughly deserve all they get. The only thing that I complain of is that so much should be left for them to take.

Discovery of Oil.

It yet remains to be seen how far British capital will be represented in connection with the discovery of oil near Port Sudan. Nothing is as yet certain as to the volume of oil which this district contains; everything is in its initial stages, and in this regard we may, perhaps, trust to the energy of one of our big companies to secure the predominant interest in the fields to our own country should they prove to be of workable value.

But Port Sudan is developing so quickly that it is important that, while there is yet time, the attention of capitalists should be drawn to the possibilities of its future trade. Already the existing accommodation for shipping is at times inadequate, and it is proposed to extend the quay wall to the south side of the harbour, thus giving facilities for the loading and unloading of about twenty ships at one time. The fact that Port Sudan is at present a sub-coaling station of the British Navy makes it imperative that there should be no delay in the completion of this work.

UM NABARDI GOLDFIELDS.

(From Our Khartoum Correspondent.)

Um Nabardi, October 17.

Your correspondent is at present at Um Nabardi, and it may interest your readers to hear of this, the only gold mining industry in the Sudan. There is evidence of very early gold-mining work being done here, in the period before the Christian era, but this modern enterprise—the Sudan Gold Fields Co., Limited—is still comparatively young. There is almost every natural obstacle. The camp is 30 miles from the main line, with which it is connected at No. 6 station by a light railway. The necessary water has to be pumped from a well more than 15 miles distant. Owing to its isolated position the camp has to be almost independent, doing its own repairs and making its own arrangements. And the machinery has to run in a country where machinery has more than its fair share of hindrance in the form of dust. There is also considerable difficulty in getting labour for the back of beyond.

Still, under its present management, the enterprise seems in a fair way to become a reasonably profitable concern. The gold values in the quartz excavated is very fair, and if the plant can be extended the gold returns should be increased. The newly introduced cyanide plant, which enables the gold untouched by other processes to be extracted, should make a considerable improvement in the finances. And the present system of working, which looks to future development rather than to an immediate but transitory success, would seem to be building up the concern on a sound commercial, and expanding basis. Your readers will all wish success to this example of British enterprise, and to the fifteen Englishmen who win success from a reluctant country under very trying climatic conditions, and at the expense of a very lonely and isolated life.

NEWS FROM ALL SOURCES.

The supply of the two distillers and six water tanks required by the Egyptian Coast Guard Administration has been adjudicated to the following two firms, viz., the two distillers to Messrs. Dowrie and Co., of Port Said, for £E810, and the six water tanks to the Egyptian Engineering Co., Limited, of Cairo, for £E200.

The heavy export of British fancy goods and Christmas toys to the Balkan nations and to Turkey has been considerably interfered with by the war, says the *Evening Standard*. Manufacturers can get no guarantee that the goods will ever reach their destination, while insurance rates have reached almost a prohibitive figure.

Reuter's Cairo correspondent states that the opening of the Assouan Barrage will take place on December 23 by His Highness the Khedive, and that Lord Kitchener will be present.

Last Friday, at West Ham, three Egyptian boatmen, who were said to have shipped at Port Said as stowaways because they wished to see London, were ordered to be sent back to their own country.

A Teheran telegram states that Mr. Lemon, Inspector of the Indo-European Telegraph Department, has been completely robbed by tribesmen near Norgoubaz, between Nain and Yezd.

An impressive naval funeral was witnessed at Dover on Monday, when a seaman of the Greek torpedo-boat destroyer "Keraynos" was buried. An English naval detachment and the crew of the Greek destroyer followed the coffin, while the Berkshire Regiment's band played funeral marches, and the same regiment supplied the firing party. A Greek priest from London officiated. The "Keraynos" is repairing at Dover.

Messrs. Dick, Kerr and Co., of Abchurch Yard, the well-known contractors, have just supplied the Alexandria and Ramleh Tramway Co. with a large quantity of material for their lines, and are at present engaged in negotiating to build and equip a newly projected tramway service for one of the principal provincial towns in Egypt.

TENDERS INVITED.

EGYPT.

Supply of Printing Machine.—Tenders will be received at the Printing Dept., Cairo, for the supply of a rotary press for bookwork, to print all sizes (rising by centimetres) between 0.50 metre and 0.90 metre; sheets to be cut before reaching the first printing cylinder; minimum speed 4,000 per hour, with flat delivery; surface of printing cylinders to be 0.90 metre by 1.12 metres in length, to be supplied with rotary knife for cutting sheets before delivery. Stereotyping accessories. Offers for sheet-fed rotary presses with automatic feeder will also be considered. It is essential that a full description of machines and all particulars be sent with each tender. Tenders should be enclosed in sealed envelopes bearing the inscription: "Tender for rotary press," and addressed to the Director, Printing Department, Cairo. No tender will be considered unless accompanied by a declaration from a bank or the Government Treasury to the effect that it holds at the disposal of the Printing Department a sum equal to 10 per cent. of the calculated total value of the tender. This guarantee declaration will be returned to the successful bidder against a security deposit of equal value, either in cash or in Egyptian bonds. This deposit must be paid into the Printing Department within fifteen days from the date of notification of acceptance of tender. The machine must be delivered within 150 days from the date of the order, and in the event of non-compliance the Printing Department will then have full right to either cancel the order or inflict a fine not exceeding 4 per cent. on the total value of the order. Date, November 14 (noon).

Supply of Red Roofing Tiles.—Tenders are invited for the supply of red roofing tiles required by the Coast Guard Administration. Conditions of tender and specification can be seen at, or may be had from the Headquarters, Coast Guard Administration, Bab el Luk, Cairo, or from the offices of the Director, Coast Guard Eastern Directorate, Port Said, and of the Director, Coast Guard Stores, Arsenal, Alexandria. Tenders must be made on stamped paper of 30 mills. and submitted with the conditions of tender and specification in sealed and registered envelopes marked "Tender for the Supply of Tiles" to the Director, Coast Guard Stores, Arsenal, Alexandria. Date, November 16 (noon).

Supply of Coal.—The Municipal Council of Helouan invites tenders for the supply of 200 tons of Cardiff coal delivered at the stores of the waterworks, Kafr-el-Elui (on the Nile). Delivery should be made within a fortnight of November 16. Particulars at the Municipal Offices, Helouan. Offers, on stamped paper (30 milliemes), to be forwarded to M. le Gouverneur, Président du Conseil Municipal de Hélouan. Date, November 16 (noon).

TURKEY.

Telegraph Wire.—The General Direction of the Hejaz Railway invite tenders for the supply of a quantity of telegraph wire. Particulars are to be found in our "Constantinople Business Letter."

An interesting exhibit at the Aeronautical Exhibition, which is at present being held at Paris, is the Henri Farman biplane, "Louis Mouillard," which was presented to the French Army by the Egyptian branch of the Ligue de Navigation Aérienne.

OIL TOPICS.

British Enterprise at Ploeshti.

Mr. J. Haimann, owner of the Sperantza Refinery at Ploeshti, has disposed of his property to the Anglo-Continental Oil Company for the price of 50,000 frs., of which half was paid on the signing of the contract, the balance being payable on November 19. The company has also entered into a contract with Mr. Haimann, in accordance with which the latter undertakes to increase the capacity of the refinery to an output of 5,000 wagons of crude oil per annum. In consideration of this the company will pay him £24,000—£12,000 in cash at stated periods and the balance in shares of an English company to be formed for the purpose of working this refinery and exploiting oilfields in Roumania.

Baicoi-Constantza Pipeline.

Work has already begun on the Roumanian State pipeline, and will be carried out on three sections at once—Baicoi to Buzeu, Buzeu to Feteshti, and Feteshti to Constantza. The "Financier" says that it is hoped to have the first pipes laid in the spring of 1913. Two engineers, Mr. G. Filipesco and Mr. E. R. Samitca, have been dispatched by the Roumanian Government to purchase abroad Diesel engines and pumps for the three pumping stations of Ploeshti, Buzeu, and Hagieni, and have already left Roumania with that object. Mr. T. Constantinesco, director of works for the pipeline, has visited Ploeshti for the purpose of fixing, in consultation with Mr. Nicolaesco, the site for the terminal station and tank storage.

Brevities.

Mr. J. R. Falkowicz, the well-known oil expert, has been paying a visit to Roumania lately in connection with some important oil business in that country. Mr. H. J. Brown, of the Oil Trust, has also been visiting Roumania for the purpose of examining certain oil properties which have been proposed to him.

The Hellenic Government has issued a royal decree authorising the import of mineral oils necessary for motors and machinery which comply with certain conditions.

The Balkan Petroleum Syndicate, Limited, has received an authorisation from the Roumanian Government to start work in the country, where it will be represented by Mr. Bertie Maw.

A decree has been issued authorising the Oil and Drilling Trust of Roumania to start work in that country and recognising Mr. I. T. T. Lincoln as its representative there.

The production of the Anglo-Roumanian Petroleum Company for the week ended 26th ult. was 210 tons. The production of the Roumanian Consolidated Oilfields for the same period was 1,564 tons.

The remarkable well of the Colombia Company, No. 1 at Moreni, has given up to the present 120,000 tons of oil, and is still producing at the rate of 1,400 tons per day.

A football match between teams representing the Anglo-Egyptian Bank and the Southend and District Banks was played at Southend-on-Sea on Saturday, and resulted in a draw of two goals each. The Southend Banks, playing with the wind, were the first to score. This was the only goal in the first half, the play being very even. On the change-over the A.E.B. soon pressed hard, and their opponents' centre-half stopping a shot from W. J. Teele with his hands, a penalty was awarded, which J. B. Kiddell took successfully. The A.E.B. continued to press, but the Southend Banks, breaking away, again scored. Soon afterwards J. B. Kiddell again scored with a fine low drive. The visiting forwards strove hard for the winning point, but the home defence were not to be beaten.

ENGINEERING NOTES.

Agricultural Motors.

In these columns, in a previous issue, we described an oil tractor which demonstrated its uses for agricultural purposes in a very admirable way. In expressing our opinion as to its suitability in certain agricultural districts of the Near East, we remarked that a smaller and lighter tractor of that kind would be more suitable there, and would be appreciated especially by small landowners, who are very numerous throughout the Near East. We happened to see the other day just such a tractor, or motor, which we think could meet all the requirements of the small landowner in the East. The machine can be adapted for use either in the field or in the barn. In the field it can be attached for traction purposes to the plough, to the mower, reaper, binder, and other field machinery; in the barn, the petrol motor, for the time stationary, can be utilised for cutting chaff, pulping roots, grinding corn, and a variety of other purposes. It can also be used as a road traction-engine, for the transport of produce to market. The petrol motor itself is portable. It is 8 h.p., with two cylinders, water cooling, and electric ignition. It has, however, in our opinion, at present, a drawback, and that is that it has only one speed forward and reverse, but we were told that an improvement will soon be effected in this respect. The engine is free, and when put in motion a friction clutch is employed in order to transmit the power through an intermediate shaft to the balance-gear shaft of the road wheels. These are driven by means of patent silent-running chains. The wheels have wide rims, on which are grips to prevent skidding. When the motor is required for use on the high road, detachable rubber pads can be fixed, by thumbscrews, to the wheel rims, so that vibration and noise may be lessened. The machine complete weighs 16 to 17 cwts., including some 40 gallons of water, which it carries for cooling the cylinders. This weight, which is an important consideration in field work, is distributed over three wheels. When required to draw a mower, reaper, plough, or other machine the motor is connected, by means of a short pole, with a spring coupling, which allows the attached machine to ride easily and evenly over undulating ground. In this way the motor can be attached in a few minutes to almost any agricultural machine. In ploughing, the steering wheel and one of the rear wheels run on unploughed land, the third wheel running in the furrow. This is of great importance; for at a demonstration it was noticed that no objectionable compression was apparent, either in the upturned furrow or in the packing of the subsoil. In fact, the effect of the machine on the subsoil was not more marked than it would have been in the case of horses. In conclusion, from what we have seen at the demonstration, we believe that this class of agricultural motor will secure a great sale in the East if properly introduced by competent men, and, above all, properly brought to the notice of Near Eastern landowners.

TRADE CONDITIONS IN ADEN.

The merchant in this district is a native. He is either a Parsee, Indian, Bannia, Mahratta, Cutchy, or Bohri (Persian); each entertains his own peculiar ideas of trade, and each has brought with him the traditions, tastes, and economies common to his own country. To these people English, French, Spanish, or German trade literature means little or nothing. They buy in a common market because they know no others, and because someone has led the way to that market. As they know no others, it must needs be satisfactory. The Aden merchant buys in English, German, and Austrian markets; and these constitute his common market. The merchants here carry similar lines of goods. One is struck by the sameness of everything in their shops, and there is no competition to speak of, and no enterprise (says U.S. Consul Schultz).

To illustrate actual conditions in this district it is but necessary to recite the story of a pair of American scissors. The Consul had occasion to inquire after scissors. He had heard of cheap German and English goods, and how they had swept everything before them, but he wanted to buy cheap American scissors. He was informed that he could obtain only the German article. The scissors were produced and examined, and proved to be an American product marked "Made in U.S.A." The shopkeeper was told that he was selling American goods instead of German, but he said it was impossible. Why? Because he had imported the scissors from Hamburg, Germany. They were German scissors in his eyes, and will remain German scissors so long as he buys in Germany. Further inquiry developed the fact that this particular make of scissors was the best seller in Aden. It was not only cheaper than but superior to the higher-priced English or German articles.

LEBANON TOBACCO.

H.M. Consul-General at Beyrout (Mr. H. A. Cumberbatch, C.M.G.) has forwarded to the Board of Trade samples of tobacco cultivated in the Lebanon districts, and remarks that two varieties of tobacco are grown there, viz., the older kind known as "Baladi," and a newer kind called "Turkish." About 150 metric tons of "Baladi" were produced in 1911, of which about 75 metric tons were exported to Egypt, the remainder being consumed locally. Much larger quantities were grown in former years, but the cultivation has been largely abandoned owing to tobacco from other parts of Turkey having successfully entered the Egyptian market.

In 1908 the cultivation of "Turkish" tobacco was seriously taken up by the Lebanese, the crop in that year being 6 metric tons, which had increased to 100 metric tons in 1911. The estimated crop for 1912 is about 50 metric tons. Prices vary from 1s. 6d. to 3s. 4d. per kilog., according to quality. This "Turkish" tobacco has, up to the present, been almost exclusively reserved for local consumption, owing to the establishment of several cigarette factories in the country. A small quantity has been exported in leaf, but the experiment was unsuccessful owing to imperfect methods of cultivation, though it is hoped that better results will be obtained in the future.

The above-mentioned samples may be seen, and names of the principal dealers in the Lebanon district obtained, by British tobacco merchants and cigarette manufacturers on application to the Commercial Intelligence Branch of the Board of Trade, 73, Basinghall Street, London, E.C.

The court of directors of the Royal Mail Steam Packet Company recommend out of the profits of the current year the payment of an interim dividend for the half-year ended June 30 last, at the rate of £5 per cent. per annum (less income tax) on the preference stock, and an interim dividend at the rate of £5 per cent. per annum (less income tax) on the ordinary stock. The interim dividend on the recent issue of ordinary stock will be calculated from the dates of payment of the instalments. The dividend warrants will be posted to the proprietors on October 31.

Near East Markets.

SPECIAL REPORTS.

(From Our Own Correspondents.)

Alexandria. October 25.

We are this year experiencing a certain scarcity of cereals, and large dealers have profited by this in order to impose famine prices. For instance, beans, which are the staple food of the working classes, have attained fantastic prices. Dealers have also taken advantage of the war and the high freight rates to corner barley and maize (which latter in Egypt replaces yeast in the making of bread), so that these grains have also reached prohibitive prices. The fellah thus sees articles of prime necessity increasing in price in an alarming manner, and he is obliged to sell his crops at absurdly low prices, as he is unable to adequately feed his cattle. It is certain that this situation is partly due to the middling crop of beans in Upper Egypt and to the small imports of cereals from abroad, but it is nevertheless true that exaggerated increases in price have been caused by the manipulations of large dealers in Upper Egypt and Cairo. It appears that in this country one can with impunity establish a monopoly in the necessaries of life, and impose arbitrary prices on the population. Is it not possible to protect the country against the rapacity of these speculators? It is high time that some legislation should be effected in this matter and heavy penalties imposed on the authors of these reprehensible operations.

Khartoum. October 17.

Reports from the provinces give varying accounts of the state of the crops in September. To take two extreme cases, Kordofan, except in the extreme north, has had plentiful rains, and if no pests appear the prospects throughout the province are first-rate. Dongola, on the other hand, is suffering from the low Nile. The Nile flood there has been exceptionally bad. The river, which reached its highest level on September 5, has been 60 centimetres lower at Merowe than the highest level attained last year, which was also an indifferent year, and a whole metre lower than the good flood level of 1909. As a consequence only one irrigation basin, the Kerona, has been inundated this season. However, the general level of prosperity in the provinces will probably turn out very fair, but it seems a safe prophecy that the ruling high prices of dhurra will not come down apart from the institution of special measures.

The following information is compiled from the weekly bulletins received at the London offices of the Imperial Ottoman Bank from its correspondents in the Near East :—

Beyrout. Oct. 15.

Market.—Since the declaration of war by Montenegro the local position is apparently tending to become worse.

The local authorities, in conformity with instructions received from Constantinople, are requisitioning all good horses and mules and paying for them in accordance with expert valuation. The public carriage service and transport are almost entirely stopped owing to shortage of draught animals.

Cereals.—Wheat prices are stationary, while barley is tending higher.

Dry Cocoons.—Export is meagre, merchants preferring to spin the silk here and export the thread to Lyons, thereby obtaining better prices.

Busreh. Oct. 5

Imports.—The market continues calm. Business in produce and cotton goods is limited to immediate requirements.

Exports.—Cereals : In spite of firm prices, small lots arriving from the interior are quickly bought up. This week 4,500 tons have been shipped, of which 2,500 are for Hamburg by s.s. "Ekbatana" and the balance per s.s. "Nasseri" for Jeddah.

Dates.—On the flood tide of the 27th to 30th ult. four vessels crossed the bar—viz., the "Stanhope," with about 120,000 cases for America; the "Turkestan," with about the same load and for the same destination; the "Ekbatana," with 60,000 cases, of which 35,000 cases are for Triest, Oran, and Tunis (transhipment at Port Said); and the balance for Antwerp and Hamburg; the "Woolich," with about 120,000 cases for Jaffa, Beyrout, Messina, Salonika, Smyrna, Constantinople, and the Black Sea ports. Various other shipments, estimated at 20,000 cases, have been effected by the mail steamer for London and South Africa.

Salonika. Oct. 17.

In consequence of the political situation our market is in a very difficult position. Local stocks of Manchester goods remain unchanged owing to lack of sales.

Angora. Oct. 19.

Mohair.—Owing to the Balkan war and the general mobilisation resulting, the Government has requisitioned the railway for military transport. Thus all commercial traffic, both export and import, is entirely suspended and commercial transactions are arrested. There are thus no dealings in Tiftiks. Prices are nominal, but stocks are very much reduced, and as soon as commercial communications are resumed existing lots will be sold at high prices.

Cereals.—The same causes have stopped all exports. Arrivals from the interior are, owing to deficiency in crops, unimportant and prices are fairly high. Present stocks, held by large houses, cannot be exported and will be sent to Constantinople for army use.

CONSULAR REPORTS.

Olive Crop in Greece.

A recent American Consular report states that the olive crop has suffered greatly because of the continued lack of rain. In Attica and Boeotia, where practically no rain has fallen since May, the yield of oil will be not more than one-tenth of that of last year. In some of the districts of these provinces no oil whatever will be produced. The total estimated yield of olive oil of the whole country for the year 1912-13 will be about 20,000,000 okes, or approximately 6,800,000 gallons, which will be hardly more than enough to supply the local consumption. There is said, however, to be a considerable stock of oil in Greece and Crete left from the yield of 1911-12. This surplus stock is estimated by some to be as much as 40,000,000 to 45,000,000 okes, or approximately 13,600,000 to 15,220,000 gallons.

Persian Almond Crop.

H.M. Consul-General at Ispahan (Mr. T. G. Grahame) reports that the crop of almonds, etc., in that district this year is estimated at about 75,000 shah mans of sweet almonds, 10,000 shah mans of bitter almonds, and 2,500 shah mans of bitter apricot kernels, a total of 87,500 shah mans (about 10,152 cwts.), as compared with about 98,000 to 100,000 shah mans (11,500 to 11,700 cwt.) last year. The decrease is attributed to excessive cold during last winter. Advance purchases are reported to be at higher prices than last year.

IVORY SALES.

In their report dated October 25, Messrs. F. W. Bowyer and Bartleet write :—The last quarterly sales of the year commenced on the 22nd and terminated on the 24th inst. The quantity offered totalled 89½ tons, made up as follows :—15½ tons Zanzibar, etc., 38 tons Egyptian, 5 tons West Coast African, 6 tons Abyssinian, 8 tons land carriage, 10 tons waste ivory, remainder walrus and rhinoceros horns. Throughout the sales the demand was good and prices remained steady for soft and slightly easier for hard. Billiard ball ivory met keen competition and realised extreme prices, being £5 to £8 dearer. Egyptian and Tripoli.—In large supply, and sold with keen competition. Soft large and medium teeth firm to slightly dearer rates. Bangles firm. Hard ivory £2 lower. West Coast African.—In very small supply, and sold steadily. Scrivelloes slightly easier. Abyssinian met with good demand. Prices firm to about £1 advance for large and medium teeth. Bangles firm. Ball scrivelloes sold steady at £5 to £6 advance. Rhinocerous horns in moderate supply and partly sold at steady values. The next sale will probably take place on January 28, 1913.

PRODUCE REPORT.

London, October 31.

There has been a fair amount of activity in the produce markets during this past week, and prices are well maintained. Sugar is steady for best and slightly lower for refined. Coffee tended downwards. Currants dearer. Sultanas firm. Figs steady. Seeds are quiet but firm. Oils quiet. Corn slow.

Sugar.

The Russian Government has asked the Powers who are parties to the Sugar Convention for a written undertaking to allow Russia to export more than the maximum quota fixed by the Convention, whenever exceptional circumstances arise, such as those which secured this concession to her this year. The States concerned are said to have agreed to this proposal. Beet sugar was steady and a little dearer this week, closing, however, quiet. October, 9s. 3½d.; November, 9s. 4½d.; December, 9s. 5d.; May, 9s. 9½d. to 9s. 10d. Refined sugar, although slightly lower, is steadier. English cubes have sold freely at full prices, as foreign cubes are still scarce on the spot and have been offered very sparingly to arrive.

Coffee.

The falling off in the Continental demand, and the fear of monetary difficulties owing to the war in the Near East have rather depressed the terminal market here as well as the market in Santos. Quotations, therefore, have a tendency to lower prices. Futures were slow and 9d. to 1s. lower; December sold, 64s.; March, 63s. 6d.; May, 63s. 6d.; July 62s. 9d.

Currants.

Business, in the market, although not so heavy as recently, has again been very considerable, and the scarcity of fruit under 30s. is making itself felt somewhat acutely, so that good Pyrgos is in good demand. Pyrgos bags sell at 25s. 6d. to 26s.; Pyrgos cases, 27s. to 27s. 6d.; Amalias, 28s. to 29s.; Patras, 30s. to 33s.; Gulph, 30s. to 34s.; Panariti, 30s. to 36s.; Vostizza, 31s. to 48s.

Sultanas.

There has been a good demand for sultanas, and the market is very firm, particularly for old fruit and lower-priced new. It is reported that the s.s. "Seafield," which left Smyrna on October 22, brings only 1,000 tons, which is 500 tons less fruit than was expected, and it is also said that shipments of Greek fruit are suspended owing to labour difficulties through the war. This means that the supply for Christmas trade will be some 1,000 tons smaller than was expected, and if the exceptional demand of this season continues much longer, it will not be surprising to see some grades considerably dearer. Smyrna old is quoted 30s. to 58s.; new, 38s. to 72s.; Persian old 32s. to 38s.; Greeks, 52s. to 76s.

Figs.

Up to the present shipments of skeleton cases are about 4,000 behind those of last year, and it is reported that there is only one further shipment to come. It is probable, therefore, that boxes will advance, as, undoubtedly, the bulk of the business is yet to be done. With regard to the bags of Naturals, the position is different, as the tendency is for the standard of quality to become gradually lower as the season advances. Naturals are quoted 26s. to 32s. Pulled, per cwt., 75s. to 100s. (in 1 lb. to 3 lbs. boxes).

Seeds.

The market remains very firm, but there is rather less doing. Linseed is slightly steadier. London-Calcutta afloat and October is quoted 57s.; November, 56s. 9d.; December, 56s. Rapeseed is slow but firm. Cottonseed is quiet. London-Egyptian on passage is quoted £8 6s. 3d; November-January, £8 5s. per ton. Canary seed is active, and prices have further advanced in Turkish. Hemp seed is quoted 40s. Sunflower seed, Russian, 12s. 6d. to 14s. 6d. per cwt.

Oils.

Linseed Oil.—Spot pipes landed, 30s. 6d. to 31s.; barrels, 31s. 6d. to 32s. Rapeseed Oil.—Ordinary Crown, naked, 31s.; refined casks, 33s. 6d. Cottonseed Oil.—Crude spot, 24s. 6d. to 24s. 9d.; refined sweet, 29s. 3d.; ordinary pale, 26s. 6d. Petroleum.—Russian and Roumanian, 7¾d.; American, 8d. to 8¼d.; water white, 9d. to 9¼d.

Digitized by Google

SMYRNA FRUIT MARKET.

(From Our Own Correspondent.)

Smyrna, October 19.

Sultanas.

Business has been exceedingly active since the season opened early in August. Prices having started at a moderate level, consumption has been stimulated, and large shipments have been made weekly to all parts of the world. Prices have fluctuated within narrow limits and have ruled steady, but some excitement prevailed during the first half of September owing to rainy weather, which damaged some 7,000 tons of fruit. After a temporary spurt, the market eased under the pressure of large supplies.

Prices have ranged as follows :—

Extra Fine Qualities	42/- to 45/-	per cwt.	f.o.b.
Choice ,, ...	37/- ,, 42/-	,,	,,
Fine ,, ...	32/- ,, 35/-	,,	,,
Good Medium ,, ...	27/- ,, 30/-	,,	,,
Inferior ,, ...	23/- ,, 25/-	,,	,,
Rain-damaged Fruit.....	18/- ,, 23/-	,,	,,

Total arrivals to date compare as follows with **last year** :—

Arrivals to the 19th October, 1912.	
Bags, 225,000 or Tons, 28,125	
Sales ,, 203,000 or ,,	25,375
Stock Bags,	12,200 or Tons, 2,750
Arrivals to the 19th October, 1911.	
Bags, 125,000 or Tons, 15,625	
,, 116,000 or ,,	14,500
Bags, 9,000 or Tons,	1,125

The outbreak of war in the Balkans is tending to disorganise the market. The Government having requisitioned the services of the railway companies for the mobilisation of the army, the transport of goods during the past fortnight has been practically suspended. Arrivals of sultanas are presently exceedingly small, and no increase in supplies can be expected for several weeks. On the other hand, shippers, alarmed by political developments, are anxious to close their engagements, and during the past week a heavy rush to buy has been recorded. Stocks which on the 12th inst. stood at about 32-33,000 bags have been reduced to barely 12,000 bags at present, and the selection of fruit offering is very poor.

The s.s. "Leafield" sails to-night with a considerable supply of fruit for London, and at present there is no prospect of any other sailing for the London market before the middle or end of November. The s.s. "Bavarian" is also sailing to-day with a fair supply of fruit for Liverpool.

The majority of shippers are closing their warehouses this week. Apart from the absence of steamers, labour conditions are causing much concern. Both Turks and Greeks are being called up by their respective Governments for military service, and the scarcity of labour has caused serious prejudice of late. One of the principal box factories, which hitherto employed about 280 men, has within the past ten days found its pay roll reduced to thirty-eight men.

The yield of Vourla sultanas has proved about 4,500 tons, and that of Carabournou 700 tons. The Chesme district has returned 1,700 tons. The bulk of the fruit from these districts has already been shipped to the Continent, where consumers fancy the even-coloured fruit grown in these particular districts.

The stocks now remaining in the country appear to be rather lighter than expected. It is a matter of some doubt whether 10,000 tons are still available. This would reflect a total production of about 45,000 tons.

Figs.

The total arrivals to the 16th inst., according to the figures published by the Ottoman Railway Company, amount to 154,561 bags, against 163,338 to the same date last year. The yield will probably prove somewhat smaller than last season. Qualities have been somewhat unsatisfactory, and the proportion of fine fruit has been very small. The figs, however, are sound and well cured. Prices have been well maintained throughout the season, and fine grades have realised higher prices than in 1911.

EGYPTIAN COTTON MARKET.

(From Our Own Correspondent.)

Alexandria, October 25.

Prices remain at practically the same level as last week. The effect of large arrivals was neutralised by the strong demand, and it is not to be foreseen that prices will again fall. A rise seems more probable, in spite of the abnormal volume of the crop.

The second picking is now being generally carried out, and the yield is abundant. We can already count on a good third picking, thanks to the favourable weather recently experienced.

Speculation is somewhat slack, and operations are on a small scale. On the other hand, exporters are eagerly buying.

This year Afifi is below normal in quantity, while there is abundance of Ivanovich and Sakellarides. The demand for the two latter varieties is limited, but Afifi enjoys an almost unlimited inquiry. The result is that we will not have enough Afifi to meet the requirements of spinners, whereas large quantities of Ivanovich and Sakellarides will probably remain unsold this year. It is time that cotton culture should be more carefully regulated, and that more account should be taken of the demand from abroad.

Cotton seed is in active request, and prices are firm, in consequence of the bad olive crop.

Manchester Report.

Messrs. Reynolds and Gibson report that the upward tendency in futures, owing to the reduced crop estimates and in sympathy with the rise in American cotton, has had the effect of raising Egyptian quotations ½d. for brown and 3-16d. for Upper. There is practically no increase in the demand for spot. In future quotations of Egyptian cotton will be made in hundredths of a penny, discount not being allowed. The estimated sales are 2,000 bales. Despite the rapid accumulation of goods manufactured specially for the Near East owing to the war, there has been no talk of financial difficulties.

EGYPT'S COTTON PESTS.

The Egyptian Government have appointed an important Commission to investigate the means of preventing the recurrence or destruction of cotton pests in that country. During recent years serious losses have been experienced by cultivators through the ravages of the cotton worm and the boll worm, which have tended to retard the development of this highly important industry. The Commission has appointed a sub-committee composed of technical and scientific members of the Commission itself. In addition to carrying out original experimental work, the duties of this committee will consist of the examination of all schemes and suggestions presented to the Commission. The Commission invites the co-operation of agriculturists and scientists throughout the world, and has directed the sub-committee to prepare, publish, and circulate accounts of the exact nature of the two pests mentioned above, in such a manner that they may be clearly understood by all. The information to be supplied will give a sufficiently clear indication of the local conditions to enable suggestions to be sent in for consideration by persons not necessarily personally acquainted with Egyptian agriculture.

SPINNERS IN EGYPT.

Under date of October 27, Reuter's correspondent at Alexandria reports:

Sir Charles Macara and a number of other members of the International Federation of Cotton Spinners arrived here to-day, and many more are due to-morrow. After investigation of the presses here, the party leaves for the interior on November 1 to inspect various ginning factories. Many of the delegates will proceed to Cairo and Assouan by the Nile. Altogether about 80 delegates are expected.

The Egyptian cotton on passage from Alexandria includes the "Corsican Prince" with 7,970 bales, the "Trojan Prince" with 7,850 bales, and the "Italian Prince" with 8,152 bales. The "Cabenda" is now on the berth at Alexandria loading for Manchester.

EGYPTIAN COTTON FIGURES.

For 8th week, ending October 25.

Supplied by Reynolds and Gibson.

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna, report as follows for the week ending October 18 :—We have to report a very active week in opium, with sales amounting to 169 cases for America, England, and for account of speculators. The prices we can quote to-day are as follows :—For mixed common grades, 9½ to 10½ per cent., 17s. 6d. to 19s.; for mixed tale quale, 10 to 11 per cent., 18s. 9d. to 20s.; for uniform sightly Carahissar, 10½ to 11 per cent., 19s. 6d. to 20s. 3d.; for rich old Carahissar and Yerli, 11½ to 12 per cent., 20s. 6d. to 22s.; for fine paste selected Yerli, 24s. to 25s. The business done during the week is on the bases of above figures, but owing to the protracted drought and to the active demand from all consumers we can with confidence predict that next week we shall reach a higher level, and probably our quotations will be a shilling or eighteen pence per lb. higher. To-day our market closes very firm, with buyers and only a few needy dealers who may agree to sell at above prices. The arrivals are 1,679 cases against 815 at same date last year.

Shipping Intelligence.

BRITISH SHIPPING IN THE BLACK SEA.

(From Our Own Correspondent.)
Odessa, October 27.

British ship agents in the Black Sea ports are of opinion that it was a hasty and ill-considered decision on the part of the Cunard, Ellerman, Pappayani, and Moss companies to suspend their operations with the Black Sea, but, of course, the managers of those firms know their own business best. Their procedure is calculated, however, to deter the ordinary tramp owners from accepting Black Sea charters at a very propitious time for the making of handsome profits. For British bottoms carrying grain cargoes from these waters to neutral ports there is practically no war risk whatever. The Porte has pledged itself to the Powers not to close the international commercial waterway of the Dardanelles. That assurance should suffice. The whole of the seventy or seventy-five Greek steamers ordinarily engaged in the Black Sea grain trade are held up till the close of the war, and that naturally gives an advantage to British steamers, and helps to maintain the standard of high and lucrative freight rates. In the *Daily News and Leader* Sir Edwin Pears, telegraphing from Constantinople last week, also pointed out that British shipowners were making a serious blunder in declining Black Sea charters and missing a unique opportunity for unusually profitable business. There are, however, sensible British owners who do not allow their nerves to be affected, and are carrying valuable hay on their forks.

BLACK SEA FREIGHTS.

(Messrs. Sydney Reid and Co's Report.)
Odessa, October 13-26.

Odessa.

At the close of last week a reaction in freights had set in, and 20s. to 21s. was the very best obtainable for spot and very prompt tonnage. This week, however, rates again became somewhat firmer, and for spot and very prompt tonnage 22s. 6d. to 23s. Rotterdam, 24s. Hamburg has been done for immediate and very prompt loading. Owing, however, partly to bad weather, and also to quieter consuming markets, the week again closes with a weaker tendency, and shippers inclined to temporise. Altogether, there is an extremely limited business doing, and shippers are confining themselves to the very promptest steamers.

Nicolaieff.

After doing a very brisk business during the last several weeks, this port is now much quieter, and there is only a small demand for immediate and very prompt loading at 22s. 6d. to 23s. Rotterdam, 23s. London or Hamburg. For Marseilles a very prompt steamer has been berthed—at 26 frs.—on the deadweight. For November 1-25 shippers showed some interest a few days ago at 20s. Hamburg or Weser, but owing to the generally quieter tone of the freight market, and more tonnage showing up they are now inclined to temporise.

Kherson.

A fair amount of business was done this week on the London berth at 22s. 6d. to 23s. for very prompt loading, but pressing requirements on this berth have now been filled. Rotterdam is a quiet berth at 22s. to 22s. 6d., and Hamburg at 23s. for immediate and very prompt loading. Bar draft is 23 ft. fresh.

Theodosia/Novorossisk

Continue small takers of very prompt tonnage at about 23s. Rotterdam-Hamburg-Weser. There is also some interest shown on the Marseilles and Genoa berths at about 25 frs.

State of Port.

There are free berths at Nicolaieff, Odessa, and Novorossisk.

Weather.

Winter has set in abnormally early this year, and last night there were 3 deg. Reaumur of frost at Nicolaieff and Kherson, with 5 deg. higher up the Dnieper, whilst to-day Odessa experienced the first snowstorm of the season.

BRAILA NOTES.

(From Our Own Correspondent.)
Braila, October 27.

We have had a steady, though limited, demand from Sulina to Antwerp all this week, the open tonnage at that port being just equal to the demand. Rates, with slight fluctuations, kept at 23s., at which figure they stand to-day. There is very little demand for Rotterdam, and at present no steamer loading for that port.

A steamer loading at Braila for Rotterdam completed at 23s. 6d. on Monday, since when we have had no open tonnage either here or at Galatz for any Continental or U.K. port. There is a liner loading for Marseilles, which is securing 25.50 frs. to 26 frs. on the berth. Business in general is restricted within a very small compass owing to the withdrawal of credit, the lack of tonnage, and the high freights that are ruling.

The depth of water in the Danube rose 6 ins., river draft now being 23 ft. The depth of water on Sulina Bar remains unchanged, vessels being able to cross drawing 23 ft.

Snow fell here this evening.

The Johnston liner "Barrowmoue," which had been damaged by a mine in Salonika Harbour, is now repairing at Galatz.

SEIZURE OF THE "PENPOL."

The action of the Greek Government in seizing the British steamer "Penpol" at Zea is of a very high-handed character (says the *Syren and Shipping*), and may give rise to a lot of trouble, especially in connection with her marine insurances. She is a steel steamer of 2,061 tons, owned by Mr. R. B. Chellen, Falmouth, and was on a voyage from Penarth to Varna with coal. Her value is about £12,500, which is covered at Lloyd's. It is said the Greek Government seized her so that she might not fall into the hands of the Turks, but they have no right to seize a British vessel under such a pretext. The owner has already notified his intention of throwing her on the underwriters' hands under the war risks clause, for which she was specially covered. Underwriters say that the "Penpol" was not captured as going to any enemy's port, but to that of one of the Greeks' allies, and they refuse to accept the explanation under the policy and refer the owner to the British Foreign Office, which is not swift in its action as is the German Government.

Thus, at present, there is a deadlock. It is reported the Greeks, apparently knowing themselves to be in the wrong—and perhaps being short of coal—have offered to pay for her cargo and also for detaining the vessel. The "Penpol" has been taken by a Greek war vessel to the Piræus. Not content with this action, the Greeks have since captured the s.s. "Polurrian," bound from the Bristol Channel to Constantinople with coal, but, of course, this is another matter, as she is consigned to an enemy's port. On her hull 35 guineas was paid against confiscation.

SUSPENSION OF RED SEA BLOCKADE.

It is announced in the *London Gazette* of October 22 that H.M. Embassy at Rome report that the Italian Government sent instructions on October 17 to the officer commanding the Italian naval forces in the Red Sea for the suspension forthwith of the blockade established in those waters.

NEW ODESSA-DANUBE SERVICE.

The British Vice-Consul at Nicolaieff (Mr. J. P. Bagge) reports that the Russo-Danube Steamship Company has extended its service between Odessa and the Danube ports, so that the steamers will go from Odessa to Nicolaieff and back before departing for the Danube. There will be two sailings weekly and the vessels will take passengers as well as goods.

SHIPMENTS TO DANUBE PORTS.

Mr. John B. Jackson, American Minister in Bucharest, states in a recent report:—"The steamers of the Roumanian freight service do not leave Rotterdam at regular intervals, but average about one sailing a month. These cargo boats, of which there are four in actual service, with a contemplated addition of two more, require about seventeen days for the voyage to Constantza (Black Sea), or to Sulina (when they are going up the Danube to Galatz and Braila). The Danube is open usually for about eight months of the year—from the middle of March to the middle of November, dependent upon ice conditions. As this line depends for its support on cargoes shipped from Roumania, its agent at Rotterdam is allowed considerable latitude in making terms for cargoes for the return voyage, and there are no fixed freight rates. Merchandise imported into Roumania by this line profits by a reduction of 25 per cent. on the railway freight rates to points in the country under the normal tariffs 1, 2, and 3 (according to rapidity of transportation), and of 15 per cent. under the special tariffs, and a similar reduction also applies to the transshipment charges.

In addition to this cargo boat service the Roumanian Government maintains a postal service as far as Alexandria, with vessels leaving the Piræus (Greece) once a week for Constantza, and this is the route followed by most of the merchandise imported into this country from the United States at present. The sea voyage takes three days, and through rates from the Piræus to any point on the Roumanian railways can be quoted upon a given quantity of a given article. For instance, the rate for cotton-seed oil from the Piræus to Bucharest is 30 frs. per ton, with customs duties and fees and insurance in addition. Special rates are accorded by this line—in other words, transportation can be bought wholesale—when a contract is made to furnish a definite quantity of merchandise during a given time.

GREEK BLOCKADE OF TURKISH COAST.

H.M. Minister at Athens reports that the Greek Government have notified the establishment of an effective blockade of the Turkish Coast from Goumenitsa, 39° 32′ latitude north, to the entrance of the Gulf of Arta. A period of 24 hours from October 19 was granted during which neutral vessels might leave the blockaded area.

The Greek Minister in London has notified the Foreign Office that the Island of Lemnos is under blockade as from October 21, a delay of twenty-four hours being allowed during which neutral vessels might leave. The Minister further notified that a blockade has also been declared of the coasts of Epirus, as far north as the mouth of Voustrotos, 39° 45′ latitude north.

The Wilson Line stated on inquiry at Hull that, owing to the Balkan war, the sailings of their vessels between Hull and Constantinople had been suspended. The company had its liner "Tycho" at present on a voyage to Constantinople and two liners homeward bound. It is hoped the sailings between Odessa and Novorossisk will not be interfered with.

It is possible that a new line may soon be organised between Constantza and Salonika.

An accident, which caused the drowning of five sailors, is reported from Galatz, where a boat containing a party of sixteen marines, who were going aboard the monitor "Alexandre Lahorary," capsized, and the whole of the party was thrown into the water. The number of victims would have been much larger had it not been for the prompt assistance given by the crews of the "Principele Carol" and the "Domneel Tudor."

LONDON, October 31.

Three Failures.

The Settlement produced three failures, none of them very important. Glasgow managed to squeeze through without a default. We are now awaiting the result of the end-of-the-month's settlements in Paris and Berlin. If these pass off satisfactorily the position will be relieved. But we must not expect any improvement in prices as long as the war continues. The markets have held up much better than anyone expected. Too many people sold bears. It is said that a well-known foreign banker lent Montenegro the money to go to war with on the understanding that he was to have forty-eight hours' notice of the declaration. This he got, sold a bear, and netted £40,000 profit. There is no doubt that the bears have made very large profits, for they were enabled to sell on a steady market, and they bought back during one of the worst slumps the Bourses of Europe have ever experienced.

Dear Money.

Money has been lent to the Stock Exchange for the Settlement at from 7½ to 8 per cent., and there is very little chance of its becoming cheaper, at any rate until after the turn of the year.

Cheerful Internationals.

On Wednesday the tone of the Foreign market was quite cheerful, mainly due to a telegram from Vienna announcing that the Russian and Austrian Governments had come to an agreement with regard to their policy. Bulgarians rose to 83, Unifieds were done at par, Greek Fours were very firm on buying orders from Paris and closed at 54. Bulgarian Rentes were steady at 88, Russians moved up, and Turkish Unified were in demand at 80. Even the two great gambles of the Foreign market, Perus and Tintos, were steady. Paris has financed Bulgaria, Servia, and Greece, and she is delighted at the success of these countries. But we must not forget that there is still a large amount of pawned stock to be liquidated. Therefore, there is very little chance of any important rise. Indeed, many cautious people consider that present quotations were much too high.

Railways.

The Settlement showed that most of the dealers were short of Home Rails, and prices hardened all round. There is still a good deal of gambling in Metropolitans, and the latest tale is that the City and South London will be absorbed. But it is difficult to understand how this railway can help the Metropolitan. The tunnels are too small to permit of a physical junction. Americans seem unable to shake off the influence of the war. It shows how important a factor Berlin is in this matter. Business throughout the United States is good, and the railways are all making money, prices are certainly at a very moderate level, and the American market looks the best in the whole Stock Exchange from the point of view of the investor. Unions have been at 173, and give a good yield at present prices. Southern Common at 29½ are a very cheap lock-up, as this railway is doing well, and sooner or later the price will go to par. The cotton crop is expected to reach nearly 14 millions and a large proportion of this crop will be carried by the Southern.

Rubbers Lifeless.

Raw rubber remains very weak, and, consequently, the rubber market, both on the Stock Exchange and in Mincing Lane, lacks life. None of the reports do more than maintain expectations, but the big Antwerp company, the F.M.S., promises us 100 per cent. dividend next year. This is one of the best-managed rubber companies in the world.

Oils Harden.

Some of the oil shares, notably Urals, have been hard. It is said that the company has satisfactorily settled all its arrangements with the Government. The talk of a big Maikop amalgamation did not help Maikop shares, and the British Maikop report had no effect upon the market.

Mines Being Sold.

Paris continues to sell mining shares, and as the big houses take no interest in the market prices sag away. But Modders were strong on the very satisfactory strike in the circular shaft, 42 ins. of reef going 26.9 dwts. These far-eastern propositions look like turning out well.

Egyptians Uneasy.

The Egyptian market has been uneasy the whole week. Paris has not come in a buyer: on the contrary, she has sold Land Banks, which are down to 7. Nationals have, however, been fairly steady and have improved to 17½. Beheras have been offered as low as 14½, but very little stock has changed hands. Aboukirs show no change, and Agricultural Banks are fairly steady round about 6. Markets carried over at 25s. and Salt and Sodas at 16s., but they weakened to 15s. on some large blocks being offered. United Egyptian Lands carried over at 3s. 6d and Investment and Agency at 9s. Egypt has occasionally supported Bank shares, but the general tone of the market has been dull.

TURKISH DEBT.

The Council of Foreign Bondholders has received from the Council of Administration of the Ottoman Public Debt at Constantinople a statement, of which the following is a summary, of the complete receipts in respect of the month of May, 1912, compared with those for May, 1911:—

COMPLETE RECEIPTS.

	May, 1912.		May, 1911.
Five Revenues.....	£T191,304.34	..	£T190,874.46
Tobacco Tithes	10,503.37	..	—
Cyprus.....	33,629.06	..	87,527.10
3 p.c. Customs Surtax.	82,719.10	..	105,156.92
Sundries.....	2,055.80	..	1,691.00
	£T320,212.17	..	£T385,249.48

BANK OF EGYPT.

The Senior Official Receiver and Liquidator is about to make a further payment of 2s. in the £ in part redemption of the loan certificates on the amount of the original debt. This will make a total dividend to date of 18s. 6d. in the £ on the original debt, or a redemption of the loan certificates to the extent of 17s. in the £. The payment of 2s. in the £ will be made on the 8th inst. to the holders of the loan certificates. The liabilities of the bank, which amounted at the date of suspension to £2,050,000, have now been reduced approximately to £200,000.

The receipts of the Egyptian Delta Light Railways for the ten days ended October 10 amounted to £E8,580, an increase of £E1,193 over the corresponding period of last year. The increase is attributed to the free movement of all classes of traffic, especially cotton.

The receipts of the Egyptian Markets for the week ended October 23 amounted to £658, representing a decrease of £221 on the figures of the corresponding period of 1911. The total receipts since the commencement of the year are £4,507 less than for the similar period of last year.

ALEXANDRIA NOTES.

(FROM OUR OWN CORRESPONDENT.)
ALEXANDRIA, October 25.

The Share Market.

After the first panic due to the commencement of hostilities in the Balkans our market showed a firmer tone, and although transactions are not numerous prices gradually improve. Indeed it can be said that we have been less affected than other markets, for the level of our prices—with the exception of securities quoted in London—has again risen to the point at which it stood before the war. This improvement is due to favourable local conditions. A monetary crisis has been avoided, thanks to the gold imports, which amount to about four millions sterling. Further arrivals of gold are expected during the next few days. On the other hand, the political situation is excellent, and everything will continue calm as long as Egypt remains neutral.

Egypt and Tripoli.

News of the conclusion of peace between Turkey and Italy has been favourably received here. The end of the war has reopened a large market for our commerce, and the establishment of a great European Power on our frontier is calculated to bring about greater security in that part of the continent than has prevailed for some years past.

Kom Eshou Land Company.

This company has just been formed for the purchase of 520 feddans of land situated at Kom Eshou (Behera) from Abou Madani at a price of £15,000. Although this purchase is an advantageous one, it is not to be hoped that the company will acquire further land in this locality, for the level is very low and labour is scarce. The company has been placed under the management of Messrs. Paull and Wodman, and the principal shareholders are Messrs. Peel and Co., of Alexandria.

The Tilche Bankruptcy.

The creditors have approved the *concordat préventif*, guarantees being given for the payment of at least 40 per cent. of the debt. This decision having been taken unanimously, the Courts will agree to the *concordat*, and will probably appoint as liquidators Messrs. Marcel Tilche and Elie Salama and Messrs. Russell, Harris, and Co.

German Enterprise in Egypt.

The progress realised by Germany in Egypt during the last ten years is certainly prodigious. Numbers of ships flying the German flag are to be seen continually in our port, and are competing strenuously with both the English cargo boats and the passenger lines. The Deutsche Orient Bank, although possessing a small capital, has at its disposal very considerable financial means, and has monopolised a great deal of the banking business. Numerous agricultural and industrial enterprises have been established by Germans in the country. On the other hand, the large increase attained by German imports is well known, but it is not only German imports which are increasing, but exports also. A considerable part of the cotton exports are going to German factories. Powerful German firms are exporting our cotton, and they have also constructed large ginning factories in the provincial towns. A German company, La Société des Presses Allemandes, has enabled German dealers to free themselves from foreign companies, and the only spinning business in the country, the Egyptian Spinning and Weaving Company, has recently passed into German hands under the title of "Filature d'Egypte."

Reuter's Agency states that the Bulgarian National Bank is arranging to establish branches and agencies in the principal towns and villages taken from the Turks.

NATIONAL BANK OF TURKEY

ESTABLISHED 1909 BY IMPERIAL FIRMAN.

CAPITAL - - £1,000,000 Sterling.

BOARD OF DIRECTORS.

CONSTANTINOPLE.

SIR HENRY BABINGTON SMITH, K.C.B., C.S.I., Chairman.
SIR ADAM BLOCK, K.C.M.G.
F. EDWIN WHITTALL.
H.E. AHMED DJEMAL BEY.
HUSSEIN DJAHID BEY.
RECHID SADI BEY.

LONDON.

HON. SIDNEY PEEL, Chairman of London Committee.
HON. HUGO BARING.
HENRY BIRCHENOUGH, C.M.G.
C. S. GULBENKIAN.
R. H. MACAULAY.
E. N. MEYER.

Head Office: CONSTANTINOPLE (KENADJIAN HAN, STAMBOUL).
MANAGER - - H. P. KINGHAM.

London Agency: 50, CORNHILL, E.C.
MANAGER - - - R. HECHT.

The National Bank of Turkey undertakes every description of Banking business. It opens current accounts according to the custom of Bankers. Customers have the facility of discounting approved bills and of obtaining advances upon negotiable securities. The Bank will undertake the purchase and sale of bonds, shares, etc., on the London Stock Exchange, on the local and on all Continental Bourses, the safe custody of customers' securities and valuables, and the collection of drawn bonds and coupons when due. The Bank issues drafts and telegraphic transfers payable in all principal towns in the world. Letters of credit for the use of travellers are also issued. Advances made on merchandise. The purchase and sale of coupons, foreign bank notes, coin and bullion are undertaken. Bills negotiated or sent for collection. Mercantile credits opened.

Deposits received for fixed periods at rates of interest which can be ascertained on application.

BANK OF ROUMANIA, Ltd.

Head Office: 7, GREAT WINCHESTER STREET, LONDON, E.C.
Branch: 94, STRADA LIPSCANI, BUCHAREST.

CAPITAL (fully paid), £300,000. RESERVE FUNDS, £169,688.

DIRECTORS:

THE EARL OF BESSBOROUGH, C.V.O., C.B.
SIR R. HAMILTON LANG, K.C.M.G.
THE VISCOUNT GOSCHEN
E. W. H. BARRY, ESQ.
P. NAVILLE, ESQ.

The Bank was originally incorporated in 1869 under Roumanian law, but in 1903 was transformed into an English Company under the Companies Acts. It is the oldest bank in Roumania, and the only one with a London office.

A general banking business is carried on. Correspondence is invited from those doing business with Roumania, and should be addressed to THE MANAGER in LONDON or BUCHAREST.

ANGLO-EGYPTIAN BANK, LIMITED,

LONDON, PARIS, ALEXANDRIA, CAIRO, MALTA, GIBRALTAR, TANTAH, MANSURA, BENI-SUEF, ZAGAZIG, and PORT-SAID.

COMPANY MEETING

Anglo-Persian Oil Co., Ltd.

The third ordinary general meeting of this company was held at Winchester House, Old Broad Street, on the 28th ult., under the presidency of the Right Hon. Lord Strathcona and Mount Royal, G.C.M.G., G.C.V.O., the chairman of the company.

The Secretary (Mr. F. Macindoe) having read the notice convening the meeting and the auditors' report,

The Chairman said: Gentlemen,—The directors' report and balance-sheet have been in your possession for some days, and we will, with your permission, take them as read. As the reasons for the later date for holding our meeting were given by me when I last had the pleasure of meeting you, no further explanations on this point are necessary. I may remark, however, that our anticipations as to the difficulty of getting our accounts out at an earlier date have been fully confirmed this year, and therefore I think we must in future regard October as the permanent date for our annual meeting.

THE ACCOUNTS.

From our balance-sheet you will see that we have expended on capital account during the last financial year a further £263,830 0s. 11d., bringing our total expenditure on this account up to £751,716 2s. 6d. This expenditure mainly consisted of the further outlay incurred in connection with the completion of our pipe line and with the erection of our refinery, but it also includes, as usual, the payments made in respect of debenture interest and guaranteed preference share dividends, and also the sum of £14,508 7s. 1d. for expenses incurred in connection with our last issue of preference shares. With regard to these last-named items, totalling £66,840 3s. 10d., I may mention that, although they are for the time being included in our capital expenditure in order that we may start our revenue account (which we shall do this year) with a clean sheet, it will, of course, be necessary to make provision for them and for previous similar payments before we can deal with the profits which, I hope, will before long be shown in our accounts.

In addition to the expenditure represented by the figures I have already mentioned, we have also, since the starting of the company's operations, made advances amounting in all to a total of £212,188 12s. 10d. to our producing companies, the Bakhtiari Oil Company, (Limited) and the First Exploitation Company, Limited, in respect of which we have been allotted fully paid shares in these companies to the value of £106,080, and these companies were at the date of the accounts still indebeted to us to the extent of £106,108 12s. 10d. Against this indebtedness further fully paid shares will be allotted to us by these companies to the extent of their authorised capital, and any balances will remain outstanding as advances to be repaid out of their future profits.

THE AVAILABLE FUNDS.

At the date when the accounts were made up we had a balance in hand, represented by investments, loans, and cash, of £129,397 15s., apart from £90,670 10s. of uncalled capital. These two items together made a total of £220,068 5s. of available funds. As stated in the report, this sum will not suffice to meet the outlay that will be necessary to bring us to a self-supporting position, but arrangements have been made for the advance of any further sum that may be required in the meantime. The expenditure we are incurring is, I regret to say, a good deal in excess of our prospectus estimates, but this is acounted for partly by unforeseen delay in the completion of our refinery, the reason for which I will explain later, and partly to extensions to our original programme of work. It is satisfactory, however, to know that we are now within sight of the end of our immediate capital expenditure, and have arrived at the stage when our revenue will, we hope, very shortly exceed our working expenses. Before concluding my remarks on the accounts I should, perhaps, refer to the further issue of preference shares which was made in October last. This issue, the dividend on which was guaranteed by the Burmah Oil Company, Limited, for a period corresponding with that of the guarantee on the previous issue, was, I am pleased to say, quite successful. This completes all the remarks which it is, I think, necessary for me to make on the accounts, and I will now proceed to make a few comments on the progress of our work.

THE FIELD: THE PRODUCING COMPANIES.

Beginning with the field, I am pleased to say that the developments of our producing companies at Maidan-i-Naphtun are in every way satisfactory, and well ahead of the requirements of our refinery. Further experience confirms our previous anticipation as to the productivity of our territory, and I do not, therefore, think we need feel the slightest anxiety as to the abundance of our supplies of crude oil. (Cheers.) As regards the Northern Field, to which I referred last year, where Mr. D'Arcy first began his exploratory work nine years ago, you will be interested to learn that, although the field, owing to its present remoteness from any large markets, is not of much commercial value at the moment, we have considered it advisable, in view of approaching railway developments in that part of the country, to resume work on a small scale for the supply of local requirements. No large amount of expenditure is involved in this resumption of work, and it places us in a position to take immediate advantage of the demand which will inevitably be created when the projected railway from Baghdad to Teheran is constructed.

THE PIPELINE AND THE REFINERY.

Our pipeline was practically completed when I last had the pleasure of addressing you. You will be pleased to learn that it has since brought down a large quantity of crude oil to our refinery at Abadan, and that it has been found to work in a thoroughly efficient manner. In respect of our refinery, I regret very much that the anticipations expressed last year have not been realised. Owing to difficulties of one kind and another —but chiefly to delays, both in the delivery and in the shipment of some of the essential parts of our plant, consequent upon the strikes in the early part of this year—we have only been able to put up the final portions of our refinery within the past few weeks. To illustrate the difficulties we have been experiencing in this respect, I may mention that even at the present time we have not received from the manufacturers some tanks purchased about twelve months ago for delivery at the beginning of this year, although fortunately this delay, though it will cause inconvenience in working and possible difficulty in maintaining a full throughput, will not seriously interfere with the working of the refinery. Notwithstanding these difficulties, you will be pleased to learn that a trial run was made in the first portion of the refinery in August last, that other portions have since been gradually brought into operation, and that the complete refinery was, according to our latest advices, expected to be in full running order shortly. As mentioned in the report, arrangements for the marketing of our various products are well in hand. The first deliveries of refined products to our local markets were made a fortnight ago, and our first shipments to foreign markets will be made within the next few weeks.

From what I have said you will, I think, be satisfied that though we have experienced unfortunate delays, some of them due to the difficulties of working in an undeveloped country, but others (and these the more serious ones, I am sorry to say) due to the labour unrest in our own country, yet everything that was practicable has been done to bring our undertaking to a revenue-producing basis at the earliest possible moment. And now that we have practically completed the great amount of preparatory work which was necessary to bring us to this stage, I think we may look forward with confidence to the future. (Cheers.) At the same time, I must remind you, though this is perhaps hardly necessary, that no very substantial results can be looked for in the profit and loss account, which we shall present with our accounts for the current year, because the period for which we shall have been working will have been too short to permit of any large turnover.

POLITICAL CONDITIONS: RELATIONS WITH THE PERSIAN GOVERNMENT.

I am again pleased to say that we have been entirely unaffected by the political troubles which are so much before the public eye in connection with Persia, and that our relations with the Persian Government continue to be of the most friendly nature. As you have probably noticed in the Press, the question of the construction of a railway from Mohammerah to Khoramabad, and (or) Burijird and (or) Hammadan, is now under consideration by the Persian Government. Such a railway would be of great benefit to this company, not only because it would open up the central markets of Persia to our products, but also because it would perforce require to burn oil fuel, and it is therefore, perhaps, needless for me to say that the directors are giving this project their utmost support. (Cheers.) I now beg to propose "That the report of the directors and balance-sheet for the financial year ending March 31, 1912, be received and adopted." (Cheers.)

The Vice-Chairman (Mr. C. W. Wallace) briefly expressed his pleasure at seconding the motion.

The Chairman: I think I have covered all the necessary ground in my remarks, but if any shareholder should desire to ask any questions I am sure that Mr. Greenway will be pleased to answer them to the best of his ability.

Sir Boverton Redwood, in replying to Mr. Stoup, stated that the company's crude oil yielded the usual commercial products of good quality, and therefore of itself, as crude oil, was of a satisfactory character.

The Managing Director (Mr. C. Greenway), in answer to Mr. Hay, stated that the capacity of the refinery, which was at present erected, was six million gallons a month, and the pumping capacity of the pipeline was at present about nine to ten million gallons.

The Chairman then put the motion to the meeting, and it was carried unanimously. Continuing, he proposed the re-election as directors of Mr. John T. Cargill, Mr. W. Knox D'Arcy, and Sir Campbell K. Finlay.

Sir Hugh S. Barnes, K.C.S.I., K.C.V.O., seconded the motion, which was carried unanimously.

Messrs. Brown, Fleming, and Murray, chartered accountants, having been re-elected auditors to the company,

The Chairman said: "That closes the business of the meeting. I trust it will be felt that the directors have been doing everything possible in very difficult and complex circumstances in some cases, and I am sure they will be happy, looking to your interests and their own, which are very considerable, to do the best they can in the future for the benefit of all." (Cheers.)

Mr. Stoup, in proposing a vote of thanks to the Chairman, observed that all the shareholders very much appreciated Lord Strathcona's presence, and they all hoped that he would be with them for many years to report on the progress of the company. (Cheers.)

Mr. J. D. Proctor seconded the motion, which was carried unanimously.

The Chairman briefly acknowledged the vote, and the proceedings then terminated.

Mr. Parkinson, who has been spending the summer in England, has returned to Alexandria to resume his duties as general manager of the Khedivial Mail Steamship and Graving Dock Company.

An extraordinary general meeting of the Grecian Refined Oil Company will be held in Paris on November 11, to confirm the resolutions passed at the meeting held on the 25th ultimo.

Coupon No. 35 of the 5 per cent. bonds of the Compagnie Ottomane des eaux de Smyrne is payable at 10 frs., in Liége and Brussels, at the Crédit Général Liégeois.

At an extraordinary general meeting of shareholders in the New Egyptian Company, held in London on Wednesday, the resolution that had been passed at the extraordinary general meeting of the company held on October 9 removing Mr. P. G. Hamilton Carvill from the office of director of the company was confirmed. In answer to a question, the Chairman (Mr. D. Q. Henriques) stated that, in order to give effect to the recommendations contained in Sir Walter Lawrence's report, it had been decided to liquidate the P.S. Syndicate forthwith.

COOK'S NILE STEAMERS AND DAHABEAHS.

THOS. COOK & SON have unequalled facilities for Travellers visiting Egypt, now the premier Winter Resort of the World. Their fleet of **Fourteen Large Passenger Steamers** consists of the finest vessels on the Nile, specially built, luxuriously appointed throughout, and fitted with every modern convenience.

TOURIST SERVICE.—These large and handsomely-fitted Steel Steamers sail once a week from **Cairo** to **Assuan**, and twice a week from **Assiut** to **Assuan**, the sailings from **Cairo** beginning in November, and from **Assiut** in January.

EXPRESS SERVICE.—The Express Steamers also leave **Cairo** twice a week, the Friday departures commencing in November, and the Monday departures in December.

There is thus a Service of **Five Cook's Steamers per week** ascending the Nile to the **First Cataract** during the Season—three from **Cairo** and two from **Assiut**—calling at all points of interest on the Nile, in connection with which complete arrangements for sightseeing and excursions are made, enabling Travellers to visit, to the best advantage, all the famous

PYRAMIDS, TEMPLES, TOMBS, RUINED CITIES, etc.

SECOND CATARACT SERVICE.—In connection with the above Services there is also a Service twice weekly by First-class Steamer from the **First** to the **Second Cataract**, with through bookings to **Khartoum, the Sudan,** and **Uganda.**

PRIVATE STEAMERS AND DAHABEAHS. — **Thos. Cook & Son** have several small Steamers for charter at moderate rates, specially adapted to the requirements of Families, Private Parties, Sporting Parties, etc., accommodating from eight to sixteen passengers, with competent crews, and thoroughly equipped. Also a large Fleet of First-class Sailing Dahabeahs, the best on the Nile.

Illustrated Nile Pamphlet free from:

THOS. COOK & SON,
Managing Agents for THOS. COOK & SON (EGYPT), LTD.,
CHIEF OFFICE:
LUDGATE CIRCUS, LONDON.
Branches throughout the World.

SUDAN.

BIG GAME SHOOTING.

The Sudan is one of the most accessible countries in which BIG GAME still abounds, and its large territory offers a most varied choice of shooting grounds.

Special steamers and sailing boats are available for private charter. Complete and inclusive arrangements can be made for the supply of native servants, hunters, bearers, skinners, and transport and riding animals, and for camp outfit and catering.

For particulars and tickets apply to ARTHUR S. BULL, Chief European Passenger Agent, Sudan Government Railways and Steamers, 3, Crane Court, London, E.C., England, or to any of the Tourist Agencies in all countries.

P & O Passenger Services

EGYPT, INDIA, CEYLON, STRAITS, CHINA, JAPAN, AUSTRALASIA, and All Eastern Ports.
